This great republic has been guided
the political wisdom of men who have held
d the result is the best testimony of what
ant and what they did. No body of men ever gathered in the world who were more determined to bring into existence good and to guide this land into the paths of righteousness than the Congress of the United States. I believe we are going onward and upward.

It might be well to bear in mind that although we are a great nation rich in industries and natural resources, other parts of the world have been just as rich and glorious as our great America, but they have not gone on because they have not had men at their head who have sought to do the best for the nation. I believe the men elected to public life are going to give the best they have. The American politician has done more than any other body of men ever produced in the world.

At the conclusion of Mr. O'Connell's address a toast was proposed, from the audience, to William B. McKinley, chairman of the Republican State Committee of Illinois, following which he was introduced as the next speaker.

"I have been in close touch with men of Philadelphia," said Congressman McKinley; "in fact, some of you might say I have been 'touching them.' I have been guiding from Philadelphia round dollars towards Illinois, but I have found business men of Philadelphia are good and just as sound as the dollar, and that they last. But you business men should give more time to politics. Go to the polls and vote, and don't believe everything you hear about the men you elect. Consult with these men; they want to hear your views."

George W. Prince, of Illinois, who was introduced as the dean of Congressmen present in point of service, made an address laudatory of Speaker Cannon.

"I have served with many speakers," said he, "but I can say without fear of successful contradiction that I have served under no speaker whose hands have been cleaner or whose heart beats truer to the American people than Joseph G. Cannon, who, without cause or reason, has been attacked simply for carrying out the rules and regulations of the House, which are the product of ripened experience. No member who will study the rules will have difficulty in securing legislation. If he doesn't study the rules he is like an unversed lawyer, who goes into the court without knowledge of its rules or how to draw up a paper, and who cannot hope to get what he wants. So I say that I have faith in the sound judgment of the American people."

Congressmen Duncan E. McKinlay, of California, was the next speaker, and he started his speech with a compliment to Philadelphia. He said: "It is my first appearance in Philadelphia, and as I entered the city I was reminded that it was here that the Liberty Bell was rung, and I was told once the Liberty Bell used to be rung to wake people in Philadelphia. It woke them a century ago, and Philadelphia has been awake ever since."

Mr. McKinlay then launched a plea for the merchant marine, reciting the fact that America is producing more than it can consume, therefore must look to foreign markets in which to sell the surplus. He said it is the business of Congress to protect every business. The administration at Washington is endeavoring to open foreign markets, and so it comes face to face with the problem of the merchant marine, which must be the means of opening and protecting the trade to these foreign markets.

Prof. Ernest Lacey, head of the English Department of the Central High School, in starting a historical and eulogistic address upon jewels and gems, said: "I am not a politician, and therefore cannot make a political address. I am hired by the city to educate the sons of politicians, and as they take after their fathers I can assure you they keep me busy watching them.

"There is an unconscious education in jewels," said the speaker. "Their educational power is marvelous. Walk through a jewelry shop and notice the cleanliness and beauty that nowhere else prevails. It is the constant association with the best that this is true."

Rev. Edwin Heyl Delk, pastor of St. Matthew's Lutheran Church, of this city, was the next and last speaker. He spoke upon the jewels of character.

Following Mr. Delk's address the banquet was brought to a close with the singing by the guests of "Auld Lang Syne."

The officers of the club and the reception committee of the banquet was as follows: Louis P. White, president; Frank L. Wood, vice-president; A. J. LeJambre, secretary, and William H. Long, treasurer.

The board of governors consists of Joseph E. Cadwallader, A. G. Lee, Victor Burgesser, John A. Lehman and Louis J. McGrath.

The reception committee includes Frank L. Wood, chairman; George W. Read, Henry Bodenheimer, I. D. Garman, Charles E. Berry, Jacob T. Alburger, Robert C. Green, William P. Sackett, J. E. Simonson, Harry Oliver, H. D. Stevens, Benjamin F. Griscom, F. C. Bode, Frederick Keim, H. G. Stevenson, L. H. Muller, H. Higham, T. Zurbrugg Harry C. Larter, William G. BUYERS OF RINGS PLEASE BE CAREFUL

There are too many set-rings made in which the stones come out.
Read why the stones stay in WWW Rings.
Read how you may have a more profitable ring business.
Sign the coupon below—now—to-day it's the opportunity for the progressive, hustling, wide-awake Jeweler to move forward.

There's a Reason Why the Stones Stay In WWW Rings

There's no secret, nor "patent" process, nor private "method" in good stone-setting. Its simply a plain, straight case of good work—handwork, by people who know how, who get paid for knowing how.

We believe that stone-setting is the real test of the quality of a ring business. You may almost say that the character of the business might be read in the stone-setting. The real reason why the stones stay in WWW Rings is because we devote thought and energy to this particular branch of the business. We make special effort to procure the most skilled of workmen. If you want to see why WWW Rings are so pre-eminent, why the stones stay in, and why in every other way they give your customers satisfaction, study the stone-setting. The excellence of our rings is not merely what we say about them—it's in the rings.

Mr. Jeweler, For Just a Moment Change Places With the Man or Woman Who Expects Buying a Ring

Just suppose that you want to buy a ring. Let us suppose that there are a number of jewelry stores in your city. Suppose one store among this number is in a position to advertise, that their's is the only store in town allowed to sell the WWW insured Ring—the only permanently insured ring in the world. Isn't it natural that you would go to the particular store selling the insured ring? Isn't it natural, that at the same price, you would prefer to buy an insured ring in preference to one without such an insurance? In other words, place them side by side—a ring with a certificate of insurance next to one without such a written guarantee. Which ring would you buy? Of course, the insured one. Consequently, is it not natural that your customer would do likewise? Is it not reasonable and logical that the insured ring is the only one for the live and progressive Jeweler to buy? Since WWW Rings are the only permanently insured rings in the world, is it not to your interest to make arrangements to sell them, if you are not already doing so?

This is the Light-of-Heaven Factory, with 86 Windows and 3 Sky-Lights.

These remarkable facilities mean much to the Jeweler who wants to sell rings in **which the stones do stay in.** It signifies simply this: It is not too much to say that every man can write. But how many fine penmen are there among them? From your own acquaintance, how many do you know? **And so with stone-setters**—there are, no doubt, a few thousand men who claim they are stone-setters. But, would you believe it, there is only about one in every thousand who is really a good stone-setter? Good stone-setters are difficult to get. Stone-setters who can hold a seat in the WWW Light-Of-Heaven Factory are far and few between.

Poor Writing is Seldom the Cause of a Poor Pen, but a Poor Ring Almost Always is Caused by a Poor Stone-Setter

But good stone-setting makes a good ring. Good stone-setting is the real test of good ring making. If you were an exceptionally fine setter, would you work in a dark, gloomy factory with poor surroundings, or would you apply for a position in a light, clean, modern ring factory with every inducement to a good workman? Ours is the Light-Of Heaven Factory, termed such by our men, for it has 86 windows and 3 skylights—an inducement to the best stone setters.

Isn't this another intelligent reason why WWW Rings are set better and made better than most rings?

WE Do More Than [illegible] Rings in Which the [illegible] Do Stay In. We H[illegible] Sell Them

We have no patience with th[illegible] of doing things. We believe th[illegible] much our business to help yo[illegible] rings as it is to sell them to [illegible] believe in doing something diff[illegible] are doing something so differen[illegible] are quite sure that some Jewele[illegible] accustomed to the old, hard tr[illegible] beaten paths will laugh and s[illegible] But to those who are inclined [illegible] let them recollect that the peop[illegible] at Columbus. The hoots and s[illegible] gibes and jeers did him good. [illegible] for but a moment, but just as t[illegible] spurs stunned the thoroughbre[illegible] real stride, so these jeers and laughs [illegible] work all the harder. Remember the p[illegible] wide-awake Jeweler can afford to be [illegible] by his old-fogy competitors. Remember [illegible] are hard to get, otherwise they would[illegible] value. Ground-fruit is easier to pick tha[illegible] the tree, but if it were sound it would [illegible] low.

Sign the coupon below, and with[illegible] on your part, you get the advan[illegible] procuring something that will me[illegible] to you.

Forget the Methods of [illegible]day! Add New Strings t[illegible] Bow!

This is your opportune time to get a[illegible] the old methods of doing things. Thi[illegible] opportune time to begin relations wit[illegible] house who not only makes rings wort[illegible] attention of every progressive Jeweler, [illegible] also does other things so remarkable an[illegible] ling that it is a revelation to the busin[illegible] Our methods will revolutionize the ring[illegible] Our methods will help you double your [illegible] ness. The mechanical window display [illegible] swinging ball will attract every man, w[illegible] child to your window. This free a[illegible] combined with our permanent insura[illegible] every ring cannot help but give you pre[illegible] no other combination could possibly [illegible]

Remember it costs you nothing [illegible] this information and every Jewel[illegible] it to himself to sign and mail the [illegible] to-day.

Press Table.—JEWELERS' CIRCULAR-WEEKLY, *Record, Ledger, Press, Inquirer, North American.*

Echoes of the Banquet.

Where was "Billy" Earle?

Sam Levy enjoyed the singing.

And Lou's hrother sat at Table C.

Rodgers, of Scranton?—Of course, as usual.

The Wittnauer party at Table H numhered 10 in all.

W. H. Long's illness was the suhject of much regret.

J. E. Simonson did his part hut he had no "cinch."

The Simons family was represented hy the third generation.

Hans is quicter in Philadelphia than in New York. Why?

S. Kurtz Zook, as usual, ahly represented the Lancaster contingent.

David Kaiser, having passed through his, had a fellow feeling for Brother White.

President Archihald, of the A. N. R. J. A., and Steele Roherts had much to say to each other.

E. R. Crippen enthused to the point of waving a flag during the singing of all the patriotic songs.

And Bill Penfold sat next to a man who wasn't there, hut he won't know it until he reads this.

Hiram A. Bliss and W. N. Le Cato were prominent members of the Gorham party at Table E.

Mayor Reyburn received a warm welcome and his reference to the trolley strike caused much amusement.

Maryland's contingent was large and prominent if the call for and the singing of the song of that name is any criterion.

Geo. Stehhins and Warren Alford did an amusing specialty. It is called "The Long and the Short of It Waltz."

Col. J. Warner Hutchins was on a Europeau trip so could not he there. To say that his ahsence was felt is to put it mildly.

The Pennsylvania Retail Jewelers' Association was ahly represented by its president, Ira T. Garman, as well as hy many of its members.

All the officers of the Jewelers' 24-Karat Club of New York, except the treasurer, were present and much in evidence, as were a majority of the club's members.

Prof. Lacey's discourse on the mystical and religious significance of jewels proved a gem of thought in a poetic, literary setting of the finest workmanship.

If Dr. Deilk did not have some of the jewelers at his church the next day it was not hecause of the impression that he made hut hecause the services were held too early.

Mr. Hallenheck, president of the Simeon, H., & Geo. L. Rogers Co., came all the way from Wallingford to he at this hanquet, which is the only trade function of the kind he ever attends.

Wm. P. Sackett, as usual, was at home among his old friends in the club, and was kept husy shaking hands and introducing President Dowse of the Reed & Bårton corporation, who was with him.

Didn't F. Gianinni realize that the orchestra played that tune for his henefit? Sure—Lou told him so and he responded hy singing it with a will. Incidentally it may he remarked that Signor Gianinni's tenor voice is of an unusually fine quality and he knows how to use it.

The two Congressmen McKinley were the suhject of several jokes, hut Mr. McKinlay, of California, started it hy introducing himself as "the other of the McKinley Gold Dust Twins." The Pacific Coast memher of the family proved himself to he a 24-karat orator and incidentally a fine press agent for San Francisco.

Lou White was not only president and toastmaster, hut manager, major domo, general peace maker, hanquet committee and poohah rolled into one, and he did it all with a smile and with ease apparently ahle to get to all parts of the room and talk with half a dozen guests at one and the same time. However, if congratulations pay for yeoman's work, Lou got his wages before the night was over.

Bankruptcy Adjudication of the Herman Keck Mfg. Co. Stands Unless Costs of Appeal Are Put Up Before March 1.

CINCINNATI, Feb. 16.—Yesterday (Feb. 15) the United States District Court here received a decision from Judge Sater, at Columbus, O., overruling the application of the Herman Keck Mfg. Co. for an allowance of $1,600 from the funds now in the hands of Receiver Carroll to pay cost of filing a transcript in the appeal of the case to the United States Circuit Court of Appeals.

Judge Sater holds that only a voluntary bankrupt can plead poverty, and that anyone resisting bankruptcy proceedings must pay his own costs in the proceedings; also that there would be no justification for appropriating, in such a way, the money that is being held to pay claims of creditors. He refers to the former declaration of the court that it had been shown that diamonds to the amount of $24,000 had been concealed or were not in the Keck Co.'s stock, and that they are still unaccounted for. In case the Keck Co. does not furnish a transcript by March 1 the judgment of bankruptcy in the United States District Court goes into effect.

In reply to Judge Sater's announcement regarding his overruling the application of the Keck Co., Attorney Fred Hoffman, counsed for the Keck and Duhme concerns, says that Judge Sater's' decision does not necessarily end the matter. He also says: "We have until March 1 to file our appeal and by that time we will have been able to secure the needed funds, which have already been assured us from outside sources."

Ferd. Levy, Philadelphia, Pa., Goes Into Voluntary Bankruptcy.

PHILADELPHIA, Feb. 21.—Ferd. Levy, individually and trading as Ferd. Levy & Co., jobbers, of 900 Chestnut St., this city, has been adjudged a voluntary bankrupt.

Mr. Levy was originally in the employ of M. Sickles & Sons, and in 1902 began business under the above style.

Of the assets of $1,122.65, $512 is accounts receivable and $500 merchandise. The liabilities placed at $2,981, include a promissory note for $1,100 and merchandise accounts for $1,881.

The matter has been referred to a referee and the first meeting will be held March 7.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended Feb. 19, 1910.

The U. S. Assay Office reports:

Gold hars exchanged for gold coin	$455,521.36
Gold hars paid depositors	86,266.62
Total	$541,787.98

Of this the gold hars exchanged for gold coin are reported as follows:

Feb. 14	$125,563.06
" 15	107,513.64
" 16	51,142.57
" 17	103,808.03
" 18	57,265.36
" 19	10,228.70
Total	$455,521.36

Providence, R. I., February 23, 1910.

Notice to the Trade

We present on the opposite page copy of a decree signed by Judge Lacombe, of the United States Circuit Court of the Southern District of New York, restraining F. & M. Weintraub from further infringement of our well-known trade mark, the lion, the anchor and the letter G. We desire to give this decree the widest publicity, as we have found that since our last notice to the trade which had reference to the restraining order of Judge Ward previously granted, that the circulation of the infringing articles had attained a much greater volume than was at first believed to be the case and we desire to reiterate to the trade that under no circumstances must the articles bearing the infringing mark be sold.

We have to thank the trade for their co-operation in advising us of the instances where goods bearing the infringing mark have innocently come into their possession and shall be glad to hear from any cases not yet reported, as we believe that this is a matter in which all jewelers having the interests of the trade at heart will endeavor to assist us to the best of their ability.

We feel that any action taken against the sale of goods bearing a spurious trade mark is not only in the interest of ourselves, but in the interest of all manufacturers and retailers manufacturing and selling silverware of recognized and enduring quality.

GORHAM MANUFACTURING COMPANY.

P. S.—Please note that infringements of our trade mark consist not only in the use of a combination of a lion, anchor and letter G, but also in the use of the letter G in Old English style in combination with two other symbols and in the use of a variety of combinations of three symbols in which one or two of the symbols represent a lion, an anchor or a letter G.

Circuit Court of the United States
For the Southern District of New York

Gorham Manufacturing Company, a corporation duly organized, existing and doing business under the laws of the State of Rhode Island, Complainant,

against

Frederick Weintraub and Morris Weintraub, co-partners doing business under the firm name and style of F. & M. Weintraub, Defendants.

IN EQUITY.

The complainant having moved for an injunction herein pending the final determination of this cause and said motion having been argued before this Court on the 7th day of January, 1910, by and for counsel for the complainant and defendants herein: and on reading the bill of complaint and affidavits in support of said motion in behalf of said complainant and the affidavits in opposition to said motion in behalf of said defendants:

Now, upon the application of the complainant, and on reading and filing the bill of complaint and the affidavits on behalf of complainant herein,

ORDERED that the defendants, Frederick Weintraub and Morris Weintraub, their servants, agents, attorneys and workmen, be, and they hereby are, and each of them is, restrained, enjoined and prohibited from making, offering or selling any silverware or analogous articles bearing the trade mark complained of in said bill of complaint or any combination of a lion, anchor and letter G or any imitation or simulation of said trade mark or from marking any silverware or analogous articles with any imitation or simulation of the trade mark of complainant complained of or from selling, offering for sale or otherwise disposing of any silverware or analogous articles to which shall be applied in any form or manner whatsoever the trade mark employed by the complainant, the Gorham Manufacturing Company, or any simulation or imitation thereof calculated to deceive or in any other way infringing upon said trade mark employed by the complainant, the Gorham Manufacturing Company.

ORDERED that this injunction Pendente Lite shall remain in force and effect until the final determination of this cause, upon filing with the Clerk of this Court a renewal approved by a Justice of this Court of the security bond hitherto given by complainant

Signed at New York, N. Y., this 4th day of February, 1910. on the restraining order hitherto granted, which security bond shall be renewed to extend until the decision on final hearing.

E. HENRY LACOMBE,
U. S. Circuit Judge.

Philadelphia.

A [illegible] of Dubois, Pa., is having an auction sale.

W. W. [illegible]er, Sunbury, Pa., is having an interesting [illegible]ourage sale.

Lewis Rosen, gold plater, 125 S. 7th St., is seriously ill at his home.

L. P. Ledos, of the Ledos Mfg. Co., Newark, N. J., was a recent visitor.

Ross Quicksall, Mt. Holly, N. J., is making extensive alterations to his store.

The wife of J. C. Finsley, a retail jeweler of this city, is reported as seriously ill.

C. P. Meyer, 909 Passayunk Ave., has bought a Summer home at Palmyra, N. J.

M. E. Hunter, Beverly, N. J., is receiving congratulations upon the arrival of a daughter.

L. A. Shalet has opened an attractive new jewelry store on 60th St., south of Market St.

Sylvester Engle, Hazleton, Pa., is improving his store, having recently added a new front.

Charles A. Parker, salesman for Bates & Bacon, Attleboro, Mass., called on the trade during the week.

John W. Sherwood, of the Solidarity Watch Case Co., New York, was a recent visitor to this city.

The store, stock and fixtures of the late C. Kohler, Norristown, Pa., are being offered at private sale.

Sargent Engle, son of Walter M. Engle, retail jeweler, 4233 Lancaster Ave., is taking a course in engraving.

Frank Schenuit, 2631 Germantown Ave., will sail for Europe some time in March, to be gone for three months.

A four-story and basement fireproof building has been added to the plant of Robt. H. Ingersoll & Bro., Trenton, N. J.

A. M. Yeakel, Perkasie, Pa., was in town, this week, making arrangements to place his two new patents on the market.

John T. Van Sant, representing the B. S. Freeman Co., Attleboro Falls, Mass., was here during the week, booking orders.

Mark Simon has taken title from Jacob H. Cohen to the store property, 128 S. 8th St., which he expects to convert into a jewelry store.

Richard Pearsse, assistant manager of the silver section of the Bailey, Banks & Biddle Co., is convalescent after a recent attack of grippe.

Suit has been begun in the local courts in the December term by the American Swiss Watch Co. against the Futernik Co. on account of contract.

Louis V. Wolf, a well-known lock manufacturer at 116 S. 8th St., died, Feb. 8, at his home. The deceased was a familiar figure in the jewelry trade.

M. Lampert, salesman for Henry Zimmern & Co., New York, who has returned from a successful western trip, stopped off in this city on his way home.

J. M. Hoffer, Kane, Pa., is closing out his business on account of ill-health. Mr. Hoffer expects to go west, where he will engage in the lumber business.

The sympathy of his friends in the trade has been extended to Frederick C. Lingg, one of the oldest jewelers of this city, owing to the recent death of his wife.

George S. Katz, 1913 Germantown Ave., accompanied by Mrs. Katz, sailed, Friday, on the *Persian* for Savannah, Jacksonville and other southern points to remain through the Lenten season.

It is expected in the trade that Frank Schuler, formerly manager of the jewelry store of the late Mr. Lewis, 4600 Frankford Ave., will purchase the entire stock and fixtures from Mrs. Lewis and will shortly open up on his own account.

Henry Hollinshed, Jr., a member of the Camden County bar, and previously a well-known jeweler of this city, died, Feb. 17, at his home in Delair, of uraemic poisoning, at the age of 54. Mr. Hollinshed is survived by a widow and seven children.

T. S. Schirm, a young watchmaker of this city, died suddenly at his bench while at work last week. Mr. Schirm, although a foreigner and a comparative stranger in this city, was well known in the trade, and had formerly been identified with J. E. Caldwell & Co. and C. R. Smith & Sons as a watchmaker.

The retail jewelry store of Jacob Rubenstone, 1607 Susquehanna Ave., was slightly damaged by fire and smoke, early last week, as the result of a fire in a candy factory adjoining. During the progress of the fire many families were forced to seek the street as an avenue of escape, and by doing so were exposed to the elements.

F. L. Davis, 5143 Market St., and president of the 52d and Market Sts. Business Men's Association, will introduce, next Monday evening, the street cleaning resolution. Mr. Davis will discourse on the condition of the streets in this section, and he will explain how the merchants are losing thousands of dollars as a result of the disgraceful condition of the highways.

I. Mayer, 57 N. 8th St., a brother of Max Mayer, whose jewelry store at 609 Market St. was robbed Feb. 1, has advertised in his brother's behalf in all the local papers a reward of $1,000 for the return of all the stolen property. He further extends the reward to $100 for every $1,000 worth returned. The stolen pieces consist of watches, rings, diamonds, chains, bracelets, etc.

The following jewelers were visitors to this city during the week: Roland Oliver, Burlington, N. J.; William Beck, Vineland, N. J.; E. P. Ledos, Newark, N. J.; George K. Ware, Atlantic City, N. J.; M. E. Hunter, Beverly, N. J.; D. H. Krause, North Wales, Pa.; J. E. James, Swedesboro, Pa.; Henry Bolte, Atlantic City, N. J.; E. K. Bean, Lansdale, Pa., and H. B. MacFarlan, East Downington, Pa.

J. E. Caldwell & Co. recently added to their force Mr. Henderson, an engraver of marked ability. One of his greatest feats in this line has been the engraving on the head of a common dressmaker's pin (which is even smaller in size than the average house pin) the 26 capital letters of the alphabet, and on the stem in five distinct lines is the Lord's Prayer. The pin is not only a curiosity but a remarkable example of the engraver's art.

John D. Passer, 648 N. 11th St., was arrested, last Monday, by Detectives Emmanuel and Scanlon, charged by Lewis M. Nelson, a retail jeweler of Camden, N. J., with stealing an agent's outfit, which contained watches, rings and other articles of jewelry. Mr. Nelson claims that P[illegible] was an applicant for a position s[illegible] weeks ago, and he finally engaged him [illegible] salesman and gave him the outfit to [illegible] with. After the man had been awa[illegible] some time without hearing from him [illegible] son became alarmed and notified the [illegible] tives. The result was his arrest on Mo[illegible] Passer has been held to await requi[illegible] papers from New Jersey.

Harrisburg, Pa.

E. G. Hoover gave a dinner t[illegible] t[illegible] ployes of his jewelry store, Thursday [illegible] ing, Feb. 17, at his home, 100 Eve[illegible] St.

Mr. and Mrs. C. Ross Boas g[illegible] George Washington party at their [illegible] in honor of the 11th birthday anniv[illegible] of their daughter.

Charles Haines, of this city, has [illegible] chased the store of J. W. Bowers [illegible] Beaver Springs, Snyder County. [illegible] Haines formerly resided at Beaver S[illegible]

Among the successful candidates fo[illegible] fice at the recent election in this d[illegible] was Jeweler George F. Bloser, who wa[illegible] elected to Town Council in Greenc[illegible] by a large majority.

Robert J. Latta was recently bro[illegible] back from Baltimore charged with h[illegible] $168.22 worth of jewelry, etc., from G[illegible] & Fitzgerald on lease, selling the g[illegible] and departing without making sett'en[illegible]

Henry C. Claster was one of the ju[illegible] in a debate held under the auspices of [illegible] Young Men's Social Club at its headq[illegible] ters, 320 Market St., last week. The [illegible] will give a dance at the Metropolitan [illegible] Feb. 24.

Samuel Bowman, one of the pio[illegible] merchants of this section, who establi[illegible] the present big firm of Bowman & Co., [illegible] city, died at his home in Carlisle, [illegible] week, aged 68 years. One brother and [illegible] sisters survive.

The directors of the Hoover Mer[illegible] tile Co. have declared a regular quart[illegible] dividend of 1½ per cent. on the prefe[illegible] stock and 1 per cent. on the common st[illegible] payable March 1 to stockholders of re[illegible] Feb. 17. It is the 77th dividend.

An auction sale is being held at Ein[illegible] brink's jewelry store, 133 W. Market [illegible] York. Mr. Eimerbrink advertises that [illegible] goods not sold before April 1, 191[illegible] be disposed of to jewelry brokers, as [illegible] is positively going out of business.

Among the visitors to Harrisburg, [illegible] week, was Kendig H. Bare, an instruc[illegible] in the Ezra F. Bowman Techn[illegible] School, Lancaster. Mr. Bare was f[illegible] merly a watchmaker in the employ of [illegible] G. Hoover, and was pleasantly entertai[illegible] by his Harrisburg friends during his s[illegible] stay.

J. W. Stevenson, who died at his [illegible] in Brooklyn, Feb. 13, after six mon[illegible] illness, was a native of this city, where [illegible] some years he conducted a jewelry st[illegible] succeeding George McCalla. For a sh[illegible] period he was in business in Middleto[illegible] and later at Sunbury and Johnstow[illegible] where during the flood of 1889 his ho[illegible] and place of business were swept away. [illegible] recent years he resided in Brooklyn, wh[illegible] he continued in the jewelry business.

The A. N. R. J. A. Trade-Mark.

FOR two years or more the officials of the American National Retail Jewelers' Association have been taking action looking to the general use of a trade-mark which would be officially controlled by the organization and used by manufacturers on goods sold to the members. When the proposition was first brought forth it was believed by many that a revenue for the organization could be obtained in this way, but the attempts to put the proposed trade-mark into effect have not been successful either from the standpoint of the manufacturer or the association. In due course the question will probably again come up and occupy some time at the next annual convention of the organization, which will be held in Detroit, July 26 to 29, inclusive.

We would respectfully suggest to the officers, members and delegates at the convention who may take up the subject that the basis on which this trade-mark be put forward and offered to manufacturers be carefully considered or reconsidered, and that the contracts or licenses to use the mark be based, not on monetary consideration at all, but upon an agreement which will tend to benefit the association and its membership at large.

The trade-mark of the A. N. R. J. A. can be made a most valuable feature of the organization and a valuable asset to the manufacturer who may use it, but its value must be given by the organization itself. In other words, if the organization limits the use of this trade-mark to manufacturers who agree to the principles underlying the organization movement, the individual jeweler will have an interest in pushing goods bearing this mark, because he can assure his customers that the articles on which it appears are absolutely up to their stamp of quality; that they are not handled by department stores or catalogue houses; that the prices are not cut, and that they are made and sold under "live-and-let-live" principles—all these being a part of the contract to which the manufacturer using the mark would bind himself.

Under such conditions there is an inducement to the public to buy goods so marked; there is an inducement to the jeweler to handle goods so marked; there is an inducement to the jobber to distribute goods so marked, and there is an inducement to the manufacturer to make goods so marked. What is more, when the public, through the members of the organization, are told that such a mark is a guarantee, particularly of quality and value, there is an added inducement to all jewelers to join the national and State associations, if only for the purpose of being able to handle goods with this trade-mark.

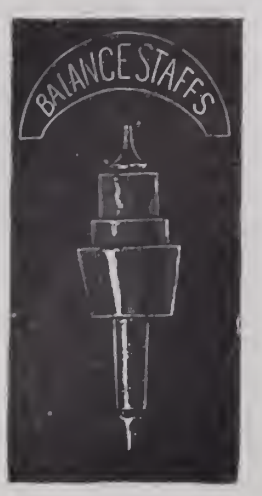
On the other hand, if the license to use the mark is granted to manufacturers on a pecuniary basis alone, where does the advantage come to the members of the association to handle these goods? The trade-marked articles then cost the manufacturer more than those without the trade-mark; consequently he must charge more for them or depreciate the quality of his product. In other words, the members of the association must pay to him what he pays back to the association, and perhaps more, so that in the aggregate they could gain by the use of the mark.

The subject is one that requires careful consideration, and we hope that before anything further is done in the matter the officers and executive committee will give it the thought and discussion that it warrants.

System is as essential in advertising as it is in any department of one's business.

The Right to Recover Stolen Articles.

THERE will probably never come a time when the merchants and dealers in the jewelry trade are not interested, in one way or another, in the questions arising from the right of a dealer to recover from pawnbrokers articles pledged by an agent or bailee, as it would seem that the law cannot be so thoroughly settled on points of this kind that the jeweler can know in advance what his rights are before his particular case has been adjudicated by the highest court. Two actions which have come up in the courts of New York in the past week, of which mention is made in another part of this issue, simply serve to show that no matter how much the legal principles underlying these transactions are settled, the application of these principles to a particular case is generally a question of fact and may always be the subject of controversy.



However, a fundamental knowledge of the legal principles underlying bailment and agency will do neither the jewelry dealer nor manufacturer any harm, and may serve to minimize the number of these cases that will come to the courts, though they cannot eliminate them entirely. For a working knowledge of such principles of law the merchant must, of course, go to the text books, but he can do much toward protecting his interest if he keeps in mind two points. First, in memorandum transactions (bailment) the title of the article delivered does not pass from the original owner to the party to whom it is delivered; therefore the latter cannot give title *i. e.*, dispose of it in any way. Any modification of the agreement which will permit the party receiving articles to dispose of them violates the principle of the memorandum agreement and may vitiate the contract which has been entered into. Second, when an agent is appointed the principal is bound by the actions of the agent within the legitimate scope of his agency, and when the agency is of a limited character everything should be done to put those with whom the agent deals on notice as to these limitations.

It will be readily understood that pawnbrokers or other pledgees can obtain no title to articles pledged by one who simply holds them on memorandum, provided the true theory of the memorandum transaction is carried out by the owner and party with

iles in bankruptcy of the Rosner ry Co. were filed by Sol. Urbach week. Urbach gained considerable pub- 1906 when he was committed to fo failing to turn over $10,000 worth a nds, which he claimed he lost.

A judgment was rendered in the Supreme Court last week for $1,374.67 against Loie Fuller in favor of O. M. Farrand, a Maiden Lane jeweler. Miss Fuller did not appear to contest Mr. Farrand's suit, which was for payment on a promissory note for $1,000 and interest in consideration of money loaned five years ago.

The Antwerp Jewelry Mfg Co. has been incorporated under the laws of the State of New York to manufacture and deal in diamonds, jewelry, watches, ornaments and fancy articles, with a capital of $10,000. The incorporators are: Isador Mayer, New York; Irene Stoll, Brooklyn; John J. McCarty, Richmond Hill, L. I.; Margaret Gilmore, New York.

Simon Blaumauer, for many years associated with the S. F. Myers Co., 47 Maiden Lane, severed his connection with that firm last week to become a partner with the Knickerbocker Mfg. Co., of this city, which will make all kinds of cutlery. Minthorne Udell, with the same concern, fell recently near his home, Westfield, N. J., and fractured the bones in his right arm.

On Thursday, March 10, Dr. George F. Kunz, head of the precious stone department of Tiffany & Co., will speak on "Precious Stones, How Found and Cut, Their Sentiments and History." The lecture will be one of three evening entertainments to be given for the benefit of the East Side Home Settlement, 67th St. and the East River, at Mrs. Daniel Lamont's, 2 W. 53d St. The lecture will be illustrated with stereopticon views.

The will of the late Seth E. Thomas, of the Seth Thomas Clock Co., was filed for probate in the office of the Surrogate last week. Mr. Thomas died on Feb. 6 at his residence, 115 W. 21st St. There were three witnesses to the will, Thomas Rodeman, who died in 1892; Charles A. Adams, who died in 1889, and Nathaniel B Cooke, who died in 1893. Their signatures and also that of Mr. Thomas were attested by the secretary of the Seth Thomas Clock Co. and other witnesses. The real estate left by Mr. Thomas is placed in the petition at $1,000 and the personal property at $75,000 He left all his property to his widow, Sarah G. Thomas.

Operating within 100 feet of the rear of the Madison St. Police Station, burglars entered the jewelry store of Morris Cooper at 213 Clinton St., blew open a safe with dynamite, took therefrom $40 in currency and a small quantity of gold jewelry, then leisurely departed without police molestation, early Thursday. The burglary was discovered by Mr. Cooper when he opened his store and found fragments of his safe scattered about the place, together with bits of paper which the explosion had sent broadcast. He notified Captain William Clark, of the Allen St bureau, and detectives were detailed upon the case. The police on night duty at the Madison St. station declared last night that they heard no explosion and were in total ignorance of it until they received news of the affair from headquarters.

An action brought by Tiffany & Co. against Mrs. Daniel J. Sully, wife of the cotton operator, before Justice Hendrick, in Part 12 of the Supreme Court Trial Term, in New York County, resulted last Wednesday in a verdict for the defendant. Tiffany & Co. alleged that purchases to the amount of $6,000 were charged to Mrs. Sully's account. The defense was that Mr. Sully had notified the plaintiffs that one account in the family with the company was sufficient and the account which should have been charged to Sully was discharged when he went through bankruptcy proceedings. The attorney arguing the case for Tiffany & Co. claimed that the goods were charged to Mrs. Sully's individual account. The decision upheld the plea of Mrs. Sully that the goods should have been charged to the account of her husband. Included in the articles charged to the account are two dozen bouillon cups at $72, a bronze bust at $40 and leather goods amounting to $1,000.

From Trenton, N. J., comes the news that according to an opinion handed down last week in that city in the smuggling case against Mrs. M. H. Chesbrough, wife of the owner of coastwise steamers, the woman must stand trial. The demurrer argued a few weeks ago was dismissed. The contention of the counsel for Mrs. Chesbrough was that the statute under which the indictment was brought did not describe her alleged crime because it made it a penal offense punishable by a fine of $3,000 or not less than $50, or two years' imprisonment "for the importation contrary to law of merchandise." Included in the goods which it is alleged Mrs. Chesbrough imported was a necklace made of 302 pearls, which collection Loeb ordered seized a short time ago. The necklace was estimated to be worth $25,000. When her trunks were searched an imitation necklace, it was claimed, was found together with a bill of sale of a real pearl necklace. The real necklace had been brought over to Canada and was to have been kept there until the new tariff law became effective.

The Board of United States General Appraisers decided last week that importations of artificial eyes made by C. L. Schulze must pay a duty of 60 per cent. under the tariff as "decorated glassware," whereas the importers allege that the articles are American goods returned and hence free. According to Schulze, the artificial eyes were taken to Canada and subsequently brought back to the United States as baggage. General Appraiser Sharretts in his decision for the board dismisses the protest on the ground that there was no compliance with the requirements of the customs laws. The General Appraisers say in part: "With the facts before us the board feels constrained to hold that however meritorious the claim of the importer may be it is powerless to afford any relief. If the receipt for the payment of the duty can be regarded as the final liquidation then the protest was filed more than 10 days thereafter. On the other hand, accepting the official statement of the Collector that the protest was received Aug. 30 and the liquidation of the entry took place Aug. 31, the requirements of the statute were not complied with, protest having been filed before, and not within ten days after liquidation. The present is

Dr. E. E. Hale, head of the estate of O. M. Draper, North Attleboro, Mass., with Robert Fletcher, his head designer, was in town several days last week.

The annual election of officers of the 14-Karat Club will take place, Thursday evening, at the Hotel Albany, at 8.10 P. M. A collation will be furnished.

The annual meeting of the Jewelers Protective Union will be held March 8 at the rooms of the organization in the Silversmith's building, 15 Maiden Lane.

L. H. Levi, of the firm of L. H. & B. Levi Bros., wholesale jewelers, Winnipeg, Can., was a visitor at the offices of THE JEWELERS' CIRCULAR-WEEKLY, last week.

The New York jewelry trade was well represented Saturday night at the annual banquet of the Philadelphia Jewelers' Club, which was held at the Bellevue-Stratford.

Thomas Newman, a pioneer pawnbroker, of Brooklyn, died last Wednesday at Lakewood, N. J. He was 77 years old and a native of Germany. He started in business in Brooklyn in 1861.

The Jewelers Security Alliance has received a telegram from Dallas F. Greene, Fort Wayne, Ind., announcing that a window in his store has been smashed and 18 Masonic rings stolen.

Edwin P. Loebl will in the future represent Samuel Kresney, manufacturer of diamond mountings, 19 Maiden Lane. Mr. Loebl will also continue to look after his own business, and will make his headquarters with Mr. Kresney after March 1.

The Clark Gallery, New York, has been incorporated for buying, selling, restoring paintings, etchings, engravings, dealing in and exhibiting works of art, with a capital of $30,000. The incorporators are: F. B. Clark, Helen Clark and C. B. Lundborg, all of New York City.

A protest as to the duty on imitation precious stones filed by J. Mamluck & Co., of this city, and protests of M. de Delectis & Co., Chicago, and A. B. Closson, Jr., Co., Cincinnati, O., as to the duty on precious stones cut, have been sustained by General Appraiser Sharretts.

The Art Metal Works, whose New York salesrooms were located at 508 Broadway for a number of years past, have removed to quarters in the Everett building, corner of 17th St. and Fourth Ave. Their new rooms are well equipped. F. W. Osgood is the New York sales manager.

I. S. Goldenstein, Montreal, Can., returned to this city, Friday, from Europe. He was in Paris during the floods and had an exciting experience. Mr. Goldenstein will gradually give up the plated ware part of his business and increase his precious stone and gold jewelry business.

The trial of Herman Marschner, who is accused of stealing a diamond ring from Louis N. Max, 37 Maiden Lane, has not been reached because of another long trial on the calendar of the same court. It is said that the ring is only one of a number of articles obtained from various dealers on memorandum.

In reference to the American representatives for the Turin International Exhibition, the international exposition bureau of New York writes to the Bureau of Manufactures that its address is 41 Union Sq. American manufacturers can secure useful literature concerning the Turin exhibition from the New York bureau.

August Kritzler, 581 Hudson St., who has been manufacturing ebony, rosewood and snakewood walking canes for the jewelry trade for the past 10 years, has sold out his factory, machinery, stock and goods will to Arthur W. Ware & Co., 41 E. 20th St., who will conduct the factory in conjunction with their own and continue to supply the trade with the same line which Mr. Kritzler formerly made.

Having in their possession a diamond valued at $1,000 and a gold watch and chain which the police appraised at $250, Adolph Schultz and his wife, Mamie, who gave as their address 164 S. 8th St., Brooklyn, were arrested last Wednesday night and arraigned the next day before Magistrate Barlow in the Essex Market Court on the charge of being suspicious persons, pending investigation. Detective Bayar, of the central office, who made the arrests, said he was in Simpson's pawnshop, 164 Bowery, when the couple, rather poorly dressed, entered. They began negotiations with the clerk, the detective said, to obtain $800 on a diamond which seemed too valuable for persons of their appearance to own. When Bayar spoke to the woman she told him she had inherited the diamond from her first husband, who died a month ago, and whose name she gave as Charles Leonard. The detective was not satisfied and placed the woman and Schultz under arrest. When searched in Police Headquarters the watch and chain were found on Schultz. The watch is studded with small diamonds. Twenty pawn tickets, for sums ranging from $1 to $7, also were found on the couple.

Death of L. M. Bassett.

DETROIT, Mich., Feb. 16.—The many friends in this city of L. M. Bassett, of L. M. Bassett & Son, Coldwater, learned with profound regret and much sorrow of his demise this week. Mr. Bassett was an enterprising business man and enjoyed both the esteem and affection of a large circle of friends throughout the State of Michigan and elsewhere. Mr. Bassett established the business which bears his name over 40 years ago.

The son of the deceased was admitted into the concern 20 years ago. The establishment reflected the personality of the late founder in many respects, the business policy being one of rigid honesty.

A girl, known as Lottie Fischer, alias Blaczac, and residing in Buffalo, N. Y., was arrested in Batavia, a short time ago, for stealing three rings from C. C. Bradley & Co., and sentenced to the Women's Home of Refuge at Albion.

Lurchin & Lurchin, St. Johnsbury, Vt., have decided not to renew their lease of the present quarters in the Citizens' Saving Bank block, and on March 1 will move to other premises which will be entirely remodeled for their use.

Do you believe in conducting your own business or in having the people from whom you buy goods do it for you?

We have conducted our own business in our own way and *successfully* for 50 years.

We absolutely refuse to be told how or from whom to purchase our watch cases, as we feel fully able in this respect to determine what is best for ourselves and our customers.

Our determination in this matter is dictated by our self respect, and the conservative independence we have at all times shown in our endeavor to faithfully and economically serve the retailers who patronize us.

Where competition is stifled and prices are arbitrarily regulated, the dealer is at the mercy of those who submit to such dictation. That we refuse to enter into any trade-throttling agreement we believe will be understood and appreciated by all those who know us.

sed selection packages on approval to responsible jewelers

Boston.

Ira E. Nye, formerly with William A. Thompson, is with the George E. Smith Co., of the Paddock building.

Frank L. Kelsey, of the New York office of the Chelsea Clock Co., was in Boston last week on a business trip.

Buyers here during the week included: A. G. Page, Jr., Bath, Me.; Mr. Safford, of J. H. Safford & Son, Rochester, N. H.

Leon C. Collins, watchmaker of this city, has filed a voluntary petition in bankruptcy, giving liabilities as $727 and assets as $150.

Harry Mills, formerly with J. H. Derby & Co., of Somerville, has taken a position with the Aldrich-Murphy Co., of Winsted, Conn.

Herbert Silver, formerly with E. A. Cowan, is now with Cashner & Magid, 77 Bedford St., covering New England territory as outside salesman.

Fred E. Chick, of the Smith, Patterson Co., left Boston for New York last Thursday and sailed from the latter city Saturday on a European trip, accompanied by his wife.

The directors of the John B. Humphry Co., which was recently incorporated with a capital of $40,000, are: G. Edward Smith, John B. Humphry, Edward W. Stone, all of Brookline.

The Waltham Watch factory, which twice previously within the past three months has found it necessary to shut down temporarily to curtail production, is again closed for a fortnight. It will reopen next Monday.

E. A. Whitney, traveler for John C. Sawyer, has recovered from the effects of a broken tendon sufficiently to resume his trips on the road for the house last week, and has been warmly greeted by his friends and customers on his circuit.

Foster & Co. will vacate their present store at the corner of West and Mason Sts. at the expiration of their lease, which takes place in a short time, as a shoe concern announces that it is to occupy the premises. Plans for the future of Foster & Co. are not as yet made public.

The Jordan-Marsh Co. has just opened its new jewelry department, which now occupies much larger quarters, elegantly fitted up, in an annex recently built for the company. In extent of store space and stock displayed, the department is equal to many of the larger exclusively jewelry establishments in the city.

The smuggled jewelry goods which were sold at the Federal building in this city last Saturday by United States officials brought only $1,337.50, although a fine lot of coral in the outfit had been appraised at $5,700. This coral was bought by E. A. Bailey for $1,100. There were watches, rings, chains and clocks in the stock.

At the annual meeting of the stockholders of the Wm. B. Durgin Co., held at the factory at Concord, N. H., recently, the following officers were elected: President Barton P. Jenks; clerk, Gen. Frank Streeter, and treasurer, John B. Abbott. The directors elected were: E. Holbrook, New York; J. S. Holbrook and F. C. Locke, Providence, R. I.; B. P. Jenks, F. S. Streeter and J. B. Abbott, Concord.

Traveling salesmen in the city in the past week were: E. E. Allsopp, Wordley, Allsopp & Bliss Co.; Julian G. Hall, Carrington & Co.; E. W. Martin, Martin-Copeland Co.; H. N. Van Bergen, Snow & Westcott Co.; Henry W. Bruns, George O. Street & Sons; L. F. Clark, Cory, Clark & Noon; E. Cooper Stone, Brassler Co.; Mr. Gowell, Alling & Co.; John Curran, A. J. Hedges & Co.; Mr. Lee, Lee, Dodd & Co.; George W. Read, Larter & Sons; V. L. Burgessor, Krementz & Co.; Mr. Doubra, Samuel Lawson; William Kirtland, Howard & Cockshaw; W. W. Hurd.

The second annual banquet given by the firm to the employes of Rand & Crane, 3 Park St., this city, took place Feb. 15 at the Hotel Marliave. Handsome floral table decorations were also provided by the firm and the occasion was a very pleasant and social one for the round dozen of participants. Toastmaster William S. Trefry, Eugene V. McAuliffe and Laroy E. Nichols spoke and there were solos by Charles C. Stevens and quartet selections by William S. Trefry, Harry H. Dodge, William T. Bryant and J. S. Dalzell. The others present were: Fred N. Davis, Walter Kipp, Charles R. Everson, Joseph B. Matthews and Ernest G. Bartlett.

Samuel Bavley, of 39 Pleasant St., frustrated an attempt to rob his store Saturday night. Two men, one white and the other a negro, entered late in the evening, when the place happened to be without customers, and fastened the door inside to bar further entrance. Bavley was ordered to give up the contents of his safe or be shot. He caught up a heavy weight and hurled it through the store window into the street, dropping to the floor immediately to avoid being wounded in case either of the men should carry out the threat of shooting. The ruse had the desired effect of drawing a crowd and the men rushed from the store, pursued by a hundred spectators, but made their escape. Bavley was able to give a good description of the men to the police.

Fred Sargent, the clerk who robbed his employer, W. B. Foster, of Hanover St., a few weeks ago of money and jewelry valued at several hundred dollars, returned to Boston last Thursday, Feb. 17, and gave himself up to the police at headquarters. Sargent had been able to elude the detectives since his disappearance from the city, for it was supposed that he had gone to New York and was living there under an assumed name. Sargent, in his confession to the police, however, stated that he had been in Montreal. He was promptly arraigned and sentenced to 18 months' imprisonment in the Concord Reformatory, this comparatively light penalty being given in consideration of his youth, his surrender and his willingness to disclose the whereabouts of the bulk of the stolen property, for which he obtained only a small percentage of its real value. Mr Foster and one of the Boston police inspectors left for Montreal subsequently to try to recover the goods.

The New England Watchmakers' Club is to hold its first technical exhibition in March at a date soon to be announced. The committee having the matter in charge is composed of C. M. e went to the Belleville Police t week to report a robbery that red at his home early in the Charles W. Curtin, Sr., a jeweler, Cortlandt St., that place, was confronted by his own son and namesake, who had been locked up as a suspicious character. The son, who is 17 years old, confessed to the robbery, according to the police, and Justice La Faucherie later held him for the grand jury on the father's charge.

An elaborate Masonic jewel, made by Philip Krimke, was presented by the members of Columbia Lodge, No. 176, F. & A M., to Benno Littauer, the outgoing master, at a meeting held last Thursday evening. The jewel contained a carat and a quarter diamond and the top bars were of hammered gold. Upon it was a wreath of 18 karat gold. It was presented to Mr. Littauer by Grand Deputy J. C Reiss. Following the presentation and other basmess of the evenmg, refreshments were served to the 250 persons present.

Twelve games were played in the Jewelers' Bowling League last week, six on Monday evening and six on Wednesday evening. On Monday evenmg the team representing Alling & Co. won one game and lost three; the team representing the Crescent Watch Case Co. won three and lost one, and the second team of Bippert, Griscom & Osborn won two and lost two. On Wednesday evening the team representing Durand & Co. won two games and lost two; the first team of Bippart, Griscom & Osborn won one game and lost three, and the first team of Shiman-Miller Mfg. Co., won three games and lost one.

Leopold Engel, president of the L. Engel Co., 26 Beecher St., will sail from New York March 12 on the Hamburg-American steamship *President Lincoln*, for a six weeks' trip to Germany and Austria for the double purpose of celebrating in Vienna, the city of his birth, the 50th anniversary of his starting in the jewelry business and to visit his aged mother, now in her 84th year, and several brothers and sisters. As a boy 13 years old, Mr. Engel started to learn the jewelry manufacturing business in Vienna. He came to this country nearly a quarter of a century ago, and for 23 years has been manufacturing jewelry in Newark. In his absence his son, Alexander Engel, will be in charge of the business.

At the recent meeting of the New Jersey Pawn Brokers' Association, which was held at the office of Philip Krimke, 29 Academy St., officers for the ensuing year were elected and other business transacted. It was reported that the membership at the present time consists of 20 of the leading pown brokers in different parts of the State. The meeting was the second annual meeting of the organization. There was talk of a banquet for the members, but no definite arrangements were made at the time. The financial condition of the organization was reported good. Officers were elected as follows: President, Philip Krimke, Newark; vice-president, Otto Lawrence, Hoboken; secretary, Simon Mayer, Jersey City; treasurer, Fischer Finkel, Newark.

J. A. Thomason, Salem, Va., has been named as the purchaser of a new town clock which will shortly be installed in the local court house. The clock will have four dials and will cost $1,060.

Canada Notes.

M. Goldstein, Ottawa, is selling out and removing to Montreal.

E. Allum, Vancouver, B. C., has given a chattel mortgage to Howson & Co., Ltd., of the same city, for $221.

The Hensley Mfg. Co. has obtained judgment against A. B. Ryan, Stellarton, N. S., for $318, and another firm has taken a writ against A. B. Ryan for $60.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included: E. W. Ross, North Bay; D. Lundy, Mount Albert, and I. H. Little, Parry Sound, all Ontario, and Messrs. Challoner & Mitchell, Victoria, B. C Mr. Challoner proceeded to Europe on an extended buying trip.

Mrs. Grace Price has been arrested in Chicago on the charge of defrauding Bradley Bros., Windsor, Ont., from whom she purchased a diamond ring for $100, some weeks ago. She paid for the ring with a check, which was returned as no good. Other charges are made against her in Detroit.

James O'Neill, James Robinson, and John J. Walsh, who are wanted at Rouses Point on a charge of breaking into the jewelry store of Holcomb & Bruce, and stealing jewelry to the value of about $500, Nov. 25, last, were taken from Montreal jail, on Thursday night, and conveyed to Rouses Point by Sheriff Nost and Constable Sabourin, of Plattsburg. The prisoners were arrested at Montreal several days after the robbery, and they have been in jail all this time awaiting extradition.

On Wednesday, Feb. 16, the department managers of Ryrie Bros., Ltd., Toronto, Ont., gave a banquet at the St. Charles Café in honor of Herbert H. Braun, son of C. F. Braun, a leading pearl merchant of Paris, France, who has been in America about nine months, gaining an insight into business conditions here. For a portion of the time he was engaged with Ryrie Bros. Richard Galbraith acted as chairman, and after the banquet the party visited Shea's Theater. Mr. Braun left, Feb. 17, for the United States.

The action in which D. L. Rey, watchmaker and jeweler, and Swedish Consul in Montreal, has entered against the city to recover $15,000 damages for injuries sustained through having been hit by a bullet fired from the revolver of a constable in pursuit of a prisoner, came up in the Practice Court, Montreal, on Monday, on an inscription in law filed by the city. The point raised is whether the city can be held responsible for the act of one of its constables in such circumstances. Mr. Justice Fortin asked for further particulars, to be filed before hearing the case on its merits.

The annual meeting of the New England Watch Co. was held a short time ago and the following officers and directors were elected: President, George L. White; vice-president, E. L. Frisbie; secretary and treasurer, William H. White; directors, G. L. White, E. L. Frisbie, W. H. White, James S. Elton, Otis S. Northrop, J. Hobart Bronson, Gilman C. Hill, Gordon W. Burnham, John B. Burrall and Henry L. Wade.

chattel mortgage against the machin-tools and personal property of Thomas Kkman, 95 Pine and 107 Friendship Sts., h been discharged by James R. McLean C for $1,400.

John Tranter, an old-time electroplater, died at his home, 75 Potter's Ave., Thursday, in the 79th year of his age. His sons, John Tranter, Jr., and Joseph E. Tranter, are silversmiths.

Englehardt C. Ostby, of the Ostby & Barton Co., accompanied by his daughter, Miss Helen Ostby, sailed Wednesday from New York for Naples, from whence they will go to Egypt.

Joel J. Pincus has resigned as manager of the business conducted for the estate of the late George E. Darling. Mr. Pincus was associated with Mr. Darling for more than 10 years previous to his death.

J. A. Foster Co. announces that it repaired 6,711 watches during the year 1909, not including several thousand small repairs, such as case work, bows, hands, dials, crystals, etc., of which no record is made.

John H. Tuttle, of Tuttle & Stark, left Wednesday for a month's trip to St. Augustine, Tampa and other places in Florida. He is accompanied by his wife and Miss Clarine Kettlety, daughter of George H. Kettlety.

The Kazanjian Co., A. H. Bozyan, manager, of 138-144 Bellevue Ave., Newport, has purchased the stock and fixtures of the Gorham Art Co. The company is preparing to make extensive alterations and improvements in its store.

Herbert Graves, a well-known journeyman jeweler of this city, was found dead in a doorway on Pine St. Thursday morning about 6 o'clock. A medical examiner viewed the body and said death was due to natural causes. He formerly lived in Attleboro.

Among the foreign importations received the past week through the Providence Customs House were the following: From Liverpool, 20 packages of manufactures of metal; from Liverpool, one package of leather goods, one of jewelry, one of copper ornaments and one of imitation precious stones.

The will of the late Oren C. Devereux has been probated by the Municipal Court in this city and his widow, Mrs. Jane F. Devereux, and Henry Dunster, are named as executors, with bonds fixed at $20,000. The court appointed Frank A. Dary, Alfred K. Potter and W. Arthur Countryman, Jr., as the appraisers.

Mr. and Mrs. Frank P. Daughaday entertained at an anniversary dinner at their home on Elmgrove Ave., Wednesday evening. The decorations were in white and gold, with a white and gold dinner service. The favors were handpainted menu cards. Among the guests were Mr. and Mrs. Howard D. Wilcox.

Herbert S. Tanner, 64 Westminster St., was the recipient Friday evening of a handsome remembrance from the members of the Officers' Association of the Rhode Island National Guard. It is in the shape of a replica of a five pound shell in silver and copper. Mr. Tanner was for several years the head of the National Guard of this State.

The Providence Auto Garage Co. has filed with the Secretary of State papers providing for changing the corporation's name to the Loring Mfg. Co. The purpose of the corporation is now to engage in the business of manufacturing jewelry and jewelers' supplies. The capital stock includes $30,000 common stock and $20,000 preferred stock.

Charles C. Mumford, former Associate Justice of the Superior Court, has been appointed receiver of the estate of the late John McAuslan, who was a member of the original firm of Callender, McAuslan & Troup Co. There was no opposition to this appointment on the part of any of the beneficiaries under the will. The bond was fixed at $15,000.

Edward P. Cory, formerly well known in the manufacturing jewelry business, died at the home of his sister in this city, last Saturday evening. He had been ill but a brief period from pneumonia. Mr. Cory, who was in his 74th year, had enjoyed good health until last week. He was unusually active, although he had not been engaged in business for some time.

The Crown Hotel was the headquarters the past week for the representatives of the Eastern Dry Goods Alliance, and many orders were placed with the manufacturing jewelers of this city and the Attleboros. The buyers here and the firms they represented were as follows: Miss C. Conway, of Howe, Stetson & Co., New Haven, Conn.; Miss A. Burbank, of Harris, & Mowry Co., Woonsocket, R. I.; W. L. Noble, of England Bros., Pittsfield, Mass.; H. A. Miller, of H. S. Barney Co., Schenectady, N. Y.; J. L. Van Densmore, of W. G. Webber, Salem, Mass.; W. Peddie, of Howland Dry Goods Co., Bridgeport, Conn.; John Maher, of Shartenberg & Robinson Co., Pawtucket, R. I., and C. Smith, of Reid, Hughes & Co., Norwich, Conn.

The T. W. Lind Co., manufacturers of jewelers' ornaments and findings, has purchased the plant of Dodge & Adams, manufacturers of a similar line of goods at 40 Clifford St., including all the finished and unfinished stock, tools, machinery and fixtures and will for the present continue the business at the same place in connection with its own. The firm of Dodge & Adams is one of the oldest in the findings' line in the city, having been established in the Fall of 1880 by E. Spencer Dodge, a manufacturing jeweler and his son-in-law, A. Bigelow Adams. The business occupied a prominent place in the trade and since August, 1894, when the senior member of the firm, Mr. Dodge, died, the business has been conducted by Mr. Adams under the old name.

The Inlaid Co., 42 Cyr St., manufacturers of celluloid combs, has awarded the contracts to erect three new buildings fronting on Broad St., this city. Two of the buildings will be of brick construction, one story high and will have gravel roofs. One will be 80 by 200 feet and will be used for manufacturing purposes, and will be thoroughly fireproof. The second will be a one-story brick building to be used as a boiler house. It will be 10 by 24 feet and will be thoroughly equipped as an electric power plant which will furnish electrical power for the operation of the factory building. The third building will be two and a half stories high, of frame construction, 18 by 40 feet, and will also have a gravel roof. This is to be used as a store house, which will be fitted up with a sprinkler system and other safeguards.

George H. Kettlety, salesman for the A. H. Bliss Co., has been drawn by the aldermen of Providence to do jury duty.

Harry Fisher, of Furbish, Swift & Fisher, and John E. Tweedy, of Chever. Tweedy & Co., spent last week at Hartwell, N. J.

F. S. Gilbert has decided to accept the nomination of the Republican town committee and will be a candidate for re-election to the school board.

John Kelly was in New York, last week, in the interests of Scofield, Melcher & Scofield. Woodbury Melcher, of this firm, was in New York last week.

Henry B. Richardson, a former resident of North Attleboro, died, last Wednesday, at his home in Taunton. Mr. Richardson was for many years foreman at the factory of the R. Blackinton Co.

Frank H. Bliss, of the A. H. Bliss Co., was unable to appear in court, last Friday morning, to answer to the charges of reckless driving and manslaughter, as he was confined to his home by illness.

Cards are out announcing the marriage of Miss Gladys Blackinton, daughter of Louis A. Blackinton, western salesman of the W. & S. Blackinton Co., to Lieut. William Williams, of the United States revenue service. They will live at Astoria, Ore.

Mandalien & Hawkins have purchased the vacant land opposite the J. D. Pierce School on Elm St. from the H. F. Barrows estate. It is the intention of the firm to erect a small building that will be used to temporarily accommodate their outside purse makers. The business of this firm has grown so fast during the past few years that extra accommodations were necessary.

The trial of Eugene L. Cardin did not take place in the Superior Court at Taunton, Feb. 17, as expected. It was late in the afternoon when the case was called and the court decided that inasmuch as the case could not be finished on that day it would be best to defer the opening of the trial until to-day (Wednesday). The grand jury reported indictments against Cardin for larceny and for being an accomplice in the celebrated Webster Co. payroll robbery several years ago.

C. H. Gould, Northampton, Mass., has recovered from a severe attack of pneumonia, which confined him to his home for several weeks.

Attleboro.

Herbert C. Bliss, of the Bliss Bros. Co., has returned from a western trip.

R. H. Smalley is representing the James E. Blake Co. in the northwest territory.

Frank Truell, of the W. H. Saart Co., is getting his line ready for a western trip.

Charles Sekowski, foreman of the J. H. Peckham & Co. factory, did jury duty at Taunton last week.

P. G. Storm, of the Reed & Barton Corporation, Taunton, is making a western trip in the firm's interests.

James Freeman, who has charge of the New York office of Freeman & Daughady Co., was in town last week.

The R. F. Simmons building was closed all day Tuesday in honor of the late Edward E. Richardson, whose funeral took place that day.

James E. Nihan, an employe of the D. E. Makepeace Co. for the past nine years, will leave in the near future for an extended trip abroad.

Clarence L. Watson, treasurer of the Watson & Newell Co., and Joseph L. Sweet, president of the R. F. Simmons Co., have been re-elected directors of the National Exchange Bank of Providence.

The following manufacturing jewelers were present at the annual banquet of the Attleboro Driving Association last Wednesday evening: C. O. Sweet, W. H. Saart, Frank Truell, O. W. Hawkins, S. O. Bigney and Charles H. Tappan.

The J. M. Fisher Co., one of the oldest jewelry concerns in the country, has received overtures from a number of towns to move the plant to other territory. Mr. Fisher stated, last week, that he had received a number of inducements, but that he had not as yet accepted any of them. Harrisville, R. I., is particularly anxious to secure the concern and have offered free land and exemption from taxes.

Edward E. Richardson, of this town, died recently in Brooklyn, where he had been for the past two months. Death came after a lingering illness. Mr. Richardson was widely known in this town, first as a manufacturing jeweler and then as the representative of the Prudential Insurance Co. He was born in Providence, and when a young man entered the employ of R. F. Simmons & Co. as a bookkeeper, and continued in that capacity for several years. After leaving this company he became superintendent of the S. O. Bigney & Co. plant, where he continued until he became a representative of the insurance company. The funeral was held Tuesday afternoon of last week from the residence of W. H. Lamb and was in charge of the officers of the Ezekiel Bates Lodge of Masons, of which the deceased was a member.

Simon B. Novick has purchased from Samuel Novick the store at 142 Northampton St., Easton, Pa.

The local technical school has just taken possession of the upper stories of the large building next door, which have provided additional quarters for the watchmaking department and permitted of the rearrangement and enlargement of other departments. Lawrence Bryson, of Demos, O., a student of the school, has gone to Jenkintown, Pa., to take a position; F. Brethauer, Independence, Wis., has entered the engraving department of the school; A. L. Buchan, Hanover, Pa., has entered the engraving department; Kendig H. Bare, head instructor in the watchmaking department, on the evening of Feb. 17 attended a reunion banquet given at Harrisburg by E. G. Hoover to as many of his present and former employes as could attend; J. B. Frontis, Ridge Spring, N. C., late a student at the school, has taken a position as watchmaker with T Wilson Dubbs.

Buffalo, N. Y.

H. W. Papineau and Miss Elizabeth Karp have been added to the staff of C. F. Chouffet.

Albert J. Diebold, 1227 Jefferson St., has returned from a business and pleasure trip to New York.

It is reported that C. D. Barnes, Gowanda, N. Y., is receiving congratulations on account of the birth of a son.

White, Wile & Warner have added another skylight to their factory. They will increase their space and put on more men in that department.

Among the recent callers on the Buffalo trade were Milton Stern, representing H. Nordlinger's Sons, and E. Anderson, of Lassner, Anderson Co.

J. F. Lang and C. A. Mitchell, optometrists, have gone into partnership. They are located at 548 Main St., under the name of Lang & Mitchell.

Among the jewelers who recently visited the Buffalo market were George J. Magner, Wellsville; H. L. Fox, Dunkirk; R. S. Mil's, Akron; Mr. Lewis, Arcade; C. L. Harris, Brockton.

A. J. Best, of Best & Co., who have jewelry stores at Buffalo and Niagara Falls, is spending a month's vacation in Texas and Mexico. He reports delightful weather at the various points he has visited.

E. A. Eisele is in New York, where he will combine business and pleasure. J. K. Thompson, manager of the jewelry department of King & Eisele, has spent a week in Pennsylvania and Ohio in the interests of his firm.

Daniel O. Muma has taken a position as jeweler with Charles A. Schopp, who has a jewelry store in the court of Ellicott Square. Mr. Schopp has opened a manufacturing department in connection with his business.

Post Bros. & Co., who will manufacture and deal in art glass, have filed a certificate of incorporation with the county clerk in Buffalo. The concern is capitalized at $2,-100. The directors named are Gerritt W. Post and Fred G. Post, of Kenmore, a suburb of Buffalo, and Harry M. Bell, of this city.

Louis J. Heintz, of Heintz Bros., ring manufacturers, who is now on a trip around the world, sailed from San Francisco recently. His many friends in the trade are waiting with great expectation for items of news which he promised to send from time to time about the enjoyable features of his protracted journey.

The attendance at the annual banquet of the Buffalo Retail jewelers' Association at the Genesee Hotel on the evening of March 1 promises to be a record-breaker. A committee composed of Gustav Frisch, F. Petersen, Louis B. Striker, Emil Dettling, Louis Pollock and Albert Diebold visited the jewelers of Tonawanda, Niagara Falls and Lockport and received promises from nearly all of them that they would attend the banquet.

Fred. G. Bixby, who has been known for many years as "the watch doctor" and is located in the store of Charles F. Damm, 520 Main St., has made his son, Kenneth Bixby, his assistant in business. Mr. Bixby recently visited another son who is an advertising writer in Lancaster, Pa. He also recently placed a U. S. Observatory clock at the front of the building where he and Mr. Damm are located. The clock is corrected every hour and is in great demand by Buffalonians.

Judge Brennan recently held Louis Rosokroff, of this city, for the grand jury. The arrest was made on complaint of Charles F Damm, manufacturing jeweler, who alleges that Rosokroff forged the signatures of his brothers, Leo and Max Rosokroff, to promissory notes with intent to defraud. The defendant claims that he was authorized to sign the names of his brothers to the notes, which covered the delivery of a quantity of jewelry by Mr. Damm to Louis Rosokroff.

The next meeting of the Buffalo Optometrical Society will be held at the Lafayette Hotel on the first Friday evening in March. The election of officers for the ensuing year will be a feature of the session, and the members will be served with a light lunch and refreshments. The election will be informal and no ticket will be announced in advance. E. V. Syrcher, optometrist, was recently delegated by the society to take flowers to E. G. Wiseman, president of the organization, who was ill. Mr. Wiseman has now recovered.

Among the travelers who recently called on the Buffalo trade were: James R. Palmer, Henry A. Kirby; E. H. Levy, E. H. Levy Co.; Mr. Allen, Bristol Jewelry Co.; J. McClannin, Wilcox Silver Plate Co.; D. Skutch, New Haven Clock Co.; G. T. Howard, Towle Mfg. Co.; H. A. Bliss, Wordley, Allsopp & Bliss Co.; Herbert R. Morse, R. Blackinton & Co.; Mr. Hawley, R. H. Ingersoll & Bro.; A. D. Manning, D. Wilcox & Co.; Walter H. McKenna, S. B. Champlin Co.; H. E. Barkman, F. H. Cutler & Co.; L. E. Waterman, L. E. Waterman Co.; J. Wezansky, B. H. De Jong; S. C. Powell, S. C. Powell & Co.

We supply our product to a limited number of the best wholesale watch houses in the country. They push the sale of Illinois movements — not because of the superior quality alone — but because of the established selling prices, which insure a satisfactory profit to them as well as to their customers.

Miss Gertrude Zamost has been engaged by W. S. Tompers, who represents the D. A. Hart Co., Attleboro, in Chicago, as assistant. Mr. Tompers left last week for a three weeks' trip in Illinois.

Glenn L. Seitz, who represents Mandalian & Hawkins, Mansfield Jewelry Co. and the Wagner Comb Mfg. Co., has just returned from a month's trip in the south. He attended the Mardi Gras in New Orleans.

Otto Lieberman, of the diamond department of the Stein & Ellbogen Co., has returned from an Illinois trip. H. J. Hagen, recently with Swartchild & Co., is making his initial trip for the Stein & Ellbogen Co.

M. J. Averbeck, New York, has engaged C. A. Starr to represent him in Oklahoma and the southwest and Wm. Duff to represent him in the far west. Both of these gentlemen formerly traveled for Lapp & Flershem.

A meeting of the creditors of Lapp & Flersheim was called for last Thursday at 2 P. M., but was postponed till Monday at 11 A. M. A definite offer was promised by that time, but later the matter was postponed until March 3. Lapp & Flershem as a company has been incorporated with a capital of $10,000, and it is believed that this has been done to protect the name as against any possible purchaser of the estate in bankruptcy.

A dispatch from Omaha, Nebr., last week stated that a jeweler of Chicago is accused by Louis Frank, of Omaha, of having taken Frank's daughter from a Nebraska insane asylum without the father's consent. The girl is thought to be in Chicago. Frank appealed to the county attorney here to secure the return of his daughter and said he was satisfied the jeweler was actuated only by the best motives toward the girl. Miss Frank was brought up in an orphan asylum in Cleveland in which city the jeweler also resided. Some time ago she became suddenly insane and was brought to Nebraska by her father and placed in the State Insane Asylum.

Moses Cohen, a well-known business man of Dayton, O., left his home in that town at 6.30 A. M. on Feb. 1 to take a walk and has not been heard from since. His family and friends, among whom is "Sid" Lebolt, jewelry buyer for Rothschild & Co., are anxious to know of his whereabouts. A circular bearing his photograph has been sent out offering a reward of $100 for information leading to his discovery. His description is as follows: Height, five feet eight or nine inches; weight, 170 or 180 pounds; 46 years old, smooth face, dark hair mixed with gray, high forehead, brown eyes He wore a dark suit, dark lightweight overcoat, black derby hat. If anyone knows where Mr. Cohen is he is requested to telephone or telegraph "Sid" Lebolt, care of Rothschild & Co.'s jewelry department, this city.

Atlanta, Ga.

Nat. Kaiser, the Decatur St. jeweler, who, as noted in the last issue of The Jewelers' Circular-Weekly, recently purchased the property at 59-61-63 W. Mitchell St. for $100,000, disposed of this within two days after his purchase for $110,000. The property, which is 64 x 132 feet, was in Mr. Kaiser's possession hardly 48 hours.

B. W. Bentley, who recently sold out his oil and power business at Valdosta, this State, and retired with a very large fortune, was at one time in the jewelry business, and among his collections of souvenirs and relics which he values most highly is the money he made as a jeweler when he moved to Valdosta from Whittman 30 years ago. He repaired a watch for a negro railroad hand and received in payment a $1 bill and 50-cent "shin plaster," which he filed away and has kept ever since. He later left the jewelry business to go into other lines.

Jaeger Bros., Portland, Ore., recently purchased what is known as the Stanley Apartments at the northwest corner of King and Washington Sts., that place, for $100,000. The property consists of 51 feet frontage on Washington St., a depth of 100 feet in width, of 70 feet at the back of the lot.

Milwaukee.

David Goldman, Milwaukee, has just returned from a business trip to Chicago.

L. A. Martin, Superior, Wis., has purchased the site on which his jewelry store stands and the adjoining lot from Richard Junker and wife, of Chicago, for $14,850.

Several out-of-town jewelers were Milwaukee visitors, last week, including: M. F. Peters, Mauston; J. B. Kimball, Waukesha; J. M. Bostwick, Port Washington, and U. S. Briggs, Hartland.

Howard Fosburg, at one time a watchmaker and optician in Milwaukee is now connected with T. J. McCollow, jeweler at Ellsworth, Wis. Mr. McCollow has also enlarged his stock of jewelry.

Milwaukee wholesale jewelers have received the news that M. S. West, Kenosha, Wis., has moved to Portland, Ore. Mr. West moved most of his stock and will engage in the jewelry business at Portland.

Thirty-six members of the Milwaukee Jewelers' Club met for their monthly meeting and banquet recently, held at the Blatz Hotel. Several matters of interest to the trade were discussed, and President Henry Stecher appointed a committee to revise the by-laws of the organization.

Several Milwaukee jewelers are planning to attend the meeting of the Fox River Jewelers' Club, which will be held at Fond du Lac, March 9. A special programme is being prepared for the occasion. While Milwaukee jewelers are not members of the organization the close proximity of Milwaukee to Fond du Lac will allow an attendance from this city.

W. H. Becken, well known jeweler and optician of Beaver Dam, Wis., who recently sold an interest in his business to Ray W. Bayley, has purchased the Success store from B. E. Lawton, at Beaver Dam. Mr. Becken has been most successful in the jewelry business. Mr. Bayley is now in active charge of the Becken jewelry store, Mr. Becken retaining an interest, however.

It is reported here that Mrs. Jessie E. Sears, Glidden, Wis., has gone into bankruptcy. Neither the liabilities nor assets are said to be large. Mrs. Sears is the wife of A. J. Sears, who was formerly in business in Park Falls, Wis., but he went through bankruptcy in February, 1901. In April of the same year Mrs. Sears started the business at Glidden, which her husband managed.

David Goldman has completed plans for the new basement department that will soon be opened at his downtown store in the Caswell building. After the quarters have been remodeled the china, cut glass, brass goods and stationery lines will be installed there. An elevator, connecting the basement with the first floor, will be installed. The entire arrangement will be something of an innovation in the jewelry stores of Milwaukee.

Archie Tegtmeyer has progressed so favorably in his campaign for track elevation or depression on the south side that he has forwarded supplementary petitions, with more than 4,000 signatures, to the Wisconsin State Railway Commission at Madison. Mr. Tegtmeyer still has about 260 petitions in circulation, and it is conceded that when all the petitions are in that some definite action in the matter will be taken by the railway commission. Mr. Tegtmeyer has always taken a leading stand on all public questions affecting the south side.

Edward Dubuque, 17 years old, and Harry Davis, 21 years old, the two young men who attempted a bold daylight robbery at the jewelry store of Max Krome, 266 W. Water St., last week, were each sentenced to three years in the Wisconsin State prison at Waupun by Judge Alvin C. Brazee in the Milwaukee municipal court. Both of the accused, mere boys and novices at the hold-up game, pleaded guilty and requested that they be sent to the State reformatory at Green Bay, instead of to Waupun. Judge Brazee was inclined to be lenient, and so let them off with the comparatively light sentence. The arrest and conviction of the two men followed a sensational attempt to rob the Krome store, after attacking Louis Werbil, a clerk, and hitting him a stunning blow over the head. The plucky fight put up by Werbil resulted in the flight of the two would-be robbers, who, in the endeavor to escape, jumped into the Milwaukee river, but were captured.

San Francisco.

A. L. Ott has offered a valuable award, that is to be competed for during March by the Oakland police department, when the annual marksmanship contest will be held.

A number of local jewelry concerns have been visited of late by secret service officials who are on the outlook for "strippers" who are systematically taking small quantities of gold from gold coins in circulation and returning the lightened coins to the channels of trade again. It is believed that there is a plant located somewhere in this city for there are many short-weight gold pieces now in circulation.

With the aid of a jimmy a window in the rear of the store occupied at 546 Clement St., San Francisco, was opened a few nights ago and 100 watches valued at more than $3,000 were taken. The robbery was carried out just at supper time, while Frank Durkee, the owner of the store, was out. He left about 6:30 o'clock and when he returned found the show cases rifled of the best watches in stock. Many of the watches were owned by parties having them repaired. There were other valuables in the store, but the thieves paid exclusive attention to the best timepieces.

The San Francisco detectives and railroad officials who have been working on the stolen trunk affair whereby a Los Angeles wholesale house lost valuable gems valued at over $10,000 have all gone to the southern city and are ending their investigations there. The woman interested in the case, who is supposed to have opened the trunk and made away with the goods, has not been located and no definite clews as to her identity have been secured. The detectives state that the trunk was insured for $5,000 with the Hartford & Citizens' Insurance Co., San Francisco, and that a claim for $11,000 has been filed. The expert locksmith who is working on the case has testified that the trunk had been opened with its own keys. Whether the baggage tags on the trunk and valise that were checked at Los Angeles were changed at the railroad depot in the southern city or whether an exchange of tags was made at some later date is still a mystery.

Local jewelers are very much interested in the clearing up of a murder mystery that has been baffling the police for the past week and from present indications a member of the trade will be the means of unraveling the mystery, as the chief clews seem to be in the jewelry left by the unfortunate victim. The remains of a woman's body were discovered on Mount Tamalpais near here, a short time ago, the clothing rotted away and but little remaining as a clew to the identity of the woman other than a watch that bore on its works the private marks of some repairer. The local watchmakers have been busy looking over their records since the fire to ascertain whether they have ever handled the watch. Word is sent that the watch had at one time been repaired by Frank Ward, of that place, and that it had been bought from him by a man named James McKay. According to the records that had been kept. The police are now working on this clew and developments are expected at any time. There is a reward of $1,000 offered for information that will lead to the apprehension of the murderer and this is of great interest to be taken in the case.

Omaha.

A. Mandelberg attended the jewelers' convention in Lincoln last week.

Harry Dixon, North Platte, Neb., was in this city last week purchasing stock.

W. N. Neilson, Allen, Nebr., was in Omaha last week buying his opening.

Curtis Lindsey, son of S. W. L., underwent a slight operation at the hospital last week.

Fred Brodegaard & Co. will supply the medals and emblems this year for the Platt-Deutcher Verein.

R. J. Bott, who recently accepted a position with Albert Edholm, moved his family here last week from Milwaukee.

H. M. Reed, Jr., Battle Creek, Mich., stopped off a few days in this city en route to the Jewelers and Opticians' meeting in Lincoln.

The Nebraska jewelers and opticians were glad to have with them at the conventions in Lincoln Claud M. Wheeler, Columbia, Mo., of the American National Retail Jewelers' Association. Mr. Wheeler made an interesting address before the convention.

Chas. T. Higginbotham, of the Elgin-Bend Watch Co., gave an illustrated lecture on watchmaking at the Tarbox & Carpenter Horological Institute Friday afternoon at 2 P.M. Mr. Carperter, also of the Elgin-Bend Co., gave an interesting talk on watches and business in general.

Traveling representatives in Omaha this week were: Clayton Shepperd, Krementz & Co.; R. Watson, Whiteside & Blank; Norman Strauss, Strauss & Strauss; L. Cohn, Eastwood Park Co.; W. S. Cory, Clark & Noon; Mr. Smith, Williams Silver Co.; Morris Lekwow, Ullman & Co.; Albert B. Randall, C. & Heilborn Co.; C. M. Cole, H. C. Glass Co.

Bleecker, Martin-Copeland Co.; Joseph Guntzburger, I. Guntzburger & Son; E. H. Eckfeldt, Eckfeldt & Ackley; Geo. Pilzer, Goodfriend Bros.; Geo. L. Jaun, C. F. Rumpp & Sons; Alvin T. Hatch, manufacturers' agent; C. M. Davis, Depasse Mfg. Co.; Jerome Bernheim, Woodside Sterling Co.; C. W. Hickok, Graff, Washbourne & Dunn; W. H. Gregory, Strobell & Crane; Albert E. Levy, Marchand Freres, Ralph Wakefield, Burstow, Kollmer & Co.; A. T. Teague, Link & Angell; W. N. Brooks, Brown & Mills; Jul F. Schuman, Jr., Wm. Kincherf Co.; A. L. Hancock, C. Sydney Smith & Co.; Wm. J. Anton, Durand & Co.; R. L. Seely, Lapierre Mfg. Co.; W. H. Osborne, R. Wallace & Sons Mfg. Co.; S. W. Pickering, A. Ludeke & Co.; A. S. Riley, Mandeville, Carrow & Crane; Clayton Shepperd, Krementz & Co.; Mr. Blaking, F. Baumeister; Charles H. Hartsham, Alling & Co.; H. R. Blackman, Enos Richardson & Co.; R. M. Sawyer, Shafer & Douglas; Leo Cahn, Borrelli & Vitelli, and C. A. Holbrook, Sloan & Co.

Pacific Northwest.

Jaeger Bros., Portland, Ore., have purchased a four-story building at the corner of King and Washington Sts.

G. W. Carlton has closed his establishment at Marshfield, Ore., in order to arrange the trusteeship for the benefit of his creditors.

Frank Cruikshank, Lynden, Wash., has removed to a much larger store at that place. A larger safe has been put in and the stock doubled.

Carlquist Bros. have decided to relocate in Ashland, Ore., and have secured a store site where the First National Bank is located at present.

Randolph Horn, formerly in business at Lents, Ore., has been arrested in Portland, Ore., on the charge of larceny, it being alleged that he received a $20 gold piece and returned no change, claiming that he received a silver dollar.

Walter A. Lord and Fred L. Miller have opened a retail jewelry store at 1012 8th St., Sacramento, Cal. Mr. Miller, who conducted a store in Loyalton, Cal., recently discontinued it.

Henry Alberts has been arrested at Hoquiam, Wash., charged with robbing the second hand store of Hattabaugh & Moir of $300 worth of watches and jewelry. He was captured in his room with the goods spread out on his bed and when the police came was attempting to change the works of one watch to another case.

Indianapolis.

Carl L. Rost has returned from a business trip to Cincinnati.

E. M. Craft, of the A. P. Craft Co., is home after a business trip to Chicago.

Julius C. Walk was confined to his home part of last week by illness, but is recovering.

Retailers report an exceptionally large valentine trade, especially in souvenir spoons and silverware novelties.

H. A. Winn has returned from Chicago, where he accompanied Mrs. Winn and children, who have gone to Los Angeles, Cal., for several weeks.

J. C. Ertel, owner of the Ertel Jewelry & Loan Co., 209 Massachusetts Ave., has been appointed pound master at the city dog pound by the board of public safety, on recommendation of Mayor Shank.

After two weeks' work, J. P. Mullally has completed an appraisement of the personal property of George Rhodius, a millionaire, who died recently, and has filed his report with the Probate Court.

A thief smashed the plate glass window in the store of Andrew Strang, 505 Massachusetts Ave., a few nights ago, taking a number of rings and other articles of jewelry. Practically everything in the window except some fancy combs was taken. The loss was estimated at about $200.

Owing to the heavy snow storm over the State last week, few retail jewelers were in the city. Among the visitors were: George W. Clemons, Greenwood; Mr. Robbins, of Cooper & Robbins, Mooresville; John W. Hudson, Fortville; Fred Pennington, Knightstown; I. H. Barnes, Greenfield; Clyde Porter, Tipton, and J. O. Lutz, Zionsville.

J. H. Reed and Charles Mayer & Co. have subscribed to a fund for ornamental street lights in Washington St. from Meridian to Illinois Sts. Five ornamental standards, each bearing a cluster of five arc lights, have been installed on each side of the street. The system is to be extended to other parts of the downtown business district.

Charles Medias, in business at 510 Indiana Ave., was assaulted in his store by a negro a few days ago, who drew a knife. Medias was not injured and got to a telephone where he called the police and the negro was taken into custody. The negro was intoxicated and was displeased because Medias would not advance him as much money as he believed he should receive on a watch.

Los Angeles.

H. C. Crowell, San Bernardino, was a recent visitor here.

C. O. Goldman is closing out his business at 108 S. Main St.

Mrs. Meyers, saleswoman with the J. C. Fleming Co., is taking a week's vacation.

The Donavan & Seamans Co. is making a large display of handsome silver loving cups.

Percy H. Greer is closing out the fine jewelry stock of F. M. Taylor & Co., Pasadena.

Frank Sterling, traveling salesman for the material department of the E. W. Reynolds Co., is making a trip north.

Newton Moore, 315 S. Broadway, has received the appointment of local watch inspector for the Southern Pacific Railway.

C. Chapman, formerly with the Meyer Jewelry Co, Kansas City, Mo., has taken a position as engraver with the Carl Entenmann Jewelry Co.

"The Radium Gem Jewelry & Optical Co," controlled by the U. S. Investment Co, will open a new store about March 1 at 533 S. Broadway, next door to the J. C. Fleming Co.

R. H. Gilmore, of Gilmore & Lee, returned a few days ago from Santa Barbara and other cities north of here and has again started out to visit the cities of southern California, expecting to spend Sunday with his wife and her friends in Redlands.

Walter L. Glenn, secretary of W. B. Glidden, Inc., San Francisco, on his return from a business trip to the factories of R. Wallace & Sons Mfg. Co., Wallingford, Conn., stopped in this city last week to visit Fred S. Geirrine, who represents the Glidden Co. here.

The Southwest Turquoise Co. has added a new jeweler to its force in the person of C. Anderson, who lately came here from the East. This company has increased its business largely since removing from N. Broadway to W. 4th St. It has recently bought a new mine of rhodenite, located in this State.

Among the traveling men who have been in Los Angeles recently are: Hugh E. King, Queen City Silver Co.; J. H. Merrill, J. H. Merrill Co.; E. M. Childs, Kohn & Co.; B. J. Clark, LaPierre Mfg. Co.; A. E. J. Winter, Enos Richardson & Co.; H. H. Day, Day, Clark & Co.; Geo. W. Birnbaum, J. Wodeska, Jacob Marx.

Information has reached here that an investigation is being made by the officers of San Bernardino Co. to see who is responsible for the escape of the burglars who entered the F. J. De Arman jewelry store at Ontario. Owing to the fact that the burglars were little more than boys, the court struck upon the plan of allowing them to join the army. They agreed to do so, and were placed in the custody of the probation officer with strict instructions to bring them to the recruiting office in Los Angeles. If they were not accepted they were to be taken back to San Bernardino and turned over to the sheriff for transportation to the penitentiary. The probation officer returned to San Bernardino with the news that the men had been accepted. A deputy sheriff, however, learned that the men had not enlisted. They had applied for enlistment but had dropped out of sight immediately afterward. They have not yet been apprehended.

Cincinnati.

Messrs. Snow and Carle, of the Howard Watch Co., visited the trade here, last week.

Clarence Loeb, of Herman & Loeb, has just started on a southwestern business trip.

Julius D. Jacobs, of D. Jacobs' Sons Co., started, this week, on a northern business trip.

W. S. Fawcett, of Lindner & Co., is home from a long business trip in the western trade.

Otto Mehmert, with Joseph Mehmert, is making his first business trip after a long illness.

Harry Gilsey, of S. & H. Gilsey, left, last week, on a 10 days' business trip among his southern trade.

Godfrey M. Braham, of A. & J. Plaut, has just returned from an extended business tour and has started on a southern trip.

Albert Bros., after 15 years at 236 W. 4th St., have decided to join the procession to the Merchants' building at 6th and College Sts., where they have leased for a term of five years the entire fifth floor. They will not move before April next.

Frank Herschede, of the Frank Herschede Co., has gone to Washington, D. C., to confer with President Taft and Government officials in regard to securing Government exhibits for the Ohio Valley Exposition, to be held in this city early in the Fall. Mr. Herschede is chairman of the governing committee.

The estate of Emil Broderson, who for years was connected with the Duhme Jewelry Co., goes to his five nephews and seven nieces, his only heirs. No will has been found. The estate consists of $31,000 cash in the bank, also notes aggregating $20,490, which the appraisers report of doubtful value. There are two notes aggregating $15,825 due from the Herman Keck Mfg. Co.

Charles H. Thompson, well known to the trade here, having been connected with Duhme Bros. as manager of their stationery department and also connected with the old Duhme house, died at the Bethesda Hospital, Feb. 15, after a short illness. Mr. Thompson for the past few years was connected with a large book company of Cincinnati. The news of his death was received with deepest regret by his many friends in the trade.

Creditors of Charles Rosen, bankrupt jeweler on Race St., have, through Receiver Bolsinger, asked for an examination of the bankrupt's business affairs. Max Schapiro, watchmaker for D. Jacobs' Sons Co., and M. R. Slayback, watchmaker for Charles Rosen, have been called as witnesses to appear, Feb. 17, before Bankruptcy Referee Greve, of the United States District Court. Rosen's stock was appraised at about $1,700 and was sold for $1,100.

Out of town jewelers who were buying stock here, last week, included: James Davis, Franklin, Tenn.; E. F. Randolph, of Randolph & Mittendorf, Williamson, W. Va.; Owen Sherwood, Falmouth, Ky.; W. H. An exclusive right has been secured from Luther Burbank for metalizing the Burbank productions. A company is to be formed and incorporated for carrying on the business to be entered into.

The bold robbery that occurred at Sacramento a short time ago, when diamonds to the value of $500 were extracted from a show window in broad daylight, is still the talk of that place and the police are still working on the matter in the hope of bringing the guilty parties to justice. Emil Steinman, the jeweler who owned the store, states that there was more than $1,000 worth of jewelry within easy reach of the thief. It is believed that the thieves worked all the previous night in making preparations for the robbery, for much cutting was done in the basement to reach the show case.

Detroit.

William Arnold, Ann Arbor, has been ill with grippe recently.

W. W. Bridges, Marine City, was a purchaser in this market last week.

A. B. Hull, Belding, attended the automobile show in Grand Rapids last week.

Reuben W. Merriam, father of F. W. Merriam, Fremont, O., died here recently, at the age of 95 years.

William F. King, Sr., Adrian, who has been seriously ill, was reported to be improving in health, last week.

S. B. Lemmon, who has a store on Grand River Ave. near Perry St., was the victim of a thief recently, losing rings worth $85.

Dwight and Ray Herrick, who have been in business with their father, Rollin Herrick, at Edmore, are looking for a location in northern Michigan.

M. E. Rowley, traveler for the E. H. Pudrith Co., started out on a trip through Michigan on Monday. A. E. Hawkins, with the same firm, got back Saturday from an Ohio trip.

The Switzer-Griswold Co. has taken over the business of Switzer Bros., Ypsilanti. This is a new company. The Mt. Clemens store of Switzer Bros. will be run under the old name.

G. W. Parsons, formerly employed in the Dueber-Hampden Watch Works, is now in charge of the watch-making school run in connection with the educational department of the Y. M. C. A. Day as well as evening classes are being held.

Otto Loomis, Lakeview, has bought out Merritt & Co.'s store at Northville. Mr. Merritt has purchased the business of Edwin V. Allison, at Pontiac, having been with Allison previous to opening the Northville store. The Allison store was an old one in the trade, Edwin V. Allison having succeeded his father in the business.

Burt F. Chadwick, 665 Commonwealth Ave., has reported to the police the loss of a diamond brooch containing a large central stone and 27 smaller stones, valued at $6,000. He had called on a prospective customer at the Hotel Pontchartrain, he says, and thinks his pocket was picked while he was on the street. He is a nephew of Cassie Chadwick, who died in an Ohio prison.

J. J. Heath, Lansing, was victimized a few days ago by a swindler who passed a bogus check on him. This young man claimed to be a son of the president of the Welch Grape Juice Co. and to be representing that firm on the road. He stopped in Heath's store and priced a $163 diamond, saying that he would return later to purchase it. He cashed a check for $63 at his hotel and paid the remainder of the purchase price of the diamond with a bad check.

Kansas City.

J. F. Sweet, president of the R. F. Simmons Co., Attleboro, Mass., was in the city last week, on his return from a trip around the world.

Wilbur Peterson, Plainview, Tex., has been enrolled as a student at the Missman School of Engraving.

C. W. Wolkfolk, with W. W. Whiteside, Liberty, Mo., was in the city Friday, combining business and pleasure.

L. Botts, of this city, a student at the Missman School of Engraving, who has been ill for a month with typhoid fever, is convalescing.

The following new students have been enrolled at the Kansas City Polytechnic Institute: H. E. Baker, Council Grove, Kans.; Ray Brehm, Great Bend, Kans.; Walter Cornelius, Grand Island, Nebr.

The executive committees of the Missouri and Kansas Jewelers' and Opticians' associations held a meeting at the Baltimore hotel, in this city, early in the week, and decided to hold a joint convention of the two associations in this city in June, the date or dates to be announced later.

Among the jewelers in the city during the week, were H. W. Walter Starcke, Junction City, Kans.; Claud M. Wheeler, Columbia, Mo.; J. A. Bourquin, Horton, Kans.; H. L. Raines, Marysville, Mo.; G. E. Read, Lebanon, Mo.; E. L. Thurber, Warrensburg, Mo.; L. E. Armel, Holton, Kans.; W. H. Haupt, Bartlesville, Okla.; J. C. Haupt, Peabody, Kans.; H. C. Schultz, Hays, Kans.; Harry Warden, Topeka, Kans.; L. S. Slocum, Corning, Kans.

The following traveling representatives called on the trade here last week: A. H. Cohn, Eastwood Park Co.; H. Hansburger, S. Pitzele; Harry Goodison, E. G. Webster & Son; A. Johannes, Oscar Gottlieb & Co.

Oscar W. Dreyer, who a couple of months ago bought out the business of the Kansas City Polytechnic Institute, formerly conducted by A. C. Stuhl, and more recently that of the Kansas City Horological School, carried on by A. E. Pittenger, has consolidated the two institutions and will hereafter run them under the name of the Kansas City Polytechnic Institute. Mr. Dreyer intended to occupy the upper floor of a building at 7th and Main Sts., but because of the lack of proper fire protection was compelled to abandon the idea. He will continue the business at the old location of the institute in the Aragon building at 8th and Walnut Sts. The optical department of the Kansas City Horological School has been sold to Finis Anderson, and will be conducted by him. The physical breakdown of Mr. Pittenger made a disposal of his business necessary.

Remington McRee, Highland Home, Ala., has removed to La Pine, Ala.

Pittsburg.

H. B. Hayes, of the Hardy & Hayes Co., has recovered from his recent indisposition.

Samuel Weinhaus has returned from a business trip to the east where he went to buy spring stock and attend to some other business matters.

Among the out of town jewelers in Pittsburg last week were: B. E. Brown, Monessen; H. R. Brown, Donora, and Wm. M. Barbour, Midway.

L. Ehrman, who traveled for S. Davis & Co. some 15 years ago, is again going on the road for that house and will cover western Pennsylvania, Ohio and West Virginia.

P. C. Gillespie, of Gillespie Bros., and Mrs. Gillespie, leave this week for a three weeks' stay in Florida in the hope that they will escape the cold weather of this climate.

Dr. H. Harrison, the father of W. O. Harrison, of the Marsh, Brown, Mather Co., who was operated on here some time ago and who returned to Wheeling, is again able to resume his practice.

Charles Holyland, a well known engraver and father of C. H. Holyland, also in the same line, slipped on the icy pavement on the North Side last week and was severely bruised. He has not been able to work since.

Steele F. Roberts, president of the Jewelers' 24-Karat Club, and H. B. Hayes, of the Hardy & Hayes Co., left last week for Philadelphia to attend the annual banquet of the Jewelers' Club of the Quaker City, being especially invited guests on the occasion.

A mad dog which is said to have bitten quite a number of dogs in the vicinity of Waynesburg, Pa., and which attacked a dog owned by John W. Nichols, a jeweler at that place, caused the latter to shoot his dog last week. Nichols' dog showed symptoms of hydrophobia and the jeweler did not care to take chances.

Warren W. Mather, of the Marsh, Brown, Mather Co., who was ill with typhoid fever, has almost fully recovered. Miss Florence Kennell, of that house, fell last Friday and broke her collar bone. Someone has been ill or injured in this firm almost every month since last October and the members of the firm hope that the worst is over.

Robert Adams, a brother of Dawson B. Adams, the diamond and jewelry broker with offices in the Park building, died at Waynesburg last Tuesday evening. Mr. Adams went to Waynesburg to attend the funeral, which took place Thursday afternoon. The Pittsburg correspondent of THE JEWELERS' CIRCULAR-WEEKLY was a brother-in-law of the deceased.

William Heeren, of Heeren Bros. & Co., returned Wednesday from his tour around the world. He was agreeably surprised Wednesday night by the employes of the Heeren establishment calling on him at his home and wishing him welcome. Mr. Heeren told of many little interesting events concerning his trip and all present had a most enjoyable time.

Marshall Parker, the negro arrested in Pittsburg several weeks ago while carrying a suit case containing jewelry valued at $2,000, turns out to be a much wanted man. Parker, who escaped from the police here, but left his suit case behind, was arrested last week in Philadelphia. It is alleged he secured plunder valued at $6,000, but, so far as known, his operations did not concern the jewelers.

Schneider & Baxmier are still endeavoring to arrange a settlement with their creditors, but as yet have not succeeded. The smaller creditors are now being offered 35 cents on the dollar, a raise of 10 per cent. since the last offer was made, while the larger creditors have agreed to accept 50 per cent. and wait a reasonable length of time to receive their money. It is believed that if the firm is given time the creditors will fare better.

The members of the Jewelers' 24-Karat Club, of Pittsburg, will hold their annual banquet about March 25, although the exact date has not as yet been determined. Steele F. Roberts, the president of the club, expects to call together the committee which will look after this feature, within a few days. The first banquet of the club last March was such a delightful affair that most jewelers have been anxiously awaiting for the announcement of the date.

Capt. Hugh A. Ayers, of Butler, aged 71 years, a veteran of the Civil War and who was a jewelry apprentice after the close of the war and then well known to the jewelers of Butler, died there last week. He resided in Harrisburg for a number of years following his removal from Butler after learning his trade, but returned there in 1887 and was elected registrar and recorder for one term. Two children, Mrs. Thomas H. Greer and John Ayres, of Butler, survive.

George T. Kroesen, who several weeks ago was appointed temporary receiver for Charles W. Morgan, the missing Butler St. jeweler, was last Friday made permanent receiver by order of Common Pleas Court No. 4. Nothing has been heard from the jeweler since he disappeared from Pittsburg after the Christmas holidays. Kroesen, who formerly was with Henry Terheyden, was appointed at the instigation of Mrs. Morgan and for the benefit of the man's creditors, since Morgan is badly involved. It is said he owes $8,000 or more.

The Jewelers' Duckpin League challenged the Insurance League team a few weeks ago and now some of the teams are sorry that they did for the insurance men "ate 'em alive." The jewelers went down in a defeat, the "firemen" taking all four games played. The jewelers' league teams rolled the usual games Monday of last week, the Lochs and Diamonds breaking even; Wattles took all four from the Roberts. The Vilsacks and Terheydens did not play. The Roberts played off a postponed series with the Diamonds, taking three out of the four games. John W. Wightman rolled high score, with 103 to his credit, Holyland coming next, with 102.

S. F. Mohr, who operated the Bon-Ton Jewelry Co. in the entrance of the Hippodrome in Fifth Ave., has removed his stock and fixtures and will not engage in the jewelry business again. Mr. Mohr when seen by THE JEWELERS' CIRCULAR-WEEKLY correspondent said that the Hippodrome had changed hands and that the owners of the place had forced him to vacate. I $2,100 in the venture," said he, "an the last time that I shall ever go jewelry business." Mr. Mohr says will engage in the optical business. failed several times in the jewelry the report that he had been sold his Fifth Ave. location, Mr. Mohr, unfounded.

The following traveling repres called on the trade here last week: dore Parker, Smith & Crosby; Bradshaw, Rogers Bros.; Sidney H S. & B. Lederer & Co.; C. C. Offe A. Marsh & Co.; Frederick C Powers & Mayer; M. Loeb, Duebe Case Mfg. Co.; Mr. Greene, Geo. L & Co.; John S. Cunningham, E. L. Co.; George H. Thomas, Scharling M. E. Van Bergh, Van Bergh Siv Co.; Mr. Levinson, Levinson & Frie J. P. Fagan, Unger Bros.; Wm. Gowan, F. T. Pearce Co.; J. T. Gri Carter, Howe & Co.; Frank E. B Homan Mfg. Co.; J. Williams. Kadison; J. E. Simonson, Ludwig & Co.; George A. Schuetz, Snow cott Co.

Rochester.

Bastian Bros. Co. are movi South Ave. to 311 E. Main St.

E. J. Scheer returned from Ne last week, whither he had gone ing trip. One of the local papers p an interview with Mr. Scheer in w said the demand for fine jewe growing.

Julius R. White & Co., 92 M have filed papers of incorporat style becoming J. R. White Co thorized capital stock is $10,0 directors are Julius R. White, J Marshall, Edith L. White, Perry B and Roy P. White.

The jewelry store of Emil B Main St., W., was robbed, last w burglars, who gained an entra breaking a window, getting away w eral small articles. The matter w ported to the police and detectives investigating the case.

The Jewelers here are taking a terest in the fact that the eleven the retail jewelers' association wi in Rochester May 26 and 27, this ing been selected practically efforts of Stephen D. Burritt, Ge E. J. Scheer and L. Sunderlin, w tended the recent meeting of the ex committee. There are many mem Rochester, and it is hoped before t vention takes place that practically jeweler in the city will be workin success.

A man who was recently take today in Lawrence, Mass., s being implicated in the recent Jacob Hershoff & Son, watch jewelers at 91 Essex St., at that released owing to lack of incrimin dence. Simon Hershoff, who att trial, testified that two men store, held him up, took $5 fro and then $200 from his person, after they bound and gagged him and escape.

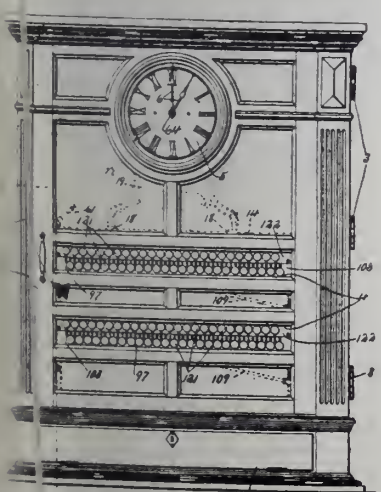
..122. ELECTRIC-CLOCK-SYNCHRONIZING APPARATUS. Ernest A. Hummel, St Paul, Minn., assignor to Albert L. Haman, St Paul, Minn. Filed Feb. 23, 1907. Serial No. 358,952



e combination with the minute and second shafts of a clock, of sleeves so supported said shafts as to be normally rotatable thereand capable of independent rotation thereon, t offset from the second hand sleeve, and an ically operated arm adapted to be brought dically into locking engagement with the

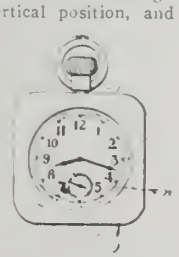
hand sleeve, a connected lever arm having in its free end in position to receive the hand sleeve and offset post when in alignherewith, a dividing lever extending across ot in position to engage with and turn the post into the path of the lever arm, and holding back the dividing lever when said arm is in locking engagement with said

..2. TIME-RECORDER. William D. Hawey, Syracuse, N. Y., assignor to the Hawy Time Register Co., Syracuse, N. Y. Filed arch 2, 1905. Serial No. 248,076.

time-recorder, the combination with the ng means of a time-movement, and the

or advancing said means; of a shaft, a eiving element mounted on the shaft and therewith, a barrel mounted on the shaft and revoluble therewith, said barrel being connected to the gearing, a rotary winding member mounted on the shaft and revoluble relatively thereto, and a spring coiled about the axis of the shaft and having its ends connected respectively to the barrel and the winding member.

949,323. BRACELET. Harry R. Holbrook, Attleboro, Mass. Filed April 3, 1907; Serial No. 366,108. Renewed Jan. 6, 1910; Serial No. 536,741.



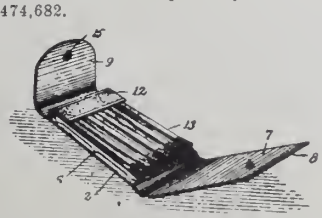
In an article of the class described, a pair of members one of which is pivoted at one end to an end of the other, a plurality of bearing surfaces

on one member disposed about the axis of said pivot and an actuated plunger on the other member for contact with said bearing surfaces being at different distances from said axis.

949,364. WATCH-HOLDING CASE. Wilson E. Porter, New Haven, Conn., assignor to the New Haven Clock Co., New Haven, Conn. Filed May 17, 1909. Serial No. 496,507.

In a watch-holding case, the combination with a flanged sheet-metal case-body adapted in the external conformation of its flange to be self-supporting in a vertical position, and the flat front

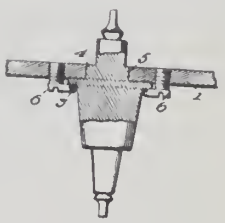
face of the said body being formed in the plane thereof with a circular opening through which a portion of the watch-crystal may project, and the upper portion of the said flange of the case-body being formed with a rearwardly opening slot for the reception of the pendant stem of the watch, of a flat sheet-metal cover formed with a shoulder abutting against the rear edge of the flange of the case-body for which the said shoulder forms a finish, and the said cover being also formed with a narrow flange entering the case-body with which it has frictional engagement and closing the rear open end of the said slot in the flange of the case-body.



949,425. FOUNTAIN-PEN. William E. Geyer, Cambridge, Mass. Filed Oct. 23, 1908. Serial No. 459,170.

A fountain-pen comprising an ink chamber, a pen, a plug having a longitudinal duct for delivering ink to said pen, a cap for the fountain-pen, a plunger slidable transversely in said plug adapted to close said duct when pressed inwardly, and a leaf spring connected at its free end with

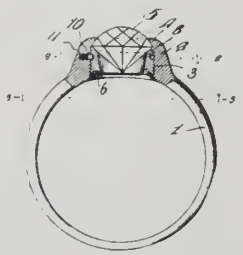
said plunger for holding the latter in its position for leaving said duct open; said spring being formed with a protuberance and having its fixed end between its free end and said pen's point, whereby the application thereto of said cap slides the edge of the latter smoothly along said spring without resistance.



949,528. MATCH CASE. Barnett Epstein, New York. Filed Jan. 28, 1909. Serial No. 474,682.

A match case having a substantially rectangular rigid plate, a body of flimsy material attached to said plate at the side edges thereof, maintained extended by said plate and forming a retaining sleeve therewith, and a folding flap at one end of said body adapted to fold over said plate.

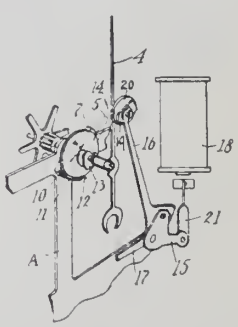
949,645. BALANCE-WHEEL AND STAFF-FASTENER. Jacob W. Cahill, St. John, New Brunswick, Can. Filed April 24, 1909. Serial No. 491,951.



In combination, a balance having an opening formed with a straight side, a staff comprising a body and reduced ends terminating in pivots, the body having a flat sided portion to snugly fit within the opening of the balance, and having an outer flange to overlap the portion of the balance provided with said opening, and fastenings threaded into the balance and having laterally extending

portions which in one position engage the flange of the staff, and which in another position clear the flange, whereby the staff may be removed or readily placed in position.

949,657. GEM-SETTING. John J. Murrin, Pine Camp, N. Y. Filed Sept. 11, 1908. Serial No. 452,650.



A gem-setting comprising a finger ring having a boss thereon, said boss having an annular inwardly projecting lip at its outer side and an opening extending entirely through said boss, said opening being provided with interior screw threads, a threaded collar having a beveled upper edge, said collar being fitted in the opening in the boss with its beveled edge bearing against the under-

side of a gem seated in said boss against the annular inwardly projecting lip, said collar being provided with an annular series of sockets disposed in the periphery thereof, and a spring bolt seated in a recess in the inner wall of the boss for engaging one of the sockets in the collar, whereby the gem is permanently seated in the boss against removal without destruction of the collar or spring bolt.

949,705. CLOCK. Ernest A. Hummel, St. Paul, Minn., assignor to Albert L. Haman, St. Paul, Minn. Filed Nov. 23, 1909. Serial No. 529,582.

In a clock, the combination with an arbor, and a hand-carrying sleeve loosely mounted thereon,

of a disk fast upon one of said parts, and a shoe fast upon the other of said parts, one of said parts having means for receiving the other, whereby said disk and shoe are constantly engaged but free to move relatively to each other.

Our wide experience in this line of business enables us to appreciate the conditions of a successful Auction sale. We have obtained this knowledge from our association with the Jewelry, China and Fine Arts trade of forty states of the country. It has taught us how to manage a sale to the best advantage, how to best advertise it at the least cost and get the greatest results.

Our Booklet on Auctions "Tells Our Way."

COMRIE & BROKAW

AUCTIONEERS

JEWELRY :: CHINA :: ART WARES

14 Maiden Lane, New York

This is Dan I. Murray, the most noted jewelry auctioneer in the world

SAVED FROM BANKRUPTCY

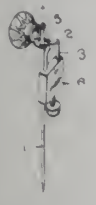
But I always do that. Read this letter carefully, Brother Jewelers. I have many letters of this kind from jewelers, attorneys, trust companies and banks. No jeweler ever failed after my sales. 20 years of success is my record. This, my last sale, ran four months and my daily average profit was 31 per cent. over cost of goods. I sold the fixtures also without a loss. This is not only salesmanship, but cool-headed business judgment. If you need money, if you want to reduce stock, if you need advice that will make you money, consult me. I often advise against auction sales, as I just did for a large house in New York, where I knew a sale would hurt them. That is the kind of a man you deal with when you deal with me, and if you need a sale you can have two men at the price of one. Gentlemen, not fakirs. I also furnish you any amount of goods desired at 25 to 50 per cent. under market prices. You pay for what you sell, return balance. Sales made on commission or share of profits.

DAN I. MURRAY

3 Maiden Lane - - - NEW YORK
151 Wabash Avenue - - CHICAGO, ILL.
512 Race Street - - - CINCINNATI, O.
183 Eddy Street - PROVIDENCE, R. I.

This is H. T. Stapleford, who has been in my employ for the past 10 years

To Whom It May Concern:



Syracuse, N. Y., February 14, 1910.

This is to certify than Mr. Dan I. Murray, who has just concluded a four months' sale with us, has pulled us out of a bad hole and, through his advice, good judgment and splendid salesmanship, has enabled us to pay our creditors in full and saved us from going into bankruptcy. We dreaded the idea of an auction, but after consultation with our creditors and others, found Mr. Murray has greatly exceeded our expectations and cannot too strongly recommend any firm to employ him who wants to realize 100 cents on the dollar for their stocks.

(Signed) VANDERBURG & DURNEY,
H. C. Vanderburg, Successor

Salvator Peloso. Filed March 9, 1909. Serial No. 482,321.

device of the character described comprising a ornamental pin, a right angled member having horizontal and vertical portions, said horizontal portion forming a loop secured to the rear edge

of ament of said pin and receiving said e vertical portions of said member forming a slide adapted to receive said tines and ways in its inner lateral edges also receiving said tines, a plate adapted to engage said and guided within said ways, a screw connected to said plate and having screw threaded ment with said slide, said screw being provided with means for its manipulation.

ITED STATES TRADE-MARKS.

following trade-marks have been adjudged to registration under the Act of Feb. 20, and are published in compliance with Section of said act. Said section provides:

person who believes he would be damaged registration of a mark may oppose the same g notice of opposition, stating the grounds r, in the Patent Office, within 30 days after plication of the mark sought to be registered, said notice of opposition shall be verified person filing the same before one of the mentioned in Section 2 of this act. If no of opposition is filed within said time the sioner shall issue a certificate of registrarefor, as hereinafter provided for."

which are stated to have been "Used 10 are registrable under the last proviso of 5 of said act, which is as follows:

provided further, that nothing therein shall the registration of any mark used by the or his predecessor, or by those from itle to the mark is derived, in commerce reign nations or among the several States, Indian tribes, which was in actual and e use as a trade-mark of the applicant or ecessor from whom he derived title for 10 xt preceding the passage of this act."]

This New Minute Numeral Dial

(MONTGOMERY PATENT)

With Upright Figures

was designed by the chief watch inspector of a large railway system, for railroad men's use and is now supplied on any of the

Railroad Models of the Elgin Watch

All Figures are Upright

Each minute is numbered with clear, sharp, upright figures. The figures of the even five numbers in the minute circle are printed in red. This dial is so well designed that the complete time is read at a glance, doing away with even the momentary calculation necessary with old style dials. Railroad men want Elgins with this dial. The complete line of Elgin Railroad Watches with this dial will be well advertised in railroad men's publications. Be prepared to furnish them to your trade.

Write your jobber or this company direct.

THE HOROLOGICAL REVIEW

Points on Safety Action of the Lever Escapement.

Written expressly for The Jewelers' Circular-Weekly
by T. J. Wilkinson.

(*Continued from issue of Feb. 2.*)

WE shall next consider what constitutes a safe action in a double-roller escape-, and in order to make the subject both ficial and practical we shall point out ein there is a similarity of the safety ns in both escapement types and ein their safety actions differ.

single-roller escapements, as explained

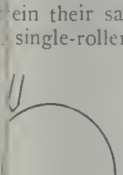

Fig. 1.

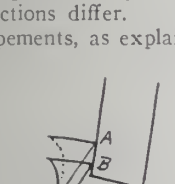

Fig. 2.

preceding paper, the principal parts he guard pin, edge of roller table, roller l and corner of slot in lever, and in- ely associated with each is the lock e escape-wheel teeth on the locking of the pallet jewel. To the foregoing require to add, it being a part of the ty action in double-roller escapements, curve of the lever horn. This we shall consider.

order to elucidate our subject we shall,

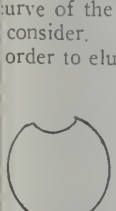

Fig. 3.

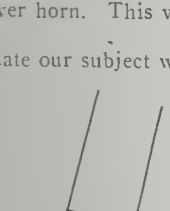

Fig. 4.

efore, give such specifications as are sary to a sound, practical explanation e safety action, as follows:

tal lock of tooth of escape wheel on t jewels' locking face, lever against its , two degrees.

stance of guard finger from edge of afety roller, one degree, when the lever against its bank. Distance of corner e slot in lever from path of roller l, lever against bank, 1¼ degrees. Dis- of curve of horn from path of roller jewel, 1¼ degrees, lever against its bank. This specification especially applies to that part of the lever horn found opposite the roller jewel at the moment the guard finger enters the crescent. The tip of the lever horn should have a greater freedom from path of roller jewel than that specified above.

This is done to avoid any possible chance of the roller jewel butting or in any way catching on the end of the lever horn while the guard finger is without the crescent.

We shall now commence our analysis and endeavor to show the relationship which exists between these parts. The specifications call for a total lock of tooth on pallet jewels' locking face of two degrees. This total lock, we may state, is composed of the lock proper, or drop lock, and the slide or second lock, their sum composing the total lock. The figures of the specifications also call for a freedom of one degree between the guard finger and the edge of the safety roller when the lever rests against its bank.

Bearing the foregoing figures in mind, we proceed to lift the lever off its bank until the guard finger is in contact with the side of the safety roller at any point on its periphery outside of the crescent, as shown in Fig. 1. The immediate effect, when these parts come in contact, is a lessening of the lock of that tooth at rest on the pallet jewels' locking face, as depicted at B, Fig. 2. Hence, when we make an escapement examination and find the conditions as before stated, we may pronounce this part of the safety action as being sound. Our figures will likewise demonstrate the correctness of this action, viz., distance separating the guard finger from the edge of the safety roller, one degree; total lock of tooth on pallet, two degrees. This separation of the parts exists when the lever is at rest against its bank, but as we lifted the lever off its bank the resultant effect was to bring the guard finger in contact with the edge of the safety roller, and this freedom of one degree was then destroyed; concurrently, there was a lessening of the lock of the escape-wheel tooth on the pallet jewels' locking face to the exact extent we moved the lever, viz., one degree. If we therefore subtract the amount of the lever's motion from the total lock of tooth and pallet, $2 - 1 = 1$ degree, the answer gives us the remaining lock, as illustrated at B, Fig. 2.

Having made this extended explanation, both theoretically and practically, we shall confine further remarks on similar conditions to a statement of the points at issue.

We shall next investigate an erroneous condition of an escapement at this phase of action. In Fig. 3 is illustrated a guard finger, the separation of which from the edge of the safety roller exceeds that of the total lock of tooth on pallet. The result to an escapement possessing this fault is that in the event of its receiving a sudden

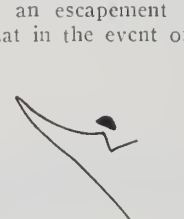

Fig. 5.

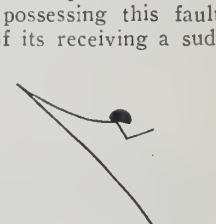

Fig. 6.

shock, the lever being thrown off its bank and the guard finger coming in contact with the edge of the safety roller, the effect would be as follows:

Owing to the distance separating the safety finger from the edge of the safety roller being in excess of the total lock of tooth and pallet, an erroneous condition and

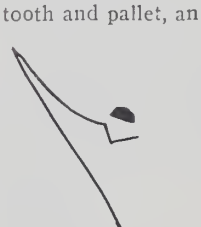

Fig. 7.

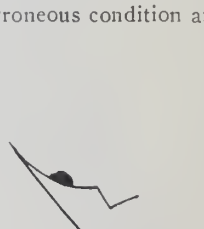

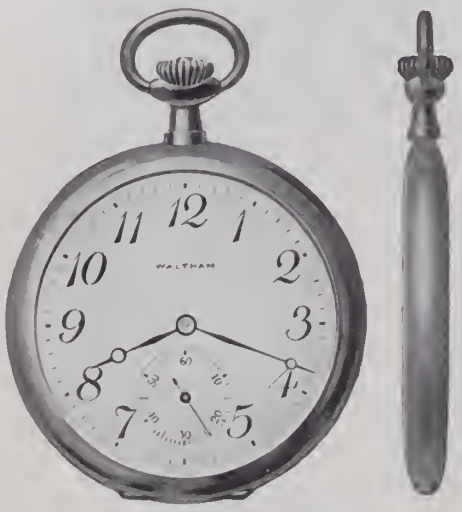

Fig. 8.

position of tooth and pallet would develop, namely, the escape-wheel tooth, in place of remaining on the pallet jewels' locking face, would enter on to the pallets' impulse face, as Fig. 4 shows.

This error is technically called a trip. The extent to which a tooth slides over the pallets' impulse face, of course, depends on the extent of over-separation of the guard finger and safety roller. If the separation of these parts was three degrees, and the total lock of tooth and pallet two degrees,

WALTHAM WATCHES

COLONIAL SERIES
Riverside Maximus
Enamel Dial

COLONIAL SERIES

Gold and Gold Filled Watches

These watches are a noteworthy addition to the Waltham line. They are exceptionally thin and may be had with Enamel, Silver Finish or Gilded Metal dials of artistic design. Colonial Series watches appeal to the most critical buyers. Equip your stock with these goods for Spring trade.

Colonial Series watches are to be had in five grades of movements as follows:

Riverside Maximus—23 jewels, adjusted to temperature, isochronism and five positions.

Riverside—19 jewels, adjusted to temperature and five positions.

Royal—17 jewels, adjusted to temperature and three positions.

No. 1425—17 jewels.

No. 1420—15 jewels.

All Colonial Series watches are cased and timed at the factory. They are delivered to the trade in display boxes. The retail selling price on these watches is fixed and plainly printed on the contract notice which is placed in the box with each watch before leaving the factory.

WALTHAM WATCH COMPANY
WALTHAM, MASS.

w would have a resultant trip of one d ree.

ur next topic is the relation of the r er jewel to the corner of the slot in the le r as a factor in the safety action.

Whenever the roller jewel is opposite the r ner of the lever slot, as illustrated in F. 5, the maintenance of the safety action d ends on the parts named. For instance, sh uld an escapement, when these parts are o posite to each other, be subject to rough u ge, the effect of which is to throw the le r off i s bank, there results a contact of t roller jewel with the corner of the lever s as Fig 6 shows, and, concurrently, we h a lessening of the lock of the tooth on t pallet, as illustrated at B, Fig. 2.

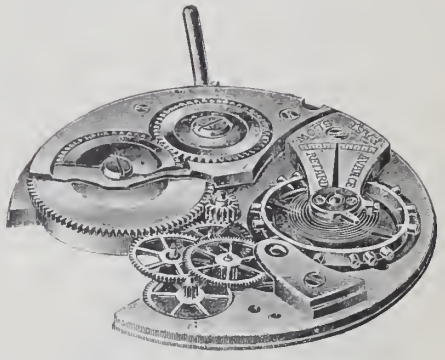
ccording to the specifications the dis- e separating the corner of the lever s from the roller jewel is 1¼ degrees o the total lock of escape-wheel tooth on t pallet jewels' locking face is two de- s: we get, by subtracting the amount w ch the lever moved off its bank until i tercepted by the roller jewel, 1¼ d rees. Deduct this from the total lock o tooth on the pallet, two degrees, and we h 2 — 1¼ = ¾. The answer now repre- s s the extent of the remaining safety lock o tooth on pallet when the corner of the le r slot came in contact with the face of th roller jewel.

We shall next illustrate a condition of e r such as we sometimes meet when e apements have been tampered with by w kmen who are not acquainted with the p inciples of escapement construction. We s l suppose that for some reason the act- in length of the lever had been tampered w —in short, someone cut away the cor- n s of the lever slot. This would cause a excess of freedom between the corner o he lever slot and the face of the roller j el. (See Fig. 7) We will assume this f dom now amounts to three degrees; the t l lock of tooth on pallet jewel being two d rees, the result of such a condition of t parts named would be that if at this p se of action the lever chanced to jump o its banking and the corner of the lever s met the face of the roller jewel we s uld have a trip, as Fig. 4 pictures. This e or, as explained, is disastrous to the t e-keeping qualities of a watch.

Our readers will now see that the safety a on of single and double roller escape- n nts corresp nds in so far as our remarks o the safety action have gone. We now, h wever, arrive at their point of difference. When concluding our former paper we r marked that we would have something to s about the relation of the horn of the le r to the roller jewel, and will now state t t in single-roller escapements, whenever t guard pin is brought in contact with t edge of the roller table no contact of t face of the lever horn with the roller j el should exist. Freedom of these parts w l prevail up unto the moment the guard p enters the crescent. This portion of o r subject we introduce here in order to a ble us to make a comparison with rela- t ely the same parts in a double-roller e apement.

We find that the safety actions of both t es of escapement are alike up until the t rd finger of the double-roller escape- m nt enters the crescent of the safety roller; when this happens the safety action of a double-roller escapement then devolves upon the roller jewel and that part of the horn which at that precise moment may be opposite the roller jewel. Should the lever at the exact phase of action described leave its banking, the result of a shock or otherwise, the face of the lever horn will strike the face of the roller jewel, as illustrated by Fig. 8. According to our specifications the curve of the lever horn must be such that in the event of an accident such as is shown in Fig. 8 no trip can take place. Hence if we state a curve for that part of the lever horn which will be opposite the roller jewel at the precise moment the guard finger enters the crescent of the safety roller, as one that will allow for 1¼ degrees of space between the face of the horn and the path of the roller jewel when the lever rests against its bank (we before allowed two degrees of total lock of tooth on pallet, lever against its bank) we will then have the following result: 2 — 1¼ = ¾. This amount represents the remaining or safety lock of the tooth on the pallet (see B, Fig. 2) whenever, from any cause, the lever horn and the face of the roller jewel meet.

(To be continued.)



A New Thin Model Watch.

THE following from the columns of the *Deutsche Uhrmacher-Zeitung* describes a new and interesting departure in the construction of thin model watches: "Thin model watches on account of their flatness have as a rule proven themselves a constant source of worry and annoyance to watchmakers. The old style thin model watches when of a high grade and practically new can be repaired, but when such watches from use or abuse become worn in the bearings for the center wheel pivots the result is a tilting of the center wheel which causes contact of this wheel with the balance or hair spring, this defect being alone attributable to lack of room in the parts mentioned.

In the next few years watchmakers will find the old type of thin watch an endless source of trouble to repair. It therefore becomes a pleasure to call the attention of watchmakers to a thin watch made by the Tavannes Watch Co., of Tavannes, Switzerland, that, notwithstanding its thinness, provides plenty of room for the escapement parts; in fact as much room is provided for these parts as is usually found in the ordinary thick watch.

The change made from the old style of construction has been accomplished in a comparatively simple manner, namely, that the center wheel which formerly crowded the main spring barrel, balance and hairspring has been omitted. The illustration shows a part of the lower plate cut out in order to show the new idea and arrangement of the parts. The usual center wheel pinion is present and, as in the old style, is drilled through, to receive the center post, but the center wheel is abolished; the center pinion works into a very strong toothed steel wheel which is embedded in the plate. The power from this steel wheel is transmitted by means of two other wheels to the wheel which carries the second hand (the fourth wheel of watches of the usual type). It has therefore one wheel and pinion more than that found in the ordinary pocket timepiece. The advantages thereby attained are very substantial ones; first, one can raise the main spring barrel much higher. This feature allows for the use of a stronger main spring and consequently the balance can be made much heavier and the timing results improved. Heavy balances are much less affected by the shaking all watches are subjected to and the practical results obtained are decidedly superior to watches whose balances are of comparatively light form.

By means of the innovation mentioned, more space in height, etc., is gained for

A NEW THIN MODEL WATCH.

the balance and hair spring. This extra space provides room for a Breguet hair spring which, under the old form of construction, could not be successfully used. The watch from which this description has been given was of the 19-jewel type, the fork and pallets of one piece, with the pallet stones visible. All parts were highly polished, and the general finish was faultless. The Breguet spring of nickel steel added both to the attractiveness and timing qualities of the watch. The daily variation remains within a few seconds.

Strange Disappearance of a Watch.

TWO years ago a prominent ranchman from the northwest stopped at the Queen's Hotel in Montreal and, while taking an afternoon nap, lost his watch. How it disappeared he never could tell. He had a vague impression that while half asleep some one entered the room, but he was not willing to swear to this. All that he could tell was that he had lain down on the bed and when he arose the watch was gone. A thorough search was made to discover the timepiece, which was of gold and had certain associations which made it of great value to the owner, but he had to go back to the west without it.

During the usual cleaning process of the room, last week, the carpet was taken up; a crack was discovered in the floor near the wall, with something strange glittering in it, and the lost watch was found.

The only way the thing is accounted for is by assuming that the watch slipped out of the man's vest pocket as he turned over on the bed during his sleep and slid along the floor until it dropped into its hiding-place.

the movements are effected by means aby alarm clock, which, as the motor, lden behind the piece. First as re- the "sky," it is governed by the key alarm, which, on winding, moves the the left (as seen by the observer) at the moon disappears behind the Below the moon, in the opening a railway bridge, we note the word (Monday); in this space, therefore, ays of the week are shown.

o pins, on the sky plate, enable us, in aily winding of the alarm, to show oon in a new phase each time and to the day of the week one space for- The apparatus that effects this ad- is shown in Fig. 3. The aforemen- journal unfortunately furnishes no ed explanation of this arrangement, ntly relying on the skill of the reader, can interpret this representation for lf, or can adapt it, in practice, with changes.

going alarm, as the spring runs , turns its key, as is well known, in everse direction. This is connected the sky in such a manner that the sun in the morning, after winding, is on the extreme left, at midday in the center and at evening it disappears behind the hills. Then the moon makes its appearance, moving in the same direction across the sky, or rather with it after, by the unceasing turning of the alarm key, the day's star or sun has been made to vanish.

If the sun, as well as the moon segment, are cut out and replaced with transparent substance by means of different-colored lights, produced with the aid of small lamps, the effect may be heightened. In the same

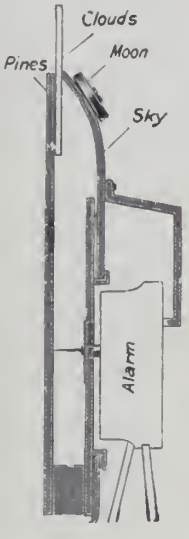

Fig. 2.

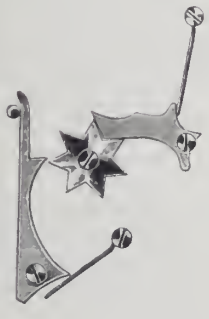

Fig. 3.

manner the painted landscape, after the style of the diorama, may be made, as it approaches the observer, to assume gradually a more realistic form by making a miniature landscape of Tufa, artificial flowers, etc.

The saw-mill displays a sun-dial, and this dial flies in the face of all laws, in the interest of the unfair competition, for while it appears to be a sun-dial, it is also operated by moonlight. It really does "go," although here again the ubiquitous alarm is called upon. To its hour canon a double pointer is attached, which marks the "shadows." One-half of the pointer is hidden behind the landscape; the other, which begins its work at six o'clock in the morning, stands at midday on the XII as it should do.

To still further enliven the landscape, the water-wheel is mounted on the staff of the escape wheel and revolves simultaneously with this wheel. In the background of the saw-mill a saw moves up and down, keeping time with the lever fork, with which it is connected. Thus this arrangement develops possibilities we should never have attributed to the modest baby alarm.

It may readily be imagined, says the *Deutsche Uhrmacher Zeitung*, that the effect of such a contrivance on the spectator will depend, in great measure, on its construction. In the country it may be possible to paste up the background from colored picture sheets. In large cities greater regard for art must be displayed. The pines need not be just a poisonous green; the moon may, however, depart slightly from the conventional and greet the passer with its most engaging smile. But it must not be ridiculous,

Another Explanation of Broken Mainsprings.

THERE has been no little discussion of late as to the reason why mainsprings break. Many and various reasons have been given, but from long experience and numerous experiments I come to the following conclusion:

While the amount of work a spring has to do in keeping a timepiece in motion is always the same, the strain it receives in being wound up is different with every person winding it, and every time it is necessary to do any winding.

There is no means of telling when a timepiece requires to be wound up, nor to show, while winding it, how much more winding it requires and when to stop. Persons generally wind the watch until it will go no further, and if the winding is done quickly and vigorously, the spring will break.

Now, what breaks the spring in this case? Take the broken part in two pliers; you can bend it slowly considerably, but do it quickly and it will snap off. In winding, the large coils or circles have to be bent into smaller ones, and a reasonable length of time is required for the operation.

A spring not properly hardened or tempered will break in one or two windings, but why does a spring break after two or six months in use and between two and six hours after winding?

Look carefully at the sides of the very same spring. Instead of showing wear all over, as old springs do, this spring will show hard wear in spots. By that you can readily see that this spring has received short bends. Very likely, before it was hardened and in coiling up by winding, those spots would not bend as easily as the other parts.

Now let us see what happened to this very spring. As it was wound up the coils were held tight, the smaller ones by the larger on the outside. Only the very largest one on the outside could begin to open up, but no sooner does it open a little when the second coil finds room to do likewise, and so on, until the very center one is reached.

When a spring is well made, every part of it is equally flexible. A circular motion sets in (it is true, with considerable friction), but the motion is almost gradual and even, but when one part is stiff and does not bend with the circular motion of the spring, then the unwinding becomes intermittent and jerky. Every jump it makes causes a strain which is felt by the center coil, which has already opened up and, having space on both sides, stretches so suddenly that it breaks the spring.

A perfectly made spring will last a very long time, but the action of being bent in and out by winding so many times will toughen the metal so much that it will break, and sometimes the sudden shock of the first break will shatter the spring into a hundred pieces in its confined space.

Yours respectfully,

S. Kahan, Watchmaker.

A **UNIVERSAL** selling plan that means more sale

Three-Ply All Gold and Permanent Watch Cases

MR. DEALER:—

Some reasons why you should stock our Cases:

Every factory claims to make the best on earth, a trial order will convince you we do.

Every factory claims to put more gold into a case for the money than any other. Assay them. If ours does not prove the best value we will pay the loss of making the assay.

Because of the method of construction of our case it will outwear all others.

We have never sold Mail Order Houses. We have turned down every overture made us by Mail Order Houses.

If we are giving your customers good value—

If we are giving you a good profit—

If we are refusing to sell Mail Order Houses and other unfair competitors of yours—

Are we not entitled to a share of your business?

Send for a Catalogue and let us have a trial order.

PLATINUM AND GOLD SETTINGS CARRIED IN STOCK AT BOTH ADDRESSES

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Easter Suggestions for Enterprising Storekeepers.

Written expressly for The Jewelers' Circular-Weekly by G. A. Dazney.

THE retail jeweler will have a chance to reap an unusually early harvest this year if he advertises properly and in ample time, because the Easter season comes in early, that is on March 27, several days in advance of last season. March 1 is none too early to begin the advertising campaign. The advertisements should be fresh and should fairly sparkle with suggestions for Easter gifts.

Wedding Gifts.

All kinds of wedding gifts should be featured in attractive single and double column advertisements, occupying not less than six inches of space. The regular line of wedding gifts, including cut glass ware, berry dishes, celerys, nappies, vases, pitchers, etc., should be mentioned with their prices, besides the extensive line of jewelry which is always shown by traveling representatives well in advance of this season.

Good sellers are gold lockets studded with precious stones. The inevitable diamond may be featured fearlessly.

First Communion Gifts.

Prospective brides must have diamonds and wedding rings, and Springtime and Easter time is ring time. But the giving of Easter gifts is not alone confined to those who buy for weddings. In many of the churches throughout the country confirmations and first communions take place at Easter, and these ceremonies clear the way for the sale of a miscellaneous lot of jewelry.

A fine drawing card consists of rosaries, which may be purchased at all prices and in all styles, from the cheap imitation stones to the genuine and very valuable ones. Rosaries can be displayed in the show window in a manner which will greatly accelerate their sale.

It would pay the jeweler to have made to his order, if necessary, a number of cheap but neat white paper boxes, lined with satin. These boxes might be made in the shape of hearts, and could be about four inches long at their widest point.

Arrange these heart-shaped boxes in the flat surface of the window in the form of a semicircle. At the left and just behind them place a silver candelabrum, one on either side. Then in the space within the semicircle, place a line of medium-priced gold jewelry, engagement rings, neck chains, lockets, pendants, la vallieres, etc., etc. The flat surface of the window should, by the way, be covered with a white material. Satin would look best, and a cheap grade may be obtained at a low price.

Clean Show Windows.

The show window should be spotlessly clean at all times, but especially so at Eastertide. The writer while traveling through the west, a short time ago, was rather nonplussed for the time being at the decidedly repulsive appearance of the show window in a local jewelry store. It was difficult to understand how a man could do business and keep his window in such a conspicuously dirty condition.

The window in question contained a jumbled mass of stock, including watches, hat pins and antiquated sleeve buttons, etc., etc. The watches were inserted in an old-fashioned tray, which contained apparently the dust of a quarter of a century. The flat surface of the window was covered with dark velvet, and that, too, was covered with dirt. The onlooker went away from the window with only one thought in mind, and that one of dirt, and not of jewelry or watches. The jewelry and watches were in fact entirely overwhelmed by the preponderance of dust and dirt.

There is no excuse for a show window of this kind. It costs no money to keep a show window clean. If expensive material, such as velvet, etc., cannot be obtained to cover the base of the show window, crêpe paper may be purchased very cheaply and may be changed frequently, thus keeping the window always spick and span.

In his Easter advertisements the advertiser should never fail to request the public to inspect his show windows, and the latter should, of course, not be disappointing.

A good idea for an Easter display is to have suspended from the ceiling a dove, bearing in its bill a white silk ribbon, attached to which is a gold cross. This will focus the public's mind on another very suitable Easter gift in the shape of gold crosses. These are merely suggestions given with the idea of making the expenditure attending the display as small as possible. More elaborate displays are in or jeweler can afford them and if h warrants them.

Besides the regular newspaper ing which should always be done time, it is a good plan to issue a tle folder, which can be gotten o expense. These might be sent t the parents or guardians of first cants, or to a list of persons wh "favors" after Easter. The first list is not so hard to obtain, bec of the churches publish name parishioners in a little periodical a church calendar.

Timely Accessories.

Still another excellent means ing trade during Easter is to ha of high class wedding cake boxes orately embossed covers. These be secured with designs represent inlaid with mother-of-pearl with of-the-valley designs in hand pai etc., etc. Most of these boxes prices, and may be sold at a gen

The Law and the Retailer.

By Bernhard Raymond, LL.B.,
of the New York Bar.

[EDITOR'S NOTE.—The articles published under the above caption have been written expressly for JEWELERS' CIRCULAR-WEEKLY and with the especial needs of the retail jeweler in mind. Considerable matter of a generic nature has been published in various journals, but the purpose of this series of articles is to give only what is believed to be particularly valuable and helpful to the jeweler.]

(Continued from issue of Feb. 9.)

Relations Resembling Partnership.

THERE are many legal relations which very closely approach that of a partnership, but which must be kept clear and unfounded with that of partnership. A ready and general conception of what does not constitute a partnership affords an accurate understanding of a partnership afforded.

Joint Tenants and Co-Ownership.

Joint tenants and co-owners are not to be considered partners in the legal acceptation of the term. The characteristic features of a partnership differ in many respects from that of a joint tenancy or co-ownership.

First, co-ownership is not necessarily the result of an agreement to create it, while a partnership generally is.

Second, co-ownership does not involve the sharing of profit or loss; it may be incidental thereto, but not an essential element of it, while partnership necessarily implies and, in fact, is the leading characteristic of a partnership.

Third, co-owners are at liberty to transfer their shares, without the consent of their co-owners, by transfer, assign and convey their respective interests, and the assignee is released to the position of the transferor. A partner positively cannot do this, and the party to whom he assigns his interest cannot become a partner without the consent of the remaining partners.

Fourth, the co-owner, as such, is not the agent of the other co-owners without the express or implied authority of the other co-owners, while each partner is the agent of the partnership.

Fifth, a co-owner has no lien on the property of the co-owner for expenses incurred for the common benefit, while a partner has such a lien.

While the relation of partnership and that of mere co-owners as distinguished above are clearly separate from one another, the relation of co-owners not infrequently merges into that of a co-partnership. That is when they employ the common property in business for the purpose of profit and divide the profit between them a partnership may result.

As where several persons jointly purchased jewelry, clocks and diamonds for the purpose of re-sale, with the understanding to divide the profits resulting from the transaction, a partnership was thereby created.

But persons who purchased goods not for re-sale and the sharing of profits, but for the purpose of dividing the goods between themselves, are not to be regarded as partners.

In a case where two men bought a tower clock for the sum of $500 for the purpose of sale at a profit, it being agreed that neither one should have possession of the clock, and while in his custody it was to remain at his risk in case of fire or burglary, and each was to make an effort to procure a purchaser, but a sale was to be made only with the concurrence of the other, the parties were held not to be partners.

Who May Enter Into a Partnership.

As a general rule any person capable in law to enter into a contractual relation may become a partner.

(1) Aliens are capable of entering into a partnership without the slightest restriction, provided that those aliens are subjects of a country at peace with our own.

War between the nations of which the partners are citizens works a suspension and often a dissolution of the partnership. (Hubbard *v.* Matthews, 54 N. Y., 43.)

(2) Infants may become partners and have the same rights and powers as adults, except that they may at their option repudiate their contracts.

An idiot, lunatic or insane person cannot enter into a partnership, for the reason that such persons are incapable of entering into a contract. While the contract is voidable, yet, if the other party was ignorant of the insanity, and the contract has been executed and to all intents and purposes appears to be fair and conscionable, the contract cannot be set aside unless the parties can be restored to their original position.

Insanity of a Partner After Formation of Partnership.

A partner's subsequent insanity does not of itself cause a dissolution of the partnership, but will frequently justify a decree of dissolution.

(3) A corporation cannot enter into a co-partnership with another corporation, firm or individual in the absence of any authority expressly conferred by the articles of incorporation.

(4) Two or more firms may enter into co-partnership and one firm may enter into partnership with an individual.

As respects third persons, dealing with the co-partnership, the associating firm or firms usually lose their identity. Each member of the firm is liable as a partner in the joint firm, but as respects themselves, their interests and division of profits or losses, the associating firms are regarded as the partners. (Raymond *v.* Putnam, 44 N. H., 160.)

No Limit to Number of Partners.

Any number of persons may associate themselves into a partnership for any lawful purpose. There must, naturally, be more than one. But no person can be introduced in the firm as a partner without the consent of all the remaining partners.

Consent in Advance.

Consent to bring in new persons as partners into the firm may be easily provided for in the contract of co-partnership, and any terms may be agreed upon for such contingency, provided they are fair and reasonable.

Characteristics of a Sub-partnership.

One or more partners of a firm may, but not all, unite with a third person to form a partnership as to the particular interest of such partner or partners.

Such a partnership is often called a sub-partnership, and the person or persons so associating with the partner is termed a sub-partner.

An arrangement of this character amounts to a partnership within a partnership: it depends upon the existence of the superior or original partnership to which it is subordinate. It has all the characteristics of a partnership between the immediate parties to it, but the third person does not thereby become a partner in the original partnership, nor is he liable as a partner for the liabilities and partnership obligations of the original firm. He has no right to an accounting as a partner in the original firm, but only as against such members of it as united with him to form the sub-partnership.

A sub-partner may, however, render himself liable as a partner of the original partnership by holding himself out as a partner and thus inviting credit for the dominant partnership.

(To be continued.)

A Simple and Effective Window Display.

DISPLAYS which have attracted a great deal of attention are often of the simplest kind. A display, if seasonable and symbolic of the occasion or time of the year at which it is made, is especially attractive.

As graduation and Summer time approaches it will be found profitable to exhibit jewelry novelties and a line of high-class fans, which might be effectively displayed as follows:

Secure several yards of vari-colored ribbon measuring about three inches in width and allow this to radiate from a point in the center of the window and well in the rear toward the sides and top of the show window, thereby forming an immense fan. The ribbon may be used on the white paper on which it comes in order to give it more rigidity.

The different ribbons radiating in different directions resemble the rods of a fan and may be used on which to display fans for graduation gifts or even jewelry. Seasonable plants and flowers should be arranged on either side of the main piece in order to set it off to good effect. G. A. D.

Don't forget St. Patrick's Day when arranging your plans for future window displays. More interest is being in taken in that day every year, and hence the opportunity for the enterprising. Miniature gold and enameled harps, serviceable as brooches, will sell well. These may be made up to order without any difficulty. An appropriate drapery for the rear of the window would be one of green cloth with a large harp in the center. The harp might be made of gold paper.

Nevers Pottery, Its Origin and History.

The Nevers factory is incontestably of Italian origin and has been thought to go back to the second half of the 16th century under the influence of Louis de Gonzague at the time of his marriage with Henriette de Clèves, but nothing corroborates this supposition. It is, however, true that pronounced traces of the Italian style

Rouen, has had its historian, Mr du Broc de Ségange, who has published a beautiful book, filled with precious documents, on the faience of Nevers and who, in his "Study of the Origin of Ceramic Production at Nevers," thinks that the foundation of the first factory can be credited to Mr. Conrade, a gentleman from Savone, who,

hands of potters from the detestable shops of degenerate Italy. A mere examination of the pieces of this period which are in the Cluny collections completely justifies the opinion so tersely expressed by the author of *"Merveilles de la Ceramique."*

If the origin of the manufacture is obscure, its developments in the 17th century are of considerable importance, for it follows, from documents found in the archives of the city, that numerous workshops were opened at the same time with those of the successors of the Conrade brothers, estab-

SOME INTERESTING SPECIMENS OF THE FAIENCE OF NEVERS.

found in the pieces of the first period of manufacture, which cannot go back of the beginning of the 17th century. It therefore appears certain that some Italian at this time established factories at Nevers, which became the starting point of an important manufacture which increased considerably under the management of the Conrades, a family of gentleman artists who came from Albissola, near Savone, on the Riviera of Genoa.

The manufacture at Nevers, like that at

according to that, would be the founder and head of the Nevers school; but, on the other hand, A. Jacquemart, whose authority in such matters cannot be doubted, declares—and perhaps rightly—that he cannot accept this view, and alleges that there are traces at Nevers, and particularly in the Château of Gloriette, of an Italian school which was anterior to the arrival of the Conrades, and he adds that the beautiful pieces in the Italian style, such as the vase at the museum of Cluny, cannot have come from the

lished in 1602, and that in 1743 there were at Nevers factories of enameled faience.

Here, as at Rouen, signatures are almost always lacking; initial letters and monograms are plentiful, but with few exceptions the greater part are inexplicable.

The production at Nevers belongs to three distinct epochs—that of the Italian influence, to which belong all the pieces which recall by their shape and their decoration the traditions of the school of Urbino of the 16th century; that in which the Oriental charac-

NEVERS FAIENCE—XVII. CENTURY.

Jugs and Cider Mugs of Two Centuries.

(From the *Canadian Pottery and Glass Gazette.*)

CIDER mugs of porcelain or earthen ware are to the licensed victualler of the west what the pewter of three generations ago was to his confere of the east and south.

Now that cider has obtained brevet rank as a wine in all the great London hotels and restaurants, and that there is a steady demand for pure cider from Khartoum to the Cape and from Tokyo to Gibraltar, a cider-mug cult has already begun, and the prudent housewives who have treasured up the cups of other days can count with certainty on the possibilities of an unearned increment. Throughout the "West Country" inn-holders and taverners, great and small, have always prided themselves on the number and variety of their cider mugs, just as the thrifty housewives of East Anglia and elsewhere set special store by their polished platters, and the Welsh matron finds delight in an array of carved wooden spoons. Cider mugs were chiefly manufactured in Leeds, Liverpool, Worcester, Bristol, Brislington, and throughout Staffordshire. In Devonshire and Somersetshire, both essentially cider counties, vessels of stoneware (Lambeth) and the productions of Bristol, Brislington, and Sunderland are in a majority. In Herefordshire and Worcestershire one constantly comes across really fine and artistic specimens, like the Worcester transfer or the Crown Derby mugs.

The Rockingham cider mugs, made like loving cups, with two or three handles, are remarkably handsome. In Devonshire huge "comic" heads in rough stoneware were once used to indicate that cider could be obtained at any particular house. Two very fine ones are in possession of Mr. Straun Robertson, of Batheaston, Bath, who has several curious cider mugs in his collection, including two exceptionally interesting cups, both of the same date, *circa* 1793, the one Liverpool and the other Leeds. A ship with patriotic verses adorns the first, and upon the second is portrayed the execution of Louis XVIII.

Lustre ware, from the middle of the 18th century up to the first decades of the Victorian era, enjoyed a very large share of popularity throughout the Midlands, and also in the West and South of England.

The cider drinker seems at one time to have been a lover of practical jokes and horseplay, for many of the "mugs" have inside them toads, frogs and other repulsive reptiles calculated to alarm the unwary. Many old cider mugs are covered with verses in praise of the apple and the health-giving qualities of its juice. The latter was generally regarded as a specific for longevity. That this was by no means a popular delusion is shown by the statistics collected in counties as wide apart as Devonshire and Worcestershire.

The manufacture of worthless imitations of these old-fashioned drinking vases is common, but the counterfeits are nearly always heavier and clumsier than the genuine article. The finest Worcester, Leeds and Liverpool cider mugs are of quite phenomenal lightness.

For decorative purposes the better kinds of cup are exceedingly effective. They look particularly well on the old oaken dressers, even more extensively sought for than the mugs themselves.

The Dallas Optical Co. has removed from its old stand on the second floor on Main St., Dallas, to a much larger and beautiful shop on Murphy St., opposite the Southland Hotel. This to-day is one of the most up-to-date and beautiful shops in the country.

Use Specially Refined Silver

In making alloys or following any particular formula, the Manufacturing Jeweler will oftentimes find his operations hampered by some apparently trifling impurity in the metals he employs.

He can work to better advantage if he uses our Specially Refined Silver. This approaches more nearly to absolute chemical purity than any other obtainable under circumstances that allow of its use for manufacturing purposes.

It is better than .999 fine, and, as it never varies, its quality may be relied upon.

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2418.—**Clean Celluloid-Covered Mountings.**—*How can I clean celluloid-covered comb mountings? C. C.*

ANSWER:—Rub up with a woolen cloth and a little tripoli and polish with a clean woolen cloth.

QUESTION No. 2419.—**Soldering to Glass.**—*I want to solder some metal rings to a glass vase. How can I make solder adhere to the glass? S. G.*

ANSWER:—The latest process known is that of Cailletet's, which, as described by him, consists in covering the glass where the soldering is to be done with a thin layer of platinum. This platinum covering is obtained by covering the slightly heated glass, by means of a brush, with very neutral chloride of platinum, mixed with essential oil of chamomile. The oil is slowly evaporated, and, when the white and odoriferous vapors cease to be given off, the temperature is raised to a red heat. The platinum is then reduced and covers the glass tube with a bright layer of metal. Upon fixing the glass thus metallized to the negative pole of a battery of suitable energy and plunging in a bath of sulphate of copper there is deposited upon the platinum a ring of copper. Soldering can now be done on the copper, by means of tin solder, with a soft flame or a soldering iron. If the glass is cold be careful to prevent cracking during soldering.

QUESTION No. 2420.—**Imitation Ivory.**—*We could use some imitation ivory for handles on manicure sets. Can you tell us how we can produce it? I. & P.*

ANSWER:—According to the *English Mechanic* a good imitation ivory can be produced by the following method: Wash sound potatoes, unbruised, in dilute sulphuric acid until clean on the surface, then boil them slowly in fresh sulphuric acid until quite thick—almost solid. Wash them in tepid water, and then in cold, until free from acid, and dry in a warm place. This substance can be moulded and turned well like ivory, and is far the cheapest to make of any. *Another:* Mix ivory powder, bone powder or powdered egg shells with water and grind to an impalpable powder in a mortar. Evaporate off the water and mix glycerine and gelatine, or glue, with it to form a putty. A little yellow or brown may be added if necessary to give appearance of age. Press this putty into a previously oiled mould and leave to dry. Dry at 140° to 160° F. under pressure. *Still another:* Mix powdered ivory bone or egg shells with 10 parts diamond cement and 1 part glycerine. All these imitations can be used for repairing and filling up cracks in ivory.

QUESTION No. 2421.—**Cleaning Silver Gilt Plate.**—*A lady customer recently asked me how to clean silver gilt plate so the shade of gold and silver would not be destroyed. Please inform me how to do this. C. S.*

ANSWER:—To keep silver gilt plate in its original shade it should be washed about once a week with warm water, soap and a soft sponge. Wash it enough to remove the tarnish which has gathered since the last washing, then rinse in clean water to remove all traces of soap and dry with soft towels. No silver polish or powdered chalk should be used on silver gilt, as this will destroy the shade and would soon destroy the gilding or any bronzy shade.

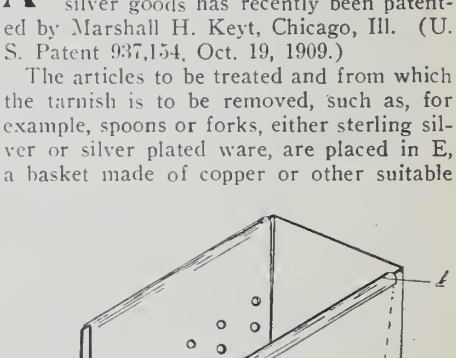
QUESTION No. 2422.—**Bronze Finish.**—*There are many bronze novelties and medals that possess a fine finish which is very artistic, especially those coming from France. Can you tell me how these effects are brought about? B. F.*

ANSWER:—Very artistic finishes are produced on bronze by the following methods: Mix one ounce each of verdigris and sal ammoniac; then make this into a thick paste with com. acetic acid. Place in a copper vessel, one which has not been tinned inside, and add to it five pints of water and boil for 20 minutes. The water is then poured off and saved for future use. The bronze articles to be treated are placed in a copper vessel and should rest on a piece of glass so there is no connection with the copper. Pour in enough of the solution to cover the articles and boil for 15 minutes, or until the right finish appears. Finish with a coat of lacquer.

QUESTION No. 2423.—**Tinning Aluminum.**—*On account of the lightness I desire to use aluminum for badges and belt ornaments, but must have them tinned. Kindly give a formula for this tinning. T. A.*

ANSWER:—*Der Metalarbeiter* gives the following formula for tinning aluminum: It has been found that the only way to tin aluminum is with an intermediate coating of copper, which can be done only by the electrolytic process. The solution for coppering consists of 17 parts water, in which are dissolved 10 parts sulphate of copper; add to this one part nitric acid. Before plating give the aluminum a matt surface, which is done by immersing it in hot concentrated caustic soda solution just long enough to obtain a white matt; then dip into nitric acid, rinse in clean water and place directly into the plating solution, using for the anode a piece of soft sheet copper. After a heavy deposit of copper, tin the pieces in a bath made by taking three parts of tin chloride and nine parts of caustic potash, dissolved in 100 parts of water. Add the potash first and warm the water a little until the solution is complete. Then add the tin chloride. This bath, when in use, must be kept at a temperature of between 160 and 190 degrees F. Tin plating begins as soon as the coppered articles are put into the bath, and in 15 to 20 minutes the coating will be thick enough.

QUESTION No. 2424.—**Etching Glass.**—*Kindly give me the acids used for etching on glass? E. G.*



ANSWER:—For etching on glass or for labeling bottles, proceed as follows: In a glazed tea cup rub some warmed parafine around the inside, and in this put zince chloride, 14 grains; hydrofluoric acid, 55 drops; water one ounce. Mix only enough for use, as it will not keep its strength very long. Do not place in glass, as it will destroy it. The writing or tracing may be done with a quill pen or camel's hair brush. After etching the glass should be rinsed or washed with cold water in order to remove all trace of acid.

A New Method of Removing the Tarnish from Silver Goods.

From the *Brass World.*

A NEW method of removing tarnish from silver goods has recently been patented by Marshall H. Keyt, Chicago, Ill. (U. S. Patent 937,154, Oct. 19, 1909.)

The articles to be treated and from which the tarnish is to be removed, such as, for example, spoons or forks, either sterling silver or silver plated ware, are placed in E, a basket made of copper or other suitable

NEW METHOD OF CLEANING SILVER.

metal. This basket rests in an outside receptacle D, which is made entirely of zinc. A solution composed of the following is placed in the outside receptacle or tank D:

Water	1 gallon
Sodium carbonate	2 oz.
Sodium bicarbonate	2 oz.
Sodium sulphate	1 oz.

The solution is preferably used warm. The electrolytic action set up between the articles and the zinc serves to remove the tarnish from the goods in a rapid manner. The metal is not attacked. It is claimed that other metals besides silver may likewise be cleaned in a similar manner.

ASSAYERS OF ORES AND METALS

LOOK AT THE COLOR

Mr. Watchmaker: The next time a traveling salesman for material calls on you, ask him to show you a bottle of Fulcrum Oil and a bottle of some other well-known brand and then compare the color. That will convince you at once that

Fulcrum Watch and Clock Oil

is superior to any oil ever produced. If an oil will discolor on the shelf or in the traveler's trunk or on your bench, what do you suppose it will do in a watch or clock?

Fulcrum Oil positively will not discolor or become rancid in any length of exposure. It is the only Watch or Clock Oil ever known which is absolutely free from acid **and we can prove it.**

Gentlemen:-

I am thoroughly pleased with my "Inverto" Staking Tool. After several months use I am still finding new points of usefulness and superiority to any other staking tool I have ever seen, and I feel confident that any progressive watchmaker who once tries the "Inverto" will surely want to possess one.

Yours truly,

Chas Ohlson

e above letter from Mr. Ohlson, superintendent of watchmaking of the world's greatest watch factories, shows what a man well ed to judge the merits of new devices, thinks of INVERTO.

u will note that Mr. Ohlson has not merely EXAMINED INVERTO, regular USER of it.

WEBSTER-WHITCOMB NEW MODEL LATHE

THE VITAL POINT

PAT. APPLIED FOR.

in a Watchmaker's Lathe is the SPINDLE AND ITS BUSHINGS. In this lathe the bearing surfaces of the spindle and its bushings TOUCH THROUGHOUT THEIR ENTIRE AREA, insuring continued TRUTH, easy running and greatest *durability.* This quality in our lathes is maintained by workmen of long experience in the operation of special machines devised for this particular work.

Many lathes may be found in the market in which the front end of headstock spindle bears only on the 45° angle. They may look well on superficial inspection, but they will run hard if the spindle is closely adjusted, and are quite unreliable for perfect work.

In buying a new lathe be SURE the spindle and bushings are PERFECTLY FITTED. Without this a lathe is dear at any price.

Our lathes are finely finished. The curves are true and the surfaces smooth. All sharp corners are carefully and uniformly rounded; this makes a great difference in the durability of the nickel plate. HEAVILY NICKELED.

In comparing lathes, the size and variety of CHUCKS, as well as the scope and general character of the ATTACHMENTS should be considered.

In comparing prices with other lathes, learn the difference in size, quality and details of construction.

The Keller Jewelry Mfg. Co.

Factory: 251 N. J. R. R. Avenue, Newark, N. J.

64 Nassau Street, New York

TO THE TRADE:

"A principle which we have always fought for has been to keep the market open for all watch cases, no matter of what manufacture, believing it to be for the best interests of the trade to allow them to buy the watch cases which they consider the best on the market and by so doing stimulate all manufacturers to their best efforts, with a view of establishing a high standard of excellence. The Dueber Watch Case Mfg. Co. in all its many years of existence has never sought to dictate to any jobber what watch cases he should use. It has never used, directly or indirectly, any method of coercion or force to either restrict the product of any watch case manufacturer, or to force the production of its cases upon any wholesale or retail jeweler to the detriment of any other manufacturer of watch cases. It employs the 'open door' policy in selling merchandise and believes that the trade should be open to all manufacturers and jewelers alike and to that end will bring all its energy to bear for the good of the entire trade."

STORE OF I. R. RUBENSTEIN, BIRMINGHAM, ALA.

Full Particulars Furnished Upon Request

Birmingham, Ala., January 25, 1910.

(Copy of original letter)

The Arnstine Bros. Co., Cleveland, O.

Gentlemen:—Answering your inquiry of January 20th as to how my business was in 1909, I can state that it went more than 40 per cent. over 1908, and my December business was 45 per cent. ahead, and in 1908, the first time I used your catalogues, my December sales showed a gain of over 40 per cent.

The increase is accounted for by the elaborate catalogues and newspaper advertisements which you furnished me with the cuts and write-ups.

Wishing you a prosperous year, I beg to remain,

Yours respectfully,

I. R. RUBENSTEIN.

We deal only with the legitimate jeweler and as a rule sell but one in a city.

WINNING ON
MERIT
ALONE

There are many ways of trying to win in the business world.

One may adopt Brute Force. That is the method of the highwayman, when he hits you on the head and takes your wallet.

Or one may seek success simply on the MERIT of his products in an open market. That is the approved method in civilized communities. It succeeds.

Jobbers, dealers, consumers, everybody responds to considerations of MERIT, and no Chinese Wall can shut it out.

For years

WADSWORTH WATCH CASES

have been winning on merit. The cases have been sold, and the business developed on the idea of QUALITY, including superior SHAPES, STYLES and ENGRAVINGS. The Cases will continue to be sold and the business to be developed along the same lines.

The Big Stick is no part of our office furniture. Dealers DON'T HAVE TO buy these Cases.

But they WANT TO and will buy them because of their MERIT, because of the PROFIT there is in them, and because there is always certainty of a SQUARE DEAL and no coercion.

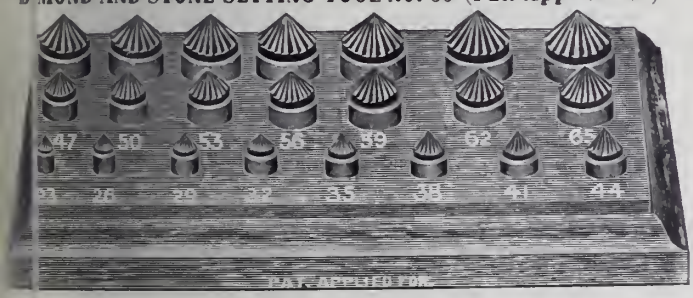
CHARCO IMPROVED WATCH GLASS CABINET, No. 85

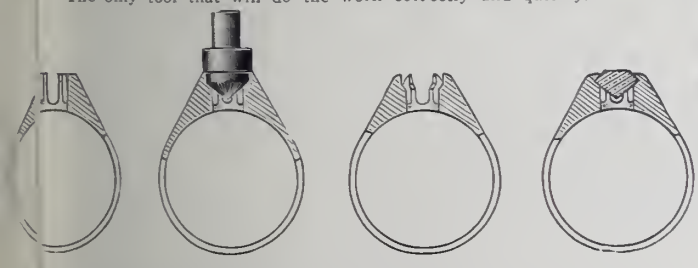
The NEW FEATURES of this Cabinet are the SKELETON DRAWERS, making an accumulation of dust and chips impossible, and the very easily read LABELS of white celluloid on the drawer fronts. The Cahinet has nine drawers, giving 1,632 spaces. It is 29½" high, 24" wide and 13" deep. The construction of drawers, arrangement of partitions to economize space and weight, and the novel method of showing contents on the drawer pulls are all novel and practical ideas and very well carried out. The Cabinet is made of oak and finely finished, and is the lightest and strongest case on the market. Spaces are provided for the small sizes of Lentilles and Genevas, and for Antiques, which no other Cabinet provides for, making it the most complete and convenient Cabinet ever offered to the trade.

Price, $16.00



PEGWOOD SHARPENER, No. 3

A new attachment, designed for use on a watchmaker's lathe, which sharpens pegwood to a hair point without breaking, and at the same time gives the point the proper concave shape. The tool is held in the lathe by an arbor fitting into a regular wire chuck as shown in the illustration, being steadied by the rest shown. The stick of pegwood is rotated by hand while the tool is revolved in the lathe, producing a fine, long, flexible point. With this tool the watchmaker can prepare enough pegwood for a day's or a week's work in a few moments, and have every piece uniformly and evenly sharpened.



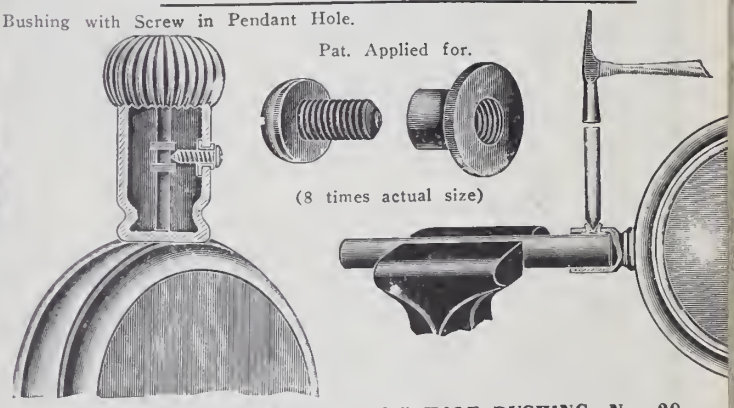
The tool is mechanically perfect, made of the best material, is durable and cannot get out of order. For sharpening the cutters the use of a fine Arkansas oil stone slip is necessary. Coarser abrasives should not be used.

Price, each, $2.00

DIAMOND AND STONE SETTING TOOL No. 85 (Pat. Applied for)

The only tool that will do the work correctly and quickly.

These tools, invented by a stone setter of many years' experience, will do the work they are intended for with absolute perfection, whether in the hands of an experienced or inexperienced workman. In eight seconds after adjustment in lathe will cut a smooth seat for any stone from 1 16 to 6 carats.



Tools are made of polished and hardened steel and are indestructible. Will fit in chucks Nos. 30 and 44.

The greatest labor saving device ever invented in the line of stone setting cutters. Put up in neat block and box.

Price, Per Set, $5.50

Bushing with Screw in Pendant Hole.

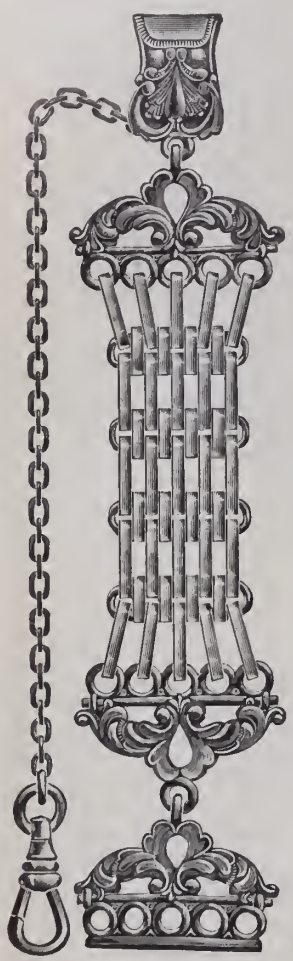
Pat. Applied for.

(8 times actual size)

THREADED PENDANT SCREW HOLE BUSHING, No. 38

Made in Brass for 18, 16, 6 and 0s Lever Set Cases, and in German Silver for 2, 3, 4 and 5 oz. cases

Cut shows watch case pendant with pendant screw hole bushing inserted and also screw, and shows repair as it looks when completed.



DIRECTIONS.—Ream hole to size of bushing, then place pendant screw bushing in hole and place pendant with bushing on arbor, as illustrated above, and with a centering punch force over the edge of bushing and then put in screw and repair is made.

No need of soldering up or plugging up of damaged pendant screw holes and damaging the pendant and case as well.

Every watchmaker knows how difficult it is to repair a pendant screw hole after the screw is pulled out, due to bending and rusting of the screws. This outfit makes a quick and good job.

Put up 1 dozen assorted Bushings and 1 dozen assorted Screws to match in a Brass Box..... 50c.

1000 BAGS DAILY

It is estimated that there are fifty million women in the United States. Not over two mill n have mesh bags. **We** must supply the other forty-eight million with machine-made mesh ba s.

The reason why machine-made Mesh Bags are better than hand-made Mesh Bags is

that we use **much harder wire** than used on hand-made bags, and machines harden it ll more in working, making wire **stiff and strong,** no **rough joints to catch,** and wear the di s. Stronger and better than soldered mesh.

We also make the only **ABSOLUTELY SOLDERLESS FRAME EVER MADE,** o er **so-called solderless** frames have joints or some parts soldered.

We are the **sole** manufacturers of machine-made mesh with **solderless** frames.

Manning-Bowman Coffee Percolator

PERFECTED "NEW CONSTRUCTION"

Starting with *cold water,* through its automatic circulating process, you will have perfect coffee, near the boiling point, in a few minutes. It also works equally well when starting with hot water. By this method the coffee is never boiled, but is distilled, which is *the secret* of making delicious coffee. The GLASS COVER is so constructed that *will not break* while in use. This important feature is not possessed by percolators of any other make.

OFFEE ODNESS IS N THE AKING

The choicest blends of coffee can be spoiled in the making and any coffee can be made a delightful beverage if prepared in the

MANNING-BOWMAN PERCOLATOR

No. 8293. SECTIONAL VIEW

WHAT WE CLAIM

Simplest in construction. Easiest to care for.

No complicated parts to clog or get out of order. Has no valves to foul and the pocket underneath the percolating tube is made large so that it can be easily cleaned.

The MANNING-BOWMAN Process not excelled by any known method for preparing coffee of the most delicious flavor.

Why Should You Pay Our Selling Expenses?

There are just two ways to buy silverware—the old way and the new. If you prefer to buy through salesmen you must pay their salaries, railroad and hotel expenses, because these items represent fixed charges which must be met. ¶ We have inaugurated a strict modern way of selling silverware. We have made Uncle Sam our salesman, and he wor without salary and without a "weekly expense account." We are equipped to sell you mail from the home office and give you more satisfactory service than you have ever receiv from traveling salesmen. Our selling expenses are almost entirely eliminated. Theref we are able to quote you prices repre-senting a

TRADE W MARK

"The Case That Courts Comparison"

Mr. Retailer:

It required a quarter of a century to bring SOLIDARITY GOLD WATCH CASES up to their present point of perfection.

Merely stamping "SOLIDARITY" on the *inside* of our cases did not do it.

It is the SOLIDARITY **Individuality** on the **outside** of our cases that did it. Individuality is the hardest thing to buy and the easiest thing to sell. SOLIDARITY CASES have it.

SOLD ONLY THROUGH THE WATCH JOBBERS

(One Block West of Broadway)

Fruit Baskets Made in Four Different Sizes
WE DO NOT ISSUE A CATALOGUE

We specialize in the manufacture of the Unusual in Goods adaptable to

The Den, The Desk, The Dresser, The Toilet, The Sideboard, The Dining Table and The Living Room.

The trade is cordially invited to call at our showrooms and inspect our new Spring productions.

"SIMPLICITY" TIE HOLDERS

(Patent applied for)

They are new to the trade, but are receiving much favorable comment. They have no spring to weaken, lie close to the tie and show **style** in every particular. Well groomed men like to wear them. Made in a variety of patterns.

Their extreme **simplicity** is a feature which highly recommends them to everyone.

New York Office: 13 Maiden Lane Chicago Office: 903 Heyworth Building

Seveninone

A NOVELTY THAT IS ALL AND MORE THAN THE NAME SUGGESTS

SEVEN SCARF PINS IN ONE

Each radically different from the other, consisting of seven beautiful stones and one mounting so constructed that one stone may be substituted for another without the least trouble.

IT'S A NOVELTY THAT SELLS AUTOMATICALLY

SOMETHING NEW IN GOLD FILLED LOCKETS

Three different finishes, and stone set. Two and three finishes on each locket. Very effective. The indications are that we will run behind our capacity on this novelty and consequently urge the trade to send in its orders at once.

WRITE TO US ABOUT IT.

Mary Morris' Lecture on Jewelry.

WHAT is style in jewelry? Is our modern jewelry artistic? These the questions which an English lady put to us here in America. The ques- r is no other than the daughter of am Morris, the famous English poet craftsman. Miss Mary Morris is ling a few months in this country and e invitation of several arts and crafts ies, is giving lectures on jewels. As rts and crafts movement sprung from William Morris idea, all who are in way interested in this large subject with delight an opportunity to hear is' daughter. Miss Morris, who is in respects "pre-Raphaelite," is striking ppearance, with dark hair, thin intel- al face, lithe, slender figure, every ment of which expresses tense energy excessive love of beauty. Like her r, she is an exponent of the mediæval —joy in labor. This gives an impres- background to her theme. She is a lete authority on the subject of jew- Not only has she herself followed oldsmith's trade—hammered gold into , cut and set jewels with her own —but she has studied the history of craft from its earliest time.

e speaks of the Egyptian workman- specimens of which have been found ncient tombs, centuries old. In these discovered gems of great value set with elous skill. The cutting of these and the exquisite art shown in their g, cannot be matched to-day. Our jewelers can give us only the crude tion.

e treatment of gold by Egyptian smen was so skilful that even the of the metal was distinctive, a won- l hue that is lost in the intense fire hich gold is nowadays subjected. Also ncients found a way to express beauty e and coutour in effects that cannot in time be reproduecd. In a wreath of flowers hammered out of pure gold, petal has a poetry all its own, con- ting to an artistic whole. A necklace once belonged to an Egyptian prin- of the 12th dynasty is made of pearls, ct in shape and hue and hung so as ce and interlace in a magic web of e charm.

ssing from Egyptian products, Miss is comes to Greek and Byzantine jew- Many of these wonderful antiques be seen in Paris at the Musée de , or in London at the South Kensing- Museum. According to Miss Morris, ce and Persia have surpassed all countries in the art of setting gems. e workers in those medieval times and were filled with love of their work. as this which gave them skill. The of combining the fire of the ruby with the tender green of the emerald, or with the clear blue of the sapphire, gave them all the ecstasy of the creative artist.

Thus it is that their work was bound up with myth and magic, even with their religion, for votive offerings and temple adornments were their chief concern.

The emphasis of the Greek workman was upon simplicity, especially in contrast to the Roman workman, whose aim was magnificence. The Byzantine jewels are also ornate and most individual in style.

The lecturer further traced the history of her art through the Gothic period, where it became decadent, for Gothic art, though supreme in architecture, failed, strangely enough to produce the finest effect in jewelry.

In the day of Gothic supremacy superstitions commenced to creep into the popular idea regarding jewelry. Some gems were reputed to bring happiness and prosperity, others to inflict misfortune upon the owner. These superstitions seem to have obtained even down to our modern times when opals are less salable than other gems.

The history of English jewels also shows decadence. The wonderful King Alfred jewel in the Ashmolean Museum at Oxford, is our finest specimen of workmanship. Our jewelry of to-day is tawdry and cheap in comparison.

Miss Morris, in closing, refrained from pointing a moral to her lecture. She merely remarked that a nation creates the jewelry of which it is worthy. Shall we go back to emulate the work of those fine craftsmen or shall we be content with these products now on the market, which to cultured taste are lacking in real beauty?

C. M. T.

Fine Basin of Repousse Silver.

ON the front cover of this issue is depicted a handsome plate or basin in repoussé silver executed in the 17th century. The basin is decorated in the style of Cellini, with a beautiful scene representing Orpheus charming the various beasts with the music from his lyre.

Orpheus, according to the Greek legend, was a son of Apollo and the muse Calliope. Apollo bestowed upon him a lyre, invented by Hermes, and with its aid Orpheus moves men and beasts, the fishes in the deep, the birds in the air, the rocks and the trees.

The rim of the plate is also chased with pretty designs. This conspicuous object of the art of silversmithing in its best expression is kept at the Pitti Palace in Florence, a repository of art, famous for its fine paintings and other art objects.

C. A. B.

M. H. Tappan, Earlington, Ky., has sold a half interest in his business to M. Gardner.

Exhibit by California Jewelry House Brings Forth a Silver Shaker Said to Have Been Made by Paul Revere.

AS noted in a recent issue a special display of silverware in Paul Revere design made by a San Diego, Cal., jewelry house resulted in a good deal of interest, not only in the articles displayed, but in the subject of Paul Revere and his silver work, and brought to light articles said to have been made by the patriot silversmith.

SILVER SHAKER SAID TO HAVE BEEN MADE BY PAUL REVERE.

One of these Paul Revere pieces, which was loaned to the San Diego jewelers to exhibit, was the shaker illustrated above, which is said to have been in the family of its present owner for over 100 years.

This piece does not bear the full name of P. Revere, as appears on most of the patriot silversmith's work, but simply the initials "P. R." Revere used his initials on some of his smaller works.

AT LAST

We have succeeded in perfecting the article Retail Jewelers have demanded for years

A PRACTICABLE IMITATION PEARL SHIRT STU

An Imitation Pearl Guaranteed Not To Break

An Imitation Pea Guaranteed Not to Come Off

They are not the ordinary glass beads filled with wax (with a tendency to break)—bu a hard, solid, durable composition with a true pearly-color and lustre equal to that of te finest Oriental Pearl.

They are securely mounted on pegs by a special process (not cemented on) and all a equipped with the Larter Automatic Shirt Stud back, in 14K. gold.

Illustrations show five different sizes from $5.00 to $7.00 per set of three studs.

Ask our travelers or mail order department to show you this line—compare them wi the ordinary imitation pearls and see the difference.

Reg. U. S. Pat. Office

Silversmiths and Goldsmiths' Work.

An Address by Omar Ramsden at the Seventh Ordinary Meeting of the Royal Society of Arts, London, Jan. 26, 1910.

(Continued from issue of Feb. 16.)

SO long as the smith remained true to his method each school or guild of silversmiths produced a different type of treatment from that of the guild or school of a town a comparatively few miles away, and when that distance was greater the difference was more startling. There is, for instance, an exquisite French cup at Oriel College, Oxford, which is a great contrast to the vigorous, bulgy onion type done at Nuremberg at the same period, or to the rather severe Gothic of our own English workers. All are good in their own particular way, and interestingly different. And they should be. Just as members of a family share a common likeness, and yet retain a separate individuality, so the art products of various places should be infinitely different in detail, while preserving the true homogeneity of style.

It was only when our greater designers and architects began to have their designs engraved and published in example books that our silversmiths fell into the pit of copying. Then all Europe began to produce little temples for salts, bigger temples for cloches and great, enormous temples for monstrances—all cast, and all architecture run little, and none of them silver in form. Moreover, this happened at that wicked period when art became scholastic, and therefore monotonous. In the hands of the adepts of the Renaissance, to be fashionable one's pepper pot had to a Cinerary urn designed by the brothers Adam.

Also at Oriel College, and of a date only 6 years later (1509) than the exquisite French cup, there is an example showing in its clumsy handling the beginning of that fall from Gothic grace which we must so greatly deplore.

The King's Lynn cup of 14th century English work may be cited as an equally beautiful, though different, instance of work done in this country, though my first example chanced to be French. This cup is also noticeable for the extensive use of enamel, which is somewhat unusual in English work.

In another field we may mention the pastoral staff of William Wykeham, 1367, at New College, Oxford, and of Bishop Foxe, 17, at Corpus Christi College. Both of these are beautiful examples of English Gothic art and that striving to do what was best in him that was the chief characteristic of the Gothic artist. He, by the way, was even equal to producing architecture in silver which did not offend architectually and yet remained silver work. There is a little in silver work, part of a jug mount belonging to David Currie, which is purely architectural—embattled wall, loopholed stations, mullioned windows, spires and conical roofed tourelles, in fact a mediæval fortress in miniature, but all so naive, charming and careless of architectural rules. One must remember, however, that the architecture it purports to represent is Gothic, ringing true, and not ruled and set of Renaissance.

The birth of Cellini—A. D. 1500—is a date easily remembered, and to my mind it is the beginning of the decadence of the silversmith as a separate artist, designing and executing his own work. Soon after this he began to look outside himself for his inspiration, to copy all and sundry, from a Venetian glass to an engraving of Raphael's cartoons, a state of things which has lasted well into the present time. For it is only of very late years that the artist silversmith has reappeared and is endeavoring to depend upon himself.

Cellini is certainly the best-known metal worker of the past, and is popularly supposed to stand for all that is excellent in the art of the goldsmith. My only excuse for mentioning him is that he is the one goldsmith that your otherwise well-educated and well-intentioned client has ever heard of, and I have more than once heard our modern artist silversmith spoken of, with unconscious sarcasm, as "Oh, he's a sort of modern Cellini." Also if it so happens that some one or two of the fine pieces of plate produced in England during, or soon after, his time still exist (as, for instance, the standing salt of the Haberdashers' Co.) it is always known as "by Cellini."

From some study of his works and comparison with his aspirations, as told in his most entertaining memoirs, it will be seen how far he falls short of what I have suggested is the true art of silver-working. He was a great craftsman and a great artist, no doubt, but his art was always that of a sculptor, working in precious metals by chance. His work (such as we have seen and read of) has none of the restraint in design and appreciation of material which is so strongly pronounced in Greek, Roman and 13th and 14th century work. It is always florid and sculpturesque, and frequently obtained by modeling in wax and casting in metal and chasing.

His own words from his memoirs give the atmosphere and aims of the period so well that I shall venture to give an extract verbatim. It describes a salt cellar which he designed for a cardinal, and which was afterward executed for Francis I.:

"I designed an oval, almost two-thirds of a cubit in size, and upon this oval, as the sea appears to embrace the land, I made two figures about a hand high, in a sitting posture, with the legs of one within the other, as some long branches of the sea are seen to enter the land, and in the hand of the male figure, representing the ocean, I put a ship cantrived with great art, in which was deposited a quantity of salt. Under this I represented four sea horses, and in the right hand of the ocean I put two tridents. The earth I represented by a female figure, the most elegant and beautiful I could form an idta of, leaning with one hand against a magnificent temple; this was to hold pepper. In the other hand I put a cornucopia adorned with all the embellishments I could think of.

"To complete this idea, in that part that appeared to be earth I repdesented all the most beautiful animals which that element produces. In the part that stood for the sea I designed the finest sort of fish and shells, which so small a space was capable of containing. In the remainder of the oval I placed several grand and noble ornaments." (These were evidently part his imagination to describe.)

No doubt this zoological and aquatic Noah's Ark was as well packed as possible, and thoroughly represented its bizarre and bombastic author.

That Cellini was an important figure of his time was obvious; a combination of artist, craftsman, poet and courtier. All of his gifts served his turn as required, but were greatly hindered by the other self, that other side of his character showing him as libertine, braggart and fiery, quarrelsome swashbuckler, who was eternally insulting his brother artists or bearding popes and princes. His great inclination to sculpture had its triumph in his magnificent Perseus, which stands in the Piazza at Florence. I venture to think, however, that if he had never been a writer of memoirs we should not nowadays know so much of him.

I must now come to that part of my paper which may be called the evolution of ceremonial insignia. It is, however, such a vast subject and one upon which excellent antiquarians have written such large volumes that I can receive scant justice in a paper of these dimensions, and must be but cursorily dismissed. I may, however, say generally that the progress made has been from good to bad. Take the best-known article of ceremonial insignia, the crown. This has developed from a very simple band of metal. In one case it was formed from one of the nails from the cross, drawn out into a circlet and covered with gold, and later incrusted with stones. In very early days this circlet was fashioned with a series of spikes, each terminating in a pearl or other jewel. This made a most becoming head-dress, especially in conjunction with the flowing hair worn by royalty in those times, when only monks and churls had short hair; times in which it meant so much that Queen Fredegonda preferred to see her sons slaughtered rather than have them part with their flowing royal locks. In the time of St. Louis the spikes had been turned into crosses and, in between, a *fleur de lys* had been introduced, making the crown one of the most beautiful head ornaments ever devised. Even as late as Bolingbroke, as may be seen on his tomb, the crown was a beautiful piece of goldsmith's work. In fact the crown of Henry IV. was a real work of art. But what is the British crown of today? A mere ill-shaped and heavy mass of precious stones.

The next most important piece of insignia, after the instruments of royal coronation, is the mace, for this is the emblem and symbol of disputed royal authority. The development of the mace is, moreover, so interesting that I should like to recall briefly its chief points. The earliest ceremonial maces were those borne by sergeants-at-arms in the 13th century. These at first were mere wooden staves or rods, bound with ferrules of metal to prevent their splitting. The sergeants-at-arms, whose duty it was to watch round the king's tent, were armed with a mace bearing some royal emblem. This was deemed sufficient authority to sanction their arrest of suspected traitors. The maces they carried were actual war maces. They were of iron, damascened with gold and silver, and consisted of a stout iron staff of about two-

fee long, with six or eight formidable
tla es at the upper part, and a leather
the attached to a button at the handle
en through which to slip the wrist, so
hi in the shock of battle the mace might
o e wrenched away.

the end of the 14th century the mayors
n lord mayors were invested with ex-
ve magisterial jurisdiction, and pro-
ed their sergeants with maces, which
a he royal arms incised or enameled on
he utton as representing the authority of
ing. By reason of this added import-
the button came to be enriched or en-
in silver and sometimes gilt, and
ve with added crestings and pierced work.
W this introduction of the Royal Arms,
ative importance of the extremities
mace were changed, and the button,
symbolism, became of equal import-
with the practical flanged end. Very
it became customary to carry the now
ry enlarged button end uppermost, this
g a period when the king's writ
to run with more ease than hitherto
with less need for breaking heads.

soon as the principle of bearing the
Arms uppermost became general, in
arly Tudor period, the flanges at the
end became merely decorative, and
e 1650 had crept up the stem until they
e no more than ornamental brackets
the head. Finally they disappeared,
ing inconvenient to the sergeants-at-
shoulder bones.

1650 the sergeants' maces were super-
ed by the Great Mace, which is carried
nly before the Mayor for dignity.
is the gradual evolution of the mace
a real fighting weapon to the bauble
romwell. The great scarcity of this
of great mace of date earlier than
is due to the wretched, fanatical aboli-
of everything that savored of regality
ng the Cromwellian rebellion. The
of the House of Commons of Crom-
time was made by Thomas Maundy,
e sign of the Grasshopper, in Foster
La. The mace by this time had come to
onsidered as the emblem of the State,
of royal authority; and it was ordered
all other maces should be of the same
and pattern; furthermore, that the said
mas Maundy should have the sole mak-
of them. Happy Thomas!

hen, at the Restoration, King Charles
back to his own again, the maces
ughout the country were altered back to
royal state, or had royal blazons,
ns, badges, or monograms added.

great number of new maces have been
since 1835 for our new boroughs.
ce they possessed no traditions, these
corporations have struck out for them-
es a new line in the design of these
s, in which novelty of form strives for
ery with extreme ugliness and absurd
ness, the introduction of little local
s being a favorite feature. The in-
ce of Foster Lane might be monotonous
hat of Oxford street is damnable.

om 1556 to 1600, and even later, there
a perfect craze for mounting all and
ry things in silver gilt. Bishop Car-
er's cup at Oriel College, Oxford, is
from a cocoanut, which is supposed
ave been washed across the Atlantic
ur shores some five centuries ago. It
stands, according to custom on ceremonial occasions, among the treasures of the College on the High Table. It once was the occasion of rather a clever compliment. When, at the commemoration dinner of 1900, Professor Norton, of Harvard University, rose to render thanks for an honorary degree just received, he took the American cocoanut, with its beautiful mounting of English Gothic silver, in his hand, and said: "As with this early visitor from America, so with the latest. It is the setting that gives the value." Surely a most courtly compliment, and one only rendered possible by Bishop Carpenter's courtly gift of former years. And what more stately form can a complimentary gift take than that of a cup of precious metal, if, as Ruskin stipulates, it is wrought with art and cunning workmanship? The act of drinking a toast in public has always some graceful and striking significance, and, therefore, consorts ill with an ugly instrument. As the well-known French writer, Jules Claretie, expressed it, in an article written a few years ago:

"To propose a toast is a real art, and I may say it is an English art. Those who invented the word know how to chisel the thing. They have humor in the manner of it; a fashion of treating grave matters with familiar ease, of avoiding the tone of a prepared lecture, and remaining in that of social gossip. A toast truly should be a dessert."

After 1650 the degringolade becomes more marked. We find beaten work so sloppily done that it should be in copper or pewter. It shows, however, that the kind of mind which produces Home Arts Exhibitions has a pedigree dating back at least to these days. I believe we should find more of this kind of stuff, but for the fact that the patrons of the silversmith, even at a later date than 1650, had eyes educated to nobler forms and knew a poorly executed thing by instinct. Also the goldsmiths' guilds were still a power and sat down heavily on poor art and puerile workmanship.

About 1714, we find candlesticks which are good examples of faceted work, which is a proper and legitimate treatment of *cast* silver, when it is desirable, for some reason or other, to produce by that method. Each surface can be cleaned off by a file, which on *beaten* work, of course, should play no apparent part.

By the 18th century we see candlesticks which are examples of die work of this stage of production. These are stamped in small sections of very thin silver, and then built up by a workman, who is very skilled in this sort of trick work, and who should be able to build a mighty castle out of a pack of playing cards, but could not, in all probability, beat out the simplest bowl of good form. Copies of this sort of candlestick are made literally by the thousand in Sheffield to this day. They owe their apparent strength to a solid filling of resin and ashes, but are sold every day as solid silver. Not long ago I saw a mirror back, bought by its owner to be melted up, "and re-fashioned into something really artistic," to quote her own words. It really did feel heavy and worth melting up, but, after the removal of the glass, a large piece of sheet lead and a quantity of resin and plaster-of-paris, there remained a mere film which could be crumpled in the hand like the silver foil off a cake of chocolate. That is, I believe, a fair example of the so-called "solid silver" sold in our swell shops, with the aid of much electric light and many bowing salesmen.

Yet I am egotistical enough and jealous enough on behalf of our own times to think that the *best* of our own work is more interesting than the *mass* of old work. There is a loving cup and cover presented to Trinity Hall, Cambridge, in memory of the late Master, Henry Latham. It represents what is perhaps the most difficult problem a designer of silverwork has to face—a three-handled loving cup. The result, unless attacked with considerable skill, is bound to look unhappily lop-sided. The design is founded upon a symbolical rendering of the Rose of Cambridge scholarship. It will be seen how its roots are intertwined with the base, how the stems appear at intervals higher up the body, and how, finally, its many stems end in one noble rose, thus symbolizing the many strivings that go to one great result.

As my last modern example, let me take the monstrance of Westminster Cathedral. This is designed to be in harmony with the cathedral and, at the same time, to be representative of our own day. Although of large size and heavily jeweled it is required to be carried in procession by the priest, who is frequently an old and infirm man. Thus it is made up of layers of exceedingly thin metal, strengthened at the edges. The combination of the wheel shape of the traditional monstrance with that of the cross is also to be noted. The latter must appear on a monstrance, but is usually a small object perched on the top like a stray sparrow. The four crystal pomegranates are in allusion to the Old Testament as the cross is to the New. Both are bound together with a circle of symbolical heavenly clouds. The four enamel panels represent the signs of the four evangelists, and those of the reverse four scenes from the life of our Lord. The square of ornanment imediately around the crystal cylinder containing the Host, is a conventional rendering of the vine, while the similar part of the reverse has a design based on the wheat. The figures surrounding the stem are those of St. Peter, St. Francis of Assissi, St. Clare, and St. Collette. St. Peter is, of course, the patron saint of the diocese. The other three tell quite a little history, which I will condense as follows: The monstrance is made from the gold, jewels and silver obtained by melting up the personal jewelry and household plate of the donor, who, some years ago, became a Collatine nun. Now, the Collatines are a most austere order, and were founded by St. Collette to recall the days of St. Clare in all their sterness. Hence the name, which is merely an abbreviation of St. Recollacta, or one who recalls the days of St. Clare, who was in her turn but the humble follower of St. Francis of Assissi.

(To be continued.)

The Gotthelf Jewelry Co., Vicksburg, Miss., recently sustained a heavy loss by fire.

Joseph Leibson has leased a storeroom on E. Market St., Wilkes-Barre, Pa., and will open a jewelry store there shortly.

NEW IDEAS FOR THE SPRING SEASON
MEMORANDUM ORDERS FILLED AT ONCE

170 Broadway, corner Maiden Lane - - - NEW YORK

reside Archibald's Statement on the Forthcoming Convention of the A. N. R. J. A.—List of the Committees.

ILLE, Pa., March 1.—J. P. Archi- president of the American National welers' Association, has issued the it statement as to the coming con- the organization:

ional executive committee of the National Retail Jewelers' Asso- t at Detroit, Jan. 14, 15 and 16. king over all the suitable hotels ng places it was found necessary the date of the next annual meet- eek earlier, or July 26, 27, 28 and to the fact that Detroit is a great city, we found that almost every a convention week, and each had ed for a long time. The only could get in our season is July

vention will be held in the large t Cadillac Hotel in Detroit, July and 29. The exhibits will be on the first floor of the hotel. The ace is large, well lighted and in a t location. The American Na- ail Jewelers' Association will have the exhibits this year. The na- ociation will solicit the exhibits, money, pay the bills and put in sury (if any surplus) the surplus urtherance of the work of the association.

se desiring exhibit space should ication at once to Claud Whecler, Columbus, O. Mr. Whecler has rge of the exhibits and will sub- rints and prices on application.

ll be a large national convention. s a distinctly convention city, as e the lake that is well suited for n the Summer months. The beau- llac Hotel is known all over the for its commodious rooms and its table menu. Even with all these parks, scenery and good hotel ser- rates are reasonable to delegates friends, being: American plan, thout bath, $3.50 and $4 per day; th bath, $4, $5 and $6 per day. plan: Rooms, $2 a day and up-

y of Detroit has many things in It has a larger average attend- l conventions than any other city. r that Detroit is a convention city ear around. Notice some of the sights that are in Detroit and the Belle Isle Park, Palmer Park, Mt. Put-in-Bay, Detroit Driving Ste Fair, public library, boulevards, nt hotels, art museums, public g plant, automobile factories and of other attractions. Six trunk ailways touch Detroit. Also the iver and the lakes make success ity Beautiful" an easy matter.

retail jeweler who wishes to see a city and enjoy a delightful vaca- ld prepare now to attend the com- ention at Detroit. No more suit- could be found to take your wife y. In addition to all the beautiful the salubrious climate and the surroundings, we will have a great national convention of retail jewelers such as the trade has never before seen.

The writer has been authorized to prepare the programme of speakers. Already a strong list of men has been secured to speak at Detroit. The second day of the convention will be "Manufacturers and Jobbers' Day." On this day there will be an array of talent from among the manufacturers and jobbers that will eclipse our former efforts. We will have the presidents of watch companies, watch case companies, managers and superintendents of clock and silverware companies for our speakers on this special day.

Many important questions pertinent to the time and occasion will be discussed by retail jewelers and other leading men. Music will be an important part of the proceedings.

A four-day programme will be carried out on time. The whole four days' session will be one of interest.

In addition to the literary feasts and the business sessions, there will be the entertainments. It is contemplated that boat excursions and interurban street car rides will consume several evenings.

The Detroit Retail Jewelers' Club of Detroit, which has just been organized, will assist in all the details of the great convention. Having been so recently among the retail jewelers of Detroit, I feel that our annual convention will be highly entertained by the good work of the Detroit Retail Jewelers' Club.

Every State association should have its annual convention before July 26. Each State should materially increase its membership and also collect the dues of all old members.

The national association has no power to suspend or drop the names of members from any State for non-payment of dues. Each respective State is charged with dues for the entire membership unless officially notified by the officers of the State that the State has legally dropped a member or members.

The State and national association dues are almost uniform in every State. Most States charge $2 a year for State association dues and $1 for national association dues, making a total of $3 a year. One State charges $5 a year for State and national association dues. We think that $3 a year is very low for both. We do think that every State should get the dues up to at least $3 per year.

Every retail jeweler should think how small $3 a year is to have the privilege of belonging to his State and national association. Your business interests cared for daily and hourly for a whole year by over 200 State officers, and also seven national officers, for $3 a year. The $3 should be sent on first mail to your secretary when the year begins. It should be sent promptly and willingly. It is only a pittance. There is no man so poor who cannot pay this amount each year.

There is no man so small or so large that he does not need the help of the craft. We have observed there are some "know-it-alls" and "egos" in every town and in every State who think they do not need the association of jewelers to help them.

There has been a great awakening among the retail jewelers in the past few years. We have noticed the men who have improved their methods of doing business and who are doing business on a good profit are the men who are most active in the affairs of their towns and cities; and usually these men are the most active in the jewelers' associations.

It is simply appalling to find such a large number of retail jewelers who seem to be in a comatose state of mind and body. I cannot solve the mystery. I have wished that a great loadstone might send forth magnetic sparks to every retail jeweler to see if he can be "magnetized."

If every retail jeweler would become "magnetized" or "polarized" or inspired with a greater zeal to become a better business man a great forward movement would take place very soon. No one can be isolated in his store and succeed. A business man must mingle with business men. He must come in contact with other business men. Organization is the great school which broadens out our minds. Organization is nothing more than the association of minds for mutual help. This association of minds gives magnetic power to every one who is associated. Then, brother jeweler, send in your application and your money and affiliate yourself with the great movement of organization.

In every town and city the retail jewelers get together and form clubs or round tables. The season and time is ripe for the bringing forth of such organizations. Where these clubs have been formed, and when they meet often, the local abuses are eliminated. The local club arranges prices on all standard articles, and thus eliminates competition. Competition is a home-grown product of mature years. Co-operation in the right spirit among retail jewelers means an increase of business and a larger profit. I have never seen cut prices where retail jewelers are friendly to each other. Retail jewelers can blame themselves for much of the price cutting. Get together; get profit.

A few days ago I saw a new article in the window of one of my business associates (competitor). The price was 25 per cent. less than I was getting for the article. I went into his store and said to him: "I am getting 25 per cent. more money for that article; you can get it also." Immediately he marked the article up to my price. Now both of us sell the article; both get the price; both get the profit.

I wish to say in conclusion that it is my greatest ambition to see a retail jewelers' organization of 10,000 members, all affiliated with the American National Retail Jewelers' Association. I wish to see the time very soon when each State convention will have present at its meetings 80 out of every 100 retail jewelers in its State. I hope to see at our annual meeting in Detroit, July 26 to 29, 1910, 2,000 retail jewelers. We urge you to come whether you are members or otherwise.

The following are the committees of the A. N. R. J. A.:

Trade Interests—F. D. Ausman, St. Marys, O.; H. F. Seltzer, Philadelphia, Pa.; Orr L. Keith, Iowa City, Ia.

Assaying—D. R. Jolly, Raleigh, N. C.;

DIAMONDS

Recent importations have added largely to our stock. We can now, as al[ways] give you stones of any size or quality at reasonable prices. No matter wha[t you] want, we can serve you.

ewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Feb. 23.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the port of New York for the week just ended:

Acajala: 1 case plated ware, $153.
Aqua: 1 case plated ware, $126.
Antwerp: 2,248 nickel plates, $38,850.
Auckland: 84 cases clocks, $786.
Brook: 17 cases clocks, $258.
Bonn: 1 case jewelers' sweepings, $150.
Bot: 22 cases clocks, $348.
Bombay: 27 cases clocks, $535; 2 cases plated ware, 159; 32 cases clocks, $468; 2 cases watches, $2
Buenos Aires: 6 cases watches, $5,540; 2 cases jewelry $800.
Buenos Aires: 19 cases plated ware, $2,019; 6 cases clocks, $248; 34 cases clocks, $560; 10 cases plated ware, $1,712; 1 case optical goods, $231.
Cairo: 14 cases clocks, $279.
Cape Town 2 cases plated ware, $153; 56 cases clocks, $423.
Frankfort: 4 cases optical goods, $516.
Hamburg: 2 cases thermometers, $100; 3 cases optical goods, $570.
Glasgow: 74 cases clocks, $1,345.
Hiau: 1 case jewelers' sweepings, $150.
Lima: 1 case jewelry, $401; 26 cases clocks, $
Lyons: 78,423 pounds nickel, $30,200; 2 cases silverware, $450; 2 cases optical goods, $265.
Hong Kong: 55 cases clocks, $854.
Hull: 4 cases thermometers, $900.
London: 24 cases clocks, $323.
Liverpool: 7 cases jewelry, $187; 26 cases clocks, $428; 8 cases watches, $1,000.
London: 9 cases watches, $1,448; 18 cases clocks, $1,11 cases optical goods, $4,841; 44 cases clocks, $793; 7 cases optical goods, $414; 28 cases clocks, $624; 1 case silverware, $200; 1 case jewelry, $250.
Manchester: 1 case optical goods, $135.
Manila: 9 cases plated ware, $1,328; 5 cases optical goods, $458.
Manzanillo: 11 cases plated ware, $226.
Melbourne: 15 cases clocks, $207.
Mombassa: 1 case optical goods, $100.
Montevideo: 5 cases plated ware, $502.
Soon: 8 cases clocks, $120.
Shanghai: 72 cases clocks, $1,457; 3 cases optical goods, $214.
Singapore: 7 cases clocks, $170.
Sligait: 2 cases optical goods, $400.
Sydney: 13 cases plated ware, $1,560. 191 cases clocks, $2,124; 3 cases optical goods, $1,553; 3 cases scopes and views, $288.
Vera Cruz: 23 cases clocks, $522.
Yokohama: 14 cases clocks, $502.

Jewelers Suffer Damage as a Result of Bad Fire at Pittsburg, Pa.

PITTSBURG, Pa., Feb. 24.—Fire early Monday morning destroyed the warehouse in the rear of the Schmidt building and badly damaged the latter by fire, smoke and water. The Schmidt building is situated at 339 Fifth Ave., and three jewelry firms are among those who suffered considerable loss. Sam F. Sipe sustained the largest loss, and all by water. Mr. Sipe occupies the front room of the second floor of the building.

When the fire was discovered some one in the Schmidt building turned on the standpipes and flooded that structure from top to bottom. Had it not been for this act Mr. Sipe might not have suffered much loss. As it was he sustained damage to his stock of silverware, clocks and bric-à-brac. The firemen broke a large front plate glass window in Sipe's store in order to gain access to the second story of the building. Early Tuesday morning the plastering on the ceiling in his store fell and broke the glass in one of his large show cases, but forunately all the goods had been removed. Tuesday night workmen removed all the plaster remaining on the ceiling and replastered the entire room. Mr. Sipe is open for business, but is conducting it under difficulties. His loss is fully covered by insurance and may amount to $5,000, although he could place no estimate on it. All of the valuable goods were locked in the safe.

Feigenbaum Bros., who occupy the eighth floor of the building, sustained several hundred dollars' damage by water and smoke, and P. H. Aronchild, whose place of business is on the third floor, also had a slight loss, all the losses being covered by insurance.

It appears that the fire broke out in the Family Theater. It started in the warehouse portion, a six-story building, fronting on Oliver Ave., the first floor of which is connected with the Schmidt building.

There is an areaway of 20 feet between the two buildings, the stage of the Family Theater being situated in it, with dressing rooms in the rear. The stage was reduced to ashes and the theater slightly scorched, the auditorium being entirely in the Schmidt building, occupying the first floor.

The total damage sustained is close to $100,000. The fire was one of the hottest with which Pittsburg firemen have had to contend for several years.

Mr. Sipe did not wait for the insurance companies to adjust his loss, but went right ahead to repair the damage done to his establishment and intends to take chances on obtaining a settlement. Water poured in a stream down the stairways of the building all of Monday morning, but Mr. Sipe had placed a painted sign in front of the building by 10.30 A. M. Monday, announcing that he was open for business.

The indications are that Mr. Sipe will conduct a sale in order to dispose of the damaged stock. The fine goods in his safe were not injured.

Canadian Manufacturing Jewelers Assemble and Take Steps to Prevent Removal of German Surtax.

MONTREAL, Feb. 26.—The manufacturing jewelers of Montreal met, this week, in goodly numbers and gave united voice to the protest individually expressed last week against the proposed removal of the German surtax, an action which they say will, if carried into effect, very seriously cripple their industry. After a long discussion it was resolved to approach the Canadian Government and ask for an increased duty on jewelry from 35 to 50 per cent.

The manufacturers claim that in order to produce the cheaper grades of jewelry Canadian manufacturers of jewelry have to pay three times as high wages as in Germany, and that under the proposed German-Canadian agreement they would be unable to compete and pay their employes the wages they have a right to demand.

"It would almost put us out of business," said Mr. Hemming, of the Hemming Mfg. Co., to a representative of THE JEWELERS' CIRCULAR-WEEKLY, "as far as Canada is concerned, and all our skilled artisans would have to leave this country."

In their resolution the jewelers say that while they have been progressing in the production of such lines as 14-karat jewelry there had not been a corresponding growth in the cheaper lines, the reason being that the cost of skilled labor in Canada was so much higher than in Germany, Austria and England. The high cost of living in Canada made it necessary for the skilled mechanic to be paid high wages.

Jewelers had asked to have the duty raised to 45 per cent., but it was placed at 35 per cent., and at that time it was thought the surtax would be maintained. Even with a 35 per cent. duty and the surtax, amounting all to 46⅔ per cent., large quantities of cheap jewelry have been imported into Canada.

"There are," the resolution says, "between 7,000 and 8,000 well-paid skilled mechanics in Canadian jewelry factories, while the manufacturers have investments in plant and stock running into millions."

The resolution concludes: "After carefully considering the foregoing facts the jewelers' section requests the executive of the Canadian Manufacturers' Association to urge at once upon the Government at Ottawa the necessity for changing, during the present session of Parliament, the duty upon jewelry from 35 per cent. to at least 50 per cent."

The Montreal manufacturing jewelers are co-operating with the Toronto manufacturers in this matter, and it is intended to organize a big delegation to wait upon the Government at Ottawa in furtherance of the proposition contained in the foregoing resolution.

Creditors of Harold M. Collins, Petoskey, Mich., who was adjudged a bankrupt, Feb. 11, have been notified that the first meeting of the creditors will be held in the office of Bankruptcy Referee Kirk E. Wicks, 212 Houseman building, Grand Rapids, Mich., March 8, at 2 P. M. A trustee will then be elected.

The Japanese Cultured Pearl

IT IS NOT an artificial pearl.

IT IS A REAL ORIENTAL PEARL produced by the pearl oyster in much the same manner that all the other species of pearls are produced.

It is the product of a long, unceasing process of cultivation, consuming a period of not a day, a week or month—but FULL SEVEN YEARS and over, a process so characteristic of Nature's painstaking, patient, careful work in making her most favored gems.

Only a small part of all the oysters cultivated in the Bay of Ago mature, and of these, but a percentage yield the gem which, however, once produced, is well worth the labor, skill and patience spent.

It is as beautiful as the process is fascinating—although difficult.

You cannot afford not to have this pearl in your line.

Its merits adequately represented—its demand's assured.

Members of the New York Wholesale Jewelers' Association Hold Annual Meeting and Elect Officers.

The annual meeting of the New York Wholesale Jewelers' Association was held, Wednesday afternoon, in the rooms of the Strat Club, 15 Maiden Lane, New York. President M. J. Averbeck presided, and 35 members were present to listen to reports of the officers, and all were interested in learning what had been accomplished during the year.

The regular routine of business was transacted, but among the reports that read by President Averbeck told in detail all what the New York organization, as well as the national organization of the jobbers, had been able to do in the last 12 months toward ameliorating unfavorable conditions

LOUIS COHN, PRESIDENT-ELECT.

in the trade, the straightening out differences between manufacturers and retailers, etc. While many of the members had participated in this work and nearly all were more or less familiar with what had been done from time to time, it is safe to say that no one realized fully, until reports had been rendered, exactly how much progress had been made by the conferences held from time to time with the various manufacturers and their representatives and with the officers of the American National Retail Jewelers' Association. Many members expressed surprise that so much could have been done in the first year of the association, and it was the general opinion that while the organization is on a solid working basis much more can be accomplished than in the past. Plans for the work during the coming year were discussed in a general way, although no program was adopted.

The reports of officers showed the association to be in a flourishing condition, financially and otherwise, and indicated the large gain in membership, the organization now having nearly 70 members in New York City alone.

When the election of officers came up the following were unanimously chosen: President, Louis Cohn, of Henry Freund & Bro.; vice-president, A. V. Huyler, of N. H. White & Co.; secretary, M. M. Mirabeau, of Lissauer & Co.; treasurer, Theo. Yankheur, of Theo. Yankhauer & Co. The Executive Committee now consists of the former president, M. J. Averbeck, S. Kramer, of Hyman & Kramer, and W. J. Ward, who were chosen at this meeting, with the following members who have not yet finished the terms for which they were elected: J. Warren Alford, of C. G. Alford & Co.; Jonas Koch, M. S. Kallman, of Lissauer & Co., and J. T. Montgomery, of M. A. Mead & Co.

Second Annual Convention of the Railway Watch Inspectors' Association Held at Washington, D. C.

WASHINGTON, D. C., Feb. 23.—The second annual convention of the Railway Watch Inspectors' Association of the United States and Canada was held yesterday. President Milton Kohler, Hagerstown, Md., presided, and there was a good attendance of delegates. The session was executive, and at its conclusion, Secretary Robert W. Little informed the correspondent of THE JEWELERS' CIRCULAR-WEEKLY that no report of the proceedings could be given out for publication. The meeting was devoted largely to the discussion of a number of matters bearing on the work of the members of the association and much interest was manifested in the various discussions.

The object of the association is to bring into one organization all jewelers connected with railroad watch inspection and time services of this country and Canada, and for the uplifting and betterment of the time inspection service. Another aim of the organization is the mutual protection of the interests of the members, particularly against the losses from unscrupulous buyers in railroad service.

The reports of the president and secretary-treasurer showed that the association was in a flourishing condition. This city was designated as the place for the next annual meeting, which will be held Feb. 22, 1911. The same officers who have served during the past year were unanimously re-elected to serve another year. They are as follows: President, Milton Kohler, Hagerstown, Md.; secretary-treasurer, Robert W. Little, Cumberland, Md.; first vice-president, W. L. Jones, Martinsburg, W. Va.; second vice-president, A. W. Bishop, Connellsville, Pa.; Third vice-president, M. B. Korman, Washington, D. C.; directors, W. H. N. Needy, Hagerstown, Md.; Charles F. Sarbaugh, Hanover, Pa.; C. M. Metheny, Thomas, W. Va.; F. E. Alder, Brunswick, Md.; James Ralton, Weston, W. Va.; Charles C. Crooks, Baltimore, Md.; membership committee, Charles C. Crooks, W. L. Jones and Robert W. Little.

Famous Frohme Collection of Old Silver to be Auctioned in Copenhagen.

COPENHAGEN, Feb. 19.—The largest and most interesting auction of old silver and china ware in Europe within 10 years will be opened here when the famous Frohme collection will be offered.

Already hundreds of dealers from all parts of Europe have arrived to buy up the things and sell them later to American millionaires at 10 times their value.

The feature of the sale is the formation of a trust among the dealers to cut prices, the result being that very dramatic scenes will be witnessed.

Death of Burton A. Noble.

PROVIDENCE, R. I., Feb. 26.—Burton Andrew Noble, for many years identified with the manufacturing jewelry industry, died at his home, 198 Atlantic Ave., this city, on Tuesday morning, from heart trouble, after a long illness. He was the son of Lorenzo and Eleanor A. Noble, and was born at Waltham, Mass., May 29, 1867.

Mr. Noble received his early education in the public schools of his native town, and from school he entered the factory of the American Waltham Watch Co., at Waltham, in the department where his father was foreman. When about 22 years of age, in the Fall of 1891, he came to this city and secured a position as traveling salesman with Payton & Kelley, now Payton & Kelley Co. In May, 1900, he severed his connection with that concern to become the manager of the New York office of E. I. Franklin & Co., manufacturing jewelers of North Attleboro, Mass., leaving there in December, 1903, to accept a position as traveling salesman for Chapman & Barden, of Attleboro. At the end of a year he accepted a position as representative for Sturtevant, Whiting & Bigelow and entered their employ on Jan. 1, 1905. When the firm became Sturtevant & Whiting he retained his position and made several long trips throughout the country, including a number to the Pacific Coast.

Last August Mr. Noble had an attack of malaria and had apparently recovered therefrom when he started on a trip for the Pacific, leaving home the latter part of September. He was taken ill on the road and was forced to give up at Chicago and came home about the middle of October.

Another Attempt to Unionize Jewelry Workers of Providence, R. I.

PROVIDENCE, R. I., Feb. 26.—There is another movement to endeavor to align jewelry workers of this city and vicinity in the ranks of unionized labor. Sunday afternoon Bazaar's Hall on Willard Ave. was filled to its capacity by Jewish jewelry workers who had responded to the appeal of labor leaders to attend and hear arguments that would be presented in favor of the formation of an organization. Two-thirds of the audience was composed of female workers. The principal speaker was Louis Pine, of New York City, one of the international officers of the United Garment Workers of North America.

The local labor movement was represented by Samuel B. Macready, of the Typographical Union, who advised those present who were willing to join a union as to how its affairs should be conducted. He warned them to beware of strikes, boycotts and sudden demands upon employers, but rather advised conciliation and friendly discussion and arbitration. Until the organization of the proposed union of Jewelry Workers is perfected State Organizer Charles H. Lee of the American Federation of Labor will be in charge of its affairs.

Bankruptcy Proceedings Against Myer Baturin, Harrisburg, Pa.—Liabilities Greatly Exceed Assets.

HARRISBURG, Pa., Feb. 28.—On behalf of creditors, Eliassof Bros. & Co., C. H. Eden & J. I. Castagnetta & Son, Attorney Conklin, appeared before Judge Archbald, of the United States District Court sitting at Scranton, last week, and filed involuntary petition reciting that Myer Baturin, doing business as a jeweler at 320 Market St., this city, was unable to meet his obligations, and asking that he be adjudged a bankrupt. The court made an order in conformity with the request of the petitioners and directed that Thomas M. Gilbert, of this city, an attorney, take full charge of the Baturin store as receiver, authorizing him full authority to attend to all repair work left with Baturin. Mr. Gilbert entered upon his new duties at once, having Frederick Rohm, a local jeweler, who recently sold his store stock on Market St., near Walnut, as watchmaker.

Myer Baturin, through his attorney, W. Clyde Carter, has filed a schedule of liabilities and assets with Referee in Bankruptcy William H Middleton, summarized as follows: Liabilities—Wages due, $160; rent, $490; secured claims, [illegible] unsecured claims, $29,659, a total of $30,[illegible]. Assets—Stock in trade, $2,000; fixtures, $300; unredeemed pledges, [illegible]; life insurance policies, $2,000, a total [illegible].

The unsecured creditors number about 75, nearly all of these accounts were contracted by Baturin during 1909. As many of the bills were contracted with one firm. Referee Middleton has called a meeting of creditors at his office, 3d and Market Sts., March 8, at 2 P. M., at which time the creditors will endeavor to select a trustee who will proceed to administer the bankrupt's estate. At this meeting all the creditors must file a sworn statement of their claims.

The bankrupt claims exemption of $300 out of his property. He is now under bail for trial at the March term of court, charged by H. Garfinkel, 717 Sansom St., Philadelphia, with violating the State fraud laws. The schedule of debts filed with the petition in bankruptcy is subdivided as follows:

Wages—Louis Idelstein, clerk, $100, and Abraham Canter, clerk, $60; total, $160.

Rent—Jacob Simonetti, storeroom, 422 Market St., four months at $110, $440; Chas. Hoffman, agent, residence, 1228 Market St., [illegible] months at $25, $50; total, $490.

Secured claims—Merchants' National Bank, Harrisburg, promissory note (90 days), endorsed by Morris and Louis Baturin (renewed), $185; Harrisburg National Bank, promissory note (90 days) (renewed), endorsed by same parties, $750, a total of $935.

Unsecured claims—Newark Jewelry Co., $[illegible]; J. J. Cooke's Sons, $197; Ferd. Dillon & Co., $265; Roseville Pottery Co., $[illegible]; A. Eppenstein & Co., $100; Cohansey Co., $126; Buck Silver Co., $120; [illegible] Bergen Co., $184; New England [illegible] Co., $160; A. Perel & Son, $363; [illegible] re Umbrella Co., $96; Fr. Bergner [illegible] $190; Cunningham Mfg. Co., $38; [illegible] utz, $104; Manchester Smith Co., $116; Rockford Watch Co., $141; Holbrook Mfg. Co., $205; M. Rosenbloom & Co., $829; Hurvitz Bros. & Blume, $190; Val Bergen Cut Glass Co., $196; Saffie Bros., $660; H. Garfinkel, $813; A. Rosaman, $825; B. Himmenblow, $183; J. W. Booker & Co., $350; Stern, Dreiblatt & Co. (not stated); N. Halbert, $110; Laubheim Bros., $433; R., L. & M. Friedlander, $293; B. Jacklovitz, $30; I. Ollendorff Co., $385; Korones Bros., $119; Jos. W. Stern & Co., $93; Hamilton Silver Co., $113; M. Sabsevitz, $125; I. Castagnetta (not stated); Myer Sabsevitz, $376; J. Freudenheim, $830; Eliassof Bros. & Co., $403; C. Bruno & Son, $91; Alois Kohn & Co., $192; Diamond Point Pen Co., $78; Mantz & Peyser, $192; Horowitz Bros., $95; Ballin Bros., $146; A. L. Tuska, Son & Co., $141; Jos. Freedman, $190; B. Weiner, $94; Robt. H. Ingersoll & Bro., $152; Spiro & Hirsh, $366; Ludwig Lehman, $79; And. Koch, $94; Importers' Cutlery Co., $49; E. & J. Bass Co., $332; J. H. Lau & Co., $80; Louis B. Prahar, $36; Herman Bamberger, $54; Hardwood Mfg. Co., $21; Aisenstein & Woronock, $85; Wm. L. Gilbert Clock Co., $127; Standard Jewelry Co., $40; Horace Tuttle, $392; Geo. W. Gerding, $60; M. Sickles & Sons, $10; Geo. W. Mayer & Co., $255; Aug. Dilsheimer & Co., $369; Royal Mfg. Co., $995; P. Rosenthal, $87; H. B. Sommer & Co., $39; Simon Michlovitz (consideration, money borrowed on note), $3,000; Morris Baturin and Louis Baturin, Harrisburg, Pa., promissory note (consideration, money), $5,000; David Sherman, promissory note (consideration, money), $2,000; Max Williams and Wolf Freidman (consideration, money borrowed on note), $4,000. The total of the unsecured claims is $29,659.

Liabilities of S. Feuerstein, Chicago, Whose Assets Have Been Bought by the Jackson Jewelry Co.

CHICAGO, Feb. 26.—The bankrupt estate of S. Feuerstein has been sold to the Jackson Jewelry Co. for $1,300. The total liabilities are $8,333, divided as follows:

Less than $50—Levinson & Jacobson, F. W. H. Schmidt, Nessler, McKenzie & Co., Felsenthal Bros. & Co., Alvin Mfg. Co., Diamond Point Pen Co., Adolph Schwob, Mandalian & Hawkins, B. Grieshaber.

From $50 to $100—Rockford Watch Co., J. R. Wood & Sons, Joseph W. Heller, M. A. Eiseman & Bro., E. J. Koch & Co., New Haven Clock Co., Paye & Baker Mfg. Co.

From $100 to $150—Theo. Jacobs & Co., Wm. L. Gilbert Clock Co., E. H. Levy & Co., L. A. Eppenstein & Co., Benj. Allen & Co., E. G. Webster & Son Co., J. Ziegler & Co., Gray-Howes Co., Wm. A. Rogers, Ltd., Henry Lederer & Bro., Jennings Bros. Mfg. Co.

The largest creditors are: Leon Hirsch, $202; Milton Herzog, $162; Retig, Hess & Madsen, $239; Wm. A. Burrows, $540; Meyer Joseph & Co., $256; Max L. Silverberg, $403; S. Pevsner, $393; Baum Bros., $210; National City Bank, $800; Herbert W. Allen Co., $563; Bonner Mfg. Co., $565; J. Rosenman & Co., $204; Julius H. Brauer, $190; A. C. Becken Co., $211; Despres, Bridges & Noel, $291; Rosenzweig Bros., $271; Sproehnle & Co., $214.

Feuerstein claims $289 in cash and $111 worth of jewelry, a total of $400, as exempt under the act.

Death of E. A. Short.

PRESCOTT, Ark., Feb. 23.—The news received last week from New Orleans to the effect that E. A. Short, a well known local jeweler, had died Feb. 10, caused profound regret not only in Prescott, but among the jewelers throughout the State, as Mr. Short was widely known and had many friends, especially among the members of the Arkansas Retail Jewelers' Association, in which he had been prominent since its inception.

Mr. Short's illness had been of long standing; he had suffered from stomach trouble for years, but had found more pleasure in poring over his work bench and in working for the interest of his fellow jewelers than in protecting his own health. However, his condition got so bad that he went to New Orleans for treatment, but without success.

Mr. Short had been engaged in the jewelry business many years and was at one time a traveler for Leonard Krower, New Orleans. After leaving Mr. Krower he started in business at Wynn; about June, 1907, he located in Prescott, where he continued until November, 1909, when his physical condition caused him to give up active work. When the organization movement in the jewelry trade first started Mr. Short took a deep interest in the subject and was one of the founders of the Arkansas association, as well as its first president. After he finished his term as president, he became secretary of the association and held that office at the time of his death.

Deceased was prominent in fraternal and religious circles, as well as in the organization, and his many friends in business and social life deeply mourn his passing. The remains were taken from New Orleans to his old home at Barden, Miss., where interment took place Feb. 12.

Bids Received by Navy Department to Supply Stop Watches and Field Glasses to Government.

WASHINGTON, D. C., Feb. 23.—The Bureau of Supplies and Accounts, Navy Department, has received the following bids for supplying 300 stop-watches: Cross & Beguelin, New York, (a) $3.45, (b) $4.25; C. A. Doubet, Washington, D. C., $8.50; Eugene Dietzgen Co., New York, $4.75; H. C. Karr, Washington, D. C., (a) $5.60, (b) $7.75; Manhattan Supply Co., (a) $6.05, (b) $4.40; Siegel-Cooper Co., $4.95; Universal Supply Co. (a) $3.69, (b) $5.15, (c) $6.75; John Wanamaker, $9; Lester Cerf, (a) $4.20, (b) $5.35.

WASHINGTON, D. C., Feb. 24.—Bids have been opened by the Chief Signal Officer for the following items:

For 50 field glasses, day and night—Henry Lorsch, $11.85 each; Fred A. Schmidt, Washington, D. C., $8.35 each.

For 10 prismatic field glasses—Henry Lorsch, $39.90 each; A. Leitz Co., San Francisco, $50 each; C. P. Goerze American Optical Co., $50 each; Bausch & Lomb Optical Co., $37 each; Fred A. Schmidt, $49 each.

President Taft's Coming Visit to the ... E. M. & J. Association's Banquet Causes a Stir in Providence.

ROVIDENCE, R. I., Feb. 26.—For the first ... since his inauguration President Taft ... visit this city on March 21, when he w... be the principal speaker at the annual ... winter banquet of the New England ... ufacturing Jewelers' and Silversmiths' ... ciation in Infantry Hall. Thus far, ...ever, no plans for the reception of the ... executive of the nation have been ... other than a decision on the part of ... executive committee of the association ...ave a couple of its members to meet ... at New Haven and accompany him to ...idence. Upon his arrival in this city ... proposed to convey him at once to In... Hall and the public will have little ...ce of getting a glimpse at the Presi...

...esident George H. Holmes of the as...tion stated to-day that the plans are ...complete and will not be until it is ... definitely what time President Taft ... reach here, although Mr. Holmes did ...think there would be any opportunity ... a public demonstration owing to the ...ness of the President's visit. He will ... the President at the Union Station ...escort him to the banquet hall privately, ...ther escort being planned, as the as...tion has hardly considered that it is ...fficial visit of the President, although ...will speak as the head of the nation to ... Jewelers.

...om the first, when it was learned that P...ident Taft was to be the association's g... on March 21, it has been pointed out h... his coming was a carrying out of plans h... the association has had for the past two ...three years. As Mr. Taft he has been w... invited by the association and accepted, ...at the last moment was forced by cir...stances to cancel his engagements. So ...visit at this time, although he is the ... of the nation, was urged not because ...was President but as a fulfilment of pre...s engagements.

...e of the daily papers of this city is ...avoring to create a public protest ...nst the association monopolizing the P...ident during his stay here and is insist... that some public demonstration should ...rranged to show to the rest of the ...ntry that Providence knows how to ...t and entertain the President in a man... that will cause him to have pleasant ...llections of his visit and the people.

...untary Bankruptcy of William Hohneck. Denver, Colo.

...ENVER, Colo., Feb. 23.—The schedules ...h accompany the voluntary bankruptcy ...ion filed a week ago by William Hoh..., a jeweler of 1305 Broadway, shows ...liabilities to be $5,348.24 and his assets ...4. The matter is now before the ...ed States District Court, of this city.

...r. Hohneck is a comparatively new...er to Denver, though he has been known to...e jewelry trade of the east for a num...of years. He is the son of a jeweler ...Cincinnati, and for some time was con...ed with the business of his father in th... city. He came to Denver early last ye... and started a business in the Summer, but his location being some distance from the retail district he was disappointed in the amount of patronage he obtained. He carried a small stock estimated to be worth about $2,000.

Employe of Providence Firm Fails in Attempt to Steal 2,000 Silver Crosses.

PROVIDENCE, R. I., Feb. 26.—James T. Killilea, 30 years of age, who was arrested here late yesterday afternoon on a charge of stealing 1,300 small silver crosses valued at $104, from the manufacturing jewelry establishment of the N. Barstow Co., 7 Beverly St., admitted sufficient evidence to convict when he was arraigned this morning before Judge Gorham in the Sixth District Court, and was fined $25 and costs.

Killilea employed an ingenious method in trying to divert suspicion from himself when the package containing the crosses was missed on Wednesday afternoon last. The crosses comprised a special order and were almost ready for shipment. When work for the day was nearly finished, the foreman of the finishing department, wherein Killilea has been employed, could not find the package, which contained nearly 2,000 crosses. Every employe at once joined in the search for the missing package, none being apparently more zealous in the task than Killilea. No trace of the package could be discovered, however.

Among the last to leave the shop was Killilea, the foreman meanwhile remaining behind to continue the search. Shortly after everybody had gone there was a knock at the shop door and upon opening it the foreman found Killilea waiting there. As the door was opened Killilea stepped within and said:

"Well, I guess somebody's trying to put up a job on me. See what I found in my pocket," at the same time pulling out a bundle in which were about 700 of the missing crosses. The workman said he could not account for the presence of the trinkets in his overcoat pocket and maintained that these were all there were in his clothing. These he handed to the foreman, who locked them in the stock safe for the night. Killilea then left.

The remaining 1,300 failed to come to light the following day, so Detective Goldowsky, of the Jewelers' Protective Association was notified, but his investigation was unrewarded and Chief Inspector C. S. Horton, of the police department was asked to send a man, and Deputy Chief Nickerson assigned Inspector Monahan from headquarters to look into the affair. The latter went to work in company with Detective Goldowsky and finally talked with Killilea, thinking that he might know more about the matter than he had been willing to tell. After questioning him for some time, the man broke down and admitted that he took the entire 2,000 crosses. He told where he had concealed the missing 1,300 under his bench, hoping to find an opportunity after a time to remove them, after the excitement had quieted down.

Thieves broke the show window in the store of A. Seidensticker, Hamilton, O., recently, and stole several watches. They managed to escape.

Proceedings of the Retail Jewelers' Association of the District of Columbia.

WASHINGTON, D. C., Feb. 23.—The Retail Jewelers' Association of the District of Columbia held their second monthly meeting of 1910 in the rooms of the Washington Chamber of Commerce, F St., N. W., Tuesday evening, Feb. 15, presided over by Vice-President Hutterly.

Mr. Hutterly in calling the meeting to order spoke of the progress made during the past month and of the commendable work done by the various committees. Mr. Prince, for the committee on incorporation, made a report which was accepted, and this committee has been requested to go ahead with the legal work in this connection.

The committee on by-laws and constitution submitted their report also. The constitution more nearly meets the working requirements of this individual association, which, previous to this time, have been working under the constitution and by-laws of a similar society. It is now possible for any retail jeweler or watchmaker or any jeweler or watchmaker doing work for the trade, owning his own establishment, to join the society, provided, of course, he is in good standing in this city.

A complaint has been received by the society that certain wholesale houses and jobbers of other cities have, by undue competition, endeavored to obtain the orders for class pins from various schools and colleges in the District, which business can be well taken care of by the members of the association. A resolution has been adopted whereby the Board of Education and the local Chamber of Commerce are to be advised of the facts in the matter.

Other matters of like importance were discussed, but were ordered held over for final action until the next meeting.

After adjournment the members broke up into small groups and exchanged stories of the day's work. The matter of attendance, at first considered one of duty, is now looked forward to by the "faithful ones" as a pleasant relaxation from the daily grind.

Among those present were A. O. Hutterly, A. D. Bestor, Mr. Selinger, L. Baum, M. H. Fearnow, A. D. Prince, G. D. Parsons, J. Korman, J. H. Deuhring, J. R. Fearno, W. J. Kettler, W. Oringe, C. H. Childs and C. A. Doubet.

Illinois Retail Jewelers' Association Decides to Meet at Springfield, May 24, 25 and 26.

CHICAGO, Feb. 28.—A special meeting of the Illinois Retail Jewelers' Association was held here last Thursday to consider plans for the annual convention. The time and place is Springfield, Ill., May 24, 25 and 26. The Springfield Music Hall has been engaged to hold the convention in and jewelry exhibits will be one of the features of the meeting. Some slight changes were also made in the by-laws.

Among those present were: J. C. Pierik, F. A. Mareau, Geo. B. Elbe, N. Nelson, J. S. Townsend, Charles Manahan, Herman Kracker, F. P. Lewis, Geo. N. Lewis, Tom Brown, Mr. Trask, R. Wieting, H. G. Weger, J. B. Ingalls, J. M. Prockter, A. W. Johanson, Paul N. Lackritz, Frank Smith, Lorenz Holland.

Financial Difficulties of Schneider & Baxmier, Pittsburg, End in the Bankruptcy Court.

PITTSBURG, Pa., Feb. 24.—Conrad Schneider and Edward Frederick Baxmier, doing business under the firm name of Schneider & Baxmier, whose financial difficulties have been noted in THE JEWELERS' CIRCULAR-WEEKLY last Monday, filed a voluntary petition in bankruptcy, in the United States District Court in this city. Their liabilities total $7,904.74, with assets amounting to $3,282.86. The petition sets forth that numerous suits have already been entered against them, claims and judgments have been

The Non-Retailing Co., whose claim of $1,155 unpaid, brought civil action to recover the amount. This concern holds a promissory note, as collateral security, given by Frederick A. Guberlet to Schneider & Baxmier, and which judgment is recorded in the prothonotary's office of Allegheny county. The Rockford Watch Co. also brought suit and obtained judgment, to recover $33.83. A judgment for $45.45 was obtained by S. B. Champlin Co. to recover same. Similar action was brought by the Jewelers' Specialty Co. to collect $23.83; J. J. Kaufman, $42.15; Thier, Kraus & Beam, $136; the Pittsburg & Allegheny Telephone Co., $52.

The principal creditors are as follows: Laubhein & Co., $1,155; Heeren Bros. & Co., $3,525.35 (promissory notes), and $575, an open account; Albert H. Gerwig, $1,250 (notes), and an open account of $52.86; Henry Terhune, $50; Pankratz Schneider (in the name of Conrad Schneider, administrator, on a note, dated Sept. 5, 1900, payable three months' from date), $200; Conrad Rudolph (borrowed money), $180; Louis Cotteryahn (borrowed money), $100. The personal property held by the sheriff includes a judgment note, filed at December term of court, 1905, and held by Frederick Gutberlet for $495, and judgment of the Non-Retailing Co. The estimated value of the stock in trade is $1,000; fixtures, material, etc., $275; fixtures, $950; accounts collectable, $604.35, and accounts payable amounting to $378.49.

The schedule of judgment also shows that in the estate of the estate of Pankratz & Schneider, in the hands of Conrad Schneider, there has borrowed in a due bill dated March 1, 1900, $500, with interest at 6 per cent., now amounting to $696.50. The bankrupts own a one-fifth interest in a lot having a frontage of 24 feet in Sarah St., and a depth of 72 feet, the value of the interest being estimated at $760.

Strenuous effort was made to save the estate of the bankrupts, in the hope that their affairs could be properly adjudicated without much loss, but the precipitation of collection suits and the obtaining of judgments, it is said, forced the concern to file in bankruptcy pettiion for the benefit of all concerned. The United States Marshal took possession of the store and the firm's affairs will be wound up.

An effort was made to secure a settlement by offering the smaller creditors 35 cents on the dollar and the larger ones 50 cent; the latter to wait one year for payment, but this arrangement failed. Schneider & Baxmier owed but one month's rent when the proceedings in bankruptcy was filed, amounting to $31. The store is situated in the South Side.

Conditions in the Diamond Market of Amsterdam.

AMSTERDAM, Feb. 19.—The reports from the New York stock market have not been so very good lately, and, of course, this influenced the diamond trade in some way. The buyers that were here first wanted to see what turn things would take, and perhaps they did not buy as heavily as they intended. However, the authorities in financial matters in this city are not at all alarmed. The diamond cutters in this town who have goods in stock which they cannot sell as readily as they expected simply lock them up in their safes until they can get their prices. That they go on buying rough material in London shows clearly that they are not afraid of the future.

The demand for fine small clean white, light brown, silver cape and slightly piqué goods remains strong, while there is much more demand for mêlée than existed some weeks ago. Especially clean sizes are very expensive, as the shipments shown in London contain a large quantity of undesirable goods.

European buyers in this market buy very heavily; formerly they generally bought medium goods, but of late they are beginning to be just as particular about the cutting and quality as are the American buyers. Consequently the latter have more difficulty in getting the goods they desire.

Among the buyers here at present are representatives of the following firms: Hayden W. Wheeler & Co., New York; Shiman Bros. & Co., New York; Wm. I. Rosenfeld, New York; Marchand Frères, Paris; A. Woronick, Paris; S. Monosson, St. Petersburg; Y. Dreyfus, London; N. M. Oppenheim, Frankfurt; Bronkhorst & Citron, London; Alphonse Judis Co., San Francisco, Cal.; L. & M. Kahn & Co., New York; Goldberg Frères, Antwerp; S. Prager, Paris; S. Pressel, Antwerp, and Van Gelder Bros., Antwerp.

The New England Watch Co. has increased its selling force since the first of the year, and now has on the road 12 hustling missionary salesmen, who call upon the regular trade in practically every town and city east of the Rockies where there is a business prospect. Their names and territories are: E. T. Allen (New Jersey, Maryland, Delaware, Virginia, West Virginia and greater New York), R. P. Clarke (Michigan and Indiana), F. T. Clark (New England), B. A. Cockings (Minnesota, Wisconsin and the Dakotas), J. E. Cruess (New York State, excluding greater New York), E. C. De Borde (Iowa and Nebraska), W. P. Gretter, Jr. (South Atlantic and Gulf States), E. W. Holland (Arkansas, Pan Handle Texas and a few towns in Oklahoma), W. L. Hough (Pennsylvania), W. R. Nash (Illinois), F. J. Spellman (Missouri, Kansas and Oklahoma), W. F. Turbert (Ohio, Kentucky and Tennessee). In addition to these regular travelers the special trade is handled by H. C. Warner, and the jobbing trade by R. C. Vaughn, W. P. Gretter, Jr., and A. L. Atkins, sales manager of the company.

Death of Jacob Schmidt.

The funeral of the late Jacob Schmidt, head of the firm of Schmidt & Son, lapidaries, 51 Maiden Lane, New York, was held Saturday, Feb. 19, from his home at Springfield, L. I. He died the previous Thursday, of dropsy. Some time ago Mr. Schmidt was seriously ill with pneumonia and since that time has not been in the best of health, although he was able to look after his business and was at his office until the Monday before he was stricken.

The interment was in the Lutheran Cemetery.

Jacob Schmidt was born Feb. 7, 1841, in Idar, Germany. When two years old, with his parents, he came to this country and went to Philadelphia to live, in which city he spent his early life. When the Civil War broke out he answered the call for troops and sailors and enlisted as a marine at the Brooklyn Navy Yard under Commodore Ringle. He saw service both on sea and land and was at the battle of Fort Sumter, Bull Run and numerous other engagements. He escaped unwounded and after the war came to New York.

Mr. Schmidt's active career in the jewelry trade dates from his arrival in the metropolis, when he became an employe of M. Fox & Co., with whom he remained for upwards of 35 years. He then started in in business for himself, with George Buhler, as Schmidt & Buhler, at 143 Fulton St. Later he withdrew from this firm and started in business for himself. His son was taken into the firm in 1906 and the business has since been conducted under the style of Schmidt & Son at 49 Maiden Lane, and since last May at 51 Maiden Lane. Deceased was a member of Kolts Post No. 32 G. A. R. and of Court Lexington, Foresters of America. He is survived by a widow and two sons, George, who is a member of the firm, and Charles, who is associated with the business.

Geological Survey to Depend on Census Bureau for Collection of Statistics of Mineral Productions.

WASHINGTON, D. C., Feb. 28.—The Geological Survey and the Census Bureau have entered into a joint arrangement by which the Survey is relieved of the collection of statistics of the annual production of minerals for the year 1909. That work is, by the agreement, merged in the Census Bureau's activities under the 13th Census act, which requires a census of mines and quarries for 1909.

Consequently, the Survey will not this year send its own schedules directly to the mine and quarry operators. The Census Bureau's general and supplementary schedules relative to this branch of its decennial work include the inquiries in which the Survey is interested and such other data as may be necessary for the latter's reports will be furnished the Survey by the Census Bureau. The schedules will be collected by the Census special agents and enumerators.

The cooperative arrangement was in recognition of the necessity of uniformity in the compilation of the statistics, the elimination of duplicate work and inquiries, and the desirability of economy in the collection of the required data.

Lpp & Flershem, Chicago, Offer Creditors 40 Per Cent. on Time, while Same Amount in Cash is Offered for the Assets of the Estate.

nAGO, Feb. 26.—In the bankruptcy of Lapp & Flershem, Musgrave & er attorneys, have sent the follow- cular letter to the creditors:

have doubtless been informed, our busi- been in the hands of the bankruptcy court . 18 last. The proceedings were insti- us voluntarily, with the view of placing editors upon an equal footing, and en- m to realize upon our assets at a min- expense We believe that every person since investigated the situation has be- vinced that we have acted in good faith, all our property of every kind has been and turned over to the trustee in y

me time past we have had under discus- local attorneys, representing a majority editors, a proposition on our part to offer ition of 40 cents on the dollar, on the out in the enclosed form of composition t. These attorneys have hesitated to d our proposition because of reports ide interests are willing, under certain nces, to pay 40 cents in cash.

me of Lapp & Flershem has a prestige of aetivity in the jewelry trade, and is an ich eannot be acquired by any outside We propose to reorganize our business rporation basis, interesting some of our employes, and continue to do business with time friends under our old name. It is nown fact that with few exceptions our are those with whom we have done busi- a great many years.

confident tbat we can make a success the 40 per cent. settlement on time, as We have no resources of our own, from which to raise the funds to enable such a settlement in cash, and cannot y arrangement for money to make a lement, unless by resorting to methods volve the payment of bonus or commis- ger than the business can carry, in addi- the 40 per cent. payments, and we feel creditors and not loan brokers should very penny that we can possibly pay.

w of the hesitation of local attorneys to eir clients to accept our proposition, and ous delays resulting, we are taking the f addressing each of our creditors per- nd asking them for an expression of their in this matter. We know from letters eceived that we have many good friends ur creditors who would wish us to con- a going concern and as large handlers of the same lines as heretofore.

e enclosing a copy of the proposition e are offering, and if you feel that you the same, you will certainly be doing us urn and one which we shall make every effort to reciprocate.

have suggested before, delay is ruinous to e assets depreciate in value and expenses daily. If you approve of our proposition, ask you to sign and acknowledge the en- greement and forward to us at once; or your claim is in the hands of attorneys, it to them with instructions to accept , and advise us of your action.

ollowing basis of settlement was also ed in the circular letter: Five per or before four months from date rmation of composition, five per cent. months, 10 per cent. in 10 months, cent. in 13 months, five per cent. onths, five per cent. in 19 months, and cent. in 22 months.

eferred payments shall be evidenced promissory notes of Lapp & Fler- a corporation organized under the the State of Illinois, indorsed by said bankrupts individually, bearing the day of the confirmation of said d composition, and bearing interest at the rate of five per cent. per annum. The said corporation Lapp & Flershem shall be invested with the title of all property and assets of said bankrupts, and the active control and supervision of the said Lapp & Flershem, the corporation, shall be vested in a creditors' committee under an appropriate agreement for such purpose, until such time as said notes shall have been paid in full, with interest.

Coincident with the receipt of this circular by the trade came another one from the Providence Jewelers' Board of Trade, announcing that their attorneys, Moses, Rosenthal & Kennedy had secured a party who would pay 40 cents in cash for the entire indebtedness, and asked that a compromise with Lapp & Flershem at 40 cents on time be disregarded, and that it would be to the creditors' interest to accept 40 cents cash.

There seems to be some feeling in regard to the 40 cents cash offer, which is really made by the Illinois Assets Realization Co. In fact, Lapp & Flershem, fearful of their estate being bought by this concern, and believing that there was a possibility of the purchaser securing the right from the court to use their name they incorporated a very short time ago, with a capital of $10,000, the incorporators being Peter Lapp, Lem W. Flershem and A. B. Towers.

Moses, Rosenthal & Kennedy are seeking to enjoin the new corporation from the use of the name Lapp & Flershem, claiming that the purchaser of the business is entitled to that name and not the bankrupts.

The court has set March 10 as the date for the final disposition of the estate.

Proceedings in the Bankruptcy of the Herman Keck Mfg. Co., and the Duhme Jewelry Co.

CINCINNATI, O., Feb. 26.—Judge Sater, of the United States District Court, having come to Cincinnati from Columbus, O., to hear arguments in connection with the Herman Keck Mfg. Co. bankruptcy case, yesterday refused to allow the Duhme Jewelry Co. and the Herman Keck Mfg. Co. to take up to the United States Circuit Court of Appeals the original records in the bankruptcy proceedings against these concerns, as was asked for by their attorneys. The judge stated in rendering his opinion that if great care was taken of the books and accounts of the bankrupt companies these could be used in the appeal the companies seek to take, but that he had no right to allow them to take other records and that other copies must be obtained.

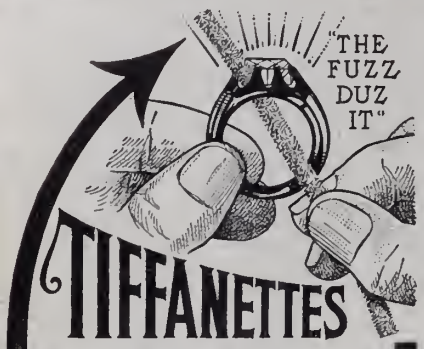
The companies claim through their attorneys that they now have $1,200 with which to start proceedings in their appeal, but that, owing to the expense and time it takes to prepare a transcript they thought they ought to be allowed to use the original records of he bankruptcy proceedings.

The meeting of the creditors of the Herman Keck Mfg. Co. was held, yesterday, at 3 P. M., before Bankruptcy Referee Charles T. Greve for the purpose of receiving claims against the bankrupt company and for the election of a trustee. The referee received claims against the Keck company as well as against the Duhme Jewelry Co., and stated that he would render no decision regarding the same and would reserve the question of allowance of claims for a future day.

Robert de V. Carroll, receiver of the two companies, was duly elected and appointed trustee, his bond being fixed at $50,000. The next meeting for the purpose of hearing testimony upon the claims will be held before the referee, March 7, at 3 P. M.

Up to this time the appeal of the adjudication in bankruptcy has not been perfected.

Mr. Carroll as receiver reported to the referee that the property of the Keck company and the Duhme Jewelry Co. amounted approximately to the following: Duhme Jewelry Co.'s cash $70,000, merchandise $33,000; Herman Keck Mfg. Co.'s cash $10,000, merchandise $11,000; fixtures, etc., of both concerns, $16,000.



Receiver Carroll and his attorneys, J. B. Frenkel and J. W. O'Hara, have filed a motion in the case of the Herman Keck Mfg. Co. for an allowance from the funds of the company for their services. As yet they haven't received any money for services on this case, which is of long standing.

Judge Refuses to Hold Sales n t Baltimore Jewelers on Cha of Larceny.

BALTIMORE, Md., Feb. 21.—Loui fer, a salesman for the Charles Co., 114 W. Baltimore St., was before Justice Grannan at the Cen station, Saturday, on a charge o two diamond rings and other jewe at $300 belonging to the firm. M fer in his own defense testified t not steal the jewelry, but left it tomers for their approval. He als that the jewelry found at his hon tectives Burns and Brennan had there by him pending several sal pected to make.

Mr. Schaeffer also contended th a member of the firm, but Mr Cr brought the charges and worked of the evidence, denied this. Ow fact that Mr. Schaeffer claimed h remove jewelry as a member Justice Grannan reserved his deci to-day to enable this point to be presenting the books of the co court. This was done to-day, a Grannan decided that the evidenc clear enough for conviction, so he the case.

Justice Grannan further said loose methods of keeping accou store made it possible for anyon out jewelry without immediate dum, and while it was evident loose method had been taken adv there was not sufficient evidence a clear case of larceny. Mr. C clared to-day that he would push further and swear out additional on this and other charges, and matter before the Grand Jury M also said that Mr. Schaeffer had b ed implicitly by him and had b every advantage for a succ Suspecting something wrong re had put Pinkerton detectives on t discover where the jewels had woman in the case who had seve of the jewelry declared that she with a prospect of buying Mr was at one time a member of the and was interested in the Na Inspectors' Association.

Mebers of the North Dakota Retail Jeelers' Association Meet at Fargo.

Fgo, N. Dak., Feb. 23.—With an attnce from almost every part of the Sa the annual session of the North Da- Retail Jewelers' Association was held Commercial Club in this city, Feb. The meeting was called to order by lent Frank V. Kent, of Grand Forks, e introduced Mayor Peter Elliott, elivered a short but hearty address of ne. The response was made on be- f the jewelers by President Kent, who elivered his annual address to the as- on.

P ident Kent's address was the feature morning session. One of the most ant things which he discussed was tter on the establishment of a mutual urance company among the jewelers State. He stated that the retail are men have organized such a com- which is meeting with good success, believed that it would be a good for the jewelers. However, he was rtain that the association was strong as yet to carry it.

H alked also about holding semi-annual gs of the association instead of the affairs which are now held. He the publication of the minutes of the tion in pamphlet form just as soon he annual convention as possible, so ose jewelers of the State who did not could see what they missed while ct of the convention was still warm r memories.

A ther important matter taken up by the nt was that of having a full printed mme for each convention, getting ad- g matter to pay for it. He believed would be a good thing.

A. Wold, Langdon, followed the presi- t with a paper on "The Good of the ation." He told the benefits which derived from attending the annual e gs. with their exchange of ideas and l broadening effect, and he scored ewelers of the State who might have ere but did not attend.

C. Tellner, Jamestown, also delivered t address. He spoke of matters per- i to the trade which are of no gen- l terest to the public.

owing the papers President Kent ap- l the following committees: Resolu- A. O. Wold, Langdon; H. O. Shel- , ottineau, and Hart Swalstad, Minot. e—W. H. Reighart, Minot; C. K. n, Grand Forks, and Louis Hanson, Lake. Membership—C. E. Tellner, own; O. C. Fields, Valley City, and Reighart, Minot.

balance of the forenoon, which was edly busy session, was taken up with g the constitution. Each article of nstrument was taken up separately, number of important changes were d

proceedings were continued the fol- day, and the association indorsed the of The American National Retail ers' Association in adopting a trade- rland system of marks indicating qual- l source of manufacture, and the organization of mutual insurance companies.

The following officers were elected: Louis Hansen, Devils Lake, president; Hart Swalstead, Minot, first vice-president; O. C. Field, Valley City, second vice-president; Geo. K. Munro, Grand Forks, secretary, and Max Rabinovich, Grand Forks, treasurer.

Frank V. Kent, Grand Forks; Geo. K. Munro, Grand Forks; W. G. Reighart, Minot; C. E. Tillson, Carrington, and Paul Girard, Grand Forks, were elected delegates to the National convention. In future the sessions will be held annually and the next one will be at Devils Lake.

One of the features of the convention were the exhibits, each in charge of a well-known traveling man. E. W. Nicar had charge of a fine display from the South Bend Watch Co. B. H. Berson represented King, Raichle & King, Buffalo, N. Y. Sam Cohen was here with a general line of jewelry from L. Finkelstein, St. Paul, Minn. O. P. Anderson showed the watch cases of the Star Watch Case Co.

The traveling men were given a room for display purposes free of charge by the Commercial Club and every courtesy was extended them by the delegates.

At the banquet given on Wednesday evening all the travelers were invited, and B. H. Berson was called on to respond to a toast, which he did in a happy vein.

Death of Edmond M. Blake.

Wrentham, Mass., Feb. 24.—The funeral of Edmond Manchester Blake, a former manufacturing jeweler, and for many years connected with the refining industry in the east, was held from his late home, Blake's Hill, in this city, Tuesday. He died Feb. 18 from heart trouble. The funeral services were conducted from his late home by the Rev. Geo. W. Need. Interment took place at Sheldonville Cemetery, Sheldonville, Mass.

Mr. Blake was born in Wrentham, Mass., in 1839, where he spent his early life. In 1857 he entered the employ of Lincoln, Tift & Bacon, Plainville, where he learned the refining trade. In 1861 he went with the Whiting Mfg. Co., North Attleboro, and came with that firm when it moved to New York in 1876. He stayed with this concern until 1877 and then returned to Plainville, Mass., as superintendent of the refining department of Lincoln, Bacon & Co., in which position he served until 1882, when, with Jos. G. Barden and J. T. Joyce, he formed a co-partnership under the style of Barden, Blake & Co.

In 1895 he sold his share in the business to J. B. Barden and remained at home until 1888, when he took charge of the Jewelers & Silversmiths' Co-operative Refining Co., North Attleboro, Mass., with which concern he was last connected.

Deceased is survived by a widow and two brothers.

The esteem in which he was held by the concern with which he was last associated and in the trade generally was manifested in the many beautiful floral tributes sent to his bier.

Cyrus Novinger, Millersburg, Pa., has gone to Halifax.

Jeweler of St. Louis, Mo., Felled by Daring Thief Who Made His Escape.

St. Louis, Mo., Feb. 23.—Frederick Bingeli has been in a critical condition at the City Hospital for a week with a fractured skull, the result of a murderous attack committed on him last Saturday night, in his jewelry store, at 108 S. 4th St., for the purposes of robbery. A man who pretended that he wanted to buy a watch struck him three vicious blows on the head with an iron bar, snatched three watches and ran out of the store.

The assault and robbery were committed early in the evening, when the streets were filled with people. Bingeli was alone in the store. A man about 35 years old came in and asked to be shown some watches. The jeweler laid two gold-filled watches and a silver watch on the show case. They did not suit the man. He indicated one in the case that he said struck his fancy and asked to be shown that. Bingeli stooped over to take the watch out of the case and as he did so the man reached over and struck him three blows on the head with a 13-inch iron bar with knobs on each end. Bingeli staggered under the blows but did not fall. The man had picked up the three watches and was running toward the door when Bingeli got his revolver, which was under the counter, and fired three shots at the robber, but did not hit him.

Persons who ran in from the street saw Bingeli standing with blood streaming from the wounds in his head and the revolver in his hand and thought he had tried to kill himself. One of them wrested the weapon from him, but Bingeli finally told what had happened. The police were called in and the victim was sent to the City Hospital. He was unconscious when he arrived there, but later regained his senses and told the story of the attack and gave the police a description of the robber.

Mr. Bingeli was selling out his stock with the intention of going back to Switzerland and spending the rest of his life there. He is 64 years old.

W. P. Hopwood, Lawrenceburg, Tenn., Makes an Assignment to Will Dustin.

Lawrenceburg, Tenn., Feb. 23.—W. P. Hopwood, of this place, who handled a stock of jewelry and silverware, made an assignment, last week, naming Will Dustin as trustee. His indebtedness as set out in the assignment papers amounts to about $1,300.

Mr. Hopwood commenced business at Cornersville, Tenn., and in 1890 located at Lawrenceburg, Tenn. He was a member of Hopwood & Hoyle, who sold out in 1891 to Wallace & Paterson, and who, in 1895, were succeeded by Hopwood & Loudon, A. W. Hopwood, his wife, being senior member of the last firm. She succeeded to the business in 1896, sold out in 1902, and they bought a farm and were farming until the Spring of 1906, when they sold out and entered the jewelry business again. Early in 1907 Mr. Hopwood came here and became associated with J. F. Boyet as Hopwood & Boyet, succeeding R. B. Robertson. In July, 1909, Mr. Hopwood succeeded to the business and continued alone.

ROSE LIGHTING FRENCH GREY

THE GLOW OF SPRINGTIME

ROSE and grey together form an effect so rich as to constitute what may be called a classic combination. To wed these colors is one of the fancies of Spring, when the same tones prevail in nature. The artistic possibilities of this charming union are revealed in the Coral and French Grey Jewelry introduced by this house. Accords tastefully with spring modes and millinery, which establishes the popularity of the line. Innumerable designs in CORAL AND FRENCH GREY LONG CHAINS, HAT PINS, SASH PINS, BROOCHES, NECK PENDANTS.

Set Aside Executors' Settlement of the late Augustus Mermod, St. Louis, Mo.

ouis, Feb. 24.—A suit to set aside settlement of the St. Louis Union st Co., executor of the will of the late us Mermod, former president of the l, Jaccard & King Jewelry Co., has d in the Probate Court of St. Louis at Clayton by the widow, Mrs. Mary lermod, and the children.

petitioners allege that the St. Louis Trust Co. allowed itself more com- ns than it was entitled to under the specification is made of one instance h it is urged that certain property d by the company, as executor, in allowed an agent five per cent. for and then allowed itself five per cent. gross proceeds of the sale. Notes y two sons of Mr. Mermod, aggre- $160,000, were added as assets of the pon which a commission was charged h rust company, according to the peti-

n Mermod asks that the court order s of 1,787 shares of stock in the Mer- l, Jaccard & King Jewelry Co., which s was listed as worth $187,700 at face value and a commission collected on that amount.

Augustus Mermod died Aug. 24, 1903, and left a will bequeathing nearly all of his estate to his widow and two sons, Arthur A. Mermod and Alexander B. Mermod. The St. Louis Union Trust Co. was named as executor. Arthur B. Mermod has since died, and his daughter Alice joins with her grandmother in asking that the settlement be set aside. The final settlement was filed Feb. 11 in the Probate Court.

Death of J. Lyman Van Buren.

DUNKIRK, N. Y., Feb. 28.—J. Lyman Van Buren, head of a large wholesale jewelry concern in this city, died at his home here, Saturday morning, of apoplexy, in his 44th year. During the evening on which he was stricken he went with his sons to a basketball game and upon his return home seemed to be in his usual health. A little later he complained of feeling numb in one of his hands, and the numbness rapidly advanced until the whole of one side of his body was paralyzed. He soon became unconscious and for some time remained in that condition despite the efforts of two doctors who were in attendance up to the time of his death.

Mr. Van Buren was born in Dunkirk in 1867 and was the partner in the concern of Joseph Nelson & Co. for 17 years prior to the death of Mr. Nelson, his father-in-law, which occurred last June, after which he bought out the other interests.

He was a director of the Dunkirk Board of Trade, a member of the Empire State Chapter of the Sons of the American Revolution and one of the most prominent business men in this city.

Deceased is survived by his widow, two daughters, three sons, two brothers and one sister.

Death of Lyman W. Thompson.

CHERRY VALLEY, N. Y., Feb. 23.—While on his way to business Lyman W. Thompson died, yesterday. He had been in failing health for some time, but remained attentive to business. His firm, L. W. Thompson & Son, is the oldest in Cherry Valley.

Mr. Thompson, who was 85 years old, was one of the veteran members of the trade of the Empire State. His son, who was his partner in the business, and has been running it practically alone for some time, is 64 years old.

Deceased was a widower. He was well known and highly respected in this town and counted as one of the leading business men in this section.

Death of B. F. Geist.

POTTSVILLE, Pa., Feb. 28.—B. Frank Geist, for some years a jeweler in Minersville and Pottsville, died at his home, 321 Minersville St., this city, last week, after more than a year's illness from a complication of diseases.

Mr. Geist was a native of Mahantango Valley, and entered the jewelry business in Minersville when a young man. Later he removed to this city and continued in business in the old Thompson building, on Market St.

A wife and three daughters survive.

I. Posner contemplates engaging in business in Kittanning, Pa.

George F. Clow has leased quarters at 522 Warren St., Hudson, N. Y.

John Tate has opened a repair shop in the Hager block, at South Bend, Wash.

Kuhne & Seidel have engaged in business as die sinkers at 25 Calender St., Providence, R. I.

Potter & Speck have just begun business as retail jewelers at 5958 Columbus St., Newark, N. J.

A jewelry and watch repair establishment has been opened by J. M. Post in the store of P. G. White at Kissimmee, Fla.

W. C. Davenport has rented a store at Klamath Falls, Ore., where he will establish a watch and jewelry repairing shop.

A new retail jewelry business has been opened at 516 Massachusetts Ave., Indianapolis, Ind., by E. B. Johns and D. A. Hickman.

D. D. Henderson has added a line of jewelry and also a watch repairing department to his music business in Bridgeton, N. J.

The Guaranty Jewelry Co., has opened a store at 252 Nicollet Ave., Minneapolis, Minn. The concern will handle white stones rings, watches and ladies' combs.

The Chartley Jewelry Mfg. Co. has filed articles of incorporation in Rhode Island, with a capital stock of $25,000. The incorporators are A. J. Dumont, Damase Dumont, Moses Dumont, Henry J. Boucher, Jacob Dumont and Frank M. Wilcox.

Jewelry Salesman's Carrier Who Made Off with $8,000 Worth of Jewelry Sentenced to Term in Elmira Reformatory.

John Murray, or "Salt Peter," as he was called, the boy who stole two cases containing over $8,000 worth of jewelry belonging to the Gibson-Krugler Co., Newark, N. J., while in New York, and who was later apprehended and held for trial, has been sentenced to an indefinite term at the Elmira Reformatory.

The two Italians to whom a part of the jewelry was sold, thus implicating them in the theft, have been sent to the city reformatory for four months.

Reilly and Lynch, who were arrested at the time, are still held for sentence, having already been convicted.

Barney, the pawnbroker who received and melted up a large portion of the jewelry, has been sentenced on an indictment instigated by the New York Central Railroad on another charge. A bench warrant has been lodged against him on the jewelry charge, to be executed on his discharge in the other case.

Only a small part of the jewelry was recovered

Trial of Conrad Schickerling on Larceny Charge Ends in Disagreement of the Jury.

The trial of Conrad Schickerling before Judge Crain and jury in the Court of General Sessions in New York, on an indictment charging the larceny of $6,500 worth of diamonds from the firm of Edelhoff Bros. & Co., 574 Fifth Ave., in 1906, was brought to an end Thursday night about 11 o'clock when the jury announced that they could not agree and were discharged by Judge Crain.

The complaint against Schickerling was brought in June, 1906, at the instigation of the creditors of Edelhoff Bros. & Co. Gustave A. Edelhoff, the president of the company, was the complaining witness. He swore that in January of that year he obtained more than $6,000 worth of diamonds on memorandum from Henry E. Oppenheimer & Co. for Schickerling, who wished to compare them with some he had already gathered for a lorgnette chain. He accused Schickerling of pawning the diamonds, which he, Edelhoff, said he was obliged to redeem before they could be returned to their original owner.

Before the trial the people decided to proceed on one indictment which charged Schickerling with larceny from Edelhoff Bros. & Co. of diamonds of the value of $6,500. The case as prosecuted by the people showed that on Jan. 24, 1906, Conrad Schickerling induced Edelhoff Bros. & Co. to obtain from Henry E. Oppenheimer & Co. four packages of diamonds on memorandum, on the representation that he, Schickerling, was then engaged in the completion of a diamond lorgnette chain for Mrs. Richards, wife of the president of the State Bank, and that he wished to buy several diamonds of a certain size to complete the chain. Gustave Edelhoff, Charles Edelhoff, his father, and Arthur Edelhoff, his brother, each testified to the statements made by Schickerling as to the making of the lorgnette chain for Mrs. Richards.

One of the defendant's witnesses, Bertha Meyer, testified that a diagram had been drawn for the lorgnette chain for Mrs. Richards, but that such a chain had never been ordered or started by Schickerling Bros. & Co.

The defense put Conrad Schickerling on the stand to testify in his own behalf. The witness told his side of the case in a convincing manner. He testified that he had a conversation with Gustave Edelhoff in which Edelhoff stated to him that he (Edelhoff) must have $2,000 by Jan. 24, 1906, to pay some pressing bills of Edelhoff Bros. & Co., and that he would purchase some diamonds and sell them to the defendant, and that he could either resell or pawn them as he saw fit and give $2,000 to Edelhoff. Schickerling admitted that he had pawned the $6,500 worth of Henry E. Oppenheimer & Co.'s diamonds which he had so obtained from Edelhoff with R. Simpson, pawnbroker, at 51 Bowery, and that he had realized $4,000, of which sum he had given $2,000 to Gustave Edelhoff and retained the balance. He also testified that on Feb. 2 he had given Edelhoff Bros. & Co. a note for $13,500, which was one of several notes which he claimed to have given them, and which specific note was for the Oppenheimer diamonds and four pieces of jewelry which had been obtained by Edelhoff Bros. & Co. from Fred W. Lewis and turned over to Schickerling.

When questioned closely Mr. Schickerling testified that Edelhoff told him that he would get the diamonds and telephone him, and that he could then make his selection of whatever he desired to buy. Edelhoff obtained the diamonds and they were shown to the witness, who looked over the four packages and selected two lots. Mr. Schickerling testified further that he told Edelhoff that he would buy the two lots he had selected, but that he did not care for the others. The other two lots were then returned by Edelhoff to Henry E. Oppenheimer & Co., and it was arranged that when the bill was received Edelhoff should telephone Schickerling in regard to the delivery of the stones.

Mr. Schickerling was asked if he had any talk with the Edelhoffs about a lorgnette chain which he was making for Mrs. Richards, and if he told them that he wanted the diamonds to finish his chain. To this question he answered, "Absolutely no."

After his conference with Edelhoff he said that he went back to the place of business, and around 12 o'clock that day (Jan. 24, 1906) he received a telephone message from Mr. Edelhoff to the effect that the two lots of diamonds had been billed out and that Edelhoff would send them to the witness by his brother, Arthur Edelhoff. Schickerling testified that after lunching at the Cafe Martin Arthur Edelhoff delivered to him a package which he said his brother, Gustave, had sent down by him to the witness.

Schickerling testified that he went across the road to a jewelry store but could not sell the diamonds. Then he said he went back to his place of business, where he weighed out the diamonds into new papers, took them to Simpson's pawnshop at Delancey St. and the Bowery, and pawned them for $4,000 cash, got the tickets and returned to his office in 22d St., and telephoned to Gustave Edelhoff that he had pawned the diamonds and had obtained $4,000 for them and would come up and see him about 4 P. M. that afternoon. This he did and gave Edelhoff $2,000. He testified that he paid him the money while in the loft over Edelhoff Bros. & Co.'s store, and that Edelhoff put the transaction in a ledger, putting on one side the two lots of diamonds as having been sold to the witness for $6,500 and on the other side a $2,000 credit for the money which had been paid him.

Further testimony in the case showed that Edelhoff Bros. & Co. was a paper concern organized by Conrad Schickerling or Schickerling Bros & Co., and through the medium of its president, Gustave Edelhoff, it had obtained several thousand dollars' worth of diamonds and jewelry from among the merchants in the Maiden Lane district, practically all of which had been immediately turned over to Schickerling Bros. & Co. or to Conrad Schickerling, and the Edelhoffs testified that the diamonds and jewelry so turned over to Schickerling were turned over to him at his demand, and on his statement that he had purchasers for them and that he would sell such pieces for the benefit of Edelhoff Bros. &

The last diamonds so turned ov amounted to upward of $45,000 were to be mounted by Schickerli & Co. and returned to Edelhoff Br All of the diamonds and mountec so delivered to Schickerling were by him, as he himself admitted, proceeds used for his own needs needs of Schickerling Bros. & Co

Schickerling, however, maintaine of the diamonds and jewelry so him were purchased by him from Bros. & Co. in his individual cap which purchases he subsequently promissory notes, and that they sold by him individually to his c Schickerling Bros. & Co.

Evidence of the pawning of t pieces and the diamonds other Oppenheimer diamonds was only a prove intent through similar tr and was not a part of the case case in chief being, as stated bef taining of the Oppenheimer di Edelhoff for the purpose of s as was needed to complete t chain and the immediate paw

The trial continued for eight d Vandiver being assisted in the pr by Charles S. Mackenzie, and the was ably represented by Abrah Judge Unger and Joseph Rosalsky.

Just before the close of the prosecution asked the defendant S ling if he had ever been convicte crime. The defendant first ref swer on the ground that it m incriminate him, but finally on the his counsel he admitted that he h so convicted, and the prosecut put in evidence his conviction United States Circuit Court for obscene matter through the U mail, by which conviction Schicker sentenced to 30 days' imprison low St. jail and a fine of $150

Under stipulation by counsel neith summed up, and the court then char jury, reading to them the sections law pertinent to the case, whic definition of the term larceny, in w court stated that criminal i shown, and explained criminal in a fixed idea on the part of the de to deprive the rightful owners of and benefit of their property

The judge further charged the the presumption of innocence rema the defendant, and before he could victed the jury must be convinced, a reasonable doubt, that the defe obtained the diamonds from E lelhoff understanding that he was to ex for the purpose of purchasing such needed for the completion of the R chain, and that with criminal int for the purpose of depriving the owners of their property Schicker ing diately pawned the diamonds.

The judge pointed out the differe tween bailment and sale and s some of the arguments that might been made by the attorneys had summed up the case. The defend support of his contention would ha gued that the transaction was a a bailment, and that there was

hi rom the testimony of a Mrs. Albert, who s a bookkeeper employed by Edelff os. & Co. The prosecution might ve gued that there was bailment in the nst of the possession of the diamonds. e getting of $6,500 worth of diad to be paid for within 30 days was a ethod of releasing the complaining e s from the obligations if they did i the diamonds and realized only ash and the balance in a note con- n on its face and running for 18

ury considered the case for six nd then notified Judge Crane that possible for them to agree upon

Vandiver states that he will not prosecution to drop at this stage ill endeavor to induce the District- to retry the case at the earliest da e, during the month of March,

aking about the case after the trial, ckenzie said that after Schickerest many hearings were had before ate, new District-Attorney Whitending over several weeks' time, esulted in the magistrate holding ling in bail to await the action of d Jury Almuth C. Vandiver, then nt district-attorney under Jerome, rge of the prosecution before Magishitman and pushed the case with diligence. After Schickerling was the Grand Jury by the magistrate ple's case was put in the hands of assistant district-attorney on ac- Mr. Vandiver's prolonged illness. r. Mackenzie said that although the disrney's office was importuned and d onstantly and repeatedly to bring ntion of the Grand Jury to the erling case, months passed before it sented. Then several indictments nd. Again aggravating delays ocbefore the case appeared upon the for trial, and the defendant, by one r another, succeeded in having it month after month.

y, when it was about to be tried, Mackenzie, who represented the Edeleditors, said that he discovered that ictments as found were faulty, and successful trial could not be had hem. He at once called the attenDistrict-Attorney Jerome to the n the indictment and urged that rling indictments should be found. s done and further delays were exd, and no action was taken until the of District-Attorney Whitman.

r Mackenzie then brought the attenthe matter to the present district- and, as it was found that there was in the district-attorney's office who en the case sufficient thought and n to be able to properly present it to rt, Judge Whitman was induced to r Mr. Vandiver as special districtr to prosecute the action on behalf people, owing to his familiarity with ils of the case required in its prosefore the magistrate.

ohen, Allentown, Pa., has the symy of his many friends owing to the death of his mother.

Receivers for Welsh & Bro. Co., Baltimore, Will Wind Up the Business.

BALTIMORE, Feb. 21.—By an order of Judge Dobler in Circuit Court No. 2 receivers were appointed for the well-known jewelry firm of Welsh & Bro. Co., 330 N. Charles St., as announced last week, and this appointment will end in the winding up of the business of the firm. This is a result of a series of financial difficulties that have developed ever since the great fire of 1904, when a business depression spread over the country about the same time. This condition was not due to the fire, but they both happened about the same time. Just before and after the great fire both members of the Welsh firm died and the business was reorganized by the younger men.

The receivers have ordered a peremptory sale of 30 per cent. discount on all the stock, which will be sold and the firm will be discontinued

The Welsh & Bro. Co. has been in business here for 29 years, and has always been one of Baltimore's exclusive stores. Frank E. Welsh was the founder, and when he bought out the interests of Canfield & Bro., early in 1882, they were then located at the southwest corner of Baltimore and Charles Sts. He took his brother, Thomas Welsh, into partnership and moved to 5 E. Baltimore St., where they remained until the great fire. Thomas Welsh died just before the fire, while Frank E. Welsh died Dec. 19, 1908.

After his death the younger men formed the Welsh & Bro. Co. The following are the officers at present: Charles Moran, president; George W. Richards, vice-president; Harry Schlarb, treasurer, and Harry Hammond, secretary.

Fourteen-Karat Club Holds Annual Meeting and Elects Officers.

The annual meeting and election of officers of the 14-Karat Club of New York City was held last Thursday evening at the Hotel Albany. The evening was devoted partly to a business session and the remaining time was enjoyed in a social way. New officers were elected and plans formulated for a beefsteak dinner and other social events for the coming season.

Over 25 members of the club were present when the meeting was formally called to order by President James Loeb, who, after a few preliminary remarks, opened the meeting for the election of officers. The following were chosen to serve for the ensuing year: President, William Anderson, Jr.; vice-president, Howard H. Whyte; secretary, Charles L. Andrews; treasurer, Edwin P. Loebl. An executive committee consisting of H. S. Osterweil, Frank Shaller and William Honigbaum were selected to have charge of the social events of the organization for the ensuing year.

After some discussion it was decided to hold a beefsteak dinner, and this event will probably take place within a few weeks, although no date was set for it at the meeting. The club is also planning this year to have an outing at a date which will be arranged later, and there is some talk of organizing a baseball team among the members of the club.

News Gleanings.

H. E. Paul, Lexington, Ill., has left for Martinsville, Ind., on a recuperative trip.

J. M. Henwood, jeweler in Court St., Binghamton, N. Y., will locate in the Kilmer building on April 1. He has been in his present location 40 years.

Mr. Tillson, of the Tillson Jewelry Co., Carrington, N. Dak., has spent the past six weeks in the hospital at Fargo, where he underwent a serious operation.

A. B. King, Clarence Saque and Charles L. Quintard, executors, have begun an auction sale of Quintard Bros.' stock, Poughkeepsie, N. Y. Murray & Stapleford, New York, auctioneers, are in charge.

F. Mendelson, formerly in business at 13 Store St., Bedford Sq., London, W. C., has removed to 187 Belsize Road, N.W. His business address will hereafter be Chancery Lane Safe Deposit, Chancery Lane, W. C.

During the funeral of Charles Kohler, held recently in Norristown, Pa., the local jewelry stores were closed. Mr. Kohler died suddenly at Overbrook after having been engaged in the jewelry business for a period of 25 years.

William Ditmars and Michael Coughlin, who so boldly looted John Gruner's jewelry store at Auburn, N. Y., Feb. 7, have been held to await the action of the Grand Jury, both prisoners waiving examination. The men have prison records.

John Kuskus, who was arrested, recently, on a charge of stealing two watches from Louis Maratskey's store, in Hudson, N. Y., when arraigned, last week, pleaded in defense that he was intoxicated at the time of the theft. The prisoner was held to await the action of the Grand Jury.

The new retail store of the Bastian Bros. Co., Rochester, N. Y., situated in the White mb building, 211 Main St., E., will be opened, March 8, and will be one of the finest in that section of the State. The location is a very good one from a business standpoint.

Representative Sheffield, of Rhode Island, has presented the petition of the New England Manufacturers' and Jewelers' Association, consisting of 412 manufacturers and jewelers located in Providence and the Attleboros, favoring the repeal of the corporation tax law of the present tariff act.

The first meeting of the creditors of J. Jay Baker, Wichita, Kans., whose financial difficulties were noted in a recent issue of THE JEWELERS' CIRCULAR-WEEKLY, was held Feb. 25. The liabilities include secured claims of $1,770 and unsecured claims of $2,436, while the assets are placed at $1,757.

A young man recently called at the jewelry store of H. H. McCreary, Cleveland, O., and offered, in payment for a watch, a check which excited the jeweler's suspicion. Investigation disclosed that the check had been stolen from a Mrs. Craft. The check was recovered by the police, but the young man escaped.

D. G. Gallett, Aberdeen, S. Dak., has arranged to move into a new store in the First National Bank building. His old store is being fitted up for Charles Sauer, who recently purchased the building in which it is situated for $18,000. He will make a number of improvements, putting on a new front and installing new fixtures.

Agent for United States and Canada

Prisoner Held by Pittsburg Police Admits Committing a Number of Jewelry Robberies.

PITTSBURG, Pa., Feb. 25.—The Pittsburg police, yesterday, captured Stephen Austin, aged 23 years, and his capture, they believe, will put an end to a series of robberies which has terrorized the town for a week. Austin was in Wylie Ave. yesterday, and in handling his pistol it accidentally exploded. The man's conscience troubled him and he began to run. That was fatal. Sub-Patrolman Charles Ross happened to be in the neighborhood and gave chase. He overtook the fleeing man and put him under arrest.

Austin broke down and made important admissions when he was placed behind

STEPHEN AUSTIN, UNDER ARREST AT PITTSBURG.

prison bars at the police station. On his person were found blue prints of thoroughfares and business establishments and a list of the names of a dozen jewelry stores which he had planned to rob. Austin acknowledged that he was the man who, last November, threw a brick through the jewelry store window of John Studer, 216 Federal St., North Side, and got away with jewelry and diamonds valued at $400. He also admitted standing in the vicinity of the Hardy & Hayes Co. jewelry store in Fifth Ave., last Saturday afternoon, for three hours, watching his chance in broad daylight to smash the show window, which contained diamond necklaces and other jewelry worth in excess of $40,000. But plain clothes men remained in the vicinity of the latter store all afternoon and Austin was foiled.

Austin had intended pulling off the robbery when the Grand Opera House matinee was closed, just before his arrest. He had placed a padded brick in an alleyway near side of the store and waited his chance to use it. However, officers kept close to the store. Austin had been attracted by the sight of the gems and concluded that if he could make a success of his plan to rob the store his fortune would be made.

The prisoner is said to be the man who played the role of a highwayman in several East Side drug stores, holding up the proprietors and customers and relieving them of their money. He is reputed one of the cleverest men with whom the police have had to deal in a decade. He is far above the ordinary criminal in intelligence and is a college graduate and a licensed civil engineer, but a thief by choice. Austin centered his thoughts and reading in criminology. He said that with him robbing was a matter of business; that it took a good man to identify a burglar who sticks a revolver in his face; that he was waiting for the big opportunity; that he had hoped some day to pay back every cent he had stolen; that he always held up young men because they could not think as fast as the older ones; that petty thefts kept the body and soul together, that he could not rob a woman. He tried the last in the East End and returned the woman her money.

Austin, yesterday, posed as a hero. To-day he is an object of pity and dejection. He sees a life of retirement in the Western Penitentiary, for the crimes which he has committed and acknowledged as committing are sufficient to send him to prison for the remainder of his natural life. THE JEWELERS' CIRCULAR-WEEKLY correspondent saw Austin at Central Police Station, to-day, after Superintendent of Police Thomas A. McQuade, had given him the "third degree." He said he hailed from Indiana, coming from a town near Terre Haute.

"When I started out," said the prisoner, "I never intended to get mixed up in these smaller robberies, but I had to do them to keep going. I am not now looking for sympathy, for I am just one of those fellows who tried the game and lost. When I left home, two years ago, it was on the promise that I would go out into the world and make my fortune, for I had something that was worth striving for—the vision of a happy home. At first I struggled on, never thinking that I would come to the life that I recently followed.

"I could not make a success of life by honest efforts so I sat down and figured out a plan that I calculated would make me rich. I reckoned that if I could make a rich haul I would be fixed for life. I would take the sum so secured, invest it and some day pay it back. Many times I hesitated about going into these smaller affairs, and on more than one occasion was on the point of sending home to mother for money to keep me going until such time as everything was right to make the next big "filch." And then again I knew that if I did that the girl who thought that I was prospering might get to hear about it and would worry for fear I had fallen on evil times."

Here the prisoner pictured the day when he would be able to wed the young belle of the Hoosier State, waiting with throbbing heart and expectant eyes for the return of the ideal of her life. He had left her two years ago to make his fortune and would not return until he did so. He was told to reconcile himself and forget finer feelings and tell of his crimes. He apologized for his thoughtlessness by retorting: "I was just waiting for someone to ask that question." Then he continued:

"I had everything arranged to show that Henry Klink, the man arrested for committing some of the crimes which I perpetrated, was innocent of the charge against him. I had planned to go through with a robbery that would convince the police that they had the wrong man. When I robbed that jewelry store on the North Side, some months ago, I would not have done so had I known that an old policeman was near at hand. If I had known that he was a young man I would not have hesitated a moment. But when I read in the papers that the policeman who was close at hand was an old man I really felt sorry for him. I knew that the very boldness with which the affair was done would bring censure and ridicule upon him. I often wondered if it would cost him his position and sincerely hoped that it would not."

Austin outlined to the police while being examined how he had intended robbing several jewelry stores; and the fact that his arrest prevented him from doing so caused general rejoicing, to-day, in jewelry circles.

Superintendent McQuade says that there is no doubt about Austin being a dangerous man, although they are not quite sure that this is his real name. Austin was photographed to-day and his picture is being sent broadcast in the hope of learning more about the man, for he may have committed thefts in other cities. Austin left Pittsburg following the robbery of the Studer jewelry store and pawned the loot. He stopped at big hotels when he had plenty of money and at small ones when his wealth was at low tide. It is now likely that the man Klink who was being held on suspicion as having committed several robberies will be discharged, since Austin admits all of them.

Edward Patrick, Corinth, Miss., Makes a General Assignment.

CORINTH, Miss., Feb. 24.—Edward Patrick, a retail jeweler of this town, has made a general assignment under State laws. No statement as to assets and liabilities has been filed.

Mr. Patrick has been in the jewelry business about four years; he started in December, 1905, at Booneville, but located in Corinth about a year ago. He is said to have few creditors in the trade.

The Wadley Watch Repair Co., Wadley, Ga., has gone out of business.

President Charles T. Evans of the New York State Retail Jewelers' Association has sent out to members the following letter upon the death of E B McClelland, fifth vice-president of the association, which occurred Feb. 17:

Utica, N Y., Feb 19, 1910.

To the Members of the New York State Retail Jewelers' Association.

It is with a feeling of deep regret and a realizing sense of the great loss we have all sustained that I announce the death at Syracuse, N Y., on Thursday, Feb. 17, 1910, of our friend and co-laborer, Edward B. McClelland, vice-president of the New York State Retail Jewelers' Association and president of the Syracuse Jewelers' Club. The development of association work in the past few years has brought into prominence many men who have hitherto labored quietly for the promotion of their own good and that of their fellows. We, of the executive committee, who have been associated with Mr. McClelland during the 11 months past, have come to know and recognize his many sterling qualities and genial fellowship. We have suffered a distinct loss in his death, and his presence will be missed at our councils. To those of his immediate family we tender our heartfelt sympathy in this their hour of desolation, and recommend them for consolation to the Great Architect of the universe who doeth all things well. C T Evans, President.

Omaha.

C. A. Williams, of C. A. Williams & Co., is making a business trip through the State.

Mr. and Mrs. E. G. Tucker and son, Pender, Nebr., were in this city, last week, purchasing stock.

H. S. Knapp and C. H. Finch, representing the Shook Mfg. Co., are traveling through the State on business.

Herman Grabeman, formerly with Adam Bloedel, Milwaukee, has recently taken a position with Albert Edholm as watchmaker.

Perhaps the largest order given in this part of the country in some time was that of $200,000 for silver spoons to the A. F. Smith Co. by the Independent Orange Co.

At a banquet given in South Omaha on the occasion of the 24th anniversary of their charter Mr. Furen, of Jacobsen & Furen Co., was on the reception committee and had charge of the decorations, for which he was highly complemented.

Claud M. Wheeler, Columbia, Mo., secretary of the American National Retail Jewelers' Association, and Chas. Sheldon, secretary of the Merry Optical Co., Kansas City, spent a day in Omaha, last week, on their return from the State convention in Lincoln.

Just at noon hour, on Friday, while the streets were crowded with pedestrians, two desperate young men smashed a front window in the store of Mr. Nathan and succeeded in getting a gold watch. Mr. Nathan and clerk were out of the store at the time. The young men were stopped by policemen and arrested.

The following out-of-town jewelers were in the city, last week, attending the Automobile Show and purchasing stock: Adolph Schlosser, Dodge, Nebr.; M. M. Huck, North Bend, Nebr.; M. L. Jones, Fairfield, Nebr.; H. L. Holtzinger, Pleasanton, Nebr.; C. E. Morris, Hancock, Ia.; John Crabill, Plattsmouth, Nebr.; Mr. Petersen, Lyons, Nebr.; L. S. Robinson, Glenwood, Ia.; C. E. Ellis, Bertrand, Nebr.; John Welirli, Missouri Valley, Ia.; E. Kahn, Friend, Nebr., and Daniel Ballinger, Cozad, Nebr.

Traveling representatives calling on the trade, last week, included: Alex. Teplitz, Schnefel Bros.; G. M. Davis, Depasse Mfg. Co.; A. Fleming, Alvin Mfg. Co.; Arthur Fess, Moore & Son; Thos. E. Rogers, Riker Bros.; John P. King, Watrous Mfg. Co.; I. Bergsman, Sheffield Silver Co.; Percy D. Lucas, Frank W. Smith & Co.; Jos. C. Wilson, Landers, Frary & Clark; A. M. Brinckle, C. F. Monroe Co.; Mr. Thornton, A. J. Hedges & Co.; M. L. Barnard, Larter & Sons; S. W. Abbey, E. Ira Richards & Co.; Milton S. Herzog, Milton S. Herzog; H. R. Blackman, Enos Richardson & Co.; F. E. Morrow, American Thermos Bottle Co.; Lew Fleming, Joseph Fahys & Co.; Otto C. Hanish, Geo. H. Fuller & Son Co.; W. A. Miller, W. W. Pierce Mfg. Co.; Geo. F. Heidet, C. F. Rumpp & Sons; William F. McGown, F. T. Pearce; Mr. Beckwith, Hamilton Watch Co.; H. C. Wilson, Crescent Watch Case Co.; C. M. Newcomb, Maple City Glass Co.; Henry Sherrill, Sinnock & Sherrill; Mr. Bennett, Waite, Evans & Co.; H. Hamburger, S. Pitzele; Randolph J. Warner, Empire Jewelry Case Co.; Joseph Block, Despres, Bridges & Noel; George Frank, Worthington & Raymond; A. H. Cohn, Eastwood-Park Co.; A. R. Engelman, Krantz, Smith & Co.; Oscar Gottlieb, O. Gottlieb & Co.; Mr. Sutherland, J. J. Nieland Co.; R. C. Larraled, Van Bergh Silver Plate Co.

San Diego, Cal.

A. L. Kingsbury, of the Rockford Watch Co., has been making calls on the local trade.

The Wiard Watch & Optical Co. has applied to the Common Council for a permit to conduct an auction sale to close out its business.

W. W. Meadows & Son have changed their place of business from 528 5th St. to 1627 E St. They had conducted their business at the former location for 12 years.

J. Jessop & Sons have issued a very neat post card for gratuitous distribution, showing the 20-dial clock which stands in front of their place of business in the Granger block. The senior member of the firm is shown standing near the base of the big timepiece.

Pacific Northwest.

B. Wolfel, Portland, Ore., is back at work after an illness of more than six weeks.

G. Heitkemper, Klamath Falls, Ore., has been forced by his many creditors to close his doors. It is claimed that his liabilities aggregate $7,000.

Charles Martin, of the Martin Jewelry Co., Walla Walla, Wash., has been putting in a new front and refitting his store, and now has a very handsome place of business.

An attempt was made to enter T. K Smith's store, at 117 S. Market St., Oskaloosa, Ia., recently. The prompt arrival of the night watchman prevented the thief from carrying out his plans.

THE GORHAM MARK

A SALE IS MADE

when the Gorham trade-mark  is shown on a piece of Sterling goods, therefore, the wise merchant makes it a point of specializing in that line. He saves not only time, but in many cases a customer, by showing him goods bearing a mark that he understands and that in most cases is desired.

The Educational Side of Conventions.

THE educational effect of the meetings and conventions of the retail jewelers and their value to the members of the organizations, and to non members who may be induced to attend, is one of the most important features of the organization movement which has now become so strong. The officers of the organizations have been making clear to members what has been accomplished directly in the way of concessions from manufacturers and the elimination of trade abuses in the last two or three years, but not enough has been said about the educational features of these gatherings. If these meetings do no more than to cause the old and conservative members to awaken to the fact that modern methods of merchandizing are an essential feature of success in the jewelry business, the work as well as the time and trouble spent in organizing has been amply repaid.

It has often been said that many a good merchant in the embryo has allowed himself to "rust" away at the watchmaker's bench. The ideas and the knowledge were within him, but there was nothing to bring them out. He knew what his competitor across the street was doing, but beyond that he was ignorant of the way his trade was advancing along the lines of progress in up-to-date methods of merchandising. Whether there was any excuse for such a man in the past is a question, but if there was it no longer exists. With his trade journals putting him in touch with his fellow merchants all over the country, with his State and local organizations giving him a chance to exchange views and ideas with men who are working in the same conditions as himself, and with the annual conventions putting before him the result of the best ideas obtainable from specialists in the manufacturing and retail lines, the jeweler has no excuse to stand still, and he who will still continue in a "rut," does not deserve to succeed, but should be considered a detriment to his trade.

Beware the Check Swindler.

AGAIN we are called upon to warn the jewelry trade in general to be especially careful in dealing with swindlers who may offer checks in payment for purchases, as the reports which have come to us from the middle west and south in the past two or three weeks indicate that a number of professional check swindlers are again operating with considerable success; though their victims among jewelers appear to be fewer in number than those in other lines, the swindlers are evidently playing no favorites, but are visiting jewelers whenever they see a chance of success.

So clever have one or two of these men been that many of the victims have not had the slightest suspicion that they have been swindled until after the crook has left town, and several hotel manager as well as jewelers who felt that they were familiar with all the tricks in the check swindling line learned to their sorrow that they had permitted their confidence to be abused by a man they felt certain was honest in every particular. It, therefore, behooves all members of the trade to be unusually careful in check transactions as one at least of the swindlers seems to be able to operate without exciting the least suspicion.

> Have a well defined purpose in advertising, and write your copy and conduct your campaign accordingly. Shoot at the mark, not all around it.

The most active of these crooks who is a fine looking young man, well dressed, with all the marks of good breeding and refinement, often represents himself as a son of a prominent grape juice manufacturer of Elmira, N. Y., and jointly swindles hotel managers and jewelers or other merchants in his operations. He stops at a good hotel and at first pays promptly and apparently has no financial worries. He soon makes the acquaintance of a jewler, looks at diamond rings, and in the course of his examination discloses the fact that he is a good judge of stones. In some instances, he tells the jeweler that he was awaiting a check and picks out a ring to be held for him for about a week. The jeweler, on making inquiries at the hotel, finds that the man is apparently respectable and well thought of, and this and the engaging manner of the customer himself generally lulls suspicion. The thief, after having identfied himself at the hotel as the son of a merchant of rating, often borrows a small amount of cash from the hotel clerk or manager for 24 hours awaiting his remittance. The following day, generally on Saturday, and after 12 o'clock, he apparently receives some checks, gives one to the hotel clerk and gets change if he can. He then goes to the jeweler, tells him he wants the ring but does not want to pay for it all in a check as he does not want his father to know how much he spent for it, and he then gives the cash which he has obtained from the hotel and a check for $100 or so, to the jewelry merchant.

Fortunately for some of the jewelers they have prudently refrained from turning over their merchandise until they could find out about the check, but others who were not so careful have accepted his part payment of cash as evidence of good faith, and let the swindler take away the ring only to find within a day or two that the check was worthless.

A typical instance of this work occurred at Lansing, Mich., recently, where the swindler obtained from the hotel $65 which he turned over with a $100 check to a local jeweler in payment for a $165 ring, but it was 10 days before the jeweler or hotel keeper learned from the bank that the checks were bogus and the swindler was wanted in other places; by that time all trace of him had been lost.

Members of the trade on whom these swindlers may call, from time to time, are requested to notify THE JEWELERS' CIRCULAR-WEEKLY, that we may in turn bring

nnual business meeting of the stock- of the Mauser Mfg. Co. will be the office of the company, 298 Fifth March 11, to elect officers for the year.

Heidenheimer, who has been in of the New York office of Martin Mainz, Germany, sailed Saturday on anic for Paris to take charge of the that city.

rt Cohen, of Lewy & Cohen, 114 h Ave., to which place the concern recently from 530 Broadway, left on a business trip to Pittsburg and t. He will be gone about 10 weeks.

el Lenkowsky, importer and cutter onds, 74 Stanton St., has opened a wn office at 71 Nassau St. Mr. sky returned last Wednesday on the after a six weeks' trip to the Euro- amond markets.

Harris Bros. Jewelry Co. has been rated under the laws of the State of ork to deal in jewelry, watches, pre- ones, etc., with a capital of $20,000. corporators are: Simon T. Harris, Thomas M. Nichols and Nathan Samter, all of New York.

Michael Kelly, who went into the jewelry store of Isidor Lande, 941 Third Ave., recently, tried to get away with a gold watch and a watch case, but who was apprehended by the jeweler and S. Edelberg, a clerk, and turned over to the police, has been convicted and sentenced to one year in a penitentiary.

Edward Stanley Hearsey, aged 57 years, for 10 years a jeweler in the employ of A. W. Cornelius at the latter's Cookman Ave. store, Asbury Park, N. J., died recently at the Shadyside, 600 Munroe Ave., of uraemic poisoning. The body was taken by Funeral Director Bodine to Flatbush, L. I., for services and interment. Mr. Hearsey is survived by three daughters and three sons.

E. R. Crippen and J. R. Coe, as trustees of the fund which was raised in the Maiden Lane district after the death of Robert Lomax, for the benefit of Mr. Lomax's widow, are in receipt of a letter from her expressing her thanks to those who so generously contributed toward the fund. The money was sent to her in weekly installments of $7, and the last payment of $6 has now closed out the fund of $370. Robert Lomax, or "Bob," as he was known, died some little time ago. He was an elevator man in the Hay's building for 16 years and was well known in the district.

The United States Supreme Court has finally settled the long litigation growing out of the advance by the Board of General Appraisers on Haviland china in 1906 by denying the application made by the Government for a writ of certiorari to the Circuit Court of Appeals, which decided in favor of the importers. The case has attracted a great deal of attention among importers and customs officers generally, because it involved the right to carry a reappraisement case to the courts when the reappraising officers made their decision without evidence to sustain it.

The news reached this city from London last Friday that the Indian Government had raised the import duty on silver to four anas per troy ounce, or about 16 per cent. on the present market value of silver. The news was without preliminary warning, and the price of silver dropped in the London market from 24d. on Thursday to 23 7-16d., with a corresponding drop here, the price of the metal being regulated by the London quotations, which fix the price for the world. Silver was as low as 22d. per fine ounce in the London market in December, 1908, and has fluctuated within a few cents per ounce since the panic of 1907.

Irving Trimmer, a chauffeur, was arraigned before United States Commissioner Benedict, in the Post Office building in Brooklyn, last Wednesday morning, on complaint of Secret Service Agent Otto F. Klinke, who charged him with having in his possession and attempting to pass counterfeit money. Trimmer visited the jewelry store of George A. Kaplan, 725 Myrtle Ave., and had a ring tested, the charge for which was 25 cents. He handed the jeweler half a dollar, which the latter saw was a counterfeit. Kaplan then asked his customer if he had any other money, and Trimmer pulled out of his pocket a quarter and a dime, both of which were bad. Kaplan then told him he should be arrested, and Trimmer picked up the ring and hastily left the store, with Kaplan in pursuit. Policeman Mahoney happened to be close at hand and he placed Trimmer under arrest. The prisoner pleaded not guilty to the charge entered against him, and waived examination when arraigned before the Commissioner. He was held under $500 bail to await the action of the Federal Grand Jury.

The sale of porcelains collected by E. H. Gay, of Boston, which followed that of the Ladd collection Friday afternoon at the American Art Galleries, included, with a few bronzes, only 54 pieces, and brought $20,197. The Duveens were the largest purchasers. They paid $2,200 for a powder blue ginger jar. John Duveen paid $2,900 for a pair of powder blue palace jars, and an oviform blue and white vase of the Wan-li period went to them for $1,650. Armond G. Smith paid $1,750 for a set of three oviform jars and two vases of Chinese blue and white and J. Sinclair $1,150 for a pair of blue and white palace vases. C. I. Hudson bought a pair of blue and white jars for $620.

The Jewelers Security Alliance has received a letter from John C. Leppert, 917 W. Madison St., Chicago, reporting an attempt on the night of Feb. 22 to enter his store. A plate glass window was broken, although heavily guarded by a grating. Articles in the window included clocks, cut glass and silverware, which were not removed at night. Mr. Leppert was notified at his home of the window smashing, and on going to his store found that the window had been broken by use of a heavy bottle. A woman was arrested on the charge, the arrest being made through the efforts of a young man named John Ernst, who was on his way home at the time. He heard the crash and notified the police.

R. A. Talbot, a traveling salesman of the Alvin Mfg. Co., who was in the automobile accident in Denver, Colo., recently which resulted in the death of three people, returned to this city last Wednesday. He shows few signs of his terrible experience and is receiving the congratulations of his friends on his escape from more serious injury. A slight scar above his temple marks the worst wound he received. Mr. Talbot in speaking about the accident said that statements were made by the press at the time which are not borne out by the facts. He explained that it was simply a coincidence that found him in the touring car at the time of the acident. It appears that Mr. Talbot and Mrs. Keating were members of a theater party and while in a restaurant before the entertainment began happened by chance to leave to join other friends at the theater at the same time that Morris Mayer, Mr. Baker and Miss Cain started to leave the same restaurant. Mr. Talbot and Mrs. Keating were invited to ride to the theater in Mr. Mayer's automobile. It was during the trip that the accident occurred. Mr. Talbot explained that he was not a member of Mr. Mayer's party but, knowing Mr. Baker, stopped to exchange greetings with him, and had either party left the restaurant at any other time he would not have

The firm of Rosenthal & Hookaylo has just started in business at 41 Maiden Lane to manufacture diamond mountings and fancy ladies' rings. Julius Rosenthal was formerly in charge of the factory of Eisenstein & Co. and Jacob Hookaylo was formerly in business at 44 Broome St., Newark.

The Leedin Novelty Co., makers of silver-plated toilet ware, whose New York salesroom was located at 566 Broadway for a number of years past, have now removed to new quarters in the Jewelers' building, 9 Maiden Lane. The new display rooms are well equipped for the jobbing trade. Earle R. Sheppard is the sales manager.

The Samuel Schoor Co. has been incorporated to manufacture pearl buttons, buckles and ornaments at 668 10th St., West New York, with a capital of $25,000, divided into 250 shares of the par value of $100. The incorporators are: Samuel Schoor, 10th St., West New York, 125 shares; Isadore Jacob Sternberger, 124 shares, and Herman E Goldschmidt, one share.

A delivery wagon belonging to Laubheim Bros., 65 Nassau St., in charge of Monroe Morris, driver for the concern, was standing in front of a store on the Bowery last week when the horse became frightened and started up the Bowery, causing consternation between Hester St., Third Ave. and 9th St. The wagon was dashed against an "L" pillar after knocking down a man and a woman and barely escaping a score of pedestrians. Policeman Long finally succeeded in stopping the runaway.

Robert C. Morris, trustee of the bankrupt estate of Schickerling Bros. & Co., has filed in the office of Referee McGrane Cox a verified petition setting forth the terms of the proposed compromise of the claim of the bankrupt estate against Edelhoff Bros. & Co. The petition is now on file in the office, where it may be examined by creditors and other persons interested. There will be a meeting of the creditors to pass upon the petition at the office of the referee, 50 Church St., March 8, at 12 o'clock.

Dr. Geo. F. Kunz, head of the precious stone department of Tiffany & Co., who returned recently from a trip in the west, is reported as saying that he believed that the diamond discoveries in Arkansas promise good results. He called attention in an interview published Monday to the fact that there is only one diamond pipe in the district within a circumscribed area and that this had all been taken up by a legitimate company. Nevertheless it would be apt to lead other concerns to talk about a continuation of the vein, he said.

J. Heilbron, formerly western representative for the C. H. Eden Co., Attleboro, Mass., and M. B. Goldberg, until recently a partner in F. L. Singer & Co., Milwaukee, Wis., have joined interests and bought the jewelry, leather and optical departments in the Thoens department store, St. Paul, Minn. The concern will be known as the Goldberg, Heilbron Co., and will have a suite of offices on 7th St., St. Paul. The members of the new concern have been buying stock in this city recently, and expect to begin operations on or about March 12.

Although he knew that the police had sought him for two months, Charles Strauss, who is charged with embezzling $1,700 worth of jewelry, could not subdue his longing to see a friend and visited her home on Jersey City Heights Saturday night. He fell into the clutches of Detectives Nugent and Rooney, who had maintained a nightly vigil at the house for weeks anticipating the visit. Strauss was employed as salesman by George Davidson, a Jersey City jeweler, and during the holiday season it is alleged decamped with jewelry which he pawned or sold.

The Gross & Gross Co. has leased space in the Silversmiths' building, 15 Maiden Lane and 18 John St., to the following: American Optical Co., Bankers & Merchants' Electric Producing Co., William P. Dodd, Eastern Jewelry Co., Henry Ginnel & Co., Eastwood Park Co., International Silver Co., Gothard Lowenstein, H. W. Matalene, Mathey Bros., Mathez & Co., I. Ollendorff Co., Oneida Community, Ltd., William L. Sexton & Son, Abraham Schorr, Alexander Steele, Jr., Weidlich Bros. Mfg. Co., J. J. White Mfg. Co., Wightman & Hough Co. and William M. Welling.

Charles Aronowitz, of Stern & Aronowitz, 71 Nassau St., recently received a letter threatening him and his family with death unless he paid over $500 before a specified time. Mr. Aronowitz found the letter in his mail. It outwardly resembled an invitation. The lines were written in a neat and careful hand and suggested that he send $500 to the writer under pain of death. The note was phrased in polite terms, and the writer said that he trusted the payment of the sum named would not inconvenience Mr. Aronowitz. However, the letter said, it was imperative that the writer should receive the money within the time specified.

A young man in the employ of Smit Bros., 71 Nassau St., while returning from a bank with $650 in bills in his possession Saturday morning was robbed of $450 of the money by pickpockets. The money, which was in bills of large denominations, was placed in a book which the boy slipped into his overcoat pocket. When he reached the building in which his employers are located he got into a crowded elevator and thought no more about the money until he reached the office. He was surprised to find that he was $200 short, but recalled that two men crowded against him in the elevator and that they were in unusual haste to reach the street. The boy enjoys the confidence of his employers.

The Jewelers Board of Trade report the following offers of compromise settlements: S. Deutsch & Son, Cleveland O., 25 per cent. cash; the liabilities are about $27,000, with nominal assets of approximately $6,000. W. E. Bishop, Caney, Kan., is offering 30 cents on the dollar, cash, the liabilities being $7,302 and nominal assets of about $3,000. P. Sabini, Stamford, Conn., has made an offer of 20 cents cash; the liabilities are said to be about $2,000 and practically no assets. J. W. Goldstein, San Francisco, Cal., is offering to settle with creditors at 35 cents on the dollar, all in notes payable as follows: 10 per cent.

Thresher, Waite Thresher Co.; Albert Buffinton, Potter & Buffinton Co.

Connecticut.

A patent was granted recently to W. A. Porter on a watch holding case. Mr. Porter has assigned the patent to the New Haven Clock Co.

Daniel J. Hurley, superintendent of the New Haven Clock Co., New Haven, accompanied by his wife, is at present enjoying a short rest at Auburn, N Y.

Horatio H. Lane, who died recently at his residence in New Haven, was for several years in the employ of the New Haven Clock Co. The deceased was 67 years of age.

Senator Irving H. Chase, secretary and treasurer of the Waterbury Clock Co., Waterbury, is enjoying a trip in company with several prominent business men of his city.

John O'Donnell, who for 35 years had been in the employ of the Bradley & Hubbard Mfg. Co., Meriden, died recently at his home at that place, after several weeks' illness.

The Geological Department of the United States National Museum has received an interesting gift of specimens showing culture pearls from Mikimoto's pearl culture station at Ago Bay, in Japan.

Employes of the American Silver Co. have organized the American Silver Co.'s Sick Aid and Benefit Association in Bristol. The officers elected are: President, Samuel J. Large; vice-president, Anna Duval; secretary, Thomas Green; treasurer, Henry N. Law.

The Rogers Silver Plate Co. recently elected the following directors: N. B. Rogers, C. B. Rogers, A. S. Davenport and G. L. Eastman, of Danbury; Gilbert Rogers, Meriden, and Arthur L. Baldwin, New York. The directors elected the following officers: President, N. Burton Rogers; vice-president, C. B. Rogers; treasurer, A. L. Baldwin; secretary, G. L. Eastman.

The wife and daughter of Henry F. English, director in the New Haven Clock Co. and other concerns, narrowly escaped being seriously burned in a fire which destroyed the home of Walter Kimball, in Brookline, Mass., where they were visiting recently. Mr. English returned to New Haven from a visit to Brookline last week. His wife and daughter were not seriously injured in any way, although they suffered considerably from shock.

Washington, D. C.

S. Greenberg, 818 H St., N. E., is ill.

C. E. Berry, of Berry & Whitmore, has returned from a trip to New York.

Wm. Nordhoff, 910 14th St., N. W., is reported to have broken his arm as a result of a fall.

Vice-President Hutterly, of the local jewelers' society, is still confined to his home with grippe, as is his eldest son.

Geo. Ellis, Baltimore, has opened an office at 639 F St., N. W., where he will do jewelry and watch repair work for the trade.

The Saks Optical Co. is now located in its new store at 708 7th St., N. W., where the company has increased floor space and window display room.

Among the travelers in town during the week were: J. Maurice Buchheimer, Geo. H. Buchheimer & Co.; representative of Whitelaw Bros. & Zagon; Arthur Totten, Brown & Mills; J. Merochinick; E. M. Lake, F. W. Gesswein; Mr. Millheiser, Newell Mfg. Co., and representative of Mann Bros. Jewelry Co.

J. H. Duehring was one of the central figures at the masquerade ball given by the Columbia Turnverein at the Old Masonic Temple, and was ably assisted by A. Schmidt, Fred Wedding and Roy Lupton, all of Schmedtie Bros. Among the prizes offered for best single and group costumes were those donated by jeweler members—a water set of three pieces by G. W. Spier, lady's silver mesh bag by Schmedtie Bros. and lady's ring set with garnets by Wm. Nordhoff.

The L. E. Waterman Co. recently obtained from the Supreme Court of the District of Columbia a decree in its favor in the suit against John Saadi, who does business under the style of the Egyptian Diamond Co. The decree restrains the defendant Saadi from infringing upon the Waterman Co.'s trade-mark "Waterman's Ideal Fountain Pen," or using the words "Ideal" or "Waterman" or "Waterman's" on fountain pens, labels, boxes, letter heads, etc., or even using the word "Waterman's" in conjunction with other words or letters in any way in connection with the sale of pens. The defendant is enjoined from representing or advertising any fountain pens other than that of the concern as "Waterman's" pens, or "Waterman Fountain Pens." A similar decree had previously been issued in favor of the Waterman Co. by the United States Circuit Court at Cleveland in the concern's suit against the Standard Drug Co.

J. B. Nye, Jr., formerly of Berkeley, Cal., has gone to Hollister to take charge of the jewelry and stationery store of his father, the late Jacob Nye

TRUSTS AND THE RETAILER

IF TRUST methods should be successfully introduced into the jewelry business, it is not to be expected that the Retailer would escape their influence.

¶ In other lines of trade where trusts have broken in and made headway, they have boldly set up chains of competitive stores with cut prices deliberately aimed to drive the independent Retailer to the wall.

¶ The octopus has many tentacles and they are aimed in all directions. The fight is on. Right-minded Manufacturers, Jobbers, Retailers, all who have a spark of manly independence, are concerned together. Help the fight by *dealing with independent houses.*

¶ We are sure this is a bad year for trusts. There are signs and omens. Whatever happens, one thing is sure: this house will continue to stand firmly upon the bed-rock of absolute independence.

D. C. PERCIVAL & CO., Inc.

373 Washington St., BOSTON, MASS.

LOYALTY TO THE RETAILER

THE POLICY of this house is to conserve the interests of the retail trade by conducting business along strictly wholesale lines. We do not sell at retail. This established principle is well known and appreciated. Lines include

Newark.

TRADE CONDITIONS.

With but few exceptions both retailers and manufacturers report a very quiet February. Many concerns which reported a much better January business than they had had for several years found business slow during the month just passed. There are some exceptions to this, however, among the manufacturers, of whom the majority look for a good trade later. Some manufacturers have received large quantities of goods to be refinished and take this as an indication that many retailers are heavily stocked and will not purchase largely of new goods until they have sold more of the old supply.

William A. Lee, of the Lee-Dodd Co., Hamilton St., has just returned from a trip to Boston.

William L. Huger, of William Huger & Co., 44 Marshall St., is just starting on a three weeks' trip through the middle west.

Horace T. Garrigus, Jr., representing L. E. Garrigus & Co., leaves this week for a trip to Philadelphia, Baltimore and Washington.

J. Sapiro, representing Bioren Bros., 473 Washington St., will soon leave for a trip to the Pacific coast. He will not return until July.

The jewelry store of Edward W. Price, 576 Main St., East Orange, will be moved to a new store to be made by the remodelling of a building at 588 Main St.

C. Chatwin, Richardson building, is enlarging his plant. He has just rented two additional rooms and purchased new equipment. Ten new employes will be put to work.

Frank Holt, of Frank Holt & Co., 379 Broad St., is spending a few weeks in Florida. He has visited Tampa, Jacksonville and other places and is now at Florence Villa.

M. Newhouse, representing M. Alexander, 50 Columbia St., left last week for a trip through the middle west. Before finishing the trip he will probably get as far west as Denver, Colo.

Theodore C. Mertz is about to start in the jewelery mannfacturing business at 12 Johnson St. He will manufacture special jewelry. He was formerly with Merz Bros., Mulberry and Chestnut Sts.

R. V. Jones, representing Frisch Bros., 50 Columbia St., will leave at once for the middle west. He is a new man in the trade and it is possible that he may become a resident salesman in that territory.

Thurstans & Waters, who recently secured quarters in the Richardson building, for the manafacture of self locking catches for brooches, belt buckles, collar pins, harrettes and other articles, have been securing proper tools and machinery and are now ready for business. They already have many orders and will complete their first order this week. The catches will be sold to manufacturers and to the trade.

The jewelry store of Erward Sherwin, in Bloomfield Ave., was broken into between eight and nine o'clock one night last week and some clocks valued at about $100 were taken. Mr. Sherwin left the building shortly before 8 P. M. and upon returning an hour later he found things upset. Entrance had been effected by breaking the glass of a window in the rear of the building. The valuable jewelry had been placed in a safe.

James Orchard, a jeweler of 324 Hillside Ave., died of heart disease in his home Thursday morning. He was born in this city 54 years ago, and for many years was employed as a jeweler by Carrington & Co. Mr. Orchard was a tenor singer and sang in the choirs of the leading churches in New York, the Oranges and Newark. He is survived by a widow, two sons, Harry and Frank, and a daughter, Margaret. Interment was in Clinton Cemetery.

Funeral services for Theodore C. Clark, a former roundsman of the local force and a veteran of the Civil War, who died of heart disease in his home, 36 Myrtle Ave., were held at the house Friday, Feb. 19. Interment was in Fairmount Cemetery. Mr. Clark was a jeweler by trade. He served in Co. R, Second New Jersey Regiment, until he was honorably discharged at the end of the Civil War. He joined the police force in 1875. He retired permanently in 1906. A widow survives.

The annual meeting of Merrill Bros. (Inc.) was held at the office of the company, 22 Green St., last Wednesday evening. A 10 per cent. dividend on the stock was declared. Officers for the ensuing year were re-elected as follows: President, Joseph M. Merrill; vice-president and sec., George D. Merrill; treas., Stuart Lindsey. Good reports are received from Harry and Joe Aicher, who represent the firm in the west. Fred Bailey, representing the firm, left Monday for the near west, and Edward Briggs for a trip through Pennsylvania and the east. George D. Merrill, of the firm, is about to take a trip to Boston.

Many prominent jewelers, representing both the manufacturers and the retailers, attended the Board of Trade banquet given in the honor of William Howard Taft, President of the United States, at the Kreuger Auditorium, Belmont and Springfield Aves., last Wednesday evening. Frank Holt, the Broad St. jeweler, was a member of the committee on arrangements, and Matthias Stratton, of Alling & Co., was on the reception committee. Plates for 700 were laid and the occasion was a most successful one. The main streets of Newark were elaborately decorated in honor of the city's distinguished guest, and at Broad and Market Sts., massive pillars were erected for the occasion.

Twenty-four games were played by the Jewelers' Bowling League last week. On Monday Feb. 21, teams representing Allsopp & Allsopp, J. A. & S. W. Granbery and the Shiman-Miller Mfg. Co. (team No. 2), played. The Allsopp team won two and lost two games. The Granbery players won four straight games, while the second team from the Shiman-Miller Mfg. Co. lost four games. On Wednesday, Feb. 23, the teams from Kohn & Co., Alling & Co. and Carter, Howe & Co. rolled. The Kohn & Co. bowlers won four games; the Alling players won two games and lost two, while the Carter, Howe & Co. players lost all four games. With the games this week the third and last month of the contest begins.

About 40 members of the Friendly Society of Engravers of the New York district sat down to their Winter banquet, Saturday evening, Feb. 19, at Hotel Broad in this city. An excellent menu had been arranged, and the members did justice to the good things provided. Th began at 7.30 o'clock and lasted hours. Alexander Murray, the of the society, presided. A sh was made by Mr. Murray, progress of the society. A rising given to former President Willia mack, who recently went to M as foreman at the Mount Royal Co. Among the speakers were: I ertson, Wappingers Falls, N. Y Stone, Peekskill, N. Y.; Leona Irvington, N. J.; Fred. P city; Joe Wright, Passaic, N J McLay. Among those wh selections were: Albert Cr Hadfield, Robert McAdam and James Logan. The com rangements consisted of Th T. S. Livsey and Elmer Th and Walter Cherry, Newark

Albert Anschutz pleaded g of the Court of Quarter Friday, Feb. 25, to fou brought against him by the Grand Jury charging him wit zling a quantity of jewelry f of the Newark manufacturers H arrested several days before fixed at $1,000. Not being a a bondsman he was committed to jail. After pleading to the indic was remanded to jail to await which will probably be pronounced Anschultz admitted that he h zled five diamond brooches fro sche & Co.; a diamond ring w from George J. Motzenbecker, Gomery St.; four platinum c William H. Taylor & Co.; and mond brooches of Adolph R Columbia St. Anschultz is a r Newark and has worked in seve jewelry factories. He obtained on credit and secured money b them. The stolen goods have covered by the owners from t shops. Anschultz last worked & Co. He was recommended the manufacturers who knew hi not know that he was a thief.

Syracuse.

The funeral of Eugene B. M jeweler and fifth vice-president of York State Retail Jewelers' A was held from the family resid McBride St., Feb. 20. The serv simple, Rev. Dr. S. R. Calthro May Memorial Presbyterian Chu ciating. Many of Mr. McClelland's associates attended the funeral T a massive cross of roses and lilies Syracuse Retail Jewelers' Asso a wreath of hyacinths and ro New York State Retail Jewelers' tion. The honorary bearers we Dey, Robert Dey, Howard N Frank Garrett, L. L. Thurwacht Pierce, F. A. Carter and Wil sted. Edward Lewis, formerly with W. W. Fulmer, of this city, and recently with M. J. Averbeck, New York, has resigned his position.

George W. Miller, father-in-law of William Bovard, of M. M. Bovard & Son, jewelers of Manayunk, died, Feb. 16, aged 86 years.

Warren Geary has purchased the stock and fixtures of F. W. Haas & Co., jewelers, of Bethlehem, Pa., and will continue in the same line.

L. Stern, Providence, R. I., has gone to Atlantic City to recuperate from the effects of grippe. Fred Barry, representative of this firm, is taking a short vacation, which will be spent at his home in this city.

T. B. Wallen, Camden, N. J., will enlarge his place of business, next month, his present quarters being too condensed for the great increase in business. Mr. Wallen has the best wishes of the trade for his steady advance to the front.

The many friends of William Long missed his cheery greetings at the recent banquet. Mr. Long, who is an active member of the club, had to forego the pleasure for the first time this year on account of a serious attack of grippe.

Application was made to the Governor, Monday, for a charter for the Bennett Jewelry Co., a corporation to be formed under the laws of Pennsylvania, to deal in jewelry and kindred lines. The incorporators are: Arthur F. Bennett, Wm. E. Thornton and C. Wilfred Conard.

J. E. Caldwell & Co. are exhibiting in their Chestnut St. window two handsome silver pieces, a punch bowl and loving cup, made and designed by this house for the Market St. National Bank and the Tradesmen's National Bank. The pieces are to be presented to George H. Earle, Jr., on the occasion of his retirement from the office of president.

Strike sympathizers, last week, interfered with the arrest of George Fimbley, of Passayunk Ave., who had robbed the jewelry store of Joseph Reider, 22d and South Sts. Quite a crowd had gathered around the police, insisting upon the release of the prisoner. It took some time to convince the mob of their mistake, and it was only when the prisoner had almost made his escape that they were sufficiently impressed to lend a helping hand.

Fire again broke out in the building of William N. Doebele, manufacturing jeweler and diamond setter, 805 Sansom St., Thursday evening. The greatest sufferer in this instance was Bershtein Bros., manufacturing jewelers, who occupy the second floor. It is doubtful just how the fire originated, but it is supposed to have been due to carelessness on the part of a workman. The damage, which amounted to $500, was covered by insurance.

Charles Dorsey, 24 years old, was arrested, last week, on the charge of having robbed the National Mercantile Co., 1607 South St., of jewelry valued at $2,000. Information was received by the police that Dorsey had been disposing of the stolen jewelry in the Tenderloin, and it was while he was making his escape with a companion that he was caught at the ferry and arrested. The prisoner was given a hearing by Magistrate Mackin and held in $500 bail.

The $1,600 worth of jewelry recently stolen from the store of Abstein & Gordon, 517 S. 4th St., has been recovered by Policemen Grover and Sweeney, of the Third district. The jewelry, which had been hidden away in the walls of the cellar of 314 S. Front St., the home of a man named Richards, now in custody, has been found with the exception of a few pieces. It was while Richards was selling the jewelry that he was detected by the police and arrested.

Claiming authority under his appointment by the Philadelphia Orphans' Court as administrator of the estate of his murdered brother, the late Leopold Ermann, Jacob Ermann, of this city, was in Allentown last week for the purpose of securing all the watches and jewelry placed in evidence as Ermann's property during the trial of George N. Schaffer, who was hanged here Feb. 10 for this murder. The administrator was given the property.

The following jewelers were visitors to this city during the week: Frank Kline, Spring City, Pa.; A. M. Kendall, Millville, N. J.; Joseph Kern, Wilmington, Del.; O. O. Stillman, New Brunswick, N. J.; H. B. McFarlan, East Downingtown, Pa.; R. T. Chapman, Atlantic City, N. J.; H. S. Kratz, Souderton, Pa.; Henry Bolte, Atlantic City, N. J.; Josiah Hecker, Mainland, Pa.; E. P. Zane, Christiana, Pa.; John Fish, Bryn Mawr, Pa.; H. H. Lake, Ocean City, N. J.; E. L. Thomas, Phoenixville, Pa.; C. E. Harper, Salisbury, Md.; E. K. Bean, Lansdale, Pa.; M. K. Laudenslager, Souderton, Pa.; Thomas Trapp, Trenton, N. J.; M. E. Hunter, Beverly, N. J.; John Merz, Hopewell, N. J.; John MacPherson, Mauch Chunk, Pa.; Joseph Loeb, Reading, Pa.; M. E. Keeport, Reading, Pa.; J. B. Ray, Conshohocken, Pa., and J. A. James, Swedesboro, N. J.

Columbus, O.

Mrs. Crezdorn, wife of Herman Crezdorn, a jeweler of Seguin, Tex., is visiting Mr. and Mrs. Robert D. Fisher, in Hamilton.

Receiver Charles P. Outhwaite, appointed by the United States Court to take charge of the property of M. J. Daniels, against whom involuntary bankruptcy proceedings were brought in United States Court, has thus far located but $2,097 worth of property. Daniels, with his wife, has been in Hot Springs, Ark., but his attorney says he will be back and will furnish a complete list of his assets and liabilities.

E. J. Goodman, of Goodman Bros., was called before a probe committee of the State Legislature to testify concerning purchases of gold leaf made several years ago from the firm of Mark Slater, former State printer, whose regime was being examined into for graft. Mr. Goodman had little difficulty in showing the committee by his books that his firm's accounts with the State were above suspicion. The committee later found alleged crookedness in Slater's deals with a Dayton man and caused his arrest. He is now in jail in Columbus.

Providence.

Kuhne & Seidel, die sinkers, have started in business on the top floor of 25 Calender St.

John R. Palmer is calling on the trade of the middle west for H. A. Kirby, of this city.

Anson D. Manning is sending some good orders from the middle west to D. Wilcox & Co.

Frederick McSchwarz, of the Alpha Jewelry Co., has been granted a patent on a cuff-pin.

Mr. and Mrs. Leo Samuels and Miss Clare Samuels are at Atlantic City for several weeks.

Zare White has returned from a successful call upon the trade in Detroit, Chicago and Milwaukee.

J. J. White Mfg. Co., of this city, has arranged with A. Merback to represent them in New York.

Pembroke S. Eddy, of P. S. Eddy & Son, who has been on the sick list for a fortnight, is convalescent.

William Williams, of Williams & Payton, is in New York for an extended stay in the interests of the firm.

R. R. Fray, of the Fray Jewelry Co., Detroit, Mich., was in this city and the Attleboros the past week on a buying trip.

William H. Luther, of William H. Luther & Son, has purchased land with improvements thereon on the east side of Melrose St.

N. B. Goldstein, of Herzfeld, Phillipson & Co., Milwaukee, Wis., visited the manufacturers here last week and placed several orders.

The Baird-North Co. was admitted to membership in the Rhode Island Business Men's Association at its monthly meeting on Tuesday.

Frank Miller, of the E. A. Potter Co., of this city, has returned from New Orleans, where he was present during the Mardi Gras festivities.

Work is to be started at once on the new buildings for the Inlaid Co., on Cyr and Broad Sts. The contracts were awarded the past week.

The trade of S. B. Champlin Co. throughout the middle west received a call the past week from the firm's representative, Walter H. McKenna.

W. A. Kaufman, of the R. W. K. Co., Chicago, was a visitor among the manufacturers of this city the early part of last week, and placed several orders.

The monthly meeting of the Rhode Island Society of Optometry will be held in the rooms of the association, 123 Weybosset St., this city, on Friday evening March 11.

Horace F. Carpenter, of H. F. Carpenter & Son, refiners, is on an extended trip through the south, accompanied by his wife. They expect to be absent for several weeks.

L. P. Sturtevant is confined to his home at North Swansea, Mass., with a fractured leg. He has been in a hospital for several weeks, but has been at home about a week or ten days.

The contract for the new factory building which is to be erected by A. T. Wall & Co., at the corner of Claverick and Clifford Sts. has been awarded, and work will be commenced about March 1.

Fire escapes are being placed on the building corner of Weybosset and Mathewson Sts., from which employes of the Frost Jewelry Co. and the T. G. Hudson Jewelry Co. had narrow escapes during a recent fire.

Mr. and Mrs. William Loeb are planning to leave soon for California. Their recent trip to Panama was curtailed by an accident to Mrs. Loeb in which her ankle was badly sprained, necessitating their return home.

The Albert Walker Co. has taken a lease from the Samuel Land Co. of premises in building at corner of Weybosset and Eddy Sts. for a term of three years. This is where the firm has been located for several years.

The S. K. Merrill Co. was closed down Monday and Tuesday of the past week and then had to work its factory evenings to make up lost time. The company has orders enough ahead to run full time for an indefinite period.

The G. W. Dyer Co., of this city, has filed articles of incorporation at the office of the Secretary of State. The incorporators are George W. Dyer, Nellie L. Dyer and Charles H. C. Carter. The company will manufacture jewelry, with a capital stock of $20,000.

The numerous old-time friends and acquaintances of Thomas S. Carpenter, of the former manufacturing jewelry concern of Richmond & Carpenter, will learn with keen regret and sorrow that he is an inmate of a sanatorium at East Bridgewater, Mass., suffering from tuberculosis.

Harry Cutler, of the Cutler Jewelry Co., made his first appearance in uniform at the head of Company E, of the First Light Infantry Regiment on Washington's Birthday. In the evening he officiated as toastmaster at the regimental banquet. Among the speakers was Maj. Howard D. Wilcox.

A. J. Dumont, Damase Dumont, Moses Dumont, Henry J. Voucher, Jacob Dumont and Frank M. Wilcox have filed articles of association at the office of the Secretary of State as the Chartley Jewelry & Mfg. Co. for the purpose of manufacturing and dealing in jewelry. The capital stock is $25,000.

Among the foreign importations received through the Providence Customs House during the past week were the following: From Bremen—10 packages of imitation precious stones; from Havre—one package of manufactures of copper; from Liverpool—one package of files and from Yokohama—eight packages of porcelain.

Among the larger taxpayers on the town of Warwick, according to the latest assessment just announced, are the following: George B. and Waity A. Champlin, $15,600; George B. Champlin, $50,000; Waity A. Champlin, $25,000; James A. Foster, $100,400; Maria M. Foster, $35,500; Henry A. Kirby, $46,600; John S. Palmer estate, $25,040.

Charles F. Simmons has purchased the interests of Frank E. Guild in the Frank E. Guild Co., 4 Blount St., this city, and a new corporation has been formed under the name of Ripley-Simmons, which includes the former members of the old company. The firm will be represented on the market by Allin W. Ripley, who was for the old concern.

Spencer B. Hopkins, inspector of buildings, has commenced a crusade against factory buildings and workshops where 25 or more persons are employed, to have all doors to open outward. The matter of fire escapes on buildings is also receiving much attention. Several buildings which jewelry establishments are in are subject to these laws.

Fred D. Carr, secretary of the Gorham Barton Co., was elected a member of the board of managers of the Rhode Island Society, Sons of the American Revolution at the annual meeting Tuesday of last week. Among those present at the meeting in the evening were Mayor Henry J. Gainer, Albert E. Stevens, Ernest L. Fuller, Frederick S. Hough, Fred D. Carr and Charles H. Darling.

The case of Samuel Harris, receiver of the Manchester Mfg. Co. was heard before Judge Tanner in the Superior Court last week on the defendant's motion to vacate the recent order of the court of Feb. 11, allowing plaintiff's attorneys to view and examine a certain machine on defendant's premises, on which it is claimed that the plaintiff was injured. The motion was denied.

Thomas U. and Joseph Catlow, of the George N. Steere Co., Pawtucket, and sister, Mrs. Benjamin Wyman, wife of Benjamin Wyman, dealer in precious stones, have the sympathy of the jewelry trade in their recent double bereavement. Within less than one week their father and mother both died from pleuro pneumonia, the latter contracting the disease while nursing her husband. Mr. Catlow was 75 years of age, and his wife 73. They were born in England and came to this country about 30 years ago.

Curtis Beatty died at his home, 9 Cross Ave., Pawtucket, Monday of last week, at the age of 50 years. For the past two weeks he had been suffering from Bright's disease and nephritis. Mr. Beatty was born in Pawtucket, R. I., and was a son of William A. Beatty, for many years a manufacturing jeweler of this city. In early years the deceased entered the employ of his father, and continued with him until he had mastered the trade, and then entered into partnership with him. When the firm gave up the manufacture of jewelry business the younger Mr. Beatty went into the fruit business, which he took up about a year ago.

An interesting feature at the 150th anniversary meeting of Mount Vernon Lodge of Masons in this city on Washington's Birthday, was the presentation to the lodge of a bas relief of George Washington, the work of Frederich Kohlhagen, a Past Master of the lodge, an instructor at the Rhode Island School of Design and a member of the Gorham Co.'s staff of designers. The presentation of the work, which is pronounced to be one of the best productions of its kind seen in this section of the country, was by the sculptor himself, who, in modest words, asked the lodge to accept his work. At the head table at the banquet of the lodge were Charles H. Dundar, Edward I. Mulcahey, G

ole Frank T. Pearce and Harry Duns-

ract aimed at irresponsible concerns ic do business under assumed names t purpose of making it practically im- si e for creditors to enter action against m was introduced in the State Senate, da by Senator William M. P. Bowen, th city. The act requires that after 1910, any concern desiring to carry a usiness under a name other than the me or names of the individual or in- id ls conducting such business shall file th office of the town or city clerk in e such business is conducted the real r names, both Christian and surname, t person or persons conducting the ne with the post office address. Persons w onducting business under assumed are directed to file such certificates o Aug. 1, 1910.

actions at law were filed in the Superior Court, Feb. 25, against F. H. Adams & Co., of Adams & Zahn, manufacturing jewelers, 129 Eddy St., as the result of an alleged accident to Stephen I. Shanley, a minor, who was employed by the defendants as an operator of a drop press. The plaintiffs claimed that the weight or hammer of the press fell upon the young man's hand on Dec. 16, 1909, crushing two fingers so badly that amputation became necessary. The injured employe sued for damages laid at $10,000. His father, Francis P. Shanley, brought suit to recover for the loss of his son's services, placing the amount of his damages at $2,000. The cause of the accident was alleged to be a defect in the belt connected with the hammer of the drop press.

North Attleboro.

Walter B. Ballou returned last week from a stay in the south.

A. B. Chace is making a western trip in the interests of Boss & Baldwin.

George K. Webster and Fred Sturdy sailed, last week, for Porto Rico.

Fred S. Gilbert left last Sunday for a short business trip to New York.

Alpin Chisholm has returned from a short visit to his New York office.

K. Lucius Taylor, salesman for Riley & French, was at the factory last week.

William Swift returned last week from an extended vacation enjoyed in the south.

Frank Waite, salesman for the Webster Co., was in New York, last week, on business.

E. I. Franklin & Co. have received notice of the registry of their trade-mark on jewelry.

Thomas G. Frothingham, of T. G. Frothingham & Co., returned, last week, from the west.

G. C. Hudson, Elton B. Fisher and Herbert J. Straker enjoyed a fishing trip at the Cape, last week.

William B. Peckham, New York salesman for J. H. Peckham & Co., is spending a few days in town.

Robert Flecher, designer for the estate of O. M. Draper and Dr. E. E. Hale, manager of the concern, was in New York last week.

A large number of manufacturers and salesmen attended the funeral of the late Burton A. Noble, at Providence, last week. Mr. Noble was formerly salesman for Sturtevant & Whiting.

Mandalian & Hawkins are erecting a small building on their newly purchased property on Elm St. It will be utilized for the distribution of their links to outside purse makers.

The Republican town committee at its final meeting last week indorsed John Tweedy for park commissioner, Fred S. Gilbert for school committee, John A. Rose for selectman and John L. Thompson for electric light, sinking fund and water commissioner.

A. L. Schiller, Scranton, Pa., is making extensive improvements in his store at 111 Penn Ave. The interior is being entirely remodeled and an extra store will be added to the building. A new front will also be erected.

Attleboro.

Ernest Bliss of the Bliss Bros. Co. left, last week for a pleasure trip to the tropics.

Arthur McRae and William H. Saart have returned from a fishing trip on the Cape.

Harry R. Holbrook, of the Holbrook Mfg. Co. has been granted a patent on a bracelet.

Sadler Bros. are running their factory at South Attleboro overtime in order to fill orders.

Fred Somles with Bates & Bacon is making a short New York trip in the interests of the concern.

R. R. Fray, of the Fray Jewelry Co., of Detroit, was in town, last week, visiting the jewelry factories.

H. E. Watson & Co. is the name of a new firm in South Attleboro which has commenced to manufacture jewelry.

William A. Cook, of the Fontneau & Cook Co., returned last week from an extended trip to the Pacific Coast.

Peter Nerney returned home last week from a southern voyage. He had planned to extend his trip but business prevented.

George L. Witherell is slowly recovering from an attack of pneumonia which has confined him to his home for some time.

John M. Fisher appeared before the Attleboro selectmen Wednesday evening and protested against the allowing of certain kinds of entertainment at banquets.

J. L. Sweet, of the R. F. Simmons Co., returned, last week, from an extended trip around the world. During his trip he visited China, Japan, Cairo, Madeira and other places.

Tyndale Bros., Inc., Attleboro, to manufacture and sell jewelry, have been incorporated with a capital of $25,000. The officers are: President, John Tyndale, Attleboro; treasurer, James Tyndale, Attleboro.

The following jewelers from the Attleboros attended the hearing at the State House last Wednesday on the amendment of the 56 hour bill: S. O. Bigney, Joseph Finberg, John M. Fisher, D. S. Spaulding, William S. Lyons, Charles Wilmarth and Chas. T. Paye.

The Electric Chain Co. and the Hansen-Bennett Co. have leased the upper floor of the factory on south Main st. formerly occupied by the Frank Mossberg Co. Interior repairs are being made to the building. It is said that one of the largest silversmithing firms in Attleboro is considering the advisability of moving into the lower floor of this building.

In the Fourth District Court, last Friday, Frank H. Bliss, a prominent jeweler of North Attleboro, was fined $50 for reckless driving, $10 for driving an automobile at unreasonable speed, and was held under bonds of $5,000 for the grand jury on a charge growing out of the fatality on the night of Feb. 9 when his automobile killed John Evans. Mr. Bliss entered an appeal from the fines.

J. M. Bigwood, Terre Haute, Ind., presented a very attractive trophy cup to the local poultry association, under whose auspices a large exhibit was held in Terre Haute, recently.

We supply our product to a limited number of the best wholesale watch houses in the country. They push the sale of Illinois movements — not because of the superior quality alone — but because of the established selling prices, which insure a satisfactory profit to them as well as to their customers.

Elmer Rich took a party of the Chicago Rotary Club to Minneapolis last week and founded a branch of that club in that city.

Alfred Eisenberg, son of Adolph Eisenberg, San Francisco, Cal., stopped over here last week on his way home from Europe.

Among the diamond men here last week were: Mortimer Adler, of Chas. Adler's Sons, and Phil Noel, of Rud. Noel & Co.

J. J. Menger, jewelry buyer for the Mermod, Jaccard & King Jewelry Co., St. Louis, Mo., was a local visitor last week.

Arthur A. Cattaneo, retail jeweler at Peru, Ill., has filed a petition in bankruptcy with liabilities of $2,436 and assets of $1,579.

Geo. E. Kissick, with Maintien Bros. & Elliott, has resigned his position to go with the C. D. Lyons Co., Mansfield, Mass.

The Wm. Bens Co., Providence, R. I., has opened an office in room 501, Heyworth building, in charge of Nat F. Kazlow.

D. A. Wilkins, representing the Ostby & Barton Co., returned from the Pacific Coast last week and is now on a trip to the factory.

Members of Silverberg Bros., El Paso, Tex., were here last week buying fixtures for their new store which they will shortly open.

In addition to the line of Mandalian & Hawkins, Glenn L. Seitz has secured the line of the Mansfield Jewelry Co., New York.

Albert Wehde, manufacturer of handwrought jewelry, has removed from 151 Wabash Ave. to room 1103, Heyworth building.

Will Beck, Sioux City, Ia., accompanied by his son, Cornish, was here last week on business relative to the refurnishing of his new store.

S. Buchsbaum & Co. are making alterations in their salesrooms, which, when completed, will considerably enlarge their diamond room.

The Jackson Jewelry Co. has increased its capital from $2,500 to $60,000 and has bought the interest of L. L. Sachs in the Jeffrey Jewelry Co.

Aaron L. Katlinsky, father of L. Katlinsky, died on Feb. 20, aged 91 years, and was buried on Feb. 22 from his late residence, 5,942 Indiana Ave.

The Imperial Clock Co., Granite City, has been incorporated with a capital of $75,000. The incorporators are: Frank H. Ferand, John R. Trott and Joseph R. Stein.

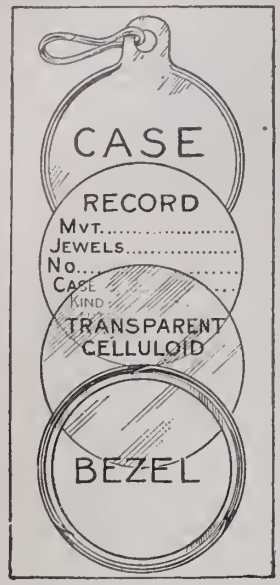
Chas. J. Jacobs, of the Knickerbocker Silver Co., has been confined to his home with a heavy cold. Leon Gross has returned from a trip to the Pacific Coast.

Miss Millie Strelitz, sister of the Strelitz Bros., died suddenly at the Michael Reese Hospital, Feb. 21, and was buried last Wednesday from Furth's Chapel.

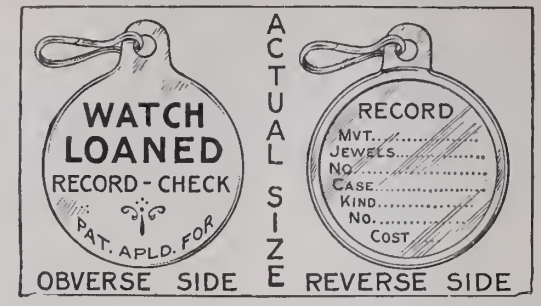
The Newman Jewelry Co. has been incorporated here with a capital of $15,000. The incorporators are: Isador C. Newman, Max H. Bloom and Joseph Brodsky.

Chas. I. Herron, for the past 17 years with the late Chas. H. Pfeil, has bought the stock, fixtures and good will and is continuing the business in the Republic building.

The Gerber-Buschmann Cutlery & Silverware Co., St. Louis, Mo., is adding a jewelry department to the business. Chester Buschmann was here last week on a buying trip.



F. A. Bull, retail jeweler at 1,632 E. Irving Park Boulevard, has sold out to G. W. Van Patton, formerly employed at the factory of the Elgin National Watch Co. Mr. Bull will locate in Wisconsin.



Wm. Miller, manufacturing jeweler at 156 Wabash Ave., has sold out to Mr. Block, who was formerly of Kronberg, Block & Fischer. Mr. Miller will confine his attention to his retail jewelry store at 354 E. 43d St.

Otto Young & Co. have begun proceedings seeking to restrain the county treasurer from collecting $894 assessed by the board of equalization on the capital stock of the company. The bill states that the amount in question was levied on the capital stock assessment of $20,000 and that this action is contrary to law.

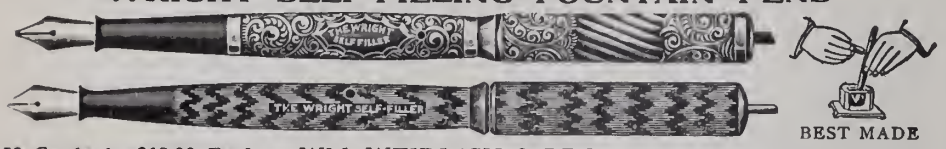
Ernest Lunt, Chicago manager for the Towle Mfg. Co., returned last week from a flying trip to New York. George Lunt, his brother, who is in charge of the New York office, will take a vacation on account of ill health and A. L. Fuller, from the Chicago office, will leave for New York to take charge there.

Among the buyers in town last week were: E. T. Oakes, of Oakes & Wulze, Los Angeles, Cal.; O. C. Zinn, Hastings, Nebr.; E. Bengston, Freeport, Ill.; L. R. McCain, Delphi, Ind.; Mr. Alsted, Alsted-Kasten Co., Milwaukee, Wis.; Geo. S. Bander, Elburn, Ill.; John Seifert, Mulberry, Ind.; L. Krasney, Milwaukee, Wis.; G. H. Coen, Normal, Ill.; M. C. Remington,

NEW!
WATCH LOANEI
Record=Check

Use this check in connection with the paj tag usually employed when a customer leaves watch for repairs, but only when you lend him watch. The check is an **Unfailing Reminder** a an absolute protection against loss of loan watch

It contains its own record, which will pr whether the watch returned is the same one you loaned. It contains a complete invoice of the loan wat It will enable you to locate any particular watch used for loan purposes at any time.



Enter the record on the printed slip within; **once only.** It will not wear out and may be u repeatedly. Two extra slips accompany each check to be used in case one is blotted when you ma record. The check proper is made of aluminum, hence, very light and convenient.

No. H1030 **Price $1.50 per dozen** **Not Sold in quantities less than One do**

Bracelet Box

Buy Guaranteed Jewelry Cases No

You have never heard of *guaranteed* jewelry cases, have you?

The boxes we make are of *steel.* We *guarantee* that they will not warp or shrink and Empire Boxes will always keep their shape.

Our automatic boxes have no catches, but are equipped with our *Patented Emp. Double Action Spring*, which holds the box rigid, whether open or closed.

Jewelers often complain that catches on wooden or fibre boxes get out of order. For those desire a box with a catch we refer you to our *Perfection* line, for which we were gran November 30, 1909, Patent No. 941,741. This catch is so simple in construction and still so stron made, that we *guarantee* it to work always.

We can sell you steel boxes for less than you have been paying for wooden boxes, because make them in very large quantities by our automatic machinery, and therefore cost us les produce—you deriving the benefit.

If you are not acquainted with our line, ask us to send you *free* our booklet.

"THE REASON WHY"

If you feel that you do not require enough boxes to order from us, let us send you the nam our jobber nearest to you. Ask him for *"Empire"* boxes.

er Milwaukee jeweler is now con-
ith a jewelry house at Omaha,

Los Angeles.

Bastheim, Adams & Abel Co. are just now immersed in the work of stock taking.

A. S. Shaddow, with offices in the Broadway Central Building, is now the local representative of Geo. Greenzweig, San Francisco.

Brock & Feagans furnished 12 cups to the Los Angeles Driving Club as trophies in the Washington's Birthday events of the club.

A son of A. H. Witman, Pomona, Cal., has come to Los Angeles and is learning the engraving business with Brandenburg & Graham.

Rudolf Olcson, who has been with the J. C. Fleming Co. for the past three years, has gone to the Imperial Valley to engage in farming.

Mrs. E. Gerson is now en route to France, her native country. It is her first visit to her old home since she came to this country in her early youth.

S. D. Seamans, Aurora, Ill., brother-in-law of J. G. Donavan, and his partner in the Donavan & Seamans Co., has just arrived here, expecting to remain about a month.

E. Griffith, manufacturing jeweler, formerly with the Carl Entemann Jewelry Co., has taken a position with Brandenburg & Graham, in the Broadway Central Building.

Among the out-of-town jewelers who have been in Los Angeles, recently, are: S. J. Newton, Long Beach; O. P. Swen, Escondido; A. R. Moon, Escondido; F. A. Conant, Santa Barbara.

Jacob Miller, who has been the city representative of Bastheim, Adams & Abel Co., has now gone on the road for the same firm. His present trip will take him to Arizona, Nevada and Utah.

The jewelry wholesalers all closed during the afternoon of Washington's Birthday. The retailers, however, with the exception of S. Nordinger & Sons, who were closed all day, did not close.

M. Brown, formerly in business at 5th and Spring Sts., this city, but who for the past six years has been in business in Buffalo, N. Y., has returned to this city and contemplates locating here again.

The Carl Entemann Jewelry Co. made an exhibit of monograms at both the big automobile shows recently held in this city. The display attracted considerable attention and resulted in a number of sales.

Geo. F. Blakeslee, a jeweler doing business at Tonopah, Nev., who has been here since Christmas, returned to Tonopah a few days ago. Mr. Blakeslee's family lives at Lankershim, a town near this city.

E. Gerson is manufacturing 350 gold, silver and bronze buttons for the Rotary Club, with headquarters in Chicago. A branch has just been established in this city. Mr. Gerson is the only jeweler in Los Angeles admitted to membership.

C. C. Abel, of Bastheim, Adams & Abel Co. has just returned from a six weeks' business tour up and down the Pacific Coast. He went up the coast as far north as Portland and returned by the way of Salt Lake City and Nevada. He reports his trip successful from a business point of view.

Harry D. Brown, a bucket shop operator who did a big business in this city for a time and who was accused of having passed a worthless check for $1,000 on Joseph Rittigstein, a Broadway jeweler, has been convicted on a charge of embezzlement. Brown's attorney has filed a notice of appeal. Rittigstein's case is still pending.

The Whitley Jewelry Co. has recently supplied a considerable number of loving cups and other trophies. Among them were a silver cup sold to the Belasco Theater Stock company, to be presented to Thais Magrane, the leading lady of the company; a solid silver cup presented to Henry J. Miller, superintendent of the Metropolitan Life Insurance Co.; and prizes for the Marathon race between this city and Venice, Cal., on Washington's Birthday. The Whitley Co. donated a cup for the second prize in this event.

Traveling representatives in this city, recently, include: L. J. Wolfsheim, Wolfsheim & Sachs; Albert M. Gilbert, M. Schussler & Co.; Joseph V. St. Clair, S. Sternau & Co.; Jacob Marx, Kossuth Marx Jewelery Co.; J. F. Finley, Whiteside & Blank; J. Mayer, Mauser Mfg. Co., Mt. Vernon, N. Y.; W. A. Brown, Carter, Howe & Co.; S. L. Mitchell, Sloan & Co.; John L. Jepson, Bippart, Griscom & Osborn; J. Longwill, Henry M. Abrams Co.; Mr. Hani, Sussfeld, Lorsch & Co.; E. R. Bennett, Waite Evans Co.; Leon Abeles; Jay H. Merrill; D. Schwab, Davis & Schwab; R. H. Krause, California Jewelery Co.; Leo Stein, Alphonse Judis Co.

Denver.

Ralf Beeman, formerly with Boyd Park Jewelry Co., has taken a position with Jos. I. Swartz.

L. Nieyth, formerly of Cleburne, Tex. has purchased the stock of the Murchison Jewelry Co., Cheyenne, Wyo.

Ralf S. Adamsky, one of the oldest jewelers in Cheyenne, Wyo., was married in Denver last week. Mr. and Mrs. Adamsky will make their home in Cheyenne after an extended honeymoon. Miss Jones, the bride, has been in the employ of Mr. Adamsky for several months.

H. E. Duncan, of the Waltham Watch Co., assisted by Mr. Robinson, gave an illustrated lecture three days last week. This is the first time Mr. Duncan has come as far west as Denver. The lecture was largely attended and very instructive. After the exhibit Mr. Duncan and assistants were given a banquet at the Albany Hotel by the Horological Society. Among the out of town visitors were Lloyd Gardner, Longmont; Mr. Hart, Boulder, and Mr. Maxwell, Florence, Colo.

James Clayton, alias Dutch Otto, was arrested last Friday in company with three others accused of knowing something about the burglary of the store of John Drayden & Sons, Salt Lake City, Utah. Diamonds, watches and rings valued at $15 000 were taken. Confronted with a picture circulated by Salt Lake police three years ago, Clayton broke down and admitted that he was J. J. Cameron, the subject of the photograph. A reward of $1,000 was offered by the jewelers of Salt Lake at the time of the robbery. He will be sent to Salt Lake for trial.

the creditors decided to make a diligent search for Rosen and prosecute him to the full extent of the law. It is charged that there was a conversion of property that should come to creditors.

Out-of-town jewelers here, the past week, buying stock included: Frank Emmerling, Hillsboro, O.; Walter Wittig and wife, Marietta, O.; Charles Hofman, Springfield, O.; A. Bland, Greenfield, O.; I. N. Pollock, Ashland, Ky.; Joseph Goodman, Columbus, O.; S. L. Sherwood, Ewing, Ky.; A. M. Stamm, Williamsburg, O.; Hurvitz & Lopinsky, Thurmond, W. Va.; O. O. McCracken, Mt. Olivet, Ky.; John L. Lancaster, Paris, Ky.; F. J. H. Schell, Xenia, O., and W. H. Kesler, Corydon, Ind.

The Ku Kus, Nest No. 2, held its election recently, the following being chosen: King, Charles Reinstatler; prince, William Pohlmeyer, of Pohlmeyer & Roth; chief, Clem. F. Schmidt, with Robert Neuman; Guard, Adam Reiss, of the Practical Plating Co.; keeper of kash, Joseph H. Kenkel, and scratcher, Robert Hess, of the Standard Optical Co. Following the election the usual bowling tournament took place, after which came the Dutch lunch at the wind-up of the meeting. The attendance was large and all agreed that it was the finest meeting in the history of the "Nest."

The local police have made what they think is an important arrest in capturing a man giving the name of William Spihai, who is said to be wanted in Hamilton, O., on a charge of window smashing. A short time ago the Seidensticker store in that place was robbed of a lot of rings and watches, the window having been broken by the thief. It was about that time that a window in George Newstedt's store was broken and considerable valuable jewelry stolen. The man in custody refuses to say anything. A woman, thought to be connected with the affair, is being sought.

Frank Herschede, of the Frank Herschede Co., has returned from Washington, D. C., where he and others of his committee were successful in securing for the Ohio Valley Exposition, to be held this Fall, the government exhibits they asked for. President Taft has accepted the invitation to come to his old home at this particular time. It is also expected that ex-President Roosevelt will be here at this time. It may be said of Mr. Herschede and many other Cincinnati jewelers that they have not only through their enterprising spirit made Cincinnati a jewelry center but have helped largely in the advancement of the city's welfare generally.

Traveling representatives who called on the Cincinnati trade, during the past week, included: L. H. Smith, Bippart, Griscom & Osborn; John J. Moffitt, Battin & Co.; M. L. Barnard, Larter & Sons; R. B. Carr, Wordley, Allsopp & Bliss Co.; Mr. Rosenberg, Paye & Baker Mfg. Co.; Charles F. Hartshorn, Alling & Co.; George H. Thomas, Scharling & Co.; L. A. Binder, Ernest Gideon Bek; C. Williams, Louis W. Hrabra; J. E. Simonson, Ludwig Nissen & Co.; James R. Palmer, Henry A. Kirby; J. Laffey, Gorham Co.; H. B. Bliss, B. M. Shanley, Jr., Co.; Lucien Rockwell, Poole Silver Co.; H. C. Barker, Hayden W. Wheeler & Co.; Mr. Barth, William B. Durgin Co.; W. R. Brooks, Brown & Mills; J. T. Griffith, Jr., Carter, Howe & Co.; A. Rutherford, Taylor & Co.; T. E. Bowne, E. Ira Richards & Co.; Mr. Angell, George L. Paine Co.; Mr. Taylor, Wilcox & Wagoner.

The fact that so many of our jewelers are seeking larger quarters and better facilities for their increasing business has proven that Cincinnati has grown as a jewelry center. Important evidence of this is even found in the removal of the Oskamp Jewelry Co., for so many years located at 5th and Vine Sts., which for that time afforded them space and every convenience sufficient to carry on their business. However, Mr. Oskamp, realizing demands of his trade were becoming such that improvements were necessary in his business, sought more suitable quarters. He is now settled in his new place at Race and 7th Sts. The floor, which probably attracts the visitor's notice first, is in Moravian Mosaic tile of a light green color, blending beautifully with the walls and ceiling, which are decorated in soft greens. This floor is the first one of its kind ever laid in America. The store, being situated on a corner, is afforded the best of light and consequently does away with much artificial light. The store has a floor space of 3,300 square feet and is arranged on the alcove plan. The fixtures, entirely new, are in solid mahogany and of a dull finish, with the exception of the counter cases, which are in solid rosewood, resting on mahogany, with bases of Verde antique marble. The window cases and some of the exterior work are of this marble also. The electric fixtures, very handsome, are massive brush bronze equipped with the Tungsten lamps. The wall cases are lighted by invisible lights shining through ground-glass ceilings in the cases. A large mirror extends across the rear of the store, which adds greatly to its beauty. In part, of the rear of the store is laid a mezzanine floor upon which are located bookkeepers, cashiers, etc. This floor is connected by means of a pneumatic tube service with every department in the store. The repair department is connected with the wrapping and cleaning room by elevators. Also in the rear are located W. S. P. Oskamp's private office, a diamond room and a department devoted to automobile supplies. The basement, which is divided into different departments for plating, engraving, watch repairing, clocks, etc., is also fitted up in mahogany. The company has a 10-year lease of this corner, with the privilege of 10 more, at a rental of $8,400 per annum. Mr. Oskamp visited many of the largest cities in this country in order to get ideas for his store. The company will hold its opening March 15.

J. S. Anderson, Aurora, Ill., is receiving the sympathy of his many friends in the trade owing to the recent death of his father, Charles A. Anderson, at Elgin.

The Rogers, Lunt & Bowlen Co., Greenfield, Mass., incorporated under the laws of Massachusetts, has just increased its capital stock to $102,000. This, with a substantial surplus, will better enable this silverware concern to properly handle its rapidly increasing business.

Indianapolis.

E. M. Craft, of the A. P. Craft Co., is seriously ill at his home.

J. W. Culbertson has taken charge of all of the watch and jewelry repair work for H. Cohen & Sons.

The spring arts and crafts class conducted by Charles B. Dyer began its sessions Feb. 21 and will continue until some time in May. It has about 25 members.

John P. Mullally, who is supreme president of the American Order of Owls, will spend several days at the organization's supreme offices in Chicago during March.

Chris. Bernloehr & Bro. have begun closing every day at 5 P. M., except Saturday. This is the hour observed by other merchants for closing only through the Summer months.

E. B. Johns and Donald A. Hickman, manufacturers, who have had quarters with Chris. Bernloehr & Bro., have moved to 516 Massachusetts Ave., where they have added a retail jewelry business.

Gray, Gribben & Gray, 35-37 N. Illinois St., expect to get into their new quarters at the point of Illinois St. and Indiana Ave. this week. This concern also has to move as their present location is to be razed.

Jobbers and wholesale merchants of Indianapolis are organizing the Indianapolis Trade Association, the purpose of which will be to attract to this city some of the trade that is going to Cincinnati, Chicago, Louisville and Cleveland.

Indiana jewelers in this city last week included: J. F. Kiser, Muncie; J. A. Miessen, Cicero; John W. Hudson, Fortville; J. O. Lutz, Zionsville; G. C. De Camp, Shirley; Mr. Staats, of the Staats-Raynes Co., Clinton, and George W. Clemens, Greensburg.

Jewelers and other merchants of Evansville closed their stores for four hours on Tuesday afternoon, March 1, and with their assistants aided the Commercial Club to sell lots, the proceeds from which will be used in giving bonuses to two large manufacturing concerns.

Ernest Newlin, who has been located at 31 N. Illinois St., will move to 215 N. Illinois St., in a few days, owing to the fact that the building in which he is now located is to be torn down. Recently Mr. Newlin and A. J. Earl, who operated under the name of Earl & Newlin, dissolved partnership, the former having engaged in the insurance business.

The show window in the store of Dallas F. Green, Fort Wayne, was broken at 5 o'clock on the morning of Feb. 21 and robbed of a tray of 18 Masonic emblem rings, valued at $700. Another tray containing watches and diamond rings was not disturbed. The robbery occurred at a time when there are no police on duty. The police have been unable to find any clew to the robbers, who are believed to have been professionals and were frightened away before they had completed their work.

Kansas City.

Chas. H. Bard, Sedalia, Mo., was a recent visitor to the city, and took in the Shriners' circus while here.

Mrs. Betina Rogers, of the office force of Porter & Wiser, is spending a vacation in Peoria and other Illinois points.

J. J. Burke, president of the Brooks Jewelry & Optical Co., who is touring Mexico, accompanied by Mrs. Burke, was last heard from at Saltillo. He is expected back in St. Louis about March 11.

M. Stiffelmann has returned from a three weeks' trip through Missouri, Kansas, Nebraska and Iowa. M. Schneider, of M. Stiffelmann & Co., will leave in a few days on a trip through southern Missouri.

L. A. Fassett, of Weiss & Fassett, returned Saturday night from his trip to Europe. He was gone two months, visited all the principal diamond markets and made very heavy purchases of gems.

The rearrangement of the interior of the establishment of the Elliott Jewelry Co., necessitated by more than doubling the capacity, is almost completed. The appearance of the company's place of business is greatly improved

R. Loewenstein, president of the R. Loewenstein Jewelry Co., has returned from a trip through Arkansas and Oklahoma and will leave next week on a trip through Kentucky and Tennessee, which will finish his Spring work.

H. Z. Wheeler, who bought the stock of Vahlman & Jacobs, bankrupt jewelers on Collinsville Ave., East St. Louis, Ill., will dispose of the stock at auction, beginning next Thursday. The auction will be conducted by Dan G. Golding

George C. Fearl, who recently came to St. Louis from Hutchinson, Kan., and took a position with the Elliott Jewelry Co., will start out next week on a trip through Illinois. Since his arrival he has been confining himself to the city territory.

An auction that was to have started last week at 611 N. Broadway, was stopped by the objections of property owners of the block and it was found to be impossible to obtain enough signatures to warrant the issuance of a license and the auction did not start.

Joseph Ebeling, president of the Retail Jewelers' Association of St. Louis, will sail June 7 by the White Star Line for Europe. He will be accompanied by his brother-in-law, August Schaller, and they will spend about four or five months in travel on the continent.

Among the out-of-town dealers in St. Louis during the past week were: G. Anderson, Taylorville, Ill.; Wolff Bros., Murphysboro, Ill.; W. Westphal, St. Charles, Mo.; Enno Diek, New Baden, Ill.; Alfred Koetting, Malden, Mo.; John Klock, Jr., Belleville, Ill.

Herman H. Cerf, vice-president of the M. Bonn Co., Pittsburg, will arrive in St. Louis in a few days on his first visit to the new St. Louis branch of the firm. Two traveling salesmen have been sent out recently from the St. Louis branch and others are to be sent out later.

H. C. Sweet, president of the R. F. Simmons Co., Attleboro, Mass., paid a social visit this week to a number of friends in St. Louis. He was on his way home from a trip to the Pacific Coast, on which he was accompanied by his wife. It was the first time in 20 years that he had been in St. Louis.

A. Kurtzeborn & Sons, who recently closed their place of business on N. 6th St. after an auction sale that continued two months, have taken rooms on the third floor of the Carleton building, where the business will continue to be carried on. Louis Kurtzeborn, of the firm., returned yesterday from a three weeks' trip to the east.

On Thursday night a meeting of the Retail Jewelers' Association was held at the Maryland Hotel. The members were permitted to invite their friends who are not members and there was a good attendance. The jobbers who sell at retail were discussed and a line of action was decided upon which will be made public within a few days.

Awards have been made by the Hess & Culbertson Jewelry Co. in an interesting and exciting contest among the employes, other than salesmen, during the holiday trade season. There were to be three awards on the basis of number of sales and three on the basis of volume of sales. For greatest number of sales Leonard Woods received first prize, George James, Jr., second prize and Paul H. Kamuf third prize. For greatest volume of sales first prize went to Alex Littleson, second to Leonard Woods and third to E. J. Helmerichs.

The Ebeling Jewelry Co. has been incorporated with a capital stock of $9,000. The stockholders are Joseph Ebeling and his wife, Elizabeth, and Louis Ebeling. Joseph Ebeling has been elected president, Mrs. Ebeling vice-president and Louis Ebeling secretary and treasurer. Louis Ebeling has heretofore conducted the optical department of the firm's business at 14th and Warren Sts., but has not been an active stockholder. The company was incorporated for the purpose of giving him a chance to become a stockholder. Extensive alterations and improvements are being made at the Ebeling store.

To G. L. Weber, Jr., one of the managers of the St. Louis store of Loftis Bros. & Co., is due the credit for the fact that the flags on the public buildings in St. Louis were lowered to half mast Tuesday of last week, the 12th anniversary of the destruction of the battleship Maine. As Commander of Camp Hamilton Fish, Jr., Camp No. 1, United Spanish War Veterans, Mr. Weber took the initiative in having pressure brought to bear upon Acting Mayor Gundlach and he ordered that the flags be lowered. Mr. Weber also has a committee working on the school board with the intention of prevailing upon that body to have the flags lowered on the school buildings on the next anniversary. Mr. Weber has also interested himself in trying to get the schools to discontinue having picnics on Decoration Day.

Among the traveling representatives in St. Louis during the past week were: E. C. Binder, Ernst Gideon Bek; W. A. Watts, T. G. Hawkes & Co.; Mr. Chavenee, Glaenzer & Co.; George F. Johnson, G. A. Henckel & Co.; S. W. Smith, Roger, Williams Silver Co.; Joseph J. Sideman, Redlich & Co.; J. E. Simonson, Ludwig Nis-

sen & Co.; P. D. Suers, T. W. Smith Co.; W. G. Moland, Sansbury & Nellis; H. A. Kidder, William Scheer; George N. Nelson, J. B. Bowden & Co.; James R. Palmer, Henry A. Kirby; W. H. Hurlbert, American Optical Co.; George Frank, Worthington & Raymond; D. N. Jacoby, Providence Stock Co.; H. W. Hedge, Excelsior Watch Co.; John S. Cunningham, E. L. Spencer Co.; M. W. Potter, J. M. Fisher Co.; John A Wick, Stacy & Co.; Ernest A. Rose, Weigle & Rose; T. W. Frazer, Celluloid Co.; M. R. Smith, R. Blackington & Co.; F. F. Gibson, J. Williams, Fera & Kadison; John J. Moffitt, Battin & Co.; J. Bergmann, Sheffield Silver Co.; E. A. Reed, Reed & Barton; Louis Berger, Ehrlich & Sinnock; H. B. Bliss, B. M. Shanley, Jr., Co.; Ben Billingheimer, McKay Mfg. Co.; George Angel, George L. Payne & Co.; Mr. Jacoby, Providence Stock Co.

Minneapolis.

C. Bergquist, of C. Bergquist & Co., 104 S. 3d St., has gone to Hot Springs, Ark., for a short visit.

E. H. Brandes, of the Paegel Jewelry Mfg. Co., returned last week from a business trip to Chicago.

S. Jacobs, of the B. Jacobs Jewelry Co., is enjoying an extended trip through Texas. He will return about April 1.

J. H. Kelner, a watchmaker of Clark, S. Dak., and a brother of R. W. Kelner of that place, is in the Twin Cities. He is thinking of going to the Pacific Coast to reside.

Dave Wills who for six years acted as salesman for M. L. Cohen & Co., but who has recently gone into the confectionery business, was married on Tuesday, of last week.

Bert Ganz stopped in Minneapolis a few days ago on his first trip through this territory as the representative of Ziruth, Kaiser Co. He was formerly with the Gustav Fox Co.

C. H. Couplin, a jeweler of St. Paul, has purchased the three-story brick building known as the Davidson building, at 182 to 184 67th St., for $60,000. The building will be remodeled in the near future.

John D. Bodfors has moved his stock from 304 Nicollet Ave. into new quarters in the Pillsbury building. The new store is much lighter, better and handsomer than the old one and is situated in the center of the shopping district. The owners are redecorating it and fixing it up in handsome style.

The following traveling representatives visited Minneapolis during the past week: James Lendan, Katz & Lendan; Louis Eppenstein, Illinois Watch Co.; Mr. Rosenstein, Rothschild & Co.; Mr. Weiman, Royal Mfg. Co.; Rube Cohen, Geo. H. Cahoone & Co.; Henry E. Hart, Albert Lorsch & Co.; F. H. Gallagher, United Cut Glass Co., and the Keystone Cut Glass Co.; S. M. Brown, S. O. Bigney & Co.

With an automobile show in progress here, a large number of retail jewelers from different towns in the northwest have found it convenient to combine business with pleasure and visit the Twin Cities just at this time. In consequence the list of visitors is an unusually long one this week and includes the following: Frank Hyde of Sioux Falls, S. Dak.; O. S. Lien, Omemee, N. Dak.; Mr. Elliot, of W. B. Elliot & Co., Ellsworth, Wis.; William Grinnell, Janesville, Minn.; J. P. Peterson, Russell, Minn.; A. G. Scherf, Red Wing, Minn.; H. O. Thomas, Hampton, Ia; L. A. Walker, Faulkton, S. Dak.; L. W. Scherffins, Miles City, Mont.; I. D. Allen, Copperstown, N. Dak.; A. Sleson, Redwood Falls, Minn.; L. Palm, Brown Valley, Minn.; C. O. Querna, Madison Minn.; H. K. Lee, Fosston, Minn.; H. L. Weatherwax, Hatton, N. Dak.; L. M. Taylor, Marshall, Minn.; Mr. McGuire, of Mullen & McGuire, Northfield, Minn.

Traveling through the northwest at this season of the year has its drawbacks owing to the vagaries of the weather. Low temperatures and blizzards operate to stall trains and create other inconveniences. Several traveling jewelers who stopped in the Twin Cities have been through interesting experiences while on the road. The experience of A. E. Madsen, of Rettig, Hess & Madsen, Chicago, seems, however, to cap them all. Mr. Madsen, who makes his headquarters here, returned a few days ago from a two weeks' trip through South Dakota in the course of which he was twice snowed in. He was obliged to remain at Plankinton for three days because no trains could get through the snow drifts. One night while he was there the wind blew so fiercely that a quantity of snow was drifted down the chimney of the hotel, extinguishing the fire in the furnace. In consequence the guests at the hostelry suffered with cold.

San Francisco.

J. F. Finley, New York, is in San Francisco this week.

Peter Engel, Marysville, Cal., has been paying the wholesale trade a visit.

A. G. Prouty and wife, Napa, are in town looking over the stocks of the local wholesalers.

E. J. Hyde, Spokane, Wash., stopped off at San Francisco a few days ago en route to Tahiti.

Mr. Shepard, of Shepard & Wolff, Los Angeles, Cal., was here a short time ago, accompanied by his daughter.

Albert Hansen, Seattle, Wash., is now in San Francisco and expects to tour California in a motor car for pleasure.

Alphonse Judis is also away buying goods for his firm and when last heard from was in Amsterdam, where he was making a large selection of diamonds.

Ernest Mueller, Eureka, Cal., was here a short time ago on his way to Mexico, where he has business interests. He has left the store in charge of an assistant.

H. E. Anthony, who represents the Manchester Mfg. Co. on the Coast and who makes his headquarters at Los Angeles, was here a short time ago making his initial visit to the local trade.

J. W. Irwin, who recently took a position with the R. & L. Myers Co., is now traveling in Oregon and Washington. Robert Myers has just completed a trip to the Eureka territory and is now at the home office, which is being altered and enlarged.

H. H. Allen, of the Morgan & Allen Co., is still in the east purchasing goo[ds] for his firm. He is expected home with[in a] time. While away he has done [much] thusiastic work in the interes[t of] World's Fair that is to be held [in] in 1915.

A number of traveling men [were] on the local trade recently, inc'ud[ing] Keil, F. H. Noble & Co.; C[harles] Sussfield, Lorsch & Co.; H. New[man] Riglander & Co.; Gus Weil E[mporium] Box Co., and E. St. Earl, [of the] Supply Co.

Philip Mendelson, who has [for a] time been associated with the [firm] house of A. Eisenberg & Co., has [left the] firm and started in business for [himself] An office has been secured in the [Crocker] building on Market St. and a stock [of goods] is now being put in.

Chas. Isaac, of the Baldwin Je[welry Co.] was recently arrested on the charge [of] ing aigrettes on sale at his store. [He was] released when it was shown that [the] feathers, the sale of which is [prohibited] here, were being exhibited to sell diamond ornaments to better advantage.

The office of Joseph Fahys & Co. has been removed to the Jewelers' building, Post St., and since the resignation of Blythe, is in charge of George H. Holden is the Coast representative of Alvin Mfg. Co. and in order to accommodate the two lines is having larger quarters prepared.

A judgment has been rendered [in favor of] Hammersmith & Co. for the sum represented by a diamond left in their safe previous to the fire and lost in the fire. It was adjudged that inasmuch as the firm had ample time in which to remove the stock and did remove a great deal, the negligence which resulted in the loss of being lost.

Pacific Coast Notes

C. O. Demaurez has opened a store in the Mark L. Burns building, Dor[ris].

H. P. Hermance, Pacific Coast representative of E. P. Charlton & Co., was in Santa Rosa, Cal., last week.

The Japanese jewelry store of [Kiyoshi] 316 L St., Sacramento, Cal., was robbed recently. The loss was not large.

John B. Nye has taken over the business of his late father at Hanford, Cal., and will conduct a store at the old location.

F. L. Vogeli, Jackson, Cal., has rented a store building at that place, and [will] as a new front can be put in the improvements made will move in.

Walter A. Lord, Goldfield, Nev., has disposed of his business at that place to Shemanski and will shortly remove to Sacramento, Cal., to enter business in the same line.

A. V. Lauff has purchased the interest of his partner in the firm of Lauff & Co., Crescent City, Cal., and has secured the services of an expert repair man to take care of that branch of the business.

After having had his store entered twice by burglars A. D. Hansell has purchased a large safe weighing 8,4[00] and has installed this in his store. This safe was originally in a bank.

LEARN JEWELERS ENGRAVING

"The Engraving School that Graduates Experts."

A fascinating, high-salaried and easily learned trade, taught thoroughly and practically by correspondence. Your instructor is the foremost authority and master workman in the world. We will teach the beginner better engraving by correspondence than he can gain in years of rigid apprenticeship. We will improve the skill of any engraver one hundred per cent. and make him master of the trade. The demand for competent engravers far exceeds the supply.

Send for handsome, illustrated prospectus.

PAGE-DAVIS COMPANY,

Suite 10, 90 Wabash Avenue, CHICAGO.

Prepared Alloy

No silver required, just add gold and use either fine gold or coin gold. Formulas furnished for any quality or color.

Correspondence Solicited.

BOSTON ALLOY CO.

49 Rawson Road WALLASTON, MASS.

LOOK AT THE COLOR

Mr. Watchmaker: The next time a traveling salesman for material calls on you, ask him to show you a bottle of Fulcrum Oil and a bottle of some other well-known brand and then compare the color. That will convince you at once that

Fulcrum Watch and Clock Oil

is superior to any oil ever produced. If an oil will discolor on the shelf or in the traveler's trunk or on your bench, what do you suppose it will do in a watch or clock?

Fulcrum Oil positively will not discolor or become rancid in any length of exposure. It is the only Watch or Clock Oil ever known which is absolutely free from acid **and we can prove it.**

35c. a bottle—For Sale By All Jobbers—$3.75 per dozen

FULCRUM OIL COMPANY, Franklin, Pa., U. S. A.

Buffalo, N. Y.

H. Brasberg is on a western trip.

Jewelry was recently stolen from Frederick Erion's store at 1025 Broadway.

Considerable jewelry was recently stolen from David L. Finkelstein's pawnshop in Ithaca.

M. J. Freedman, representing Wolfsheim & Sachs, of New York, spent Sunday in Buffalo.

John Braude, representing the Keller Jewelry Mfg. Co., of New York, was a recent visitor in town.

Joseph Freedman, representing Freedman Bros., is on a two weeks' trip in western Ohio. B. I. Freedman is calling on the New York State trade and Lawrence Freedman has returned from Michigan.

E. J. Kreinheder, partner of Louis E. Reinsch, diamond dealers, Brisbane building, is busily engaged at present as Deputy County Treasurer of Erie County. Mr. Kreinheder is Mr. Reinsch's son-in-law.

A. E. Sipe, diamond importer, has let a contract for his new home to be built on his farm in the town of Newstead. The house will be equipped with all modern conveniences. Mr. Sipe will make his annual European trip in June.

Among the jewelers who recently visited the Buffalo market were: C. L. Kerr, Silver Creek; A. E. Nield, East Aurora; M. A. Paul, West Falls; G. R. Kingan, Angola; F. D. Kelsey, East Aurora, and C. S. Hussey, South Dayton.

Much interest has been evinced in the birthstone card issued by King & Eisele. Orders for this interesting souvenir have been received from many parts of the country. A description of the card has already been given in THE JEWELERS' CIRCULAR-WEEKLY.

Deck & Wolf recently remounted a beautiful diamond amethyst cross belonging to Rev. Charles H. Colton, Bishop of Buffalo. The partners in this concern are Frank J. Deck and Herbert Wolf. Josephine M. Deck, Mr. Deck's sister, has charge of the office work of the firm.

John Miller, who was sentenced to three years in Kingston Penitentiary by Police Magistrate Fraser, of Niagara Falls, Ont., for stealing jewelry from G. C. Ditmar's store in that city, was taken recently from Welland, Ont., jail to the Kingston prison in charge of Officer McNamara.

Arthur Hill, an Indian known as "Cowboy Bill," charged with robbing the jewelry store of Frisch Bros., 443 Genesee St., this city, was sentenced to Auburn Prison by Justice White, of Buffalo, recently. The prisoner will serve a term of one year and six months. Hill was implicated with two other men in breaking into the store and stealing a trayful of diamonds.

Among the travelers who recently called on the Buffalo trade were: C. H. Davidson, Kohn & Co.; H. C. Barnum, Shafer & Douglas; J. P. Stearns, Unger Bros.; C. P. Begley, Adelphi Silver Co.; Charles S. Miller, Ansonia Clock Co.; DeForest Ely, Barbour Silver Co.; S. Cohn, Cohn, Abraham & Co.; Wm. H. Wefferling, Riker Bros.; Wm. G. Andrews, Abel Bros. & Co.; R. Wakefield, Burstow, Kollmar & Co.

S. H. Brick's new jewelry store in Broadway will be well equipped. It is reported that he will be succeeded in his former store by George Holender, formerly employed as watchmaker by William Ehmann. The latter has been looking for a successor to Mr. Holender. William F. Ehmann is working energetically as secretary of the building committee which plans to raise $100,000 for the benefit of the German Deaconess Hospital, of this city.

The annual banquet of the Buffalo Retail Jewelers' Association last night at the Genesee Hotel, was an unqualified success. The attendance was excellent and the best of good fellowship prevailed. Among the guests of the retailers were some leading representatives of jobbing and manufacturing concerns in the trade. Full details of the banquet, including the list of speakers and portions of their remarks, will appear in the next issue of THE JEWELERS' CIRCULAR-WEEKLY.

Richard J. Petersen, formerly of Heintz Bros., of this city; George J. Petersen, with the same company, and Joseph J. Max have formed an exclusive wholesale jewelry house under the style of Petersen, Max & Co., which opened for business, yesterday, at 394 Ellicott Sq. Richard J. Petersen and Mr. Max will call on the trade, while George J. Petersen will be in charge of the office. The firm announces that its policy will be to protect its customers by refusing to do any retail business whatsoever.

At Hamburg, N. Y., on Saturday the suit of Mrs. Robert Gunn against Meyer Brown, a Buffalo pawnbroker, to recover a watch alleged to have been stolen from Mrs. Gunn's home was tried before Justice Stratmier. The court awarded Mrs. Gunn the possession of the watch and issued a warrant for the arrest of a man said to have pawned it. Mrs. Gunn's home was robbed Jan. 16. The pawnbroker wanted her to pay $10 he had advanced on the watch. She refused to do that and began the action which she won. It was decided by the court that one is entitled to his or her property wherever it is found.

Lancaster, Pa.

Henry Weeber, who has been ill for some weeks, is improving.

Frank B. Fon Dersmith, with Louis Weber & Son, has been confined to his home by illness.

Jeweler Charles M. Jusek was one of the committee of arrangements of the entertainment and banquet held by the Lancaster Commercial Travelers in celebration of Washington's Birthday.

The basketball team of the local technical school, composed of Rauck, Thompson, Ralston, Buckwalter and Mumwa, was defeated, last week, by the Lititz Y. M. C. A. by the score of 28 to 25.

The stock of the late S. R. Stibgen's jewelry store at Marietta is being disposed of at auction, no purchaser of the business having appeared and it being the desire of the executors to wind up Mr. Stibgen's business affairs.

John S. Reitschey, 45 years of age, for nine years head watchmaker for T. Wilson Dubbs, died last week of inflammatory rheumatism. He leaves a wife and eight children. Mr. Reitschey learned his trade with Augustus Rhoads.

Pittsburg.

Orge Beggs is confined to his home by ns.

J C Loftis, of Loftis Bros. & Co., Chi- and C. W. Eudaley, auditor of that rn, are in Pittsburg on business.

Carles O'Brien, a former Pittsburg jew- but now a traveler for the Rockford Co., arrived in Pittsburg Sunday, the Pacific Coast for a short stay r.

Victor S. Strauss, of Jacob Strauss & has written to the trade here that he ome to Pittsburg March 11, that, on nt of six weeks' illness, his trip west n delayed.

wife of F. M. Langnecker, a jeweler w Brighton, Pa., died early last week. sympathy for Mr. Langnecker was sed by friends in Pittsburg, where well known

ne alterations to the interior of the f the George B. Barrett Co. are be- ade to properly take care of the busi- s of the house. Some new cases also ing installed

M Chavanee, representing Glaenzer & f Paris, called on the trade last week, hile he speaks some English, he had ficult time in some stores, transforming r prices into English.

following out of town jewelers were ttsburg last week, buying goods: R. oble, East Liverpool; John Linnen- Rochester; Mrs. A. Katzenmeyer, ttstown; H. M. Conrath, Indiana; oseph, Donora.

A. Gillespie, of Gillespie Bros., is in York, buying stock for the Spring P. C. Gillespie, of the same firm, had led leaving for Florida a week ago unday, but did not get away until last y. He intends to go to Havana before ning to Pittsburg. He will be gone for eeks.

Pittsburg Association of Credit Men addressed last week by City Solicitor es A. O'Brien, who told those present here is less fraud in commercial credit tsburg at the present period than at any n the history of Pittsburg, and attrib- this condition largely to the associa- energetic work for the promotion of ty in business methods.

President Steele F. Roberts of the Jewel- 4-Karat Club of Pittsburg, has called ting of the organization to be held in ooms of the Chamber of Commerce h 14, at which time officers will be ed for the coming year. The date for banquet will be definitely fixed this and every effort will be made to last year's affair, which was one of st banquets ever held in Pittsburg.

Pittsburg jeweler probably will have nor of making a solid gold chalice ed with jewels, which will be presented Paul's Cathedral. Every grain of in it will come from heirlooms and d treasures owned by members of the egation. The contributions comprise watch cases, rings, and gold ornaments most every description. Some contain onds and other precious stones, and the gold mountings are melted down, ones will be fashioned into the chalice.

the last meeting of the Jewelers' Duckpin League teams, the Wattles took three out of four games from the Diamonds and the Terheydens and Roberts broke even. The Vilsacks and the Lochs did not play, owing to illness of some of the members of the Loch team, Mr. Berger having been threatened with pneumonia. Stitt, of the Wattles' team, made the high score, rolling 146. This is the second highest score ever made by a member of the league. J. C. Crawford, Charles P. Parlett and O. A. Stehle, of the Jewelers' League, have entered the contest for the individual championship of western Pennsylvania.

Among the traveling representatives who recently visited the trade at Pittsburg were the following: Charles T. Dougherty, Osmers-Dougherty Co.; George W. Beardsley, Allsopp & Allsopp; W. H. Osborne, R. Wallace & Sons Mfg. Co.; C. K. Davison, Kohn & Co.; John F. Schierloh, Keystone Watch Case Co.; Ralph M. Hoxsie, Mason, Howard & Co.; Harry C. Kip, H. F. Barrows Co.; A. Rutherford, Taylor & Co.; Walter E. Hatch, S. B. Champlin Co.; A. B. Chase, Boss & Baldwin Co.; Vincent W. Henderson, Crane & Theurer; John S. Cuningham, E. L. Spencer Co.; George H. Thomas, Hartford Sterling Co.; J. T. Griffith, Jr., Carter, Howe & Co.; H. L. Sherman, Simpson, Hall, Miller & Co.; J. Williams, Fera & Kadison; Sidney H. Israel, S. & B. Lederer & Co.; W. J. Lane, Wm. H. Ball & Co.; J. E. Simonson, Ludwig Nissen & Co.; H. C. Berdan, Gorham Co.; L. Fleming, Joseph Fahys & Co.; E. A. White, George L. Vose Mfg. Co.

Loftis Bros. & Co. last week filed a suit in the United States Circuit Court against Thomas Flocker, of Hydetown, Crawford County, this State, who formerly resided in Pittsburg and who became surety for Isaac Friedberg, a former employe of the jewelry firm, who last week blew out his brains. The firm charges that Friedberg defaulted in his accounts to the amount of $6,145.40, and the suit against Flocker is for $3,000, representing the amount of a bond given by Flocker May 15, 1907, when he became surety for the suicide salesman. The story of how Friedberg took his life was fully set forth in last week's issue of THE JEWELERS' CIRCULAR-WEEKLY. It will be recalled that Friedberg left a letter addressed to William T. Sanford, manager of the Pittsburg store of Loftis Bros. & Co., which set forth among other things that Friedberg felt that he would be forgiven by Sanford. In discussing the suit with the correspondent of this journal, Mr. Sanford said that the amount due from Friedberg is fully covered by Flocker's bond. "I really believe that Friedberg was robbed of certain goods," said Mr. Sanford, "and that he was afraid to let the truth be known. But we are fully covered."

The store of the Marks Isaacs Co., 715 Canal St., New Orleans, La., was entered by burglars between Feb. 19 and 21, and jewelry valued at about $500 was taken from the show cases. The thieves got into the building through a fire escape leading to the fourth floor and then went down to the ground floor, where the jewelry store was located. The police are working on the case, but have no clue.

Harrisburg, Pa.

Jacob C. Schmidt has been elected president of the Lebanon School Board.

W. A. Huber is conducting an auction sale of his jewelry and notion stock at Mechanicsburg.

Joseph Benner will shortly remove his jewelry store and loan office from N. 3d St., near Calder, to Walnut St. and Tanner's Ave.

William Rohm, caretaker of the clock equipment in the various departments on Capitol Hill, winds 287 clocks once each week, which keeps him pretty busy.

Among the central Pennsylvania jewelers passing through Harrisburg, last week, was Harry Nagel, of Nagel Bros., Lewisburg. He visited his brother, who is quite ill in Philadelphia.

Fire resulting from the overturning of a stove destroyed the store of Mervin Shenk, Mooredale, near this city, last week, causing a loss of about $5,000, partly covered by insurance.

A charter has been granted at the State Department to the C. M. Creveling Co., of Almedia, Pa., capital $10,000, to retail jewelry, etc. The directors are: C. M. Creveling, president; C. B. Lutz and C. W. Miller.

David Throne, who for five years has been the manager of the city loan office of H. C. Claster at 411 Market St., has resigned and will open a dry goods establishment on Main St., Bloomsburg, Pa., April 1, 1910. His successor as manager of the City Loan Office will likely be Philip Caplin.

L. Kamsky, manufacturing jeweler and diamond setter, has been compelled through growth of trade to remove from 21 N. 3d St. to larger quarters on the second floor of 26 N. 3d St., where he has installed the latest improved machinery that makes his shop one of the most complete of its kind in Pennsylvania. Starting in business in this city in 1904, Mr. Kamsky now employs three men on hand work and enjoys the trade of jewelers in Lewistown, Carlisle, Chambersburg, York, Lebanon, Hagerstown and other nearby cities. He also has a man on the road constantly.

The 20th annual meeting of the Traveling Men's Club was held here, last week, when these officers were chosen: President, W. T. Garrison, Columbia; vice-president, W. H. Whittaker, Harrisburg; secretary and treasurer, J. S. Rawlings, Baltimore; executive committee, E. H. Stuntz and H. A. Metzgar, Harrisburg; S. L. Lamberd and N. D. Vincent, Baltimore; S. M. Mallalieu and J. S. Connelly, Philadelphia; W. H. Swarthout, Merchantsville, N. J., and H. I. Frazier, Edgewater, N. J. Philadelphia was selected as the place of meeting in 1911. The club is composed of traveling men from various cities in the eastern States. Over 150 members of the fraternity, which included a number of jewelry salesmen, attended the annual banquet at the Commonwealth Hotel.

The J. L. Duke Jewelry Co., Fayetteville, Ark., has been incorporated with a capital of $10,000, all subscribed. The incorporators are: Charles Richardson, John B. Evans and W. S. Chicks.

"What the National Association is Doing."

(By Claud Wheeler, Secretary of the A. N. R. J. A., before the convention of the Nebraska Retail Jewelers' Association.)

THE present organization was effected in Rochester, N. Y., in 1906, after a very lively session; 130 members were reported at this meeting. It was decided to hold the next meeting at Chicago in 1907. At this meeting 678 members were reported, several States having affiliated during the year. The first real work was begun at this time. The question of uniform prices was discussed, the retailing jobber came in for his usual share and the parcels post received a knock in the way of a resolution. Many things were recommended and others were condemned.

Some say the trend of affairs was radical. Of this I cannot say. But the results of the meeting were good, and when the association gathered at Cincinnati in 1908 there were reported 1,567 members. This was a meeting of results. Radicalism was laid aside nearly altogether and a conservative policy of settling our troubles by negotiation and conference was adopted. The trade-mark question was settled at this meeting and of this I shall speak later. The minimum fixed selling price on staples in our line was approved by the convention. In the light of subsequent events the most important action taken at this meeting was the election of John P. Archibald for president. I do not want you to think that I am endeavoring to place too much credit to one man, but I have been in a position to know that very many of the results that we know about have been brought about by the labor of this man. Of course, he could have done nothing as an individual. It was as the president of our national organization. It takes work to get results and he has been willing to work.

This brings us up to the most successful meeting yet held, the one in Omaha last year. It was at this meeting that harmony with a big H prevailed. The National Association of Jobbers sent representatives to this meeting and one entire day was given over to talks by representative men from the wholesale trade. These talks resulted in good. They were educational. These men learned something about the retail jeweler they did not know, and the retailer learned something about the wholesaler he did not know.

These conventions are places where we get together to discuss the conditions of trade and have offered remedies. It is then left with the officers to make an effort to have your desires carried out. The National Association, through its officers, is at work all the time. Much of the work that is done is never heard of by you. Organization work is in progress all the time. Efforts to form new local associations and keep up interest in those already formed. It is astonishing how the officers of some of the States go into their shells just after the annual meeting, and remain there until time for the next meeting. It is impossible for the National Association to accomplish much unless your officers co-operate all the year around. I have in my office as many as five copies of letters sent to one secretary of a State association and not a line have I had. I wrote a member of one State association about the situation and he offered his sympathy in reply. He said he had written their secretary three letters since their last meeting and had not been able to hear. I tell you that meeting once a year and passing resolutions of commendation and condemnation is not going to get any results. Individual interest and work is what we must have.

Now, as to what we have done or are doing. I take it that every member present reads the trade journals and are as familiar with the action taken by various companies as I am. If you do not read the trade papers I am surprised that you were live enough to come into this organization.

Just a short time ago the jewelry trade was at the mercy of retail mail order concerns. Consuming great quantities of merchandise, backed by unlimited capital, and managed by men of ability and organization, is it any wonder the manufacturer turned to them as a market for his goods? The retailer who should have been taking his goods and delivering to the consumer was indifferent and asleep on the job. Modern business methods were unknown in many jewelry stores. Merchandising was not up to a point of competing with these large concerns. The individual was helpless. Organization was the only solution. States began the work and then came an affiliation of all the States into the National Association. When manufacturers realized that the retailers had awakened and meant business they were willing to do their part and the success can be seen on every hand. And the fact is that much of the success is due to efforts made by some of the manufacturers. Many of them, as well as jobbers, are doing more to help in the organization and strengthening of our organizations than some of us are doing.

The National Association is bending every effort to correct evils in the trade which act as a handicap to what we are accustomed to call the legitimate jeweler. By that we mean the man who makes the jewelry business his principal business as distinguished from the mail order houses, department stores and pawnshops. There are two ways of bringing about these results. The association might get all the concessions in the world from the wholesalers and manufacturers and they may adopt the policies we are asking for. They might all adopt the rule of selling exclusively to the legitimate retail jeweler, and yet our condition would not be improved. It would simply be up to the jewelers themselves. If we as merchants continue along the lines we have for years, cutting one another, fighting one another, and doing the unbusinesslike things we have been doing, all the the wholesalers are doing and all the association is doing will be for naught.

The work of the association is two-fold. We are endeavoring to find out the needs and requirements of the retailer, and by bringing these before the wholesaler and manufacturer get them to adopt policies that will secure to us the welfare we so much desire. After this is done every retailer must give his support in every way to the men who adopt such policies and refuse to handle goods that are sold promiscuously and no protection given us. Let such goods be known as department store goods. To educate the retailer to do these things and work in harmony with other jewelers is the work of the association.

There are now several watch companies offering the retail jeweler protection in their lines, and I am told that others contemplate such action. Watch case companies have recently notified their distributors that there were to be no more subjobbing and cases are to be sold only to legitimate retail jewelers. Some of the best silver houses maintain a similar policy.

The National Association is working on all these things and I will tell you that there is but one thing that prevents us from doing more than we do and that is that not enough of the retail dealers are showing an interest in the matter. While the nearly 3,000 jewelers affiliated with the association constitute a power, think what it would mean if we could go to these people and show them that 6,000 or 10,000 were back of the request.

In my opinion, we have gone nearly as far as we can until we have educated the retail jeweler to see this and join with us in the work. The average small jeweler either regards the $3 dues too seriously or refuses to see the benefit of united effort. The average large dealer has held off for the reason that he felt big enough and important enough to paddle his own canoe unaided by others in the trade.

In this little talk I am not going to mention the names of the houses that have adopted policies for the bettering of the trade. It is not necessary because you receive these notices every day. If some of the efforts being made now bring the results we expect, you will receive many more such notices before our next meeting. Not all the credit for this work should be given the National Association, although it has been able to accomplish things that it would have been impossible for State associations to accomplish just as a State organization can do more than an individual. More is being done to remedy the evil of retailing jobbers by the State organizations than by the national for the reason that this question is usually more of a local one.

I said I would mention the official trade-mark. This is a big question and many of our best men have been working on it until they have it in form, but the success of it seems in doubt, and I believe will remain so until a greater number of the retailers decide to come in and give the association movement their support. It is hard to convince a manufacturer that much is to be gained by making up a line of goods bearing this mark when the sale is confined to members of the association when he knows that only about 3,000 of the jewelers are members. I hope to see a large increase in membership this year, and if the State officers do their duty there will be a larger increase than last year when the gain was approximately 800 new members.

The National Association is organizing new associations whenever enough jewelers of a locality can be interested. We expect several more States affiliated by the next m

At the meeting last year at Omaha it cided that the National Association shou a door plate to be furnished members. The have decided on a plate and the order pla them. In a few weeks these will be r deliver. A charge of $1 will be made plate. already many members have se dollar to my office and I hope many oth send for the plate. I believe this was a wis on the part of the association and full credi be given A. J. Stark, of Denver, for gi thing the start he did at Omaha. Every should have one of these plates and p door where people can see that he is a me the national organization of his trade

And I want to say just a word about the cates issued by the National Associati have issued certificates to all members w been reported to the secretary's office. these certificates bear seals of years gone have the work so arranged now that as a State secretary sends dues to our renewal seal will be issued for the year f the dues are paid. If you have not a l for your certificate it is either because y not paid your 1910 dues to your secreta has not sent the same to my office P dues and stir him up. It is unfortunate t States have their fiscal year end at a m than Dec. 31. I hope that all States will their fiscal year to coincide with that of tional, which begins on Jan. 1.

Now, I want to say a few words ab coming meeting, which will be held at th Cadillac in Detroit, July 26, 27, 28 and 2 indications now are that it will be the gathering of jewelers ever assembled in th try. There is every reason why it sh The location of the meeting this year i Detroit, one of the most beautiful cities located that it is convenient to all sec in a direction that Summer rates are alw effect. The executive committee feels most satisfactory arrangements have bee for the holding of the convention. The this year is more directly under the mana of the National Association than ever bef we hope to conduct it in a manner that highly satisfactory to the exhibitors and me

This matter of exhibits is an important the jeweler. More information can be g here and more goods be seen than by spe great number of days in a market. We have many educational exhibits this year exhibit space will be under the control association and all applications for spa exhibition purposes will be sent to the r secretary. We hope in this way to give hibitors all the advantages possible, and t best service possible. After consulting with of those who have exhibited in the past, decided that a charge of $1 per square f the week would be reasonable. We t everybody shall have a square deal.

One thing that I am trying to impress officers of the various State organizations every retailer is as welcome and as much as the delegates. The impression seems t it is a convention for delegates only. U bylaws each State is entitled to one vote f 20 members or fraction thereof. This d mean that only one is expected to atte number. If a State has 201 members, is entitled to 11 votes, and it does not whether one or 201 members are present to how these 11 votes are cast.

The National Association is your as just as much as the Nebraska asso association, and I hope you will be this Summer. Any matter which you w bring before the association should be sent of the officers. The president and myself be glad to hear from you and will do comply with any request you make and c any desire you may express.

The association work has reached a it is recognized by the leading manufacturers wholesalers in our trade, and we can more impressive and powerful by efforts to get all the jewelers interested and ing. The American National Retail Jewelers sociation is no longer an infant. It has it has strength as the results of the attest, but we need more in numbers, a working interest, and we will attain the nition we deserve.

Let us work to that end.

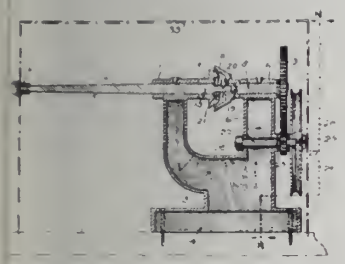
PATENT DEPARTMENT

ICH IS CONTAINED A LIST OF THE LATEST PAT- TI RANTED BY THE UNITED STATES AND GREAT RITA. THE UNITED STATES PATENTS THAT HAVE PID AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

ISSUE OF FEB. 22, 1910.

2. OUNTAIN-PEN. Francis C. Brown, York Filed June 29, 1908. Serial 440,79



ta n, a barrel, a feed-bar movable g and having at its front end a

mprising two superposed and a brace engaging the lower tongue, having a recess or seat, and a cap pro- ith an internal pin to engage said seat.

1. WATCH-WINDING MACHINE. Lisle Scott Toledo, O., assignor to the J. J. eman Co., Toledo, O. Filed Sept. 7, 09. Serial No. 516,424.

atch-w nding mechanism, the combination luble driving member, a revolubly driven adapted to be frictionally revolved by the ember, said driven member being mov- gitudinally of its axis and having an axial

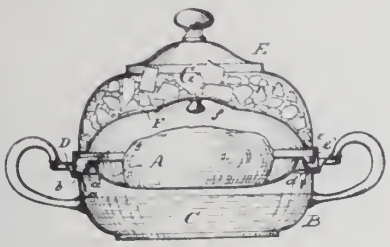
cushion, a spring adapted to normally the driven from the driving member, and to pressure on the cusion and permit the member to be thereby moved into frictional ent with the driving member, and adapted matically withdraw the driven member from gagement when the pressure on the cushion and means to revolve the driving member.

2. CUFF BUTTON. John A. Monroe, ak Park, Ill. Filed Feb. 15, 1909. Serial o. 477,947

ff-button comprising a shank, and heads to the ends of said shank and extending

in front thereof, said heads converging each other and having their free edges in roximity.

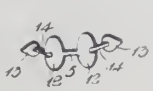
1. JEWELER'S GAGE. Herman V. RNHARDT, Newark, N. J. Filed July 13, 09. Serial No. 507,296.



ge comprising a plate having in itself ad- one of its edges an outside-calipering entirely surrounded by the plate, a neck g from said edge of the plate in a direc- ay from said aperture and opposite said aperture with respect to said edge, and an inside calipering member at the outer end of said neck

of the same size as said aperture, said neck being narrower than said inside calipering member.

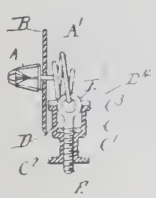
950,239. REFRIGERATED SERVING-DISH. William H Oskamp, Cincinnati, O. Filed Aug. 10, 1908 Serial No. 447,877.



In a refrigerated vessel, the combination of a melt water receiver provided with an internal shoulder below its upper edge, a dish for food-matter, the upper part of which is turned downwardly and outwardly to form a flange below its upper edge which flange is perforated and fitted to seat removably upon the internal shoulder of the melt-water receiver, said flange forming the bottom of an annular gutter of which the downturned part of the food-dish forms the inner side,

and the opposite part of the side of the melt-water receiver the outer side, a cover of semi-globular shape fitted to seat with its lower edge in the gutter described and provided with an ice-chamber in its upper part which is provided with outlet openings to permit of escape of water resulting from melting of the ice which drains into the gutter formed between the upper part of the food-dish and the upper opposite part of the melt-water receptacle and from there through the openings in said gutter into the melt-water receptacle below.

950,353. CUFF-BUTTON. John H. Simpson, Providence, R I. Filed March 25, 1909. Serial No. 485,664.



An approximately arc shaped cuff fastener comprising a strip of metal having shoes at its oppo-

site ends and disk-like heads spaced longitudinally from each other and from said shoes, said shoes being arranged in a plane parallel to that of the heads.

950,408. SAFETY-CLASP. Oscar Sherman, Brooklyn, N. Y. Filed July 24, 1905. Serial No. 271,033.

The combination in a safety-clasp of an eye bolt, a clamping barrel adjustably engaging the

bolt, a clamping sleeve having a central opening supported in the barrel, and a flange having indentations extending across the outer surface thereof at the upper end of the sleeve.

DESIGNS.

40,517. EMBLEM. Carl Blake Hunkins, Bill ing, Mont Filed Aug. 25, 1909. Serial No.

514,659. Term of patent 7 years.

40,519. HANDLE OF SPOONS, FORKS OR SIMILAR ARTICLES. William C. Codman, Providence, R. I., assignor to the Gor-

ham Co., Providence, R. I. Filed Dec. 23, 1909. Serial No. 534,744. Term of patent 14 years.

40,548. HANDLE OF A SPOON, FORK OR SIMILAR ARTICLE. William C. Codman, Providence, R. I., assignor to the Gor-

ham Co., Providence, R. I. Filed Dec. 27, 1909. Serial No. 535,214. Term of patent 7 years.

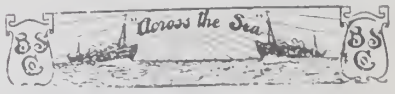
UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."]



TRADE-MARKS PUBLISHED FEB. 22, 1910.

Ser. No. **45,502** and **45,503.** (CLASS 28. JEWELRY AND PRECIOUS-METAL WARE.) Standard Button Co., Attleboro, Mass. Filed Oct. 23, 1909.

Particular description of goods.—Jewelry for personal adornment, ornamental chains and chain ornaments.

Ser. No. **45,805.** (CLASS 28. JEWELRY AND PRECIOUS-METAL WARE.) Ben Strauss Co., New York. Filed Nov. 10, 1909.

Particular description of goods.—Brooches and stick pins

James L. Hand

America's Leadin Jewelry Auctione

14 MAIDEN LANE, NEW YORK

Assisted at all large sales by a most COMPETENT STAFF of AUCTIONEERS WHO are GENTLEMEN. A specialty of sales of high class stocks. Results guaranteed and your reputation well guarded.

What auctioneer but Hand has conducted such sales as these?

L. W. Vilsack & Co., Pittsburg.
R. Strachan, Fort William, Canada.
Philip Present, Buffalo, New York.
The Duhme Jewelry Co., Cincinnati, Ohio.
W. A. Sturgeon & Co., Detroit, Mich.
B. J. Feldman's Sons, Franklin, Pa.
Emil H. Leffert, Council Bluffs, Iowa.
The Mawhinney & Ryan Co., Omaha, Neb.
Mrs. T. Kircher, Davenport, Iowa.
L. C. Smith, Gainesville, Florida.

These are just a few of my recent sales. Write any of these firms as to the results of the "Hand" sale.

I have no booklet to mislead you, but on application will mail you illustrations showing a great "Hand" sale in progress and references from the great wholesale firms of the jewelry trade.

Have you noticed the high standard that is demanded of Jewelry Auctioneers since Hand entered the field?

JAMES L. HAND.

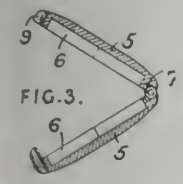
BRITISH PATENTS.

(Abridgments of Specifications, 1908, from *The Illustrated Official Journal.*)

ISSUE OF JAN 12, 1910.

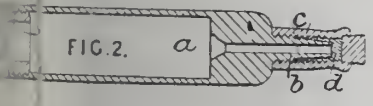
,79 WATCHES AND CLOCKS. F. C. Wil-ks, Malvern. Sept. 21. Period for grant-i patent not yet expired.



Keyless Mechanism.—To prevent over-n keys or winding-stems consist of two e part, operated by the hand, being d s a spring socket embracing the other w a frictional grip just sufficient to over-resistance of the mainspring. The de-

w a plied to a keyless watch. The g oh B is attached to a tube b^1, slotted d lly to form spring fingers b^2 which grip n A. To prevent removal of the tube b^1, ay he gr ved, the inwardly bent ends f rs b^2, or a pin b^3 fixed to the tube en-h the groove.

. LOCKETS W F. Jennens. Warwick-Sept. 23.

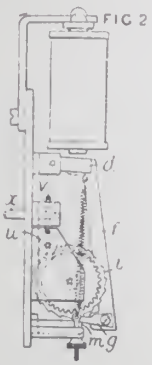


s 5 of a locket are each stamped from a e of metal so as to form in one operation c 6 for a photograph, etc., a depression

the binge is subsequently soldered, and s for the fastening. In this way the f locket are made more rigid than usual, tbt soldering.

. K RECEPTACLES. J. Glass, London. e 23.

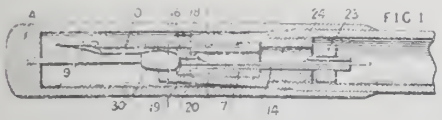
vi for filling reservoir pens consists of a v anite, or other rigid body or container d at one end with a nozzle *b* and at the n with a screw cap *e* formed with an air



w b is opened or closed by adjusting the e nozzle *b* is closed by a screw cap *c* d th a rubber or other seat *d*. The de-y e made in the form of a bottle.

ISSUE OF JAN 19, 1910

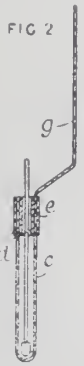
. LECTRIC CLOCKS, COUNTERS, T W. G. Stockall, Stroud Green, Lon-n Dec. 23.



s dial movements for secondary clocks, t kind in which the hands are intermit-dr n by means of the pivoted armature le o-magnet, to which a current is periodi-a nitted by a master-clock or the like. g ntralized pawl *g*, carried by an arm *f*, a tchet-wheel *i* when the armature *d* is a jams between the wheel and a fixed that overdriving is prevented. The ratchet is geared to the hand-spindle *x* th ough a worm and wheel *u*, *v*, in order that friction-tight

hands on the spindle may he adjusted without straining the mechanism.

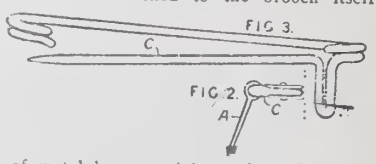
20,386. PENS. P E. Wirt, Bloomsburg, Pa., U. S. A. Sept. 28.



A fountain-pen of the kind in which the cap carries a device to cut off the supply of ink is provided with a concavo-convex metallic feed-plate 10 underlying the nib, and a feed-bar 14, which is pierced by an air hole 18 and carries a wedge-shaped supplemental feeder 24 secured in position by a stop-collar 23. The feed-plate 10 is held in place by a plug 7 and is struck on an arc of

smaller radius than the nib 9 in order to leave ink passages along its sides. The feed-bar 14 has a small longitudinal movement limited by the collar 23 and by a cylindrical head 16 on the feed-bar, so as to leave an ink passage between the wall 19 of the head 16 and the wall 20 of the plug 7, when the pen is ready for writing; this passage and the air-hole 18 are both closed when the cap A carrying the plug 30 is placed on the pen.

20,573. MATCH-BOXES. C. Neuss, Roermond, Holland. Sept. 30.



A pocket receptacle for matches consists of a case *c* closed on all sides except the top. Inside, and arranged on either side of the case are strips *d* of striking-material. Pressure is exerted on these strips by means of an elastic ring or clasp *e* comprising two metal bands connected at their

ends and having inwardly-projecting parts near the ends, which are adapted to be turned down over the upper edges of the holder when the clasp is in position. A cap or cover *g* may he provided, in which case the back of the holder is formed with slots through which the projecting parts of the clasp may pass.

20,613. BROOCHES. C. Swan, North Finchley, London. Sept. 30.

In order to prevent brooches from falling forwards about the axis of the pin, the brooch pin is provided with a projection to lie along the surface of the garment. This projection A, Fig. 3, may be made integral with the pin C, or may be carried by a sleeve which fits tightly on the pin, Fig. 2. The projection, which may also be soldered to the pin, extends downwards and rearwards. When the projection is made by bending the wire of the pin, the loop may be open and carry a small protecting-chain. In a modification, the projections are attached to the brooch itself, a

strip of metal bent at right angles being attached near the hinge joint.

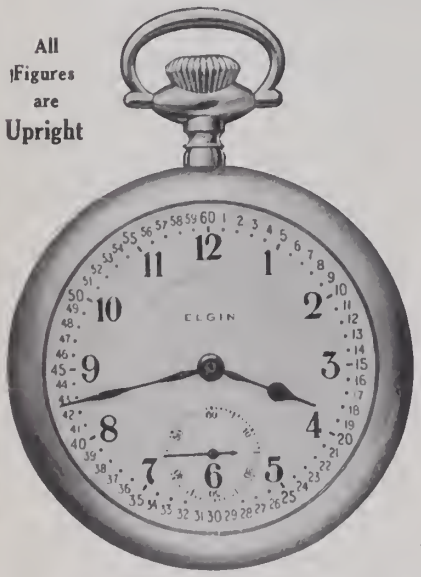
Congressional Notes.

The bill to provide an appropriation of $2,000 for the purpose of procuring bronze medals to be bestowed upon the survivors of the Port Hudson, La., volunteer storming party has passed the Senate.

A bill, without any appropriation, has been introduced in the House by Representative Foss, to authorize the striking off at the United States Mint of medals for officers of the naval service, to be known as Congressional medals of honor.

This New Minute Numeral Dial

(MONTGOMERY PATENT)



With Upright Figures

was designed by the chief watch inspector of a large railway system, for railroad men's use and is now supplied on any of the

Railroad Models of the Elgin Watch

All Figures are Upright

Each minute is numbered with clear, sharp, upright figures. The figures of the even five numbers in the minute circle are printed in red. This dial is so well designed that the complete time is read at a glance, doing away with even the momentary calculation necessary with old style dials. Railroad men want Elgins with this dial. The complete line of Elgin Railroad Watches with this dial will be well advertised in railroad men's publications. Be prepared to furnish them to your trade.

Write your jobber or this company direct.

THE HOROLOGICAL REVIEW

Hints on Safety Action of the Lever Escapement.

Written expressly for The Jewelers' Circular-Weekly
by T. J. Wilkinson.

(Continued from issue of Feb. 23.)

rate the practical side of our sub- we will assume the following erro- lition to exist, and explain its ef- ly, that in which we find the dis- ating the horn of the lever from f the roller jewel, lever against its ee Fig. 9.) This distance, we xceeds the total lock of the tooth the locking face of the pallet herefore, if the space separating e i the lever horn from the path of jewel be of three degrees extent

G. 9. FIG. 10.

tal lock of tooth on pallet two e would have as a resultant error one degree (3 — 2 = 1), which t the tooth of the escape wheel, in remaining on the pallet jewels' ce, slipped on to the pallets' im- as shown in Fig. 4.

hat we have now written it may d that the horn of a lever in a er escapement is made up of two urves, the reason for which we in.

l first discuss the correct length horn, double-roller escapement. to be of such a length that when of the roller jewel is opposite the of the horn, as Fig. 10 shows, finger must be well outside the the safety roller, as illustrated

on for thus specifying the length r horn will be apparent from the If we bring the guard finger edge of the safety roller we de- distance between the lever horn ller jewel. Now, if we maintain finger against the edge of the r and revolve the balance, there- the guard finger to enter the crescent, the moment this takes place we find that we can move the lever still further forward, and that the face of the lever horn comes in contact with the face of the roller jewel.

But if in place of this the horn was so short that it could be pushed past the roller jewel the result would be disastrous to that escapement, hence the necessity for a long lever horn in all double-roller escapements. Whenever we desire to test the length of a double-roller lever horn we hold the guard finger in contact with that part of the edge of the safety roller just outside the crescent and note that the tip of the horn extends up to or beyond the roller jewel. We should also observe that there exists no contact of the parts when in position indicated.

Having treated of the length and relation of the horn to the roller jewel while the guard finger is outside the crescent, we shall now take up the relation of that part of the lever horn to the roller jewel at the moment the guard finger enters the crescent. If we lift the lever off its bank at the moment the guard finger enters the crescent it will be found that the roller jewel and face of lever horn come in contact and, by thus doing so, preserve the safe action of the escapement. If, when the lever is against its bank, we allow a freedom of 1¼ degrees between it and the path of the roller jewel the result will be that in the event of the lever horn meeting the roller jewel a lessening of the total lock of tooth on pallet takes place, viz., 2 — 1¼ = ¾, this being the remaining or safety lock which insures correct action whenever the escapement is subject to rough usage.

We will next suppose someone had filed this part of the lever horn, making the freedom between that part of the horn we have been discussing and the path of the roller jewel (lever against bank) a matter of 2¼ degrees. The result of this excessive freedom would be that in the event of the watch receiving a hard shock at this phase of escapement action, resulting in the lever being thrown off its bank, and in consequence the face of the horn coming in contact with the face of the roller jewel, we will now find the safety action is deranged, because the total lock of the tooth of the escape wheel on the pallet jewel is less than the excessive freedom which exists between the horn and roller jewel, viz., 3 — 2 = 1. Here we have a trip. The escape-wheel tooth, in place of remaining on the pallet jewels' locking face, enters on to the pallets' impulse face, as depicted in Fig. 4.

For practical reasons we shall briefly recapitulate the points necessary for testing the safety action:

Single-roller escapement.—Commence by bringing the guard pin against the edge of

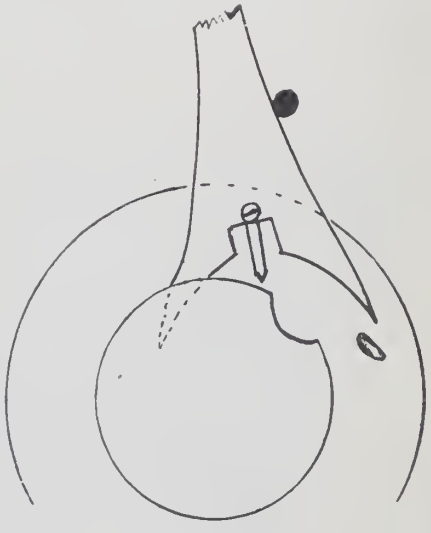

FIG. 11.

the roller table and then note the extent of lock of the tooth on the pallet jewels' locking face. Next, when the guard pin enters the crescent, bring the corner of the lever slot in contact with the face of the roller jewel, and observe that the remaining lock of the tooth on the pallet is sound. Again, it would be wise to examine the relation of the lever horn (single roller) to the guard pin. To do this, bring the roller jewel beyond the tip of the horn, then with the guard pin pressed against the edge of the roller table revolve the balance, thereby bringing the roller jewel past the horn and into the lever notch.

If the relation of the parts is correct the roller jewel will pass into the slot of the lever without any decided catch or stick. Friction will be detected when the roller jewel rubs past the corner of the lever slot, but in no part must there be any decided catch liable to cause stoppage. In fact, absolute freedom of the roller jewel with all parts of the lever horn is to be preferred, in which event the only friction of

WALTHAM WATCHES

COLONIAL SERIES
Riverside Maximus
Enamel Dial

COLONIAL SERIES

Gold and Gold Filled Watche

These watches are a noteworthy add to the Waltham line. They are exceptio thin and may be had with Enamel, Silver ish or Gilded Metal dials of artistic de Colonial Series watches appeal to the most cr buyers. Equip your stock with these good Spring trade.

Colonial Series watches are to be had in v grades of movements as follows:

Riverside Maximus—23 jewels, adjusted to m perature, isochronism and five positions.

Riverside—19 jewels, adjusted to tempera and five positions.

Royal—17 jewels, adjusted to temperature three positions.

No. 1425—17 jewels.

No. 1420—15 jewels.

All Colonial Series watches are cased timed at the factory. They are delivered to trade in display boxes. The retail selling p on these watches is fixed and plainly printed the contract notice which is placed in the with each watch before leaving the factory.

l paid for my trip to the city.
anxious to learn what it could
alled their notice to the large
stock of movements in the safe and told them some of these same movements would still be there when I came in the next two or three years.

I told them of the trouble I had had with my movements not running one year without stopping, and I saw the reason why they did not continue to run that day, and I decided to clean every movement I bought before selling to the customer, and this was one of the little things that helped me to build up trade and have satisfied customers.

This seems to be a very little thing, but it helped to cause the wholesale man to have the movement shipped direct to the retailer from the factory, assuring the movement to be delivered in fine shape. It took many years to have this accomplished, but I consider it a great improvement for the retailer; coming, as they do, by express, they do not get out of order and broken in transit, oil is fresh and the movement ready to start with a good motion.

I have had watches brought to me that had stopped on account of the oil being gummed in about six or eight months after the party had paid for cleaning, and the oil did not remain in good condition for one year, as it should. This condition is caused largely by the watchmaker who buys a bottle of oil and continues to use it as long as it will last.

My experience has taught me that after a bottle of oil is opened it should be placed where it would not be exposed to the light, and not use it on watches longer than two months. The oil often becomes unfit by the watchmaker leaving his oil cup uncovered, allowing dust to settle in the oil, and exposing it to the light and air. The workman continues using it as long as there is oil enough to adhere to his oiler, regardless of turning chip from his lathe, and dust, etc., expecting the watch to give the best of satisfaction; and if it does not, he thinks he must try some other make of oil.

The Thousandth Part of a Second.

(From the *Scientific American Supplement.*)

IN a lecture delivered before the Urania Club in Berlin, and published as a summary in the *Illustrirte Zeitung*, Dr. Spiess made the thousandth part of a second the theme. Such a part of a second is an interval that is hardly perceptible by the human senses, and yet in physics and mechanics appear occurrences that can be measured by a very much smaller interval.

The "moment" with which we designate a marvelously brief duration is a long interval when compared with the thousandth part of a second, for the human eye needs a little time to become ready for vision. A flash of magnesium passes much more quickly than the pupil of the eye is able to contract itself; with a flash of magnesium the human eye can be photographed while it is wide open, just as it always is in the dark. A flash of magnesium produces in our eye a gleam of perceptible duration, but in so doing resorts to a little deception; that is, the gleam acts on the tissue of the skin for some time after it has expired. Consequently we feel a flash of magnesium much longer than it really lasts.

Far more quickly than the flash of magnesium does the gleam of the electric spark pass; it lasts perhaps the one-hundred-thousandth part of a second. A white line on a black disk that is turning with the greatest rapidity cannot be seen while a flash of magnesium lasts, but can be seen easily enough under the electric gleam.

Electricity has also made it possible for us to measure the speed of flying projectiles. The doctor explained the various apparatus that are used to measure such small and the smallest intervals of time, the millisecond watch of Engineer Lipp, for instance. This watch is also used to indicate "exact time" which, as is well known, is of such great importance to the astronomer when he desires to state precisely the moment of the transit of a star in the telescope. Between looking at and pressing the button on a watch that shall indicate the moment of seeing time must be lost. Then the lecturer showed by illustration how much time one needs to respond with a movement to an excitation of the sense of hearing.

The human nervous system works somewhat methodically, but still with great quickness. What happens from the time a sound is heard to the time when the perception of the sound indicates itself through physical movement is very complicated. The sound waves—produced by a blow which, by means of an electric current, sets the index of the millisecond watch in motion—must first put in motion the tympanum and thereby the whole mechanism of the organ of hearing and its adjuncts before sound can act on the nerves of hearing; this sound leads aural sensibility to the brain where it is changed into an incitation to movement which is communicated by current to the muscles of the fingers. These must contract themselves before they can close a contact that stops the index of the millisecond watch. And yet all this has taken place in a few hundredths of a second, and can take place in exceptionally fine natures in the thousandth part of a second.

Incidentally the demonstrator made use of the chronoscope in the measurement of wonderfully short intervals. He measured, for instance with the Boulenge apparatus the velocity of a Tesching bullet. A long and short bar of iron, respectively, hang from an electromagnet; the bullet interrupts at the mouth of the rifle and at the goal of the current; the electromagnets lose thereby their strength and let the bars fall; a knife indents the longer bar and thus shows, in accordance with the law of gravity, how much later the longer one fell than the shorter one.

In this demonstration the Tesching bullet acquired an initial velocity of 225 meters a second. Such tests must, of course, have great importance for ballistics. And by means of the Pouillet mirror apparatus the lecturer even succeeded in measuring the velocity of the projectile while it was still in the barrel of the rifle.

A. S. Orr, Greenfield, Ind., was seriously injured, one night recently, while riding on an interurban car from Indianapolis.

It is not generally known that King Alphonse of Spain is particularly interested in horology. He is said to have a large collection of unique watches and clocks.

RATING OF WATCHES AND CHRONOMETERS. 1909.

THE number of watches sent for trial this year shows a considerable increase, the total being 380, as compared with 252 in 19 and 246 in 1907.

The number of entries for each class of test, and the results of the examination were as follows —

Entries.		Results of Trial.	
		Received Certificates	Failed
Class A	253	201	52
Class B	70	55	15
Subsidiary trial	57	43	14

The marked improvement in performance to which attention was drawn in last year's Report has been maintained, and 1 movements have obtained the distinction of "especially good."

The following figures show the percentage number of watches obtaining the distinction "especially good," as compared to total number obtaining class A certificates :—

Year	1900.	1901.	1902.	1903	1904	1905.	1906.	1907	1908.	1909.
Percentage "especially good"	35·4	35·5	31·6	42·4	50·2	44·7	47·5	43·0	56·8	54·7

The number of watches obtaining 90 marks and upwards, has shown another considerable increase, the total being 25, as ared with 15 last year.

In Appendix IV. to the Report of the Observatory Departments will be found a table giving the results of trial of the atches which gained the highest number of marks during the year The first place was taken by the keyless double-roller g-barrel Bar-lever watch No. 344762, sent by Messrs. Vacheron & Constantin, Geneva, which obtained the high total f 4·5 marks.

TEST FOR POLICEMEN'S CHRONOGRAPH WATCHES.—At the request of the Metropolitan Police a special scheme for the e ng of the chronograph watches used in timing motor cars has been prepared and submitted for the consideration of the Po e Authorities.

MARINE CHRONOMETERS.—These also show an increase, the entries being 108, as compared with 82 last year, Of these, 82 ned certificates and 26 failed. The percentage of failures, 24, is slightly above the average value.

Highest marks obtained by complicated watches during the year :—

sio of the Time as Discovered by Rabelais.

RDING to Aristophanes, the hour taking refreshment among the was when the shadow is 10 feet However, this rule, according to must be confined to the king; the me for common people depends on ptite, and the stomach is the true his view is supported by a charac- autus, who detests dials and time s and inveighs furiously against entors, because it is notorious that ach is a more accurate timekeeper human contrivance.

nes has the same respect for the stomach, but varies the application, for when asked at what hour a man should take his repast, replied: "The rich man, when he is hungry; the poor man, when he has the wherewithal."

But the old doctors are a little more formal in regulating the canonical hours:

"Rise at five and dine at nine,
Sup at five, retire at nine,
And you'll live till you're 99."

Work of a Blind Watchmaker.

WILHELM RIFFINS, a German watchmaker, who lost the use of his eyes by accident when 28 years of age, did not lose time in bemoaning his fate, but resumed his trade with increased assiduity, so as to render success independent of his sight. As before, he repaired and cleaned watches, clocks, musical and other instruments with marvelous skill.

When he took apart and put together a watch he had no need of assistance, except for removing and replacing the spring, which task was performed by his wife. Oftentimes he had in his shop more than 100 watches awaiting repairs, many of which had come from a distance of 100 or 200 miles. He knew every watch by the touch, and every customer by his voice.

A. R. Hawkinson has sold his stock at Towner, N. Dak., to F. N. Kinnoin.

Horological Notes.

N DERABLE interest is being mani- fe d by horologists in the new aero- meter, designed to indicate the d "air ships," and invented by A. P. e Beloit, Wis. Mr. Warner is the in- r the autometer, which accurately t the speed of an automobile in hour. He claims to have the of manipulating an aeroplane l nd that he will shorty equip his C iss aeroplane with a new device e as perfected. Aviators in all coun- a watching the success of Mr. War- i ntion, and say that if it is a suc- cess that the aeroplane will at once be placed on a commercial basis.

Displayed in the retail jewelry establish- ment of B. T. & W. E. Ash, Binghamton, N. Y., is a combination Colonial clock, book- case and desk, made entirely by hand by a farmer named A. L. Knight, who resides at Tracy Creek. The body of the affair is curly maple, and inlaid in it are fine-grained oak and sumac. The latter is employed extensively in the formation of birds, and the peculiar color and grain of the sumac shows up well in the wings and feathers of the birds. One especially attractive bit of work in this line is an eagle surmounting the circular mirror over the desk. This clock stands inside the door of the store.

Henry Freund & Bro., New York, an- nounce that they are marketing a new article known as the pulsometer, similar to the device known as the sphygmometer, but now manufactured in a size suitable for nurses and to fit American O-size cases. The new device, it is claimed, has never before been sold in this country, the above-mentioned concern being the sole agents for its sale, as well as for the sale of the sphygmometer, which is a pulse- timing instrument and watch combined. The pulsometer is simply a pulse timing instrument.

There is one 7-jewel watch that is sold only by retail Jewelers at restricted retail prices and is so advertised to the public that a large trade which the Jeweler controls is being built up.

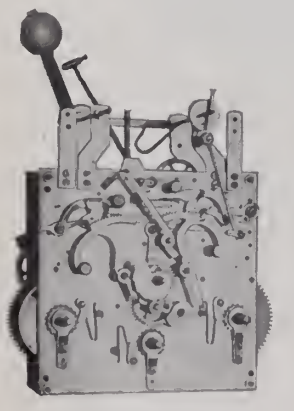
Pennsylvania Watch Case Company

YORK, PENNSYLVANIA

THERE'S MONEY IN CLOCKS

That *Stay Sold*—These Do

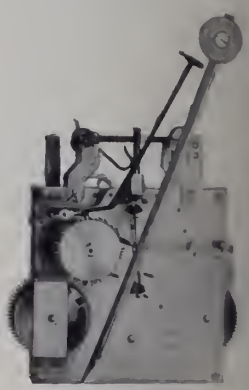


We offer you the quality that insures satisfaction, and prices that mak sales. The movements in our chiming clocks combine all the desirable fea tures of the famous Old English clocks, and we employ the most modern an progressive manufacturing methods to produce these guaranteed timepiece at prices that will quadruple the number who can afford them. That mean four times as much clock business for you, and every sale of one of these clocks is a constant advertisement of the satisfaction gained from purchases at your store.

The "Elite"

is heavy and solid in construction and equal in every respect to a first quality London made clock. The movements are guaranteed to keep time and not get out of order. The chimes are heavy tubes of special bell metal. This clock was awarded the Grand Prize at St. Louis in 1904.

The "Monastery"



is built to fill the recognized d an for a reliable, durable chiming ha clock that can be sold at a moderat price. The chimes are operated b heavy weights that run a ful l weel A spring movement slows down dai and usually stops within five day. The chimes are long rods fitted on block, or first quality genuine tubula bells of beautiful tone.

FRONT VIEW.

Excelsior Movement

The Excelsior Chiming Mantel Clock

BACK VIEW.

is a high grade, low priced chiming mantel clock, superior in every way to anything ever before offered in this line. We send it to you ready to run. It does not require hours of timing and repairing to start it going. The chimes are made of special bell metal long rods set in a heavy block and operated by a movement of exceptional merit. Glance at the cuts here shown. They will convince you that this movement is superior to anything ever shown in a moderate priced clock.

When in New York be sure and visit our interesting exhibit of chiming clocks. See them work and hear the chimes. Besides proving, it will enable you to see and hear for yourself the superiority of B. & D. clocks.

In the meantime, write for our exceptionally explicit literature showing all movements in every clock, and price lists for immediate delivery. We are also now taking import orders for Fall delivery.

A Booklet—No Brag—No Buncombe—Just Horse Sense and Lots of It

Get It, Read It, and, Like the Leisurely Cow, Digest It Thoroughly

A very conservative production is the booklet recently issued by me, also a very strange publication for an auctioneer for the reason that I say comparatively nothing about myself or my achievements. It is entitled "He that Knows and Knows That He Knows Is a Wise Man—Follow Him."

It would be well if every jeweler who ever had—or even contemplates—a sale would secure a copy of it. It is an instructive little work from cover to cover. Almost every one of its pages will enlighten you on some misunderstood or unknown point. The personal element (that is, the reference to myself) is inconspicuous and secondary.

The booklet, primarily, was designed to convey to you facts about which you know little or nothing. Some of the abuses of the business—ABUSES THAT YOU OUGHT TO KNOW ABOUT TO PROTECT YOURSELF AGAINST—are discussed in unadulterated style. There are some illuminating details, too, about the way an auction sale should be conducted. They may conflict with what you think or have been told on this particular point. If they do, just remember that the opinions and suggestions in this little treatise represent about 22 YEARS OF STUDIOUS APPLICATION TO THE BUSINESS AND THAT INTELLIGENCE, CONCENTRATED THOUGHT AND SYSTEMATIC STUDY play very important parts in the compilation of the advice, suggestions and caution therein set forth.

This booklet may be had for the asking. You will find it quite different in many ways from the literature along the same line that you have been getting. And don't forget that its purpose is to tell you a good many things you don't know and more about some things you already know. It will at least give you the ear marks whereby a conservative and business-like auctioneer may be recognized.

Just closed out the Stock of H. A. Hershberger, of Johnstown, Pa., the sale was a remarkable success notwithstanding the fact that a previous attempt by other auctioneers to dispose of it failed badly. Write Mr. Hershberger about it.

H. J. HOOPER

37 Maiden Lane **New York City**

'Phone 2951 John

Hooper is New York's Undisputed Leading Jewelry Auctioneer, and has an unparalleled record for successful sales. There is a reason for this and you should know it.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Church Wedding Scene in the Show Window.

Effectively Used to Advertise a Line of High-Class Stationery, Etc.

THE accompanying photo shows a miniature wedding scene recently displayed by Brock & Feagans, Los Angeles, Cal., to attract attention to their high-class stationery department.

This is a representation of an Episcopal church wedding. The bishop, choir boys, bride, groom, best man, bridesmaids, ushers, flower girl, pages, etc., are characterized by miniature French bisque figures, correctly dressed for such an occasion. All are painted to represent men and women rather than children, and every detail is carried out according to the proper rubrics.

One can imagine he hears the organ as it peals forth the wedding march, and can actually see the happy pair in position for leaving the church, preceded by the flower girl and followed by the maid of honor on the arm of the best man, while in their rear come the bridesmaids, each on the arm of an usher.

A portion of the church interior is shown and small orange trees in bloom form the decoration.

The balance of the window space is given to an unusual display of engraved wedding stationery—at home, church and reception cards. Samples of writing paper and correspondence cards, all stamped in plain embossing with monogram dies, are also exhibited.

With these samples there are brides' books, wedding books, wedding guest books, etc.

The display created more interest than perhaps any other display ever made on Broadway in Los Angeles, the large window often being crowded nearly to the curb during the entire two weeks the display was maintained.

All of the miniature figures and the church arrangement are the work of Mrs. Martha L. Krag, of Los Angeles, having been executed by her for Brock & Feagans.

WEDDING WINDOW DISPLAY MADE BY BROCK & FEAGANS, LOS ANGELES, CAL.

Harry A. Niles has purchased an interest in the business of Lowell & Darrow, Binghamton, N. Y. Mr. Niles is now on a pleasure trip to the Bermudas, and will return about April 1.

Martin J. Walsh, who was one of the best known business men of the Wyoming Valley for over 40 years, doing business at Parsons, Pa., under the firm name of Golden & Walsh, died at Atlantic City last week from a complication of diseases, aged about 70 years. Six children survive.

Sprekeeping Department.

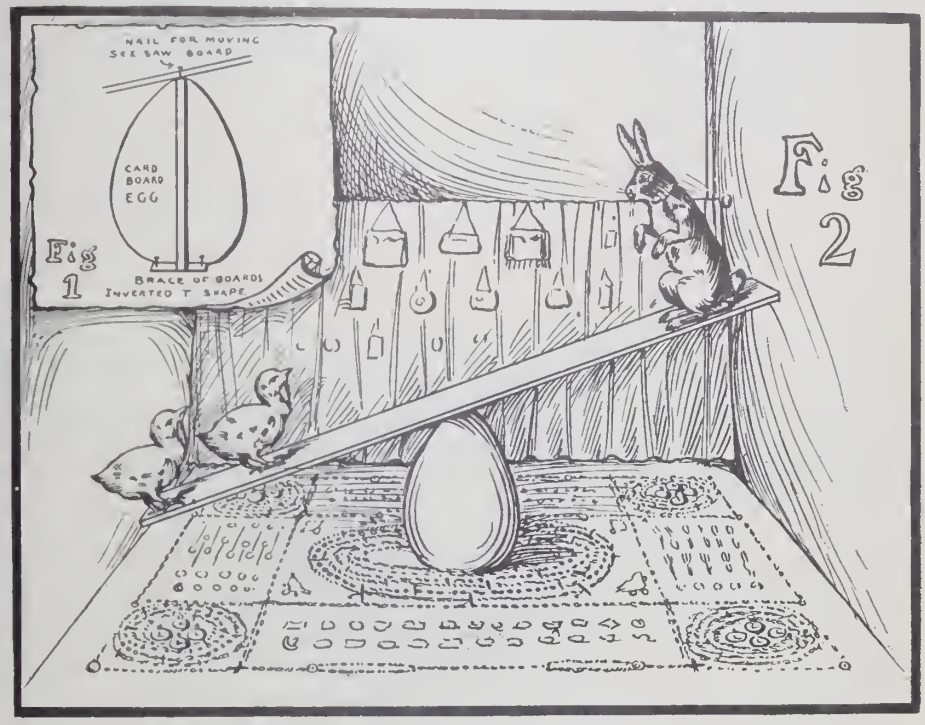
The New Store of Simons & Co., Inc., New Haven, Conn.

The beautiful perspective photograph shown on this page portrays the interior of the handsome new store of Simons & Co., Inc., 81 to 83 Church St., New Haven, Conn. The store is located in the central part of the city, in the firm's building, known as the Simons building, at the corner of Church and Center Sts. The attractiveness of the location is enhanced by the fact that there is a corner entrance.

The store is 90 feet long and 22 feet wide. The fittings and fixtures are of mahogany and present a very rich appearance. The ceiling is 15 feet high. The main store has a terraza floor and an elaborate display of stock is shown off effectively by means of electric lamps. Most of this illumination comes from the ceiling, and the lamps afford a clear, bright light throughout the entire establishment.

The store in the evening appears practically as bright as day. The different parts of the store may be communicated with at any moment by telephone, there being installed in the establishment a private system of telephones.

The diamond room is located in the rear of the store, and occupies both sides. Directly over the diamond room and the vault is an attractive proscenium, used as the office of the concern. The main entrance to the basement is situated in the rear of the store immediately in the center. Here the space is devoted to a large array of cut glass displayed on mirrored tables, clocks china, etc., also find a place in this part of the store.



Like the main store, the basement also has a floor of terraza. The basement extends out under the sidwalk, and is 90 feet in length by 25 feet in width. The sidewalk, by the way, is covered with a glass walk. The basement is splendidly illuminated by numerous Tungsten lights. The connections with the workroom, where three men are constantly employed, are to be found in this basement. Nothing has been overlooked to make the whole establishment as up-to-date as possible. There are two burglar and fireproof vaults for the storage of goods, and the entire store is equipped with a burglar alarm system operated by the American District Co.

An interesting feature of the establishment is a set of very valuable chimes erected directly over the entrance to the store.

INTERIOR VIEW OF THE NEW STORE OF SIMONS & CO., INC., NEW HAVEN, CONN.

mahogany cases built for that special purpose and there is also a special department for clocks too large to be placed in cases. Leather goods, umbrellas, imported

A NOVEL AND TIMELY EASTER WINDOW DISPLAY.

An Easter See-Saw Window Display.

HERE is a very simple but alluring Easter window attraction. The scene represents two chicks see-sawing with a rabbit, the "board" resting apparently on a large oval-shaped piece of cardboard representing an egg. This "board" is really balanced on a T-shaped piece of staging, which serves the double purpose of holding the egg in position and supporting the "see-saw."

The egg itself could rest in a "nest" made of watch chains or similar material. If a moving show is wanted, balance the board carefully and bore a hole where nail is inserted and fit the nail with a washer, to prevent the board from slipping. Then every little while the clerk can touch either side and set the affair in motion. A display of seasonable goods could be shown in the vacant spaces on either side and also on the walls of the windows.

Woman's Way.

Ruby Diamond.—I see they're about to sell the Goliath diamond for $2,000,000.

Hyacinth Jewel.—That so? How can they afford to dispose of it at such a ridiculously low price?

Ruby.—Simply because they buy 'em in such large quantities.

Orrin Blount, Lockport, N. Y., on April 1, will move to 98 Main St. The new store is being renovated and equipped with an attractive front.

Relation of Salesmanship to Advertising.

Address by HUGH CHALMERS delivered before the Associated Advertising Clubs of America, at the Louisville Convention and reported in the *Business Philosopher*.

THE relation of salesmanship to advertising is the closest relationship—closer than friends, closer than a team under a single yoke, closer than brothers, closer than friends, closer than a team un-

ATTRACTIVE WEDDING GIFT ADVERTISING.

never be separated or divorced. All salesmanship is advertising, and all advertising is part salesmanship; they are the twin-screw engines that drive the ship of business; they are like a chemical compound—

GOOD TEXT FROM LOS ANGELES, CAL.

each contains the other and is itself the thing contained.

So with salesmanship and advertising. Each is a power alone, but combine them and you have the greatest business-producing force known. It takes brains to create and combine them, and it takes nerve to touch them off, but the results are worth while.

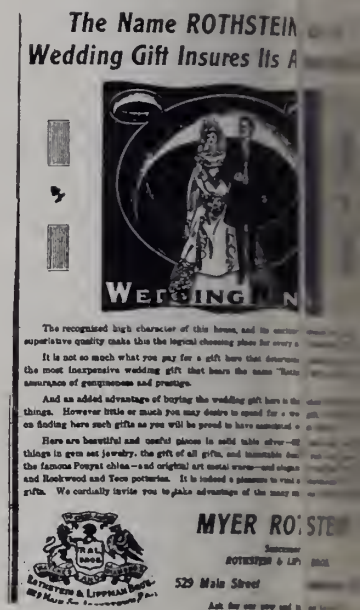
Every ad is a salesman; every salesman is an ad. Advertising is salesmanship plus publicity. Salesmanship is advertising plus getting the order signed. Advertising and salesmanship are alike in that in both you are trying to influence the human mind—trying to teach people to believe in you and your goods. Advertising is teaching; so is salesmanship.

The close relationship of salesmanship to advertising is most apparent perhaps when we get clear down to bedrock and discover the real foundation of salesmanship—of doing business successfully.

The whole business world rests on a foundation of confidence. When confidence is gone, business is gone. Individual salesmanship depends upon confidence as much as any other transaction in business. If a man has confidence in you and in your goods you can sell him. You cannot make many sales where confidence is lacking.

If your prospect lacks confidence in you, then your entire efforts must go to building up in his mind a feeling of confidence. Now, the greatest builder of confidence is publicity—advertising.

Lack of confidence is usually due to ignorance. Unless you know a man well you haven't confidence in that man. The greatest foe of ignorance is publicity. The saying that "publicity corrects all abuses" is a true one.



Advertising makes you acquainted with the public. It gives people knowledge about you and your goods, and knowledge is absolutely essential to confidence. Big advertising looks like big sales; it makes people familiar with you; it unconsciously creates confidence. Without a doubt the greatest force to-day in the interest of confidence—in the interest of credit, if you will—is advertising.

Advertising and salesmanship are identical in their object. What is their object? The distribution of goods at a profit. How can this be done? It is done by teaching. That is what advertising is—teaching—teaching great numbers of people to believe in your goods. And that is what salesmanship is, too. But advertising conducts a public school, while salesmanship gives individual lessons.

One of the oldest chestnuts in the talk of advertising men is: "We must carry on a campaign of education." Nearly every advertising magazine you pick up you read about someone carrying on a "campaign of education." When an advertising agent is up against it for something client, he assures him with gr that he must carry on a "cam gr cation."

Let us get through with this All advertising campaigns are education. If they are not e are not advertising at all. advertising is to teach people you and in your goods; to t think that they have a need f and to teach them to buy y

v that if advertisers could get nders together in a large tent day to these readers what they g them in print, that nine-tenths uld change their copy. If we o say to people these things that should certainly be more care- ere are more "bad breaks" be- o-day in advertising than in ying else.
a ertisers seem to say everything thing to their prospective cus- ey would not think of talking things if they were talking to le ice to face.
k nost copy writers and adver- k t for granted that the buying o a great deal about their goods; at least, some of the copy would make you think so. They use all kinds of technical expressions and big words.

I once heard it said that a man with big ideas used little words to express himself, while the man with little ideas is always using big words to try and impress the people with the greatness of the little idea. Small words are more important in advertising than in anything else.

No one ever buys until he is convinced. You can't convince him until he understands. He won't understand unless you express yourself clearly, and the only way to express yourself clearly is to use small words that one can understand Most advertisers shoot over the heads of nine-tenths of the people they want to reach. They don't understand the art of merely talking common sense to these people—the same kind of talk they would use if they were trying to sell them orally.

Next to the importance of what you say is the way you say it. It is so in talking; it is so in advertising. The set-up of an advertisement is like the dress of a salesman. Suppose a salesman should go into a store to sell goods, and should have on a hat of one color, and coat of another color, a vest of another and green trousers. He might attract attention, but he would not make much of an impression. The set-up of some advertisements reminds me very much of such wearing apparel for a salesman. Of course, this is exaggerated, but nevertheless you see the point.

In my opinion, an advertisement must be just as simple in form as the dress of a salesman. Some people write an advertisement and then put in a lot of red lines or heavy black lines around it, or all kinds of curlycues, so that the most important thing about the "ad" is the big red lines, or the fancy type, or the fancy border, when, as a matter of fact, that is the very thing they want to subdue. Everything must be so arranged and the type so set that attention is called to the most important thing, and that is the statements you are making in the copy about the goods you want to sell. Everything must be subordinate to that.

I have always claimed that all you can hope to do is to get a man to read the first five or six lines of your copy, and if the first five or six lines are not interesting enough to cause him to read the rest the fault is yours. He gave you the chance, but you didn't take advantage of it.

To prove this, one time we sent out 1,000 circular letters, and they were all mailed under a one-cent stamp. This circular letter asked for prices on goods which the men who received them handled. Out of the 1,000 letters mailed out nearly 900 brought replies giving prices, which showed that nearly nine-tenths of these people who received the letter under the one-cent stamp.

ARTISTIC FOLDER SENT OUT BY I. D. GARMAN, PHILADELPHIA, PA.

opened it and read the first few lines of it.

This convinced me that much depends on the opening lines of any copy. It is the same thing in a personal interview. You are impressed by what the man tells you at the start. Let's eliminate all the "by-the-ways" in advertising.

(To be continued.)

An Artistic Folder.

AN artistic three-leaf folder, which folds in two-ply, so to speak, thus making the pages double, and measuring, envelope size, 3⅝ by 6¼ inches, was offered to prospective patrons during the holiday season by Ira D. Garman, 101 S. 11th St., Philadelphia, Pa. Printed in very dark green on a greenish yellow paneled background is a half-tone illustration of a beautiful woman, nonchalantly eliciting harmony from the treble of a piano in surroundings where discord, apparently, would seem impossible.

The fair musician's left hand is thrown carelessly over the back of a chair on which she is half kneeling as she gives ear to the harmonious melody. The jeweler takes advantage of the psychological effect of the picture by referring, on the left-hand page, to the "harmony" in gems and settings, which is the motif that appeals to lovers of refined jewelry.

A very rich table of the wealthiest Romans are thus le While it is known that the pieces mbossed and chased, and the ancient eulogized some of these wares, a true idea of their form is wanting. rm *chrys* (from the Greek *chrysos*— conveys the fact that that precious twas, to some extent at least, used in eation of this costly service.

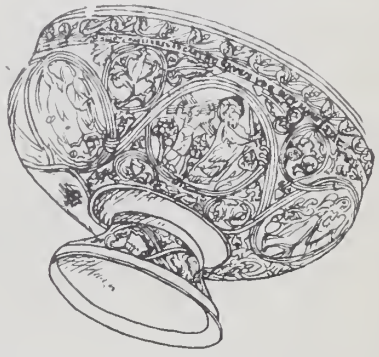
CHRYSO-CLAVUS "(Lat. *golden nail-head*). h purple silks, woven or embroidered he *clavus*" (to which refer) "in gold o named. They were used for altar s, and the *clavi* were sometimes made ge that a subject was embroidered hem; they were then called *sigillata*, led."—Mollett.

CIALA, Raffaelle. A ceramic artist working nder Duke Guidobaldo II. at Urbino, 1530-60.

CIBOIRE. French term for *ciborium* (to hi refer).

CIBORIUM. The term is derived from the re word *kiborion*—a cup. The term *borum* in the early Christian times ated the cupola (*cup* form) supported by four pillars that was above and protected the altar. These dome-shaped canopies were built of wood, stone, bronze or silver. The *ciborium* which Constantine presented to the Lateran had a silver roof that weighed 2,025 pounds. The Bishop Victor of Ravenna (539-546) had a *ciborium* built for the Basilica Ursiana, of silver, weighing 2,000 pounds.

Later "the term *ciborium* also signified a vessel in which the holy Eucharist is re-



TYPICAL GOTHIC CIBORIUM IN GERMANIC MUSEUM.

served. Formerly the blessed sacrament was reserved only for the communion for the sick, and kept in a smaller and more portable vessel, called a pyx."—Shaw.

Called also *cimbarium* and *cibarium*, *suspensio*, etc.

The noted "Warwick bowl" (see cut) is a *ciborium* in the collection of the Earl of Warwick. It originally was in blue enamel ground, the rest pale green. The subjects are in gilt metal and represent: 1, Sacrifice of Cain and Abel; 2, circumcision of Isaac; 3, Isaac bearing the wood; 4, sacrifice of Isaac; 5, Jonah issuing from the whale's mouth; 6, the burning bush. A verse is over each descriptive of the episodes.

A Roman vessel, supposed to have been in the form of the leaves or pods of the

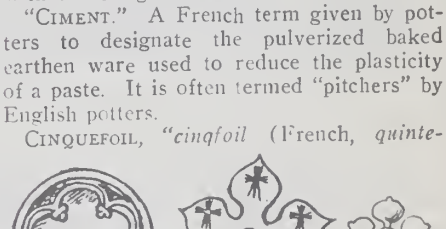
WARWICK BOWL OR ENAMELED CIBORIUM—EARL OF WARWICK COLLECTION.

Egyptian bean, *colocasia*, was called *ciborium*.

CICLAS. See *ciclaton*.

CICLATON, or *ciclas*, *ciclatoun*, *siklatoun*, *sigleton*, *singlaton* or *chigaton*. Meyrick declares this term originally to have denoted the garment that succeeded the *surcoat* (to which refer), but being tight fitting round the body, while the *surcoat* was "roomy." Later, he says, it was worn over the armor, made of silk, later again "plaided," and later still so richly ornamented that it gave its name to a species of cloth-of-gold.

CICUTA (Latin for the hemlock). A term used by analogy to denote anything made out of the hemlock plant, especially the Pan's pipes."—Mollett.



CIDARIS. The ancient Greek leathern helmet.

"A sort of diadem or royal bonnet worn by Eastern princes. It was tall, straight and stiff in shape, and was ornamented with pearls or precious stones. The same name was also applied to the bonnet worn at ceremonies by the high priest of the Jews."—Mollett.

CILIBANTUM (Lat.). "A stand or table with three legs."—Mollett.

"CIMENT." A French term given by potters to designate the pulverized baked earthen ware used to reduce the plasticity of a paste. It is often termed "pitchers" by English potters.

CINQUEFOIL, "*cinqfoil* (French, *quinte-*

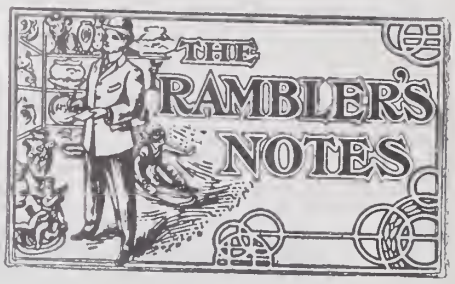
cistella, sitella (Lat.). This an- k vessel "would appear to have for the preservation of toilette The body is mostly cylindrical, val form, and covered with en- s that are mostly divided into a le zone and two narrow bands, either all three or only the middle zone having representations of the human figure, and in the latter case ornamentation being used on the others. The slightly convex cover is decorated in accordance, and either treated in eccentric circles or the entire surface being used for a picture. As a hold for the cover three, two or a single human figure serve as a handle, like the pair of public wrestlers in the accompanying cut.



ETRUSCAN CISTA.

The round *cista* stands upon three feet, mostly having four animals' claws, and are fastened to the body by an ornamental connecting member. On some of the *cistae* are buttons and chains for carrying or hanging up. Noteworthy are the cast griffins, feet and buttons mounted regardless of the engravings, sometimes covering or dividing them. And a difference in style between the engravings and the mounts being noticeable, one must suppose a division in the work, if not a later addition of the cast mounts. The most noted example is the largely illustrated Ficorini *cista* in the Kircherian Museum at Rome, about 50 centimeters high and 42 centimeters in diameter. * * * Like this one, many other *cistae* have been discovered in the neighborhood of Praeneste, the present Palestrina (east of Rome), as was the one depicted in this cut."—Bucher. (See also *Ficorini cista*).

(To be continued.)

A jeweler in Boston, Mass., has arranged a novel exhibit at his establishment. In a large case 300 watches are hung which have been so perfectly regulated that they all apparently tick together. When the doors of the case are opened the ticks are plainly audible at a distance of 10 feet.

L. A. Boli, a jeweler of Hamilton, O., is displaying in his store the cheeks for $100 which he received from the Jewelers Security Alliance as a reward for the arrest and conviction of a thief who broke into his store and stole watches and jewelry worth $200. The cheeks go to Detectives Hettrich and Charles H. Stricker for the arrest of Ross Barnhardt.

RICH EXHIBIT OF CUT GLASS

THE rich exhibit of cut glass at the salesrooms of the Jewel Cut Glass Co., 57 Park Place, New York, includes many offerings sure to please the retail dealer who makes fine crystal an adjunct to his stock. Dainty sugar and cream sets cut in artistic style are shown beside an array of attractive salad and fruit bowls. One large tray is especially attractive because of its dainty cutting and fanciful shape. The new "Florilo" entaglio cutting, a combination matt and polished design, shows correctness of detail and superiority of finish, combined with beauty of design.

*

ATTRACTIVE FAVORS AND NOVELTIES

RETAIL jewelers throughout the country who are looking for something novel with which to brighten up their stocks will be interested in a line of dinner favors which have just been placed on the market. These pleasing novelties are sure to catch the public favor and become popular. They consist of daintily made potted flowers of different varieties, appearing to grow from cleverly modeled holders of various styles and sizes. One attractive example of this new idea in dinner favors is a small rosebush bearing a number of natural looking buds. The top of the small holder may be removed and filled with bon-bons and afterwards serve as a receptacle for small pieces of jewelry, etc. Lilies of the valley, pansies, etc., are among the other flowers employed. The favors also include dainty china bells to which are attached by a ribbon branches of evergreen. The favors are the product of the factory of C. G. (Schierholz & Sons, Plaue, Schwarzburg, Germany, and are being shown in New York by Herman C. Kupper, who is also the sole agent for the United States and Canada for the Charles Ahrenfeldt Limoges china. THE RAMBLER.

L. H. Giddings, who recently purchased the establishment of T. J. Thompson, Barron, Wis., was a recent Milwaukee visitor. Mr. Giddings' wife died some time ago after a long illness. Burial was in Michigan, and Mr. Giddings stopped over a short time in Milwaukee while on his return from that State. Besides her husband, Mrs. Giddings is survived by a son.

Leonard Cornelius, Prairie du Chien, Wis., recently celebrated the 25th anniversary of his business career in that city. Mr. Cornelius is well known publicly in his home city, having acted as treasurer and once as assessor. A half-tone portrait of the jeweler and also one of his attractive retail jewelry establishment appeared in a local daily Feb. 16.

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.]
Attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No 2425.—**Amalgam for Plating.**—*I want to electroplate some ornaments, and wish you would give a formula for an amalgam bath for preliminary dip.* A. P.

ANSWER:—An amalgam dip suitable for plating zinc is made by using eight parts of commercial corrosive sublimate in 100 parts of water and adding 10 parts of hydrochloric acid. Dip the zinc pieces in for an instant, then rinse and proceed to finish them. Do not touch this solution with the naked hands.

QUESTION No. 2426.—**Sterling Silver Not Remelting.**—*I noticed that my sterling silver becomes brittle and harder to work after it has been remelted several times. Will the copper burn out and bring about this change?* S. S.

ANSWER:—After repeated melting the copper will burn out from the sterling silver, leaving the silver better and finer than 925.000, which, of course, makes it harder to work. Annealing the sterling would cause the copper to oxidize in the silver. Old silver taken from worn-out wares would have less than the required amount of copper, some of it having been blanched or pickled out from the surface of the pieces when it was manufactured. The silversmith always considers remelted scraps the best stock.

The Assay of Industrial Gold Alloys.

(Abstract of a paper read by ERNEST A. SMITH, before a meeting of the Institute of Metals held recently in London, Eng., and reported in the *Brass World*.)

THE main points in E. A. Smith's paper are the importance of obtaining a true sample for assay, the quantity and composition of the lead used in the assay and the necessity for working with checks. The low-grade alloys employed by jewelers are pickled in the course of manufacture in order to remove the coating of oxide formed in annealing, soldering, etc., the superficial stratum being enriched in gold by the solvent action of the pickling liquor on the other metals present. Hence, in order to get a true average sample of the alloy, this superficial stratum must be scraped off or the assay will come out too high (up to 10 per cent. in some cases). The amount of lead used in the assay varies with different workers, some taking a constant quantity whatever the grade of the alloy; but the author prefers to employ amounts varying inversely with the proportion of gold, between 8 parts for 16.6 gold and 24 parts for 375.0 gold. He also prefers to add the lead in two separate portions, two thirds the total being added at first and the remainder later, this practice giving a better elimination of the copper. Better results are obtained by a low cupellation temperature during the first stage, finishing off the charge at a higher temperature.

It is considered that check samples of known composition and similar standard to the alloy to be assayed should be used in all cases where accuracy is desired, since without these checks the errors may amount to as much as 2.5 parts of gold per 1,000. When an exact determination of the gold and silver is desired the author prefers to assay the gold by direct cupellation with parting silver, and the silver from a second assay piece by cupellation with lead only.

Some of the interesting remarks made during the discussion of the paper were the following:

Professor Gowland opened the discussion by remarking that although the paper was not likely to interest so many people as the one previously read, it was a valuable contribution to their proceedings. The information contained in it had never been published before, and its author, Mr. Smith, was one who was specially qualified by training, and also by his experience as an assayer for writing such a paper.

Mr. Smith was a son of Richard Smith, better known perhaps as "Dicky" Smith—Dr. Percy's old assistant. Under his father and also at the Royal School of Mines Mr. Smith had a careful and thorough preparation for the work which he is now doing at the Sheffield Goldsmiths' Hall. With regard to the paper itself, Professor Gowland thought that the poor, low 9-carat gold frequently employed in England was the lowest alloy which should be employed for jewelry. In fact, he would really not employ that alloy at all, but one which was much richer in gold.

In Japan, in the beginning of the last century, they had a similar alloy; but unlike the British alloy, which consisted of gold, silver, copper, zinc and what-not else, that consisted of gold and silver only. It was white, but by a very elaborate process of pickling the silver was removed from the surface of any object made from it, with the result that they got a perfect gold surface. Objects so produced were practically indistinguishable from those of pure gold. With regard to alloys at present in use in Japan, that used for coinage was the same as that used in France and America, viz., gold 9 parts, copper 1 part. The Japanese preferred their gold to be the color of an English guinea, and therefore all their jewelry was now made of the high standard alloy. The alloy was high in gold, but the metal alloyed with it was copper, with a considerable portion of silver.

With regard to alloys of gold and silver, and gold and copper, to which allusion was made in the paper, of course when those were such there was no segregation, and therefore there was no difficulty whatever in taking a sample. But in the case of poor alloys the ingot could not be assayed from a cutting, but must be assayed by first melting the ingot and then taking a dip assay. At Goldsmiths' Hall and at the Sheffield Assay Office articles of jewelry and plate were received in a nearly finished condition, and a most ingenious method was used of taking samples from those articles without really injuring them and without preventing their being properly finished.

Great difficulties had to be contended with, because all those articles which were low in gold had been subjected to a very severe pickling and the surface was richer in gold than the layers below. Therefore it was absolutely necessary to remove the whole of the upper surface and to take the sample for assay only from the internal layers. That method was of much use in facilitating the practical working of the assaying office. There, of course, they knew what was the composition of the alloy, and therefore it was very easy for them in making up what was called a fire, *i. e.*, a batch of assays, to make up at the same time a batch of "checks."

But where the metal consisted simply of an alloy of gold and silver it was usual in Japan, where there was not always time to make a preliminary assay, to obtain a fair idea of the composition otherwise. After practising with a series of alloys he became quite expert in determining the value of a sample by means of the touchstone. His long experience and the many hundreds of thousands of assays he had made had led him to the conclusion that one of the most important things in a gold assay was to have the temperature of the muffle right. If that was not regular, or if too high, they might as well throw the whole of the assays away.

Reverting again to poor gold alloys, Professor Gowland said that where there was much copper it was necessary to use a considerable amount of lead, and he found that the method which was mentioned in the paper was similar to one which he employed when dealing with large quantities of poor alloys received from the mines. The lead was divided into three portions; two portions were formed into balls of given weight and one portion was made into foil, in which the assay bar was wrapped. In charging the assays into the muffle a leaden ball was first passed in and then the lead packet containing the alloy; when the assay was nearly finished the other ball of lead was added.

By adopting that procedure he found that the resulting gold assay was much more free from copper than if the whole of the lead had been added at the beginning of the assay.

have made more successful and satisfactory Sales than any one Auctioneer in America.

I have three of the most talented Auctioneers in this business who can give the very best of references to assist me.

REFERENCES FROM MADE IN THE

SUCCESSFUL SALES PAST FEW MONTHS

AMERICA'S BEST KNOWN JEWELRY AUCTIONEER

I made one of the largest and most successful sales ever made in Atlanta, Ga., for Chas. W. Crankshaw, with one of my assistants lasting ten weeks. Trustee Sale for J. C. Mellichamp, Atlanta, Ga., eight weeks. The Ermod Jaccard Co. Sale, St. Louis, Mo., lasting over 100 days, one of the largest and finest stocks in United States. M. Scooler Co., New Orleans, 3 sales, sold successfully to the trade at 185 Wabash Ave., Chicago, balance of stock amounting to over $100,000 in four days. Write them for results

Consider I am in a position to buy any stock, amounting from one to $50,000 or more for spot cash.

Sigler Bros., Cleveland, O., sale, lasting ten weeks.

Ben Sands, Cleveland, O., sale, eight weeks.

Wardwell Co., Cleveland, O., sale, six weeks.

Keil & Hettich, Chicago, Ill., sale, two months.

The Duhme Bro., Cincinnati, O., sale, over 100 days.

I can furnish over 300 references from Leading Jewelers, Manufacturers, Wholesale Houses also Banking Firms I have transacted business for in the past 20 years.

All sales made strictly upon honor, and no misrepresentation whatsoever.

Write me if you contemplate having an auction. All correspondence STRICTLY CONFIDENTIAL.

No sale too large or too small for me to conduct, as I have plenty of assistants.

ALVIN SILVER

Morning Glory Pattern

925/1000 FINE

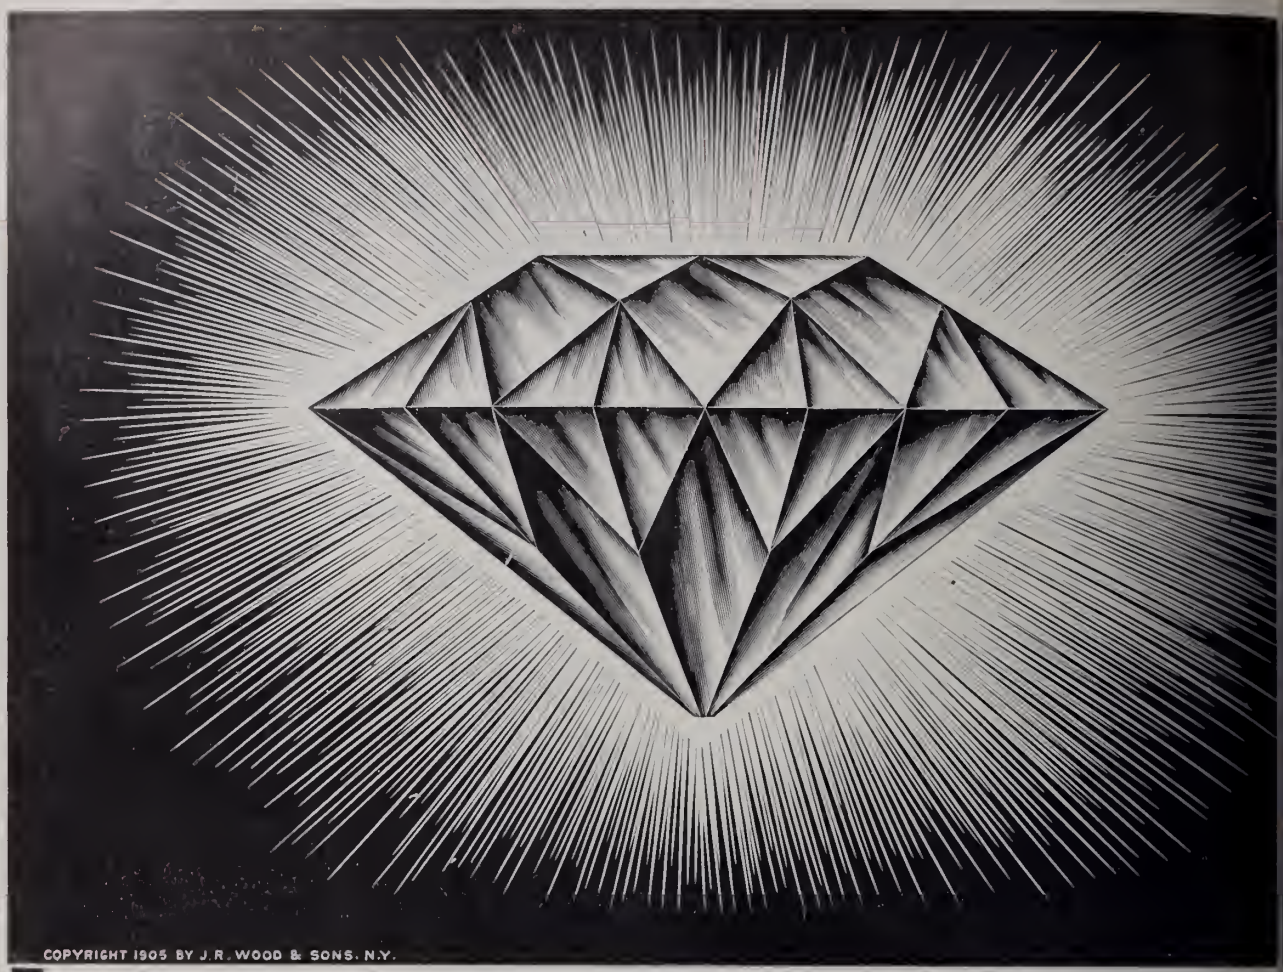
ALVIN MFG. CO.
Silversmiths
New York

The "Morning Glory" has proved one of the most successful pattern Silver flatware. It is most artistic, with exceptionally beautiful die work, por detail of the flower dominating the decoration. One seldom sees the de beyond the handle as in the fancy pieces of this pattern. It is of medium very moderate in price. Finished in French Gray.

We are issuing a Catalogue illustrating the complete pattern of 11 actual size. If you have not received your copy write us at once. It will help sales. Don't wait until the edition is exhausted. Write now

Fahys

It is only necessary to carry three grades of Gold Filled Watch Cases. With these you can supply all demands if they are:



FAHYS PERMANENT
FAHYS BRISTOL
FAHYS MONTAUK

They are the acknowledged leaders in their class, and are sold strictly on their merits.

No Coercion or "Trust" Methods Are Necessary to Make Sales of These Cases

JOSEPH FAHYS & CO.

NEW YORK CHICAGO BOSTON SAN FRANCISCO

Our diamonds are diamonds you can implicitly rely o that the price is the lowest, and the quality exactly what it represented to be.

You can be sure that the price is the lowest, becau we buy the diamonds in the rough, cut them in our own cuttir works, and pass them directly to the retail jeweler.

As to the quality, we unreservedly guarantee that ever thing we sell is just what we represent it to be. No one di putes the worth of our guarantee.

J. R. WOOD & SONS

Stone Goods of Great Variety

The reigning fad in Men's Jewelry at present is something in a stone button or scarf pin.

We have them in endless variety of stones and styles; all real stones and handsomely mounted, and the latest ideas.

We don't copy; we originate. A jeweler who is wide-awake will take up new things and push them to a finish while they are popular.

Our goods are equal in finish to any 14-K. line made, and prices much lower. The accompanying illustrations can only give you a faint idea of the excellence of the Line.

Send for memorandum package, or see our salesman when he calls.

A 10-Karat Line
that is 10-Karat

The Keller Jewelry Mfg. Co.

64 Nassau Street
New York

Factory, 251 N. J. R. R. Avenue, Newark, N. J.

TO THE TRADE:

"A principle which we have always fought for has been to keep the market open for all watch cases, no matter of what manufacture, believing it to be for the best interests of the trade to allow them to buy the watch cases which they consider the best on the market and by so doing stimulate all manufacturers to their best efforts, with a view of establishing a high standard of excellence. The Dueber Watch Case Mfg. Co. in all its many years of existence has never sought to dictate to any jobber what watch cases he should use. It has never used, directly or indirectly, any method of coercion or force to either restrict the product of any watch case manufacturer, or to force the production of its cases upon any wholesale or retail jeweler to the detriment of any other manufacturer of watch cases. It employs the 'open door' policy in selling merchandise and believes that the trade should be open to all manufacturers and jewelers alike and to that end will bring all its energy to bear for the good of the entire trade."

Gentlemen:-Replying to your inquiry regarding the result of our ɜing your catalogue will state that our business through December ıcreased considerably over December 1908. We are satisfied the ıjor part of the increase was due to using catalogues and we will, ıdoubtedly, use them in the future.

We sent most of our catalogues to the country and made quite a ew mistakes in the addresses, but, taking everything into con- ideration, we are well satisfied with results.

Thanking you for the inquiry, we remain,

Yours respectfully, LEO M. DORNBERG & CO.

We deal only with the Legitimate Jeweler and as a rule sell but one in a city

Winning on Merit Alone

There are many ways of trying to win in the business world.

One may adopt Brute Force. That is the method of the highwayman, when he hits you on the head and takes your wallet.

Or one may seek success simply on the MERIT of his products in an open market. That is the approved method in civilized communities. It succeeds.

Jobbers, dealers, consumers, everybody responds to considerations of MERIT, and no Chinese Wall can shut it out.

For years

Wadsworth Watch Cases

have been winning on merit. The cases have been sold, and the business developed on the idea of QUALITY, including superior SHAPES, STYLES and ENGRAVINGS. The Cases will continue to be sold and the business to be developed along the same lines.

The Big Stick is no part of our office furniture. Dealers DON'T HAVE TO buy these Cases.

But they WANT TO and will buy them because of their MERIT, because of the PROFIT there is in them, and because there is always certainty of a SQUARE DEAL and no coercion.

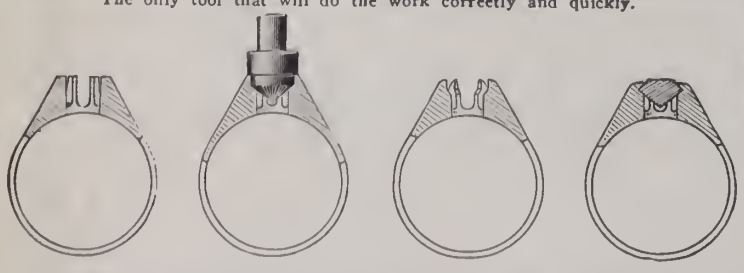
ECHARCO IMPROVED WATCH GLASS CABINET, No. 85

The NEW FEATURES of this Cabinet are the SK DRAWERS, making an accumulation of dust and chips i and the very easily read LABELS of white celluloid on th fronts. The Cabinet has nine drawers, giving 1,632 spac 29½" high, 24" wide and 13" deep. The construction of arrangement of partitions to economize space and weight, novel method of showing contents on the drawer pull's are and practical ideas and very well carried out. The Cabine of oak and finely finished, and is the lightest and stronges the market. Spaces are provided for the small sizes of and Genevas, and for Antiques, which no other Cabinet for, making it the most complete and convenient Cabinet ev to the trade.

Price, $16.00

PEGWOOD SHARPENER, No 3

A new attachment, designed for use on a watchmake which sharpens pegwood to a hair point without breakin the same time gives the point the proper concave shape. is held in the lathe by an arbor fitting into a regular wire shown in the illustration, being steadied by the rest sho stick of pegwood is rotated by hand while the tool is re the lathe, producing a fine, long, flexible point. With this watchmaker can prepare enough pegwood for a day's or work in a few moments, and have every piece uniformly an sharpened.



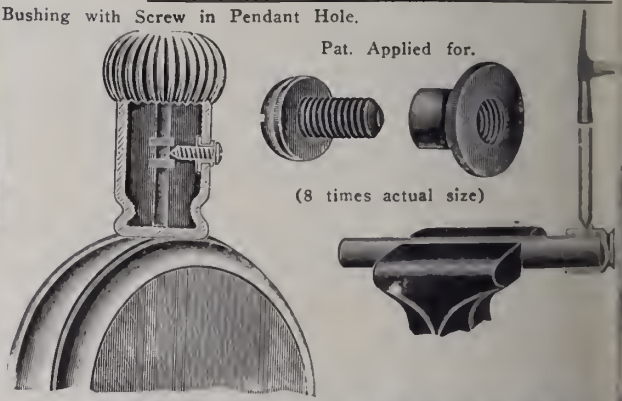
The tool is mechanically perfect, made of the best ma durable and cannot get out of order. For sharpening the c use of a fine Arkansas oil stone slip is necessary. Coarser should not be used.

Price, each, $2.00

DIAMOND AND STONE SETTING TOOL No. 85 (Pat. Applied for)

The only tool that will do the work correctly and quickly.

These tools, invented by a stone setter of many years' experience, will do the work they are intended for with absolute perfection, whether in the hands of an experienced or inexperienced workman. In eight seconds after adjustment in lathe will cut a smooth seat for any stone from 1/16 to 2 carats.



Tools are made of polished and hardened steel and are indestructible. Will fit in chucks Nos. 30 and 44.

The greatest labor saving device ever invented in the line of stone setting cutters. Put up in neat block and box.

Price, Per Set, $5.50

Bushing with Screw in Pendant Hole.

Pat. Applied for.

(8 times actual size)

THREADED PENDANT SCREW HOLE BUSHING, No

Made in Brass for 18, 16, 6 and Os Lever Set Cases, and in German S 2, 3, 4 and 5 oz. cases

Cut shows watch case pendant with pendant screw hole inserted and also screw, and shows repair as it looks when con

DIRECTIONS.—Ream hole to size of bushing, then plac ant screw bushing in hole and place pendant with bushing o as illustrated above, and with a centering punch force edge of bushing and then put in screw and repair is made

No need of soldering up or plugging up of damaged screw holes and damaging the pendant and case as well

Every watchmaker knows how difficult it is to repair a screw hole after the screw is pulled out, due to bending and of the screws. This outfit makes a quick and good job.

Put up 1 dozen assorted Bushings and 1 dozen as Screws to match in a Brass Box.....

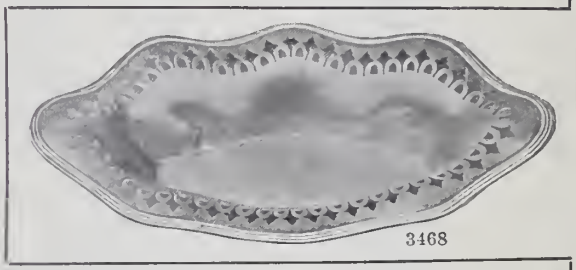
Your Opportunity To Make More Profit



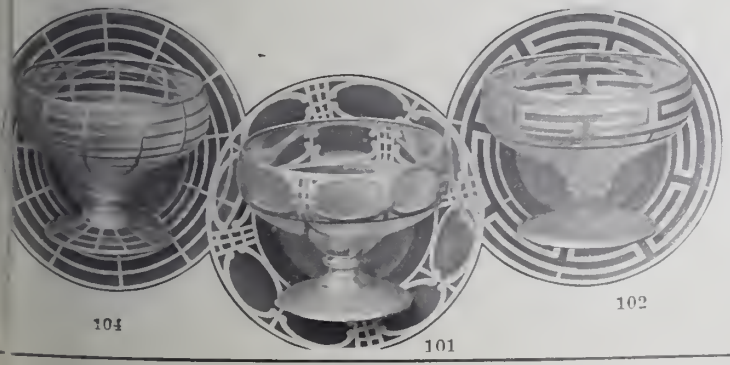
TRADE W MARK

Stand out for quality and look for price. That is the slogan—the only chance of success in the keen competition of to-day. You cannot afford to pay a salesman's salary and expenses on every bill of goods you buy. We want to co-operate with you for the betterment of your business, by selling you silverware at prices based on factory cost solely. We can do it because we sell you by mail, thus eliminating practically all selling expense. The economy effected enables us to offer you WOODSIDE STANDARD deposit ware and sterling silver at

69

15% to 20% OFF FORMER PRICES

Understand, the only change is in the elimination of dead expense. The same designers and the same expert workmen will continue to produce the same beautiful creations of their skill that have long made our productions famous for their individuality and basic worth.



3468

We again call your particular attention to our complete line of sherbet glasses, three specimens of which are here illustrated. Their remarkably low price is making itself felt in a call for them that is unparalleled. All our deposit ware shows pure white inside, and the silver is guaranteed not to come off. If it does we will give you a new piece at any time. An idea of the beauty and individuality of our sterling silver is conveyed by the two pieces here shown.

Write for the prices of these pieces or anything else you need and learn just how much more profit our selling plan means to you.

Get your name on our mailing list for our New Spring Catalog and

REENFORCED SILVER PLATE

Makes Permanent Customers

Customers that come back and bring their friends. Wh your silver plated flat ware is marked "**SIMEON L. GEORGE H. ROGERS COMPANY,**" you can stake yo reputation on its superior wearing quality.

Our reputation as leaders in plated ware of real intrinsic worth and durability is your assurance. No other line will pay you as well or give your customers as much satisfaction.

Our Sectional Process reenforces the parts of spoons and forks most exposed to wear with a triple deposit of silver, thereby more than doubling the service obtained by the old method of uniform plating.

A trial will prove this line a most attractive proposition

COMMUNITY
SILVER
COMMUNIT
The Aristocrat of
THERE'S MONEY in Community Silver, because it sells easily; because its high quality is exactly what people want to-day; because it is the best advertised plated-ware on the market; because it is sold on a restricted price basis, which brings sure and ample profit to every dealer carrying the line. This dealer's profits
FLOWER DE LUCE DESIGN

SILVER
the Dinner Table
competition, whatsoever its character, can undermine.
In short, the Community Silver dealer occupies to-day the strongest possible position in the trade. He not only carries a widely-advertised and popular line, but is absolutely assured of his profit.
ONEIDA COMMUNITY, LTD.
ONEIDA, N. Y.
LOUIS XVI DESIGN

WILDWOOD DESIGN

RELIANCE

Best Low-Priced

THE DEALER who carries Reliance Plate in addition to Community Silver makes double profit. With Community Silver he appeals to those who want the best—

While with Reliance Plate he satisfies an equally important demand for plated ware of guaranteed wearing quality at very low price. Moreover, Reliance Plate is the ideal plated ware for outfitting country homes, summer cottages, etc.

PLATE

Plated Ware Made

QUALITY Reliance Plate has a base metal of 18 per cent German Silver. Moreover, it carries a full 5 oz. A-1 Plate of pure silver as heavy plate as the best of the standard A-1 brands. Patterns, finish and workmanship are excellent.

JEWELER'S PROFIT The jeweler's profit on Reliance Plate is the same as on Community Silver. It is sold under a restricted price agreement, and cut-throat competition need not be feared.

"The Case That Courts Comparison"

Mr. Retailer:

It required a quarter of a century to bring SOLIDARITY GOLD WATCH CASES up to their present point of perfection.
Merely stamping "SOLIDARITY" on the *inside* of our cases did not do it.
It is the SOLIDARITY **Individuality** on the **outside** of our cases that did it. Individuality is the hardest thing to buy and the easiest thing to sell. SOLIDARITY CASES have it.

SOLD ONLY THROUGH THE WATCH JOBBERS

KREMENTZ
Bodkin-Clutch
Studs and Vest Buttons

HOLDS LIKE AN ANCHOR

KREMENTZ & CO. beg to announce that the **Krementz Bodkin-Clutch Stud** and **Vest Button** line is very complete in every detail.

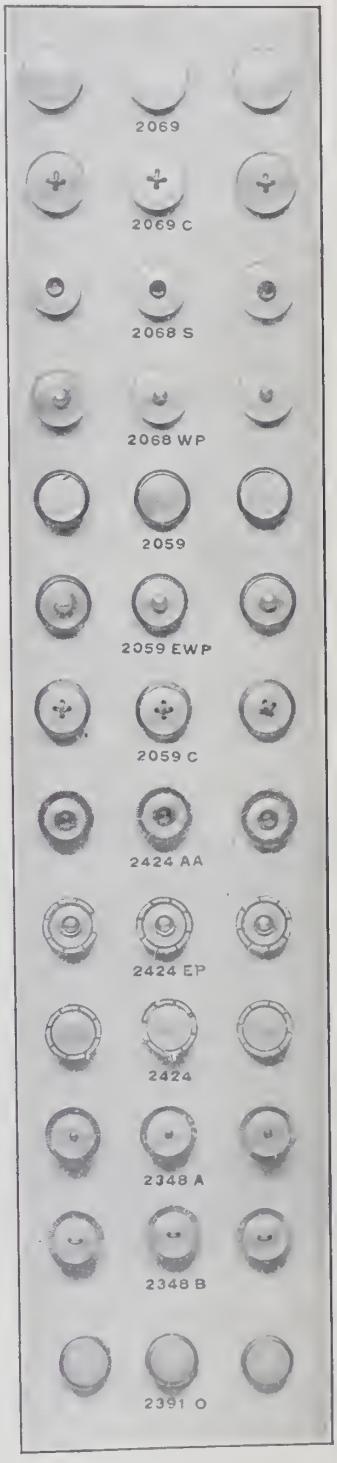
Variety of patterns—completeness of stock.

The success which our customers have had with **Krementz Bodkin-Clutch Studs** and **Vest Buttons** induces us to recommend them to all jewelers who have sale for this class of goods.

Read the **Krementz Guarantee,** which in itself indicates the solid construction, great strength, durability, easy operation and quality of the goods.

GUARANTEE

If for any cause whatever a **Krementz Bodkin-Clutch Stud** or **Vest Button** should be damaged, either in the hands of the dealer or wearer, a new one will be given in exchange without charge.



Krementz Bodkin-Clutch Studs and **Vest Buttons** have

NO Solder, Springs, Tubing.

Prices are the very lowest on the market. You can sell a **Krementz Bodkin-Clutch Stud** or **Vest Button** at the price which a similar set obtained elsewhere would cost you.

Note:

Should any of your customers have a set of vest buttons or studs with any old-style fasteners which have for any reason proved unsatisfactory, we will gladly change them (where practicable to do so) to Krementz Bodkin-Clutch Holders, making only a nominal charge for same.

...and Chaste Silver Service for the ...ited States Ship "Michigan"

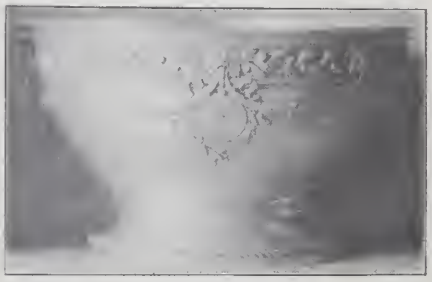
...ver service which Tiffany & Co., ... York, recently completed for the *Michigan* consists of 55 pieces ... all 2,196 ounces. Some of the ...cles of this and another service

SOME OF THE SMALLER PIECES OF THE SERVICE.

...n on the front cover and on this ...following page.

...e of the intimate historical relation ...rly settlement of Michigan to the ... Louis XIV., Louis XV. and Louis ... France, it was decided by the ... on awarding the contract that one ...yles characteristic of those periods

A ...LESTICK, PLATE AND CAKE PLATE.

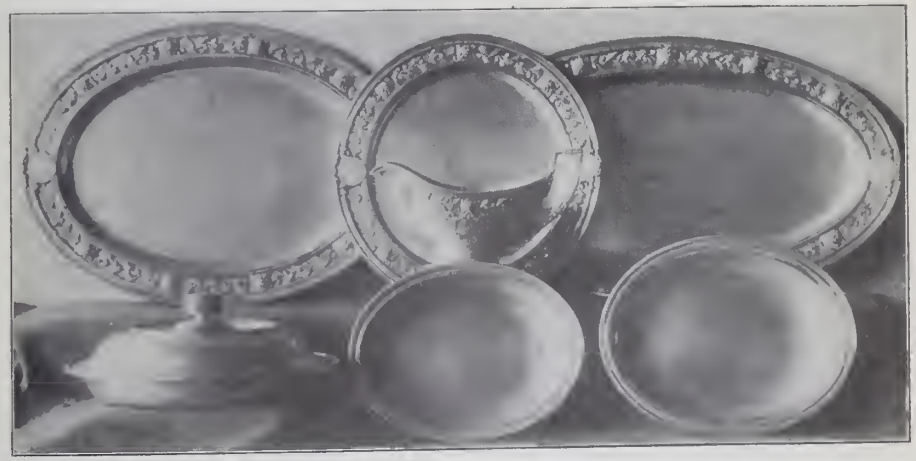


...oe used in designing the service for ... Tiffany & Co. used the Louis ...yle, keeping it as pure as possible ... the same time using motives suggestive of Michigan and the sea. For this purpose a border of pine branches, broken at intervals by dolphin heads, was employed.

On every piece of the service the seals of the Navy Department and of the ship hang by ribbons from the mouths of two dolphins. On the body of the various pieces flutes have been employed, which, in a conventional way, suggest wheat—symbolic of the land and also an important product of the State of Michigan.

The punch bowl, shown on the front cover, which is the principal piece of the service, is etched with the following inscription: "Presented to the United States Ship *Michigan* by the State of Michigan. MCMIX." It also bears the dates of the launching of the old *Michigan* and of the new *Michigan*, together with etched pictures of the old *Michigan* and of Cadillac receiving his charter from the King of France. The bowl has a capacity of more than six gallons and weighs 340 ounces.

The whole service is proportionately heavy and has been finished with the great care and attention to detail which is so important a characteristic in work of the Louis XVI. period.



In addition to the silver service for the U. S. S. *Michigan*, Tiffany & Co. also made a tobacco service of copper with silver mounts. This service includes five cigar boxes—one for the admiral, one for the captain, one for warrant officers, one for junior officers and one for the ward room, together with the necessary cigar cutters, lighters and ash trays.

A SMALL PUNCH BOWL.

Three large oak chests were made especially for the two services.

The vessels of the United States Navy whose presentation services have been illustrated and described in THE JEWELERS' CIRCULAR-WEEKLY and the dates of the issues in which these appeared from time to time are as follows:

FIVE TALKS ABOUT TRADE-MARKS

NUMBER ONE

Why We Use a Trade-Mark

We were one of the pioneer Gold Jewelry Manufacturers to adopt a TRADE-MARK, and stamp that mark on every piece of jewelry that we make.

We have appreciated the value of a good TRADE-MARK so thoroughly that we have spent thousands of dollars advertising OUR U. S. REGISTERED TRADE-MARK.

WHY?—because we know that we are making gold jewelry of unquestioned quality, strong construction, all at moderate prices and we are not ashamed, but proud to be identified with our product.

We make 14-K and 10-K gold rings for man, woman or child, and all have our U. S. REGISTERED TRADE-MARK, stamped like in this cut.

Comments on the Anniversary Issue.

BLAIRSVILLE, Pa., Feb. 11, 1910.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

I have just finished reading the Anniversary Number of THE JEWELERS' CIRCULAR-WEEKLY. I think you should be very proud of the 41st anniversary issue of your excellent journal. I believe you are doing a great work for the retail jewelers through the journal. Your standard is high and your journal should be read by all jewelers. I congratulate you on the excellent number. I have not seen a poor number of your journal. Sincerely yours,

J. P. ARCHIBALD.

* * *

THE JEWELERS' CIRCULAR-WEEKLY (New York) has just issued a very handsome number commemorative of its 41st anniversary. It is one of the most elaborate, complete, beautiful and largest publications ever issued in the history of this, the leading journal for many years in the jewelry and silverware trade in the United States. It contains besides its customary summary of trade news from all the leading centers in this country special articles of high character concerning high-art masterpieces of jewelers and silversmiths in ancient and modern times in foreign diamond markets, and recent conventions of jewelers, all the articles profusely and beautifully illustrated, the illustrations numbering many score and all being handsomely brought out on the high-quality paper which is used by this publication. The anniversary number will be prized for its permanent value.—New Haven (Conn.) *Journal-Courier.*

* * *

Containing 272 pages and teeming with advertisements and articles of great interest to jewelers, THE JEWELERS' CIRCULAR-WEEKLY, a weekly trade magazine published in New York, issued its 41st anniversary number last week, copies of which have been received in Atlanta. It is profuse with illustrations which show up to excellent advantage, and from a typographical and lithographical standpoint it is a work of art, and local jewelers pronounce it one of the finest trade editions ever received by them. This edition has additional local interest because of a detailed article of more than two columns, illustrated with working cuts of a novel electric clock, for high or low voltage, the invention of R. D. Hickok, of Atlanta. One entire page of this edition is devoted to novel ideas in catalogue covers issued by prominent jewelers throughout the country. Among the 16 designs reproduced, two of the most striking are from the catalogue and "Christmas Suggestion" booklet of the firm of Eugene V. Haynes Co., the catalogue cover occupying the central position on the page. S. A. Martin, a local newspaper man, is the Atlanta correspondent for THE JEWELERS' CIRCULAR-WEEKLY.—*Atlanta Georgian.*

* * *

THE JEWELERS' CIRCULAR-WEEKLY published in New York, celebrates in its first February issue its 41st anniversary. As usual with this publication, the leading journal published in the jewelers' interests on this continent, the number is a beauty. It has a special cover design of singular artistic effectiveness, and the contents are of exceptional interest. But it is the advertising patronage that is most attractive to the publisher. The number contains 272 pages and cover, and it is literally bursting with bright, snappy advertisements—all of which surely delighted the counting room. The *Gazette* sincerely congratulates THE CIRCULAR upon this singularly handsome number, and wishes it enduring success.—*Canadian Pottery & Glass Gazette.*

Recent Decisions by General Appraisers on Watch Glasses and Precious Stones.

Decisions of the Board of United States General Appraisers in cases involving duties on watch glasses and precious stones have been announced in the last week as follows:

WATCH GLASSES.—Protest of Scientific Materials Co., Pittsburg. Protest sustained as to watch glasses. G. A. 5812 (T. D. 25674) followed.

PRECIOUS STONES, CUT.—Protests of American Express Co. *et al.*, and protests 361317, etc., of Albert Lorsch & Co., New York. Protests sustained as to precious stones, cut. G. A. 6932 (T. D. 29997) followed.

PRECIOUS STONES, CUT.—Protests of American Express Co. *et al.*, New York. Protests sustained as to precious stones, cut. Note G. A. 6584 (T. D. 28131); G. A. 6825 (T. D. 29337); G. A. 6932 (T. D. 29997), and G. A. 6936 (T. D. 30068).

Robert H. Ingersoll & Bro., New York, are now marketing their "Midget" watch which is equipped with a seconds hand. The watches were previously sold without this additional hand. It is believed that the sales will be considerably enhanced among those who want a low-priced watch which may be used for the numerous utilitarian purposes fulfilled by a watch with a seconds hand

Rose Diamonds

Silversmiths and Goldsmiths' Work.

A Address by Omar Ramsden at the Seventh Ordinary Meeting of the Royal Society of Arts, London, Jan. 26, 1910.

(Continued from issue of March 2.)

FRE closing this paper I should like to add a few words about modern conditions of production. For one thing, there is no sense with which antiques can be compared. A workman with any artistic training, if it were not for the Hall Mark (and capital letters, please) I wonder how much our keen collectors would pay for such sums for what, after all, are often comparatively being works of art. The Hall Mark is very jealously guarded, but I think it quite possible that there is more Charles the First in existence now than in Cromwell's times

Sheffield plate, well, in the smoky days of Sheffield such tales are told of it that our experts and collectors should take care that the old dies are not used in the same way as the plates of old times, before making a cult of it.

I am asked, how does the collecting of old plate affect modern work? Our learned critics in the expert journals have for many years now impressed us with their own cleverness and caused a great interest to be taken in old work, especially when it has been through the auction rooms. Gradually coming makes a market for old plate, both *good* and *bad*. The rich collector pays his £4,000 for a small cup with a comfortable Hall Mark, while the collector of more modest purse buys doubtful specimens of which about every third one is, perhaps, a fake in one way or another. It has become common thing for the better class articles in a modern presentation committee to earn quite a small reputation for being "artistic" by bending his fellow committee men to the purchase of some so-called "antique," or more often a so-called duplication of an antique by a trade firm of the old copy so burnished on the plain parts and so frosted white on the worked parts that the maker of the original would get a headache at once if he could see it! On the other hand, your artistic or expert amateur, when you have him by the button-hole will turn on you sharply and say, "What would you have me do? You don't expect any sane man to order such stuff as may be seen in your *Studio* magazine. Moreover, we have to live with our time."

Well, modern art falls between two stools. And with what result? Take a critical look at the plate displayed at a dinner. A few pieces of very fine old plate, more pieces of old work that is not quite so fine, then, masses of stuff that is only fit for the melting pot. Of course there are exceptions to this rule. Some few firms have commissioned modern artists to produce something worthy of the fine traditions of these City companies, and their work stands out like a good deed in a naughty world. It is not unusual for your up-to-date city man, when becoming a member of honor to his livery of a piece of plate, to seek out some other member, or perhaps a friend, who "is in the line," as he called. After much talk of special discounts, he finally conducts to his applauding fellow-members some large and glittering object, made in a trade shop for about a quarter of the price paid for it by them. However, it is large, and it glitters, and they are all very happy about it.

But all this clogs up the stream of really fine artistic work which these national—we might almost say heaven-sent—repositories should receive, and blocks out the finest and most representative work of our times. How appalling must be the taste which can introduce into some fine old dining hall a great epergne of a camel scratching its itching sides against the trunk of a large and spreading palm tree, the said tree blossoming out at the top into a large cut-glass dish, and the whole standing upon a ground of looking-glass, so that not even its reflection may be lost. But this is the logical, or at least natural, outcome of the degenerate seed sown in Cellini's time, which has grown, flourished, died and been replanted so many times in diverse soil, and which at present flourishes with the luxuriant growth of a healthy but accursed weed. This weed is, however, much appreciated by the general public, who must have, or who think they must have, gorgeousness; and it is therefore carefully fostered and tended by by the trade. Moreover, it is, thanks to modern methods of production, very cheap, of the cheapness of a stinking weed which over-runneth the smiling fields of patronage, which were tilled so happily and skilfully by our master silversmiths of other days.

THE TRADE SILVERSMITH.

It is probable that some of my audience will say I am tilting against a bogey under the name of "trade silversmith," and I am quite aware that so long as the mass of buyers like to buy the products of this silver sausage mill it will continue to turn merrily. Beautiful virgin silver and gold will continue to be put in at one end and highly polished "silver goods," to use the excellent trade term, will continue to drop out at the other, each article carefully wrapped up in cotton, wool and tissue paper, each end of the parcel stopped with a neat little label in cream and gold bearing some such legend as "One Hall-marked silver teapot, 2 pints, pattern No. 2,125," and the said teapot is no doubt the 2,125th of that identical pattern.

But please understand I do not blame "the trade." It is in business to make dividends, and if the public would buy better work it would probably supply it. In fact, some one or two firms have made tentative efforts, and owing to the larger number of at least semi-educated people to-day, artistically speaking, have made it pay. There is, moreover, no reason why the factory should not produce silver for common use, of good shape and satisfactory line, even with modern methods and machinery. One must always know, of course, that the cream jug on one's breakfast table, although of good shape and outline, is but one of thousands of exactly the same pattern. But then it was cheap, or most probably a wedding present, so we must not mind.

The point where the trade, however enlightened, must fail is in the production of silver which has any added beauty or ornamentation, or any special motive of any kind. One asks why it is possible to produce most lovely fabrics and wall-papers by machinery and not articles in metal. I say "metal," for this ban of ornament applies to all objects of metal, whether pewter, steel, bronze or gold. One thing is that trade-produced ornament is the mechanical production of a pattern designed by an artist but reproduced by a machine in the hands of a common workman. In the case of wall-papers the reproduction is fairly exact, and the result, if pleasing for a time, is all right. Besides, its life is short, for a wall soon gets dirty. In fabrics much the same argument applies, but in their case with the immense added advantage of the draping and movement of stuffs, so that the pattern is broken up and never seen as a monotonous repeat, and the eye is often more taken with the sheen and color of the silk than with the pattern of its weaving. But even so, I am told on good feminine authority that plain fabrics, often enriched with embroidery, are greatly preferred by those dressmakers who specialize in artistic raiment, since machine-made brocade and the like is seldom satisfactory and the hand-woven brocades cost pounds per yard instead of shillings.

Silver does not, moreover, possess even these doubtful and accidental advantages, because in silver all repeated pattern that is going to pay a dividend must be cut in reverse in steel dies, a process that needs very special training owing to its technical difficulties, and which therefore does not attract anyone with an artistic soul. The antagonistic mind at once suggests medals. Well, yes, there are some most beautiful medals that have been produced by die-cutting. But they are a special subject; they have attracted artists because of the special notice and glory they come in for. But the cost of the dies is such that they do not come into the category of practical, dividend-paying, factory-produced silver work.

THE QUESTION OF DIES.

One may say: "Why not produce dies by modeling the pattern on a large scale and reducing it by mechanical means, as is done in the case of coins?" Well, it would not answer. It would not look "silvery," and, moreover, one might ask if it is a success, even in the case of coins and medals. To my mind, some of the best medals are those of Pisano, which never saw a die.

The die-produced pattern also has the disadvantage that it is so easy to repeat that your factory manager cannot keep his hands off it. Granted that a die has been cut at great expense for, say, an ornamental border of an entrée dish, for which purpose it is suitable. Well, before the end of the year you will find it stuck on to almost every article from a racing cup to a lady's hand mirror, for *all* of

ich cannot be suitable. And we must l· sight of the fact that even at e the die-produced ornament is list- l without backbone, even if not

There is no doubt that silverwork, h or some special reason calls for nt or special treatment, such as utensils, commemoration cups and or wedding and other gifts—to case at its lowest standing—must ned and executed by an artist, and t le-produced silverwork that is or- d is, generally speaking, not worth l it is made of—at least all such roduced by ordinary trade machin- u er which head I beg leave to place nd-work, is not worth the price of er For your trade "handwork man," to quote his trade title, has but a machine. From the cost of r one must deduct the cost of melt- n and assaying, so that I estimate e of the vast majority of presenta- os, royal caskets and what not at t 10½d. per ounce troy. Therefore, mere money point of view it pays oy an artist, for good and unique ways increases in value with age, t ultimate end of all work is the i pot.

his is so well understood in most Eglish speaking countries that one how we have come to such a pass commemoration plate should ever d in the hands of any other than rt with special knowledge of its re- ents. To sum up this part of my e—there must always be a wide and te field for silver articles of good hape and design, which can be pro- ed ust as well by the trade, if it so by an artist.

a of course, taking it for granted that h better times to come (when the is people, being converted from their c us greed for size and and showiness losts, will cry out for really honest er esign) the reformed manufacturer rn the following lesson:

t l costs, take the decision of what signs are to be produced from out h ands of the present judges. These w-a-days, the factory manager, and t eler, whom those delightful Ameri- ll "The Drummer"; this important l an, in the restless intervals between nfortable sojourns in commercial l spends much of his time in con- l on with the manager. They as- b their collection of impressions of d models of castings. These they n and re-arrange, like children with es f toys, always with an eye to the es hat are selling by other firms." e they have taken the body of last ' eapot line, the cast ornament of the t and of the year before, and, let us t horrid little lions that did duty on t casket presented to unfortunate i royalty; when they have arranged r eces in due order with the help of ti e, then, but not before, they send t poor, humble person who is known h works as the artist and bid him make n v drawing of the lot. Moreover, he to not to put in anything that would es ate fresh dies or models, but to cudgel his brains to draw the bits together to form, say, a race cup.

I assure you this picture is not overdrawn, and that this is the part of our manufacturing system that most cries out for reform. Let the manager manage and the traveler sell, but let the design be entirely in the hands of a directing designer, who has studied his profession not only in our own schools of art, but who has had, at least, his *wanderjahr* abroad to study the treasures of Europe.

I am assuming of course that, like the poor, suburbia and the manufacturing town will be always with us, and that by means of schools of art and the rest of the modern machinery for the production of the artificially artistic mind they may be led into the virtuous path of buying cheap and *good,* in preference to cheap and *bad,* silver produced by the reformed and artistic manufacturer. For, I repeat, there is no reason technically why he should not reform and vend the aforesaid good and cheap silverware.

Nevertheless, the silver plate of all such as love their eyes to dwell on a thing of beauty, designed especially for its purpose, be it pepper pot or Lord Mayor's chain, *must* remain the province of the artist silversmith.

The latter I would counsel: do not overdo the decoration, and keep the price strictly in accordance with the cost of production. Strive to make your design have interest both of shape and ornament; never let it be tame or photographic, but always of that conventional treatment that is suitable for, and brings out the qualities of, the beautiful material you are working in. And always remember, as George Sand so neatly puts it in the *"Mare au diable," "L'Art n'est pas une étude de la realité positive, c'est une recherche de la verité idéale."* Pray nightly for a seeing eye to conceive, and a steady hand to produce. And, above all, if success comes your way, as it must with an increase of true artistic education, don't become conceited. Remember the lovely things of other years and other masters, and say with Francois Villon, *"Où sont les neiges d'antan?"*

And what to *purchasers* of modern work? Well! If a vase or bucket be really necessary or desirable let it be a beautiful vase or a good shaped bucket, and do not have either vase or bucket of odd or weirdly new shape just to show you are more "artistic" than other people! I believe that the best work of our time will in future ages be eagerly sought after and prized, not merely as representative examples of a period but for its genuine beauty. As Keats said:

"Beauty is truth; truth beauty, that is all
Ye know on earth, and all ye need to know."

And, as beauty is the final test and end of all things in art, I feel justified in placing our modern work in a very high position.

(THE END.)

Edward P. Garrier, a preferred creditor of James M. Rockwell, Fifth Ave., Troy, who was forced into bankruptcy, has made a demand upon Trustee Deal for possession of the property covered by the mortgage which he held. The matter has been adjourned until March 14.

Handsome Loving Cup Made by San Diego, Cal., Firm.

SAN DIEGO, Cal., March 2.—The C. W. Ernsting Co. furnished a magnificent loving cup which was presented, recently, by a number of the business men of the city to Louis J. Wilde, president of the American National Bank and one of San Diego's most consistent "boosters." The cup, which is of silver, stands 14 inches high and rests upon a base of Mexican onyx.

On the front of the cup is the following inscription: "Louis J. Wilde, in recognition of his great worth as a citizen and

LOVING CUP PRESENTED TO LOUIS J. WILDE.

supporter of the best interests of San Diego, this cup is presented by a number of his friends, Jan. 18, 1910." The reverse bears a beautifully engraved reproduction of the $10,000 electric fountain which Mr. Wilde has presented to the city of San Diego. The workmanship on the cup is a credit to the artisans in the Ernsting shop. The onyx base is also a product of a local establishment, the Mexican Pedrara Onyx Co.

The most costly carpet in the world is in the possession of the Indian Prince, the Gaikwar of Baroda. It consists of strings of pearls, rubies and diamonds, woven into a brilliantly colored design. The value of this carpet is estimated at $11,500,000. The most celebrated artists and jewelers worked for three years at its production. This prince is also the owner of a diamond necklace valued at many millions.

Evident Reason for Philadelphia Police Discrediting Story of Max Mayer's Robbery.

PHILADELPHIA, Pa., March 2.—The attitude of the police authorities of this city in endeavoring to discredit the complaint made a week ago by Max Mayer, 609 Market St., to the effect that his store had been robbed of jewelry amounting to $9,000, seems to be entirely unwarranted by the facts as they appear.

Mr. Mayer on going to his store on Feb. 1 found that the back of his safe had been forced, the outside metal cut and the asbestos removed. Through this hole, which was about 12 x 14 inches, the robbers had removed every tray and box available, taking a few cheap articles. After Mr. Mayer had reported this to the police he was examined and the police later announced that the interview with Mr. Mayer was unsatisfactory as the jeweler could not produce the list of watches, jewelry marks, etc. The police also by referring to a previous proceeding in which the jeweler was involved and by inuendo sought to convey to the newspaper reporters the idea that Mr. Mayer's robbery was a "put up job."

The matter, as noted in THE JEWELERS' CIRCULAR-WEEKLY of Feb. 16, further indicated that there were no grounds for the situation of the authorities as Mr. Mayer's liabilities were small; his business and personal affairs were in good shape; he carried no burglary insurance, and his personal indebtedness was but nominal. It therefore became evident that he could have no interest of any kind in fabricating such a report. As a matter of fact, as he stood there as absolute evidence that he had been rifled and the work bore the marks of professional burglars.

To a correspondent of THE JEWELERS' CIRCULAR-WEEKLY Mr. Mayer told the details of the robbery as follows: Upon opening the store on the Monday morning after he noticed, his suspicion was not aroused, everything appeared to be in its usual order in the front of the establishment. It was only after going to the rear that evidence of the burglary was apparent. Here he found everything in disorder and lying about the safe were two drills, which immediately made him realize that the safe had been attacked. He then opened the safe and discovered that its entire contents had disappeared. The partitions were thrown down and the hole in the back showed the place through which the burglars had taken the jewelry.

He immediately notified the police and began to discover how much he had lost. His own estimate showed that jewelry to the amount of $9,000 had been taken. A few valuable pieces had been overlooked. By the time the police had arrived Mr. Mayer was in a position to state his loss, but recovered of his misfortune and the shock he had already undergone by the robbery, stood up under an exhaustive examination as to how he were the guilty party. Volley of questions were rapidly fired at him by the police, but because, through his nervousness and ill condition, he was unable to give satisfactory answers to all of them, the police authorities were not at all satisfied and reported at City Hall that Mayer's account was misleading.

As Mr. Mayer explained afterwards, the reason for not being able to give the numbers on the movements of the various watches that were stolen was due to the fact that he never kept a record of these because he looked after his business himself and did not think it necessary. Contrary to the police report he did give the names of houses from which he bought his stock and the names of those houses with which he had dealings and which he knew would be glad to vouch for his character.

Mr. Mayer is of the opinion that four or five men must have been engaged in committing the robbery, to do it as thoroughly and as quickly as it was done. Entrance was effected through an empty house at 605 Market St. and the robbers must have come over the roof to 609 and then descended to Mayer's store.

Mr. Mayer says that he could identify the stolen articles and his brother has offered $1,000 for information that will lead to the arrest of the culprits. The jeweler says he lost all that he had by the robbery, but is going to start afresh, his one desire being to try and correct the false impression created by the police through the press.

The court incident of which the police try to make so much was not the result of an auction sale, as they said, but of a dispute arising from a legitimate transaction with a customer and of a kind that is liable to happen to any business man.

Stephen Austin, Under Arrest at Pittsburg, Now Retracts His Admissions as to Various Crimes.

PITTSBURG, Pa., March 4.—Stephen Austin, the "hold-up" man and all around thief, whom it is alleged threw a brick through the show window of John Studer's store, North Side, and also robbed numerous other places, has hired a lawyer. He now tells a different story and denies that he had anything whatever to do with the crimes which he at first said he had committed. An information in any event has been lodged against him, charging him with the Studer theft, as well as other crimes, and he must take his trial in court. The grand jury of Allegheny County is expected to take action on the cases within a few days.

The police are not satisfied that Austin has given his right name, for it is claimed that his name is Gilette. But the remarkable thing about his many alleged transactions is that the Studer crime is the first one he confessed to the police that he committed. He told all of the details without being asked if he had committed it. Since Austin has engaged a lawyer he has not been so talkative.

The man, Kilk, who had been arrested and charged with some of the crimes which Austin said he had committed has been discharged by the authorities, the grand jury, last Saturday, ignoring the complaints.

The jewelers of Pittsburg are much interested in Austin's arrest and express the hope that the police have the man who is wanted. It turns out that Austin was arrested at Terre Haute, Ind., several weeks ago on suspicion of having committed a robbery there, but was released because of insufficient evidence.

Beware of This Pennyweight Thief Who Worked Substitution Trick in Milwaukee, Wis.

MILWAUKEE, Wis., March 2.—Members of the trade are warned to be on the lookout for a very clever pennyweight thief who is working the substitute game successfully. He operated in Milwaukee last week, among his victims being Richard Seidel, who notified THE JEWELERS' CIRCULAR-WEEKLY and supplied the description appended below, in the hope that it would save other members of the trade from suffering by his tricks.

The man, who is well dressed, came to the store shortly before closing time and asked to be shown diamond rings in Tiffany settings worth about $60. After looking at some rings (and evidently taking note of the style and marking of the tags used) he said he would send a young lady the following noon to look at the rings. The next day, after waiting until the clerk went to lunch, he called at the store and called for the clerk by name, stating that he had been shown the rings and wanted to see them again. This time he was shown a tray of 50 rings and looked at several and said he would come in again later to see the other clerk.

The man left so suddenly that suspicion was aroused, but the tray being full it was clear if he had swindled it was done by substitution. An examination was then made and it was found that the man had taken a ring with a stone of 1¼ karats substituting for it a ring with a ¼ karat stone, which contained a tag, price mark, etc., that was an exact duplicate of the one used on the stolen article.

The swindler is described as about 32 years old, about 5 feet 5 inches high and weighs about 145 pounds. He has a smooth shaven face, rather light hair and wore glasses. His hands are well manicured and he was well dressed in dark clothing and a black derby hat. He wore on the left hand a ring with a two karat stone, tooth mounting, which was finished in an odd brassy green color. When he talked he disclosed a gold crowned tooth.

Death of Sidney Nellis.

HARRISVILLE, N. Y., March 2.—Sidney Nellis, who died here recently, had been for the past 50 years a resident of this town and a prominent jeweler. He had been ill for some time from an affection of the heart, accompanied by dropsy.

Mr. Nellis was born at West Martinsburg, Oct. 18, 1835, the youngest of a large family, but one of whom survive, a sister, Mrs. Angelina Petrie, of West Martinsburg. He came to Harrisville in 1859 and opened the first jewelry store and repairing shop, and had been in business here ever since. Deceased leaves a widow, to whom he was married more than 55 years ago, also one son, Eugene, a prosperous merchant in business at Boonville, and one daughter, Mrs. William Miller, of this village.

Mr. Nellis was a member of the Methodist church and a very regular attendant so long as his health permitted. The funeral was held at the Methodist church Wednesday last.

THE SYNTHETIC SAPPHIRE

thanks to its high merits, acknowledged by scientists the world over and given the widest possible publicity by the press, at once takes its place among the class of gems most popularly known and appreciated

The real Synthetic Sapphire is produced exclusively by us and is the only sapphire that is the exact counterpart of the natural.

None but those sold under the name of

"HOPE SAPPHIRES"

Registered United States Patent Office

are the genuine Synthetics.

To distinguish an ordinary Scientific Sapphire from the natural or our Hope Sapphire, apply the Hydrofluoric acid test. This acid reacts on glass, but has no effect on either the natural or our Hope Sapphire.

New ersey Court Exonerates New Yo Jeweler and His Watchmaker ho Had Been Improperly Convicted of Forgery.

d the item in the last issue of THE s' CIRCULAR-WEEKLY telling of the ion by a New Jersey court of a New weler and a watchmaker who had y been convicted on the charge of hes the story of a gross miscar- justice that is a decided reflection e efficiency of the criminal pro- of the State in which this outrage ce The victims in this case were n Selkowitz, a retail jeweler at xth Ave, and Samuel Haskelwitch, , who were convicted in April of on a charge of which they were en- nocent, on evidence that was in no clusive. They were saved from a n jail only by the intercession of r of business men and jewelers, to ttention the case had been called.

result of this intercession and the ch were laid before the court by nsel engaged for the accused, the Attorney that prosecuted them cer- the court that the men were in- f the charge as set forth in the in- t and asked that the indictments be d. The judge ordered that this be d honorably discharged both Selko- d Haskelwitch, consoling with them t they had undergone.

rcumstances on which the men were d grew out of the fact that in April, stranger entered the delicatessen Jacob Scheer, of Jersey City, and $2.25 in cash, asking for a check amount, saying that his wife was the country and that he wanted to r money. The proprietor of the adily made the exchange. Later in he went to his bank and told the what had occurred. The cashier n that it was probably a scheme of ind, and advised him to change the f his signature from J. Scheer to cheer.

e afternoon of April 27, 1908, a man himself Benny Greenburg came into elry store of Selkowitz and bought a d pin for $34. In payment he of- d check for $62.25. The jeweler said would hold the goods until the check n vestigated.

next day he sent his clerk, Haskel- o the bank in Jersey City on which k was drawn to have it certified and arrested, charged with trying to forged check. Scheer was sent for ntified Haskelwitch as the man to some five weeks ago he had given ommodation check of $2.25.

the clerk was arrested and taken e headquarters he explained that he rely performing an errand for the whose name was indorsed on the The following day Selkowitz went Jersey City and went to the Crimi- Crt, where his employe had been ar- , to testify to his character, and was ately charged by several persons in rt room with obtaining small checks iem in exchange for money and then the amount. Both men were in- and held in bail.

about the time of Selkowitz's arrest Greenburg, the real forger, was arrested in New York while trying to pass another forged check on a jeweler. He was indicted May 5, tried May 13, convicted and sentenced to seven years' imprisonment.

Selkowitz and his watchmaker got bail and came back to New York and having been called to court in the Greenburg trial felt that this exonerated them and that the mistake in New Jersey would be rectified. The lawyer whom they engaged in Jersey told them an indictment would never be found, but much to their surprise it was handed down by the grand jury. In April, 1909, they were called over to New Jersey, as they thought, to make an explanation and have proceedings dismissed. What was their surprise, therefore, to find themselves put in the dock, tried, and on the evidence of two or three people that they looked like the man who had been attempting to get blank checks sometime before, quickly convicted and sentenced to jail.

To those conversant with the Greenburg prosecution it was evident that the men were entirely innocent and an effort was made by some of Selkowitz's friends to see what could be done to remedy the mistake. A number of gentlemen interested themselves in the case, among others being Jacob H. Schiff, Sam. D Goodman, Henry S. Herrman, president of the Union Exchange National Bank; Palmer Campbell, president of the Hoboken Land & Improvement Co.; Emanuel Fox, of the Fox Construction Co., and others, and on investigating the case found that both the jeweler and his clerk had never been in New Jersey before they went there about the check and could prove positive alibi as to all evidence testified to at the trial. In addition, a number of jewelers contributed to a defense fund.

What is more, the bank which was naturally interested in a check prosecution, not only did not help out the prosecution of the two men, but after the conviction the assistant superintendent of the Pinkerton Agency, that had worked up the case against Greenburg for the banks in New York, together with an assistant district attorney of New York who had prosecuted the real forger, appeared before Judge Blair and said that the men were falsely convicted and were innocent. They told the judge that the real forger was Greenburg, who was serving a seven years' sentence in Sing Sing. This so impressed the justice that the jeweler and his clerk were admitted to bail, while the attorney collected evidence to show how great a wrong had been done them.

After obtaining conclusive evidence that every essential point brought out against the two men at the trial was based on insufficient evidence, the friends of the accused finally succeeded in getting hold of the man who had obtained the check from Mr. Scheer and brought him before Judge Blair. This man was Greenburg's brother-in-law and who, it should be said, resembled the watchmaker, Haskelwitch. He told the judge how he had obtained the check at Greenburg's suggestion and showed that the two men, Selkowitz and Haskelwitch, had nothing to do with the transaction.

The convicted men were brought to court on March 1 and their exoneration then followed.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., March 2.—The following were the exports of jewelry, silverware, optical goods, clocks, watches, and kindred lines from the port of New York for the week just ended:

Auckland: 36 cases clocks, $1,097.
Bombay: 133 cases clocks, $2,534.
Bordeaux: 4 cases optical goods, $148.
Calcutta: 11 cases clocks, $230; 35 cases clocks, $538.
Callao: 1 case plated ware, $259.
Colombo: 5 cases clocks, $112.
Dresden: 2 cases optical goods, $116.
Frankfort: 4 cases optical goods, $800.
Genoa: 1,499 packages nickel plates, $25,900.
Gibara: 3 cases plated ware, $100.
Hamburg: 1 case jewelry, $500; 3 cases optical goods, $195; 13 barrels jewelers' sweepings, $7,000.
Havana: 1 case thermometers, $125; 14 cases clocks, $145; 67 cases clocks, $862.
Havre: 1 case jewelry, $274.
Kingston: 7 cases clocks, $149; 3 cases plated ware, $109.
Liverpool: 3 cases watches, $125; 58 cases clocks, $779; 2 cases jewelry, $55.
London: 29 cases clocks, $286; 25 cases watches, $4,411; 12 cases optical goods, $6,076; 10 cases clocks, $298.
Montevideo: 26 cases plated ware, $1,371.
Para: 2 cases plated ware, $197; 5 cases jewelry, $1,064; 3 cases clocks, $167.
Rangoon: 51 cases clocks, $699; 7 cases clocks, $154.
Rio de Janeiro: 73 cases clocks, $641; 1 case plated ware, $192; 5 cases jewelry, $798; 4 cases clocks, $293.
Sheffield: 5 barrels jewelers' sweepings, $5,100.
Sydney: 10 cases clocks, $290; 156 cases clocks, $3,229.
Tampico: 15 cases watches, $207.
Trinidad: 6 cases plated ware, $165; 2 cases jewelry, $198.
Valparaiso: 76 cases clocks, $1,622; 4 cases silverware, $168; 1 case clocks, $115.
Vera Cruz: 15 cases clocks, $318.

Navy Department Solicits Bids to Supply Thermometers, Microscopes, Etc.

WASHINGTON, D. C., March 3.—The Bureau of Supplies and Accounts, Navy Department, is calling for proposals until March 15 for the following supplies for the Washington Navy Yard:

For 50 chemical thermometers, 12 inches long, 10° to 110° C., filled with nitrogen; 12 thermometers, armored in tight steel cases, from 20° to 60° C.; 12 thermometers, same as above, from 85° to 120° C.; one chemical thermometer, 10° to 360° in 1°, 15 inches, mercury bulb one inch, to be standardized by Bureau of Standard and to be accompanied with their certificate; 43 thermometers, maximum and minimum, Hick's style, 10° to 100°, in 10-inch copper cases, must be accurate, scale marked in white on black background; two thermometers, 212° F., length 12 inches; two thermometers, 300° F., length 12 inches; four thermometers, right angle, in tight metal cases; three straight, short-stemmed thermometers, in metal cases; one thermometer plummet.

All the above to be of the best quality and manufacture.

For one Bausch & Lomb microscope, C. D. H-4, 16-MM and 4-MM objectives; one micrometer eyepiece, Bausch & Lomb No. 1,854, movable scale; 50 watch glasses, well annealed, deep form edges, ground 2¾-inch diameter.

F. E. Smith has removed from Somerset Center, Mich., to Dallas, Ore.

THE NEWS FROM ENGLAND.

Political Situation Does Not Help Business and Manufacturing Centers Complain—Exports Increase—Japan-British Exhibition to Contain Interesting Displays and British Horological Institute to Exhibit—Birmingham Association Interested in the "Bullion" Bill.

LONDON, Feb. 25.—The jewelry trade's point of view that, the elections over, people would be again purchasing, has been subject to disappointment. Now there is a feeling of waiting for better times because political scales are so evenly balanced the big parties are at the mercy of the smaller ones. Birmingham grumbles at the fact that February has been a short month, while Sheffield is also dissatisfied. From the north, Newcastle, over the border, Edinburgh and Glasgow complaints come to me that business are not as they should be."

* * *

While the general trade of the country improves. Exports show an increase of six million pounds when compared with January, 1909, the total being £36,-115, while there is an increase of £1,-000,000, as compared with the same period last year, in the imports, the total being £35,921,154. These figures show that the month of 1910 demonstrates every month of a steadily increasing prosperity although the jewelry and fancy trades have not as yet participated to any extent in the benefits.

* * *

I see that my few remarks in the American Number of THE JEWELERS' CIRCULAR-WEEKLY have created a good deal of interest in "American circles" here, and I am perhaps be permitted, without being accused of egotism, to say that practically everyone agrees with what I stated. It is always that the criticised accept the strictures of the critic with a smile and a sigh that he is right. Still, such is the ultimate case, and I am satisfied, particularly as my "Yankee" friends are.

* * *

I am particularly fortunate in getting an insight to the inner circles of the Japan-British Exhibition, and I am convinced that when it opens in May London will have an attraction such as few can conjecture. I have met one of the great company which met recently at the Hotel Cecil and to meet the Japanese Ambassador and the Commissioner-General, Mr. H. Wade. Considerably over 400 gentlemen, including men of influence in every rank of life, were present, and the general impression was that the Japanese would excel themselves. Certainly they are working remarkably hard for the exhibition, while their political, commercial and industrial representatives are doing all they can to make a show which will leave a lasting impression. Japan will occupy about 250,000 square feet of space and about 2,000 individual exhibitors will be present, besides the Japanese Government collective exhibits. Certainly American visitors who come to England during the Summer should not miss the exhibition. I hear that Mikimoto, the Japanese pearl specialist, will have a great show and intends to demonstrate the possibilities of the industry he follows.

The British Horological Institute, which organized such a successful collective exhibit of its members at the Franco-British Exhibition, has now definitely decided to take part. A committee has been formed, and at the time of writing I hear that over 20 members of the Institute had made a promise within a couple of days to take part in the exhibit.

* * *

As my readers are possibly aware, a terrific gale has visited Great Britain, and as I write a French barque lies stranded off Margate loaded with special Japanese woods intended for the Exhibition. The crew were rescued with difficulty by tugs and lifeboats, but it is expected that the cargo will be lost.

* * *

The Wholesale Association banquets have both been held, and a considerable amount of chaff in the way of words—mere words—have been scattered in the smoke-laden air by after-dinner speakers. Just a little corn may be sifted from the chaff. The question of receivers of stolen property and effective legislation to deal with it was naturally an item for both companies, but it was left for the Birmingham manufacturers to touch upon the important and far-reaching question of techincal and art training. London is too much engrossed in the recovery of bad debts (which should not be so readily incurred) to think of perfecting design or craftsmanship. It is a sorry outlook. Nevertheless, we may hope that ere it is too late the silversmiths and jewelers of London will realize that the questions of techincal efficiency and artistic ability are of as great importance as the organization of an annual dinner and status inquiries.

The Birmingham Association is very keen about the Bullion bill, which is to come before the House of Commons. The enormous leakages which take place in the jewelry and silver trades are surprising. Mr. Francis, the new chairman of the association, said that there was no doubt that the leakages totaled £20,000 a year. There is a certain opposition to this bill on the part of bona fide purchasers of old gold and silver owing to the fact that in drafting the bill it made such a number of requirements that it will be almost impossible to carry them into effect if business is to be done by legitimate bullion dealers.

* * *

One strange thing mentioned in the speech of the Mayor of Birmingham at the Birmingham Wholesalers' Dinner was the fact that, apart from the mayor's chain, badge and mace, the City of Birmingham, although it is the center of the jewelry industry, puossesses no municipal plate or jewels.

lembers of Buffalo, N. Y., Retail Jewelers' Association Hold Enjoyable Banquet and Hear Many Speeches.

F , March 2.—Eloquent speeches, a n repast, an excellent attendance evidences of good fellowship were e features which marked the an- uet of the Buffalo Retail Jewelers' on at the Genesee Hotel last night. jewelers have held successful n the past, but last night's event n every respect all former din- is kind. Among the guests were om Niagara Falls, Lockport and rby places. The keynote of the idresses was the necessity for co- among the jewelers and the many erived from the practice of re- hods in business.

the principal speakers of the even Charles T. Evans, of Utica, presi- he New York State Retail Jew- ociation. Mr. Evans painted an picture of the prospects of the elers of this State. He urged p ent to join the State organization. eved that his invitation to those t attend the State convention in s in May will be accepted by a f Buffalo members of the trade.

ans' speech was so full of instruc- s that it excited unusual interest. s full as follows:

SPEECH OF CHAS. T. EVANS.

s ct is "Organization. What Can You e Jewelry Trade?" From time im- t has been the custom among all vilized and uncivilized, to form com- or the promotion and protection of m al interests. Hence among the tribes di in our land, and among the inhab- o he isles of the sea, we find the tribes z under chiefs and sub-chiefs; we find uniting to fight against the members of r nd so on. Among civilized nations we rouping of individuals into hamlets, vil- s, cities, counties, States and nations, vi its governing officers, its common laws s mmon interests.

n the past generation the forming of nizations of different kinds bas de- d different branches of business bave l otective associations all to the better- he membership tbereof. Tbe past few seen the retail jewelers, usually slow matters, begin to take interest in the z n movement, and many reforms bave y en accomplished by their efforts. In trengtb. None will gainsay that. Indi- our efforts will not count for much. lectively and unanimously our efforts k notice of, with the result that many r which tbe individual jeweler has been g d agitating for many years have been pl ed in a comparatively short time.

h any argue that the greatest good comes th work of the national and State organiza- I n of the opinion that the greatest amount of good will come through the local associations, because to my mind the greatest reforms must be accomplished in our own ranks. Local organizations conciliate friendships and establish connections among those who have been cold and unfriendly in their manner toward each other. Where no local association exists we find that jewelers, being unacquainted with their competitors, are prone to believe some of the unwarranted tales which customers are willing to tell, where they consider it to be for their advantage to do so.

Department stores and mail order houses are heralded as the arch enemies of the retail jeweler. But I firmly believe that when retail jewelers become business men enough to fix the prices of their goods fairly and then maintain them, no matter what pressure is brought to bear on them; when they are friendly enough to their fellow jewelers so that they can get together and discuss matters of trade interest; when they can go to their brother jeweler and ask him if he does sell goods at the prices which customers report him as doing; when they can, through a united front, get the retailing jobber to abandon his unfair methods, and be either one thing or the other; then indeed will the millenium have come to pass in the retail jewelry trade

Retail jewelers, like many other business men, figure in an incorrect way their profits. They buy an article for $75 and sell it for $100, and figure that they have made a gain of one-third on their investment But how about the expenses of the store, such as rent, heating, lighting, clerk hire, advertising, etc. Every piece of goods you handle should bear a proportionate share of the operating expenses of your business. How much does it cost you to run your store, as compared with the cost of the goods you sell during a year? This will sometimes run to 25 or 30 per cent. of the cost price Can you do business on a profit of one-third? Is it not absolutely necessary that your business be operated on a margin of 50 per cent. profit to show a gain during the year? If this is so, and as most of your goods are staple goods, can you afford to make cuts in your prices to meet competition? Is not most of the talk about what your competitors are doing done for the purpose of affecting your selling price?

Before organizations of retail jewelers became common, the consumer waxed fat at the expense of rival jewelers. Diamonds and fine watches have been bought at practically cost; one jeweler sacrificing in order to keep his competitor from realizing a sale. If one would stop to consider that if the customer had confidence in his own judgment, and if the other jeweler really offered him a better price on an article, and he was satisfied that it was an article of equal merit, would he spend time trying to beat you down on your price, or would he not return to the first jeweler and make his purchase without further conversation? In the second place what does the average customer know about your business anyway? You have spent a lifetime in it, yet can you put an absolute value on a diamond, a gold watch or a piece of jewelry without making comparisons? Are you not able to ask your customer a few questions about the goods, which will make him wonder whether he can trust his own judgment on a matter about which he knows so little?

Under present conditions we find jewelers standing firm as regards prices. They are acquainted with their fellow competitor, and know that he is not in business for fun, but that he is in business for profit, and that he is anxious to get a fair price for his goods. They do not jump at conclusions and accept customers' statements to be true, but are willing to concede that you can buy your goods to just as good advantage as anyone else, and the prices you have marked your goods are as low as goods of that quality can be sold. Most customers are reasonable.

In some localities it is very difficult to organize a local society, but it is certainly worth while even although you may not be able to get every one in at the start. In forming a local organization, great care must be taken to feature the social side rather than the business side of it, otherwise many men will stay out of it. Many jewelers are so well satisfied that they know it all; that they cannot learn from their competitors, and that they do not wish to associate with their fellows in a business organization. Have an association, even although you do not meet but once or twice a year. Have a banquet in the Winter and an outing in the Summer. In time all learn that there are certain common interests on which action should be united in order to accomplish certain needed reforms. Then the association begins to develop strength and to amount to something. Your competitor will then argue with you about your position on certain matters, and you will find that he is willing to listen to you about other things.

It is not necessary to make hard and fast agreements to bring about the desired end. It is not even necessary that fixed prices be established on goods, except that each jeweler should establish fixed prices on his goods and hold to that price. The jewelry trade is beginning to get stronger and stronger now, because its membership is beginning to realize the cost of doing business, and instead of having the repair department help to make up the loss in the selling end of the business, the repairing department is being used to pay the running expenses of the business, and the profit from sales is being placed where it should be, to the credit of the jeweler.

As regards the State association, it is still in its formative state. Formed less than a year ago, it has to-day 150 members scattered throughout the State, 51 cities and towns being represented. In many States of the Union the membership of the State association is purely of a local character, being representative merely of one city and a half dozen surrounding towns. In our State such an association would be termed a local society such as yours here. Our membership is scattered from New York and Albany in the east to Buffalo and Niagara Falls in the west; from Watertown, Ogdensburg and Plattsburg in the north, and Binghamton and Elmira in the south, while every inland city is represented.

Our executive committee has had three sessions since our organization, meeting in Rochester, Syracuse and Utica. We have sounded several battle cries. First, that the retailing jobber must go; second, that we will give our influence and backing to the jobber, who, realizing whence he gets his support, will refrain from retailing; third, that we will demand that all goods be trade-marked and stamped with the quality as well, as being our only protection; fourth, that we will conduct our own conventions, on the ground that more genuine good will come to the retail jewelers' association from hearing one of their own number talk from actual experience on a subject of interest to all, and which can be discussed at the close, than from listening to some high flown language from a dispenser of hot air, sent from some large factory for the purpose of advertising their factory and output to the retail jewelry trade.

We feel that in our ranks, which contain some

of the best men in the trade in this c can find men competent to lead in disc trade topics, and that from the gist of t ments, the wishes and feelings of our ship can be learned and the policy of ciation definitely established. Executiv are established by our by-laws to which members of the association will be admi have assumed a unique position among organizations, inasmuch as we propose t own association. The executive comm been unanimous in all its movements w ception of the project of affiliation, w cided to lay on the table until our next

When one stops to consider the fac were practically unacquainted when we gether on that blustery March day we sider that we were indeed fortunate i our officers that we got men who w gether. If we had had dissension n we could not have had the gain wh had. Starting with 48 members we ha gain of over 200 per cent., numberi 150. We expect to make our membe 250 before our annual convention on M

We are expecting Buffalo to furn these members, because the conven year will be so near at hand that B ffa able to attend very easily. When we our organization there were local s ie ing in Buffalo, Rochester and Utica had none. In canvassing in Syracuse t of the State association, Mr Howe, t all feel indebted, put in a word f r a ciation, and the Syracusans went h Utica and organized within a week went back to Albany and started the b there, and they now have a live or Binghamton and Elmira, where it was associations could not be formed, now tically every jeweler in their ranks, a their State association. Messrs. Rout Elmira, and Ash, of Binghamton, beli project and pushed it to success.

Some will say that the State organi nothing to do with this matter, but whe sider that 700 jewelers have been c three or four times during the year by secretary, Mr. Sunderlin, with results e we cannot but feel that we have been strumental in forming these local assoc

It's in the air, this organization spirit, bound to grow. Look back five years sider whether a gathering of jewelers su would have been possible. The men who pioneers in the movement in each c great credit. They believed in the p they believed in themselves. The State tion cannot accomplish as much as it until it has a larger membership, but respondence we have had with lea facturers we know that even already ence has been felt.

Come to the convention at Rochester and 27. Come prepared to offer sugge work. Come prepared to do your be common weal of our membership. Conc constantly improving; jewelers are better business men and are rapidly ta proper position among the business me locality.

"Desire not to live long, but well.
How long we live, not years, but act

We read in the Good Book that Methu to be 966 years of age, and he died record. To-day men are working f realizing that what helps one man help and that as we elevate trade conditions ourselves. When in your store you get ing about what our association ought plish, just jot down a few thoughts and to the president or secretary of the a Feel free to criticize if necessary, bec sometimes a hard matter to speak for a ciation of competent men unless you have learned what the opinions of bership are. Get out among the trade membership of these associations if be willing to abandon their as what the answer will be. Don't w yourself or your competitor

John C. Yung, who acted as toa performed his duties admirably a troducing Mr. Evans and the other indulged in witty remarks which w received. G. A. Frisch, who was acted as toastmaster was absent on of illness.

Among the first whom Mr. Yung called upon to speak was William Ehmann, one of the pioneers in the retail jewelery business in this city, and former president of the Buffalo Association. Mr. Ehmann, who spoke on "What We Have Accomplished," said in part:

"If you look around and study this assemblage of jewelers you will have an excellent idea of what we have accomplished in building up an association, which consists of progressive jewelers of whom we may well be proud. There are many in the retail trade who have not joined us, but we hope to get their membership later. Tonight we are enjoying an instructive session. We become acquainted and are now aware that competitors are not as bad as we thought they were. In other words, we have learned to co-operate."

Mr. Ehmann then outlined how the members had taken action against the plan of certain jewelers place a value on jewelry sold in some other store, and explained that the agreement in this line was being lived up to to the very letter. He also spoke about the good work accomplished by the association in connection with the New York state optometry law and in opposing the sale of jewelry by the employes of jobbers. He said he hoped that the price list of prices of watches and jewelry which was being prepared would be adopted. This, he explained, was greatly needed.

Mr. Zilliox, who succeeded Mr. Ehmann as president of the local association, was the next speaker. His subject was "The Future of Our Association." Mr. Zilliox said in part:

"As to telling our future is concerned I can only say that I am no fortune teller. However, I would like to outline a few of our plans for the future. We hope to maintain this good fellowship that has existed in the past. We also hope to increase our membership by diligently working to pull together. We also intend to encourage the trade. We have local manufacturers and jobbers who are not sufficiently patronized by retailers of Buffalo. We must give them our trade if we expect favors from them. If at the end of the year the Buffalo manufacturers and jobbers find that their local trade has increased, we will know our work is not in vain.

"The Jeweler as a Business Man" was the subject of Elliott C. McDougal, president of the Bank of Buffalo. Mr. McDougal, who is personally acquainted with many of the jewelers, said in part:

"I believe that a practical jeweler who has been thoroughly trained in a shop is not always a business man. Many jewelers conduct their stores without knowing what it costs to do this. You must figure closely. You must do more than guess at your general expenses. Yours is a fascinating occupation which requires skill. It is always the case that a jeweler is not only a business man, but a good practical man. One of the greatest assets of a retail jeweler is confidence. A customer who feels that in patronizing him he is getting full value for his money is well satisfied. A jeweler is entitled to get a profit. I will always go where I can pay a price if I get what I pay for.

"Any association having any trouble with dead beats if so you should arrange to have your members collect the names of these persons. Co-operation is always needed. No jeweler has all the trade in the world.

"I advise jewelers not to indulge in ruinous competition. You have an advantage over those embarked in the department stores as you know your business more thoroughly than they do. The reason so many Americans fail is that they are extravagant. If you start in the jewelery business don't start in to spend more than you have.

Mr. McDougal's remarks were loudly applauded.

Charles Goodwin, advertising manager of Kleinert Sons Co., Rochester, was another speaker whose remarks were well received. In fact Mr. Goodwin is an entertainer as well as a good talker, and his amusing stories were very popular. He offered to the jewelers many valuable points about advertising, and his various suggestions were received with approval.

"Advertising is a broad subject. Something has been said to-night upon the effect of the mail-order houses upon the retail jeweler. I want to tell you the reason the mail-order houses get the business is because they advertise. Advertise and let the people know you have the goods. Get yourself before the people. If people know they can get reliable goods from you they will patronize you, but you have to let people know you have the goods.

"In the matter of advertising start slow and sure. People know your store. If you have a small store, do not try a large ad. You cannot deceive the people in that way. Tell the people what you have in a small space, and do it often, rather than in a large space occasionally.

"After years of experience I can tell you that the place to do your advertising is in the newspapers. In the end it is the least expensive. People do not read newspapers alone for news, but also for advertisements. The women are the ones who read the ads.

"People are skeptical of extravagant statements. You see advertisements of cut rates, goods to be sold below cost and the like. That is usually not true, and the people know it. Your matter should be plain and to the point. Write your ads as you talk to the people in your stores. Follow up your ads with a window display of the goods advertised. Always have what you advertise.

Charles W. White, a member of the firm of White, Wile & Warner, of Buffalo, was another speaker whose remarks were received with much favor. Mr. White is a member of the Buffalo Chamber of Commerce and Manufacturers' Club. His subject was "The Wholesale Jeweler." Among his many points was an emphatic appeal for the patronage of home industries.

C. E. Sunderlin, president of the Rochester Association, and secretary of the State organization, told about the success of the organizations which he represented. He said among other things that it was necessary to have the jobber cut out retailing and that home industries should be patronized.

"There are 146 members in our State body," he said, "and we want the number to reach 250 by the opening of our State convention in Rochester on May 26. We need 40 members of the State Society in Buffalo. In Rochester the jobbers have cut out retailing and that means a big profit to us. This plan can be worked out elsewhere."

A. S. Flint, who was in Buffalo doing missionary work for the Waltham Watch Co., also spoke. He proved that he was a capital story-teller as well as speaker.

A vote of thanks was extended to Louis Schutt, Albert Zilliox, Fred Petersen, Emil Dettling and others who successfully managed the banquet and arranged for an enjoyable musical programme. Mr. Schutt was especially praised for his activity and success in planning for the dinner. Letters of regret at their being absent were received from E. A. Eisele and others.

J. C. Broghamer, formerly of Wilkes-Barre, Pa., has purchased the jewelry business of B. Frank Kessler, in Mt. Carmel, Pa.

Mrs. Kohler, executrix of the estate of the late Charles Kohler, Norristown, Pa., is selling off the stock preparatory to taking final inventory of the business.

Death of Frank Lee Armstrong.

NEW ORLEANS, La., March 3.—Frank Lee Armstrong, partner, vice-president and general manager of the well-known jewelry firm of M. Lowengradt & Armstrong, in Baroune St., died shortly after 8 o'clock, Sunday night, in his home in Arabella St., from an attack of meningitis, which disease he contracted from a siege of grippe. He has only been confined to his bed for three days, having only come to New Orleans from his country home at Roseland on Thursday. The attack of grippe was contracted during the Mardi Gras season and since that time Mr. Armstrong has not been at all well.

Mr. Armstrong comes from a fine old Kentucky family, his father being the late Johnston Armstrong, who was the first stationer to settle in New Orleans after the Civil War. Although Mr. Armstrong was born of Kentucky parents, he came into this world in New Orleans 52 years ago in a historic old house at St. Charles and St. Andrew Sts.

Mr. Armstrong was reared in this city, but spent his early manhood in Louisville. Returning to New Orleans he went to work with his father in the stationery business, and was thus occupied until he went to work for the well-known jewelry house of M. Scooler. With this firm he remained for 18 years. After this he joined in partnership with E. Lowengardt and started a jewelry company of his own.

About four years ago Mr. Armstrong was wedded to Mrs. Nannie Greely, who with his brother, Johnston Armstrong, survive him.

Deceased was of a lovable disposition and was hail fellow well met with everyone. He lived for his friends alone, and never belonged to a club, though he was a member of the Washington Lodge of Masons, and was at one time affiliated with the Knights of Pythias.

The funeral took place Monday from the Armstrong home, 1632 Arabella St. Bishop David Sessums of the Episcopal Church officiated. The interment was in the Metairie Cemetery. The pall bearers were Messrs. Norvin Harris, Crawford H. Ellis, Geo. Kausler, George W. Medus, C. W. Carson, E. Lowengardt and George Riehl.

Games Rolled by the Jewelers' Bowling League of New York.

The following were the scores of the teams of the Jewelers' Bowling League of New York in the games rolled last week:

Feb. 28.	Tiffany & Co.	950	994	869
	vs. Joseph Fahys & Co.	891	1,003	966
March 2.	Wm. Barthman	884	893	887

Evidently the were familiar with the premises, then proceeded to cut a hole g the flo ring, thereby avoiding any nce with the burglar alarm wiring e cellar door, and crawled through ture instead of getting in by way the stairs They also avoided other g the store. The safe, however, thus protected, and they were work upon it freely from the

the store was opened Monday by Samuel Kahn, an employe, y discovered that a robbery had petrated and notified the proprie- the police. The front part of the s undisturbed, but a great hole in of the safe, debris on the floor openings through the flooring told . Trays were scattered about, some ols used had been left behind and s nothing easily portable of value been overlooked by the robbers. was done deliberately and com-

The burglars were equipped with some nitro-glycerine, which they left behind, but evidently found the safe easy to crack without using it Battering the iron covering, they ripped off part of the outer plate and got at the cement filling, which they removed in small fragments gradually until they reached a thick wooden partition and copper sheathing. When these had been cut through they had full access to the valuables through a hole about a foot square.

The police are of the opinion that the job was done by professional "yeggmen," and say it is similar to that of two years or more ago at Flashmann Bros., on Green St., and at the Raymond Syndicate store, last June.

In the loot there were not only the best part of the diamonds and watches in stock, but watches belonging to customers, left for repair, together with brooches and pins, some of them set with diamonds, rings and gold jewelry.

A. A. Cattaneo, Peru, Ill., Goes Into Voluntary Bankruptcy.

CHICAGO, March 2.—An involuntary petition in bankruptcy has been filed in the United States Court by A. A. Cattaneo, Peru, Ill. His schedules show his creditors as follows: Less than $50—Gilbert Clock Co., Silverfield Co., Alvin Mfg. Co., L. E. Waterman Co., F. A. Hardy & Co., Chas. F. Damm, Pitkin & Brooks. From $50 to $100—Helsman & Alter, F. E. Morse & Co., New England Watch Co., South Bend Watch Co., C. J. Roehr & Co. The larger creditors are: M. J. Averbeck, $211; J. R. Wood & Sons, $172; F. W. H. Schmidt, $594; Buffalo Chain & Ring Co., $131; Hull Bros. Umbrella Co., $248; A. C. Becken Co., $317. The total liabilities are $2,436 and the estimated assets $1,176.

Mr. Cattaneo has been in business about two years and when he started succeeded W. M. Leming. He was formerly employed in the clock works at Peru and has a practical knowledge of the trade, though he carried a small stock. Two years ago he gave a chattel mortgage on his business for $600, which has about expired.

Lapp & Flershem Can Use Their Name in the New Corporation—Settlement Offer May Be Increased.

CHICAGO, March 5.—The Lapp & Flershem estate will come up for disposition March 10. Not many favorable replies were received to the offer of settlement on the basis of a 40-cent on time, in view of the fact that a cash offer of the same amount had been made for the assets. The bankrupts will probably increase their offer to 50 cents—10 cents cash and the balance on time.

The receiver has over $30,000 on hand and expects to have as much more in about a month's time. This will leave Lapp & Flershem with enough money to pay 10 cents cash and to pay costs of administration should their offer be accepted.

The United States Court has refused to issue an order restraining Messrs. Lapp and Flershem from the use of their name in the new company just formed and the new corporation will consist of Messrs. Lapp, Flershem, Towers, Slade, Tuttle and Weadly, the four latter gentlemen having been connected with the old firm as heads of various departments.

Creditors Cause Arrest of Chas. Rosen, Cincinnati, and His Manager.

LOS ANGELES, Cal., March 2.—Charles Rosen, a former jeweler of Cincinnati, was arrested and arraigned here before the United States commissioner Feb. 26, on a complaint charging him with concealing $10,000 worth of diamonds and watches from his creditors. In default of bonds he was locked in the county jail.

Rosen declared his arrest was due to creditors, who are angered at the small amount of assets distributed when his concern went through bankrutpcy. "My partner, Morris Levine, and I," he is reported as saying, "turned over everything we had to the receiver. I supposed everything was settled. I came here with my wife and have been looking for work. I have no money or friends."

Nearly $10,000 worth of jewelry and other valuables, it is said, were discovered at the home of Rosen at Ocean Park, a beach town 15 miles from this city. These effects will be turned over to the trustee in bankruptcy and held for the benefit of the creditors. This proceeding has nothing to do with the criminal action pending in the United States District Court.

Rosen says he will resist extradition to Ohio.

CINCINNATI, March 3.—It is expected that Charles Rosen, bankrupt jeweler of Cincinnati, and his brother-in-law, Morris Levine, who acted as manager in Rosen's business, will, some time this week, be brought here to answer charges preferred against them by creditors. Rosen has been located at Los Angeles, Cal., and Levine in Aberdeen, N. Dak., after a diligent search.

It is reported that the goods seized in Los Angeles, Cal., had been stored by Rosen, and consisted of five barrels and two large boxes labeled "Cut glass." "Clocks" and "Ornaments." These goods, it was found, were shipped from the Fireproof Storage Co., of Cincinnati, and consigned to Dorothy Perlman. They were later stored by Rosen. It is believed there is at least $5,000 worth of the missing jewelry in these packages. One of the barrels was opened and was found to contain fine table silverware.

Levine, when found, is reported to have had a large quantity of the missing stock of jewelry.

Samuel Graubart Co., Schenectady, N. Y., Does Not Oppose Creditors' Bankruptcy Petition.

SCHENECTADY, N. Y., March 7.—The Samuel Graubart Co., recently forced into bankruptcy by merchandise creditors, did not oppose the petition of creditors, as was anticipated, and the company has been declared a bankrupt and the first meeting of creditors will be held before Referee Scott, Parker building, on March 9, when a trustee will be elected and claims proved

The assets have been appraised at $1,887 and include an equity in many articles which were pawned with the company

Adams Express Co. Advances Rates to New England Manufacturers After Absorbing Local Company That Did This Business.

PROVIDENCE, R. I., March 5.—Co-ordinate with, and dependent upon the entrance of the New York, New Haven & Hartford Railway's attempt to enter Providence, as mentioned under Providence items in this issue, is the matter of increased rates paid by jewelers. Tuesday the Adams Express Co. assumed control of the Earl & Prew Express Co., and on the same day the minimum express rate on small packages was advanced from 15 cents by the new company.

The advance hits the manufacturing jewelers here hard, as it strikes against packages weighing 10 pounds or less. From now on all parcels which do not weigh more than 10 pounds will be sent at this increased rate. The merger also affects the New York and Boston Dispatch. Co., the Earl & Prew Express is dissolving, the New York and Boston Dispatch becomes a distinct subsidiary of the Adams Company. This consolidation gives the Adams the complete control of all the express business between this city and all points in the country, and the effect of the change in the minimum charge on small packages is declared by business men to be of great importance to shippers, especially to jewelers.

The increase in rates on these small packages will be felt by all shippers from Providence to all parts of the country, it will have a twofold effect on business interests of this vicinity, inasmuch as all concerns that do principally a New England business will come under the new 20-cent minimum rate on all local express packages, while other concerns that deal with the country at large will feel the effect in the change of the flat minimum rate from 15 cents to 20 cents. This rate applies to packages of five pounds or less. On all other packages there is a proportionate increase.

Manufacturing jewelry interests say the advance will prove to be especially burdensome. There are more than 200 concerns directly connected with this industry in Providence alone, and these do a business that amounts in the aggregate of products valued at approximately $10,000,000 by jewelers, $4,000,000 to $5,000,000 by manufacturers of jewelers' findings and $46,000,000 to $7,000,000 by silversmiths.

The majority of these concerns, as well as those in the Attleboros, which number many hundred firms, have for many years been in the habit of prepaying all packages that are shipped from their factories.

Some of the firms that do not prepay directly request their customers to deduct the express charges when making remittances upon bills rendered. This expense to the local manufacturers is already many thousands of dollars annually and the increase of five cents, which is on every package means a large increase in outlay.

At the Providence office of the Adams Express Co. it was stated that the company had decided to adopt the Boston office rates. This is on the basis of a minimum charge of 20 cents, instead of 15 cents. The rate has been in force in connection with the Boston office as applicable to all express business throughout Massachusetts for some months. It was brought about by the Adams Express Co. receiving permission from the Board of Railroad Commissioners of Massachusetts to increase the rate.

Officials of the Adams Express Co. appeared before the commissioners and represented that it was impossible to handle small packages on short hauls at 15 cents each without loss, and the commissioners gave the company permission to add the five cents to the minimum scale. The change which has now been put into effect affects all sections of New England and local packages and to a greater or less extent all other packages.

For a long time it has been generally the custom of the manufacturing jewelers to ship by way of the Earle & Prew Co. All shipments to New York, south and west have been sent by boat direct from this city or by the New London route. With the assumption of the business by the Adams Co. all these shipments will be made in future entirely by rail direct into New York and west and south over the regular routes controlled by the Adams Co.

It is feared by the manufacturers that this change in method of handling might also entail an advance in the price schedule, but the Adams officials this morning stated that except for the five cent increase in the minimum rate, there would be no increase in price on account of the change in routes to be employed.

Speaking of the increase in rates and its effect upon the jewelry business, Fred D. Carr, secretary of the Ostby & Barton Co., and president of the Manufacturing Jewelers' Board of Trade, said: "An increase of five cents on small packages weighing less than 10 pounds will mean a great deal to the manufacturing jewelers of this city and vicinity, especially if it applies to western deliveries. A great percentage of the packages are sent to New York and the west, and an increase, however small, to these points would materially increase the expenses of the manufacturers.

"No action has been taken by the Board of Trade in this matter, but it may be taken at the regular monthly meeting of the directors, which occurs on Friday, March 11. In what manner this may be brought up I cannot say at this time."

Frank T. Pearce, of the Frank T. Pearce Co., said: "Any increase in the rates of express from this city is serious to the manufacturing jewelers of this vicinity, as a majority of the concerns prepay their packages and the entire advance will thus come upon them. This may be trifling on each separate package, but the aggregate is considerable. We have been told that packages sent to the express office previous to 4 o'clock in the afternoon will be sent at old rates by boat. In order to be thus handled, however, each package must be marked 'by boat.' This is almost an impossible thing for a majority of the jewelers do not get their shipments ready until after that hour."

Everett L. Spencer, of the E. L. Spencer Co., and chairman of the advisory council of the New England Manufacturing Jewelers' and Silversmiths' Association, said: "I do not know much about the matter, as I have just returned from a five weeks' trip south.

"However, in a general way I recognize the detriment that such an advance will be to the manufacturers. It will probably be considered at an early meeting of the advisory council of the association and some action will probably be taken, which will represent the entire trade."

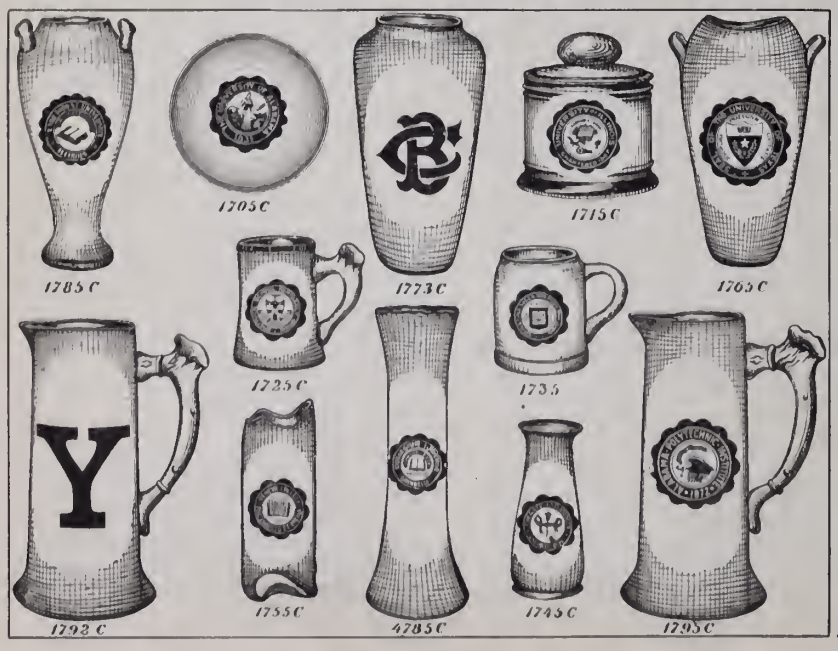
Eugene Cardin Sentenced for Complicity in Old Robbery of Pay Messenger of the Webster Co.

NORTH ATTLEBORO, Mass., March 5.—Eugene L. Cardin, of Central Falls, convicted earlier in the week of being accessory before the fact to the highway robbery of Arthur Greene, pay messenger of the Webster Co., was yesterday sentenced to two and one-half years in the House of Correction at New Bedford.

The crime occurred in August, 1907, but it was only recently that Cardin's part in the affair became positively known, although for some time suspicion has pointed in his direction. The highway robbery charge followed his conviction on a count of larceny.

In imposing the sentence Judge Bell stated that he had taken into consideration the reports of good standing in the community and the reputation he had maintained. There was, however, he said, the question of the need of an example that might deter others from such an act, and on this account he believed a substantial sentence should be imposed.

Earlier in the week counsel for the defendant, Harold F. Hathaway, had asked the court to order an investigation of the reputation of the defendant by Probation Officer Babbitt. Mr. Babbitt reported yesterday that he was unable to find that the habits of the young man since he came to North Attleboro were anything but excellent. He was a member of the Young Men's Christian League, and the officers gave him a high recommendation. His employers had told the officer that they were shocked to find him connected with peculations or any improper conduct whatsoever.



The principal witness against Cardin was William Bebeau, of Pawtucket, who is serving a 12-year sentence as principal in the robbery. Bebeau claimed that he was induced to commit the robbery by Cardin, who told him when the money would be taken from the bank to the factory for the payroll and the amount it would be.

At times Cardin was the messenger, and if this proved to be the case on the day the robbery was planned he was to be the victim of a fake hold-up and get half the proceeds. But if Greene was the messenger the hold-up was to be the real thing, and Cardin's share was to be but one-third. Cardin, he claimed, gave all the information upon which they worked.

Cardin denied implication in the robbery. If he had given any information he said it was done carelessly. He admitted telling the usual time for the messenger to go to the bank, but said this was because Bebeau wanted to borrow some money, and he said he would let him have it after he was paid off.

Why Not

introduce a College Novelty Department in your store by displaying a line of college pennants, banners, pillow covers, COLLEGE CHINA and JEWELRY?

This department will attract the College and School Trade to your establishment. Our new catalogue, dwelling in detail upon these lines (which are greatly different from the ordinary lines shown), will be sent to the trade upon request.

stoms Authorities Get Clue to
ed Smugglers in Montreal.

AL, Can., March 5.—The United
toms authorities in Montreal were
Wednesday night, last, when de-
working in the interests of the
tates Customs traced a man and
this city, en route from Lon-
., to New York, after receiving
hat the couple carried with them
worth of diamonds. As is very
n there is a duty on diamonds
cent. in the United States, while
free in Canada. For many years
e has been regarded as the prin-
cipal route to the United States by people who desire to smuggle in the precious stones.

About three years ago a man was caught, just after crossing the line, tried by the courts of New York at Niagara, and sentenced to five years' imprisonment. He passed through Montreal, gave his valuable parcel in safe-keeping to a newly-wedded couple and the young bride was arrested with the smuggler. She escaped a sentence because it was proven that she was an innocent victim. The United States authorities in Montreal refuse to discuss the whereabouts of the man and woman with the $100,000 worth of diamonds, except to say that Canada will likely have the pleasure of entertaining them for some time to come, in view of the fact that the couple know the authorities are watching them very closely and therefore are not likely to run the risk of crossing the border.

Keystone Watch Case Co. and Allied Corporations Seek to Set Aside Service in Dueber Watch Case Mfg. Co.'s Suit.

CINCINNATI, O., March 5.—The Keystone Watch Case Co., The Philadelphia Watch Case Co., the E. Howard Watch Co., the Crescent Watch Case Co., and the New York Standard Watch Co., to-day made motions in the United States District Court of Cincinnati to quash service of summons in said court in the suit brought against these concerns under the Anti-Trust law by the Dueber Watch Case Mfg. Co. The motions are made on the ground that the service of summons and return of the marshal are insufficient in law.

In addition to this motion, the Philadelphia Watch Case Co., and the New York Standard Watch Co. further object to the service on them, saying that at the time of the service of the summons J. Charles Becker, on whom the service was made, was not the local agent and manager for these concerns.

Charles M. Fogg, secretary of the Keystone Watch Case Co., entered a general appearance individually and filed a motion to strike certain words and phrases from the petition for the purpose of making it more definite and certain. Attorneys Workum & Bowdle represent the Crescent, Philadelphia and New York Standard companies. Attorneys Maxwell & Ramsey represent Charles M. Fogg, the Keystone Watch Case Co. and the E. Howard Watch Co.

Death of William A. Safford.

PROVIDENCE, R. I., March 7.—William A. Safford, for nearly a quarter of a century a member of the White Stone Jewelry Co., of this city, died at his home, 92 Providence St., Friday afternoon about 5 o'clock, after an illness which had lasted for nearly two years. He was in his 50th year. For nearly two years, Mr. Safford had been a sufferer from Bright's disease of the kidneys, but had been up and about until about a fortnight ago, when he became confined to his bed. Since that time he had failed rapidly, the end coming Friday.

Mr. Safford was born in Springfield, Mass., June 18, 1860, where he spent his boyhood, receiving his education in the public schools. When about 21 years of age he came to this city, and for a few years worked as a journeyman at the jewelry business. Later he became a partner in the White Stone Jewelry Co., the partnership lasting nearly 25 years, and until ill health compelled him to give up active business.

Deceased was an active athlete and identified with the various athletic associations. He was a member of the old Metropole Club, and a charter member of the Hope Fencing Club. He was also a charter member of the Providence Athletic Club and was champion amateur fencer of Rhode Island during the years 1892 and 1893. He is survived by his wife and four children, two sons and two daughters.

The funeral was held this afternoon at 2 o'clock from Mr. Safford's late home. The services, which were conducted by Rev. Asbury E. Krom, pastor of the Beneficent Congregational Church, was attended by many of his former business associates. The interment was at the North Burial Ground.

Another Suit Over Patent on Clutches for Scarf Pins Started in United States Court.

An action has been started in the United States Circuit Court, New York, by Maximilian H. Fischer, Charles P. Goldsmith and Isaac Loeb, the last two being in business as C. P. Goldsmith & Co., against John S. Sampson and Samuel Sampson, in business as John S. Sampson & Son, New York, alleging that the defendants have infringed upon the patent rights of the complainants in selling clutches for scarf pins containing the invention and improvements covered by their patent. It is asked that a preliminary injunction be granted against the defendants pending the settlement of the case.

The complaint recites that Maximilian H. Fischer was the original inventor of certain new and useful improvements in clutches and that on May 20, 1902, letters patent No. 700,412 were granted him by the Government, covering a term of 17 years. He entered into an agreement with Charles P. Goldsmith and Isaac Loeb whereby they obtained the right to manufacture and sell his invention, solely for use in jewelry.

It is also set forth that certain changes were found needful in the specifications of letters patent 700,412 and a new patent, No. 13,009, marked "re issue" was granted to Mr. Fischer.

It is alleged that the complainants have been deprived of large profits and royalties by reason of alleged infringement on the patent, but that the exact amount is not known. It is claimed that the defendants were notified of the alleged infringement prior to the filing of the bill of complaint, but refused to desist from selling the clutches.

It is asked that the defendants be made to pay over the income or profits derived thus far and that the devices they are alleged to be selling be destroyed or delivered to the complainants for that purpose. The court is also asked to assess, in addition to the complainants for that purpose. The have sustained by reason of the alleged infringement and that the actual damages so assessed be increased to three times the amount as a penalty.

Members of Jewelers' Protective Union Hold 32d Annual Meeting.

The 32d annual meeting of the Jewelers' Proteetive Union was held yesterday afternoon at the rooms of the organization in the Silversmiths' building, 15 Maiden Lane, New York. The meeting was called to order by the president, O. G. Fessenden, who read the annual report of the exeeutive eommittee, which was as follows:

During the past year 33 trunks of travelers have gone astray on railroads owing, we believe, to the fault of railroad employes. These trunks were all located and returned to their owners a short time after the loss was reported to the Union.

There has during the year heen considerahle work done on matters connected with the organization which it is deemed inadvisable to give the details of in a public report. There were several rohberies, the most interesting being the following:

In October it was reported to the Union by a memher that the trunks of two of his travelers had been opened while in charge of a railroad, the goods disarranged, but none stolen. The Union immediately began work on the case and within a short time another member reported a serious loss on the same railroad under similar circumstances. After a vigorous investigation it was evident to us that the baggageman in charge of the trains on which the trunks of hoth memhers were checked was the culprit. He was arrested, part of the goods recovered and he is now awaiting trial, having been held under $5,000 bonds for his appearance in court. There is no question of his conviction and punishment.

It is worthy of note that this man had been systematically rohbing trunks of passengers for a year at least. Complaints had heen made to the railroad, but up to the time of the robhery of our member it had heen unable to locate the thief, and yet within 10 days after the loss of our member was reported to the Union we had the thief under arrest. It is undoubtedly true that every baggage master as well as every other employe of the railroads covering the section of the country this man travels over knows how quickly we succeeded in arresting the culprit and realizes that to rob one of the memhers of the Jewelers' Protective Union means certain punishment.

Another important case, although the Union had no direct interest, the executive committee deemed it wise to take up may he briefly described: A member, while holding certificates covering his other salesmen's stocks, helieving that it was unnecessary to take out insurance in the Jewelers' Safety Fund Society and a certificate of registration with the Jewelers' Protective Union because, to quote him, "The stock was in charge of an old and experienced city salesman, very careful and trustworthy," suffered a loss of a large amount by the simple process of having the carrier of the salesman disappear with the entire contents of the telescopes in his charge, and this practically under the eyes of the salesman.

Believing that the arrest and conviction of the carrier was of vital interest to all of our memhers employing such carriers, the Jewelers' Protective Union co-operated with the member, and are pleased to report that not only the carrier, but his confederates in the actual theft and the men to whom they disposed of the goods were arrested, tried, convicted and sentenced to serve terms of imprisonment. The thieves engaged in this affair numbered six, and we got them all. The Jewelers' Protective Union desires to record its appreciation of the efficient work performed by the police of this city who were assigned to the case. From the chief of detectives to the detective-sergeants actively engaged in the work everything possible was done by them cheerfully and quickly.

It seems strange that any of our members should hesitate to take out a certificate for each of their travelers and city salesmen. In the case we have described, had the member covered the stock by a policy in the Jewelers' Safety Fund Society and a certificate with the Jewelers' Protective Union he would have suffered no loss whatever, while as it is his loss is large.

We have sent at various times during the year to our memhers and their salesmen holding our certificates letters and instructions which have been favorably received and acted on.

A list of hotels in the country has been compiled, showing their facilities for caring for the trunks under the Union's protection, and is ready to send to our members and their salesmen. Never, it is safe to say, have the travelers holding certificates of the Jewelers' Protective Union heen of more help than during the past year co-operating with it in exercising the greatest care and following and offering sugestions to improve the Union's efficiency in its chosen line. While naturally there will be found in so large a hody of men as our certificate holders a few who are not as careful of the stocks entrusted to them and their conduct on the rôad as they should be, the great majority, we are glad to say, are worthy in every way of the trust we repose in them. As to those who are not worthy of that trust it is only a question of time when they will be called upon to give up their certificates.

We heg to call the attention of the members to the proposed amendments to the constitution and hy-laws. These amendments are in the main to make our constitution agree with that of the Jewelers' Safety Fund Society, with which organization we are so intimately connected. Your committee recommends favorahle action on your part.

The president takes this opportunity to thank the memhers, officers and others for their hearty support during the past year.

Respectfully submitted,
(Signed.) Executive Committee, per
O. G. Fessenden, President.

The report of the secretary and treasurer showed a good condition of affairs in the Union and indicated that during the past year there has been issued the largest number of certificates ever taken out during any year in the organization's history. The report also showed a good financial eondition.

Aetion was taken upon some proposed amendments to the constitution and by-laws, whieh, as explained in the report of the exeeutive eommittee, are in the main to make the eonstitution of the Union agree with that of the Jewelers' Safety Fund Society. These ehanges were recommended for favorable aetion.

The meeting then proeeeded to the election of the offieers and the exeeutive eommittee, which resulted in the unanimous reelection of Oliver G. Fessenden, president; Frederick H. Larter, viee-president; Ira Goddard, secretary and treasurer; Fred L. Goddard, assistant seeretary and treasurer; and as members of the executive committee August Oppenheimer, Leopold Stern, George W. Street, Charles G. Alford, Augustus K. Sloan, William T. Gough, M. Luther Bowden and David Kaiser, together with the president, viee-president and seeretary ex-officio.

Death of Reuben H. Krause.

Reuben H. Krause, a traveling salesman in the employ of the California Jewelry Co., San Francisco, Cal., but who made his home in New York, died of apoplexy in San Francisco, on Wednesday of last week. Mr. Krause was well known in the trade in New York, having been for about 20 years in the employ of the old firm of Falkenau, Oppenheimer & Co. as traveling salesman and later for a short time with Ingomar Goldsmith & Co.

The body will be brought to this eity, where funeral serviees will be held next Sunday morning at Campbell's undertaking establishment, W. 23d St. Interment will be at Bayside Cemetery.

Mr. Krause was born in New York, 54 years ago, and had been eonneeted with the jewelry trade for a long term of years. He traveled on the coast for the California Jewelry Co. and had a wide cirele of friends in that section of the eountry. His home was at 153 Boston Road, Bronx.

Deeeased is survived by a widow.

Death of John H. Thom on

John H. Thompson, for mar y traveling salesman and well kno this city and in other parts of t died last Wednesday at his hor versity Pl., East Orange, N J., tism of the heart. He was taken on a trip in the west, but rec iently to go on to Minneap lis was again strieken. About T Day he was taken to the Minne pital and a representative of t J. B. Bowden & Co., New York, Mr. Thompson traveled, was sent city. Mrs. Thompson also went side of her husband, and at th t thought that he was suffering maine poisoning. He recovered to make it possible for his wife t home, sinee whieh time he ha an invalid.

Mr. Thompson was born Oct in New York, and was a son Thompson and Ada Welling life was spent in this seetion of t and when the Civil War broke ou the Duryea Zouaves and serve and a half years. After the w eonneeted in business with his some time and later beeame salesman. At different times he Bioren Bros. and for the Ke Mfg. Co., and was well known in and in New England. His last p with J. B. Bowden & Co., w h had been conneeted for six yea

The funeral serviees were he morning at Knapp's Chapel, Ea N. J., and interment was in the at Greenwood.

Deceased is survived by a wid daughters, Mrs. Carl Hartmann, Tiffany.

Thieves Loot Store and Safe kow & Co., Oklahoma City of Jewelry Worth $2,0

Frank C. Allen, representing Allsopp & Long, 473 Washington St., is just in from a six weeks' trip through the middle west. He reported unusually bad weather. He started in well, but on the latter part of his trip found things very dull. Mr. Allen started at once on a short trip through the east Fred. T. Long, a member of the firm, has just returned from a trip to Boston and Portland, Me.

The fifth noonday lunch of the Newark Association of Credit Men was held last Thursday at the Hotel Broad The speaker for the occasion was Richard C. Jenkinson His subject was "What It Was and What It Will Be." The organization will be represented at the annual convention at New Orleans, May 17 to 20, by Charles H. Sansom, president; J. Fred Braun, secretary; Curtis R. Burnett and Frank S. Cobb.

F. C. Bonner, representing F. & F. Folger, 44 Marshall St., has just returned from a trip through New York and Pennsylvania. Near Painted Stick, on the Erie Railroad, he was stalled for five hours, the water on the track coming nearly up to the body of the car. He reports that, although business was rather quiet, he never saw so many salesmen on the road at this season of the year. Fred Folger, Jr., of the same firm, has just returned from a trip to the middle west.

H. E. Dana, representing the Charles C. Wientage Co., 32 Marshall St., has just returned from a trip through the east, visiting Boston, Portland, Me., and other places throughout New England, New York and Pennsylvania. He reports business quiet. J. S. Dinplespeil has recently been engaged to look out for the company's interests on the Pacific Coast. The company is beginning to branch out in its business, and, although it finds business very quiet at present, it is looking for a prosperous year.

A jewelry theft in Elizabeth, N. J., on the night of Feb. 23 has just been made public. A window in the store of Mr Bloch, 61 1st St., was broken by the thief, who secured three trays of jewelry, which comprised 50 solid gold rings, 50 gold-filled rings, a tray of emblems, nine Ingersoll watches and two jewel cases. The three empty trays were found the next day hidden under a lumber pile a short distance from the store. Mr. Bloch thinks he knows who the thief is, but has not enough evidence to warrant an arrest.

Games were played at the Oxford alleys in the Jewelers' Bowling League on Tuesday and Wednesday evenings of last week On Tuesday evening the team representing Bippert Griscom & Osborn (No. 2) won two games and lost two; the team representing the Shiman-Miller Mfg. Co. (No. 2) won two and lost two, and the team representing Durand & Co. won two and lost two On Wednesday evening the team from Allsopp & Allsopp won three games and lost one; the first team of Shiman-Miller Mfg Co. won one and lost three, and the Whiteside & Blank team won two and lost two. The interest in these games grows greater as the end of the competition draws near. The last games will be played on March 22, and the prize winners will be announced soon afterward.

A fire swept through the Harrison building, 67 Harrison St., on Friday night, Feb. 25, causing great damage to four manufacturing jewelry concerns—the Steeber, Kraus Co., makers of gold jewelry; Otto Fessler & Co., manufacturers of gold chains; L. E. Garrigus & Co., and the Lee-Dodd Co. Other concerns in the building were the Pearl Novelty Co., the Young Mfg. Co., manufacturers of safety razors; the Standard Electric Lamp Works, and Wintergreen & Clements, pearl button makers. The burned building was owned by Benjamin V. Harrison, Montclair. Title to the building was to have passed on Feb. 28 to Dr. Patrick McGuinness. The fire is thought to have started in the shops of the Standard Electric Lamp Co. The loss by fire and water is estimated at $15,000, of which $11,000 was on the building and the rest was on stock. Mr. Harrison says that the back portion of the building will be thoroughly repaired within 30 days and the front part of the building in 60 days. L. E. Garrigus & Co. have moved from the burned building to 38 Crawford St., where large, well lighted quarters have been secured. The quarters they now occupy were formerly occupied by the International Button Co. The loss to this firm was about $1,000, which was covered by insurance. It is expected that the Lee-Dodd Co. will move to Franklin St. The Steeber, Kraus Co., which was on the third floor of the Harrison building, will remain in the same quarters. The company was insured for $3,000 and claimed $2,000 damage. The insurance company settled with the company for a little less than that amount. Two weeks' work will be lost, but there was a good stock of goods partly made which were saved from the fire, and as soon as it is safe to start up the power again this stock can be finished. Otto Fessler & Co.'s loss was covered by insurance. He may remain at the same place if repairs on the building are pushed rapidly. He had hired extra help just previous to the fire to go to work Feb. 28.

The Jewelers' Security Alliance has been informed by a Grand Rapids, Mich., jewelery concern of an unusual theft. it was discovered by the firm that a ring containing a diamond of 1 1-32 carats had been substituted for a phoney ring with a ¼ carat imitation stone. What was more remarkable, the imitation ring contained a tag which was almost an exact reproduction of the tag used by the concern. The missing ring is marked with the number 6571. The jewelers are at a loss to account for the similarity of the tags as their original ¼ carat ring had not been out of the store on memorandum, yet the cost mark on tag attached to the genuine ring was almost identical with the one placed on the tag attached to the imitation ring, and the two tags were very similar in every other respect. During the day on which the robbery occured the strangers who visited the store were a man and woman who were visitors at the same time The man is described as being of heavy build, about 40 years of age, and the women is said to be about 35 years old and as having a round red face. The other stranger who was a customer on that day was a young man about 20 or 25 years old

Providence.

William R. Dutemple has been granted a patent on a cigar tip cutter.

John Kelso was a visitor in Boston last week looking for novelties.

John H. Simpson, of this city, has been granted a patent on a cuff-button.

al windows in memory of William
Chancellor of Brown University
to the time of his death in 1907,
presented by Mrs. Goddard to St.
iscopal Church, this city, and to
Episcopal Church, East Green-
ey were designed and executed
glass by the Tiffany Studios, New York, under the personal supervision of Louis G. Tiffany, and are fine examples of the glazier's art. The window for St John's Church is gothic in its general form and detail and consists of two large panels. The subject of the design is the "Call of Matthew," and shows the figure of Christ in the left hand opening, and in the right is Matthew in the act of leaving the receipt of customs and preparing to follow his Master. The window presented to St. Luke's Church has for its subject a landscape, and is in three panels. In the central panel, near the top, is the "Holy City."

The manufacturing jewelers, as well as all other business men of this city and vicinity, are co-ordinately interested in two public questions that are of unusual importance in the commercial future of Providence. The principal question of the two is the petition of the Grand Trunk Railway for a charter from the State of Rhode Island to operate an extension of its railway system in this State with a terminal at Providence. At the regular weekly meeting of the advisory council of the New England Manufacturing Jewelers' and Silversmiths' Association, held Thursday afternoon, appropriate resolutions were adopted requesting the legislature to grant the charter. The Providence Board of Trade has taken an active interest in the furtherance of the project and sent circular letters to its members inviting expressions of opinion. Among the letters received endorsing the project are those from Nathan B. Barton, of the Ostby & Barton Co.; Walter R. Callender, of the Callender, McAuslan & Troup Co.; John S. Holbrook, vice-president of the Gorham Co., and others.

Mayor Henry Fletcher, who is treasurer of the manufacturing jewelry concern of Fletcher-Burrows Co., received a communication a few days ago from Thomas Allison, commissioner of jurors of the county of New York, summoning him to appear before that official so that his qualifications to serve as a juror could be passed upon. The document says that the person summoned must appear in person and that failure to do so on or before March 11 makes the person liable to a fine of $50. The letter was addressed to Henry Fletcher, room 62, 180 Broadway, New York, where the Fletcher-Burrows Co. has had an office for many years. The letter was forwarded from the New York office to the factory at 53 Clifford St., this city. Mayor Fletcher said he did not understand how the mistake was made, as he has never claimed residence in New York. He says that he does not intend to go on to New York and will take the chances of incurring the commissioner's displeasure by replying by letter. In his letter the Mayor stated that as he never resided in New York, but has lived in Providence for 40 years and served as a member of the City Council for 11 years, as well as a previous term as Mayor, he thought that he was exempt.

Peter A. Chisholm, Gloucester, Mass., formerly one of the prominent jewelers of that city, who retired about 10 years ago and was succeeded by his brother, died Feb. 27 at the Elliot Hospital in Boston after a surgical operation. He was 72 years of age.

The sale of the stock of Charles W. Crankshaw, which was noted at the time it began in these columns, has proved a success. Herman Briggs, auctioneer, Chicago, has had charge of the sale.

H. H. Schaul, a well known jeweler of this city, is planning the erection of a handsome apartment house at the corner of E. Harris and Peachtree Sts., where he some time ago purchased a building lot 50 x 150 feet. The improvements which he contemplates putting on this site will cost between $80,000 and $100,000.

New York, March 7, 1910.

Notice to the Trade

Owing to a stenographic error the text of the decree of Judge Lacombe of February 4, 1910, on the motion for a preliminary injunction in the case of the Gorham Manufacturing Company vs. F. & M. Weintraub contained in the third paragraph the words, "in combination with a lion, anchor and letter G," which were part of the order as originally presented by the solicitor for the Gorham Manufacturing Company, but which were cancelled by Judge Lacombe in signing the order. The correct text of the decree is therefore here published and the trade will be guided thereby.

It is desired to give the republication of the order of Judge Lacombe in its corrected form equal publicity to that accorded the former order containing the error referred to. We desire to reiterate that not only is the imitation of the Gorham Manufacturing Company trade mark, consisting of a lion, anchor and letter G in the form of the infringing mark containing these three symbols alone objected to, but that the Gorham Manufacturing Company will continue to enforce its rights against parties using a combination of the letter G with a lion and another symbol or a combination of the letter G with two other symbols in imitation of its own trade mark.

We desire to take the full responsibility for the error in the publication of February 23, here referred to; the copy of the previous order having been furnished by us to the Gorham Manufacturing Company and by them to the Jewelers' Circular Publishing Co., and having been forwarded by the Gorham Manufacturing Company to the Jewelers' Circular Publishing Company in the exact form sent to them.

HUGO MOCK,
Solicitor for the Gorham Mfg. Co.

Frederick Weintraub and Morris Weintraub, co-partners doing business under the firm name and style of F. & M. Weintraub, Defendants.

IN EQUITY.

The complainant having moved for an injunction herein pending the final determination of this cause and said motion having been argued before this Court on the 7th day of January, 1910, by and for counsel for the complainant and defendants herein; and on reading the bill of complaint and affidavits in support of said motion in behalf of said complainant and the affidavits in opposition to said motion in behalf of said defendants:

Now, upon the application of the complainant, and on reading and filing the bill of complaint and the affidavits on behalf of complainant herein,

ORDERED that the defendants, Frederick Weintraub and Morris Weintraub, their servants, agents, attorneys and workmen, be, and they hereby are, and each of them is, restrained, enjoined and prohibited from making, offering or selling any silverware or analogous articles bearing the trade mark complained of in said bill of complaint or any imitation or simulation of said trade mark or from marking any silverware or analogous articles with any imitation or simulation of the trade mark of complainant complained of or from selling, offering for sale or otherwise disposing of any silverware or analogous articles to which shall be applied in any form or manner whatsoever the trade mark employed by the complainant, the Gorham Manufacturing Company, or any simulation or imitation thereof calculated to deceive or in any other way infringing upon said trade mark employed by the complainant, the Gorham Manufacturing Company.

ORDERED that this injunction Pendente Lite shall remain in force and effect until the final determination of this cause, upon filing with the Clerk of this Court a renewal approved by a Justice of this Court of the security bond hitherto given by complainant on the restraining order hitherto granted, which security bond shall be renewed to extend until the decision on final hearing.

Signed at New York, N. Y., this 4th day of February, 1910.

E. HENRY LACOMBE,
U. S. Circuit Judge.

THE GORHAM MARK

NOT A GOVERNMENT STAMP

but the Gorham trade-mark  just as surely certifies to the quality of Sterling Silver as does the British hall mark, and it is so generally known to the public that goods bearing this mark are readily accepted without question. The prices are no higher than asked for goods less well known, and oftentimes of inferior quality.

For sale only by Jewelers.

Large Gem Importations Continue.

NEITHER the high price of diamonds in Europe nor the fact that for the past six months we have been importing into this country one of the greatest stocks of gems that has ever come to the trade, seem to in any way affect the amount of the purchases by diamond and precious stone importers in the markets of Europe, because the importations into the country still show no signs of decrease, but, on the contrary, indicate that during the present fiscal year the Government will collect the greatest amount of duty upon precious stones that has ever come into the Treasury.

The importations of gems for the last month, the figures of which have just been made public, show that the total amount which passed through the Appraiser's stores at New York was $3,731,103.70, or about $800,000 more than the figures of February of last year, and, in fact, ahead of any previous February except 1907. Of these importations the cut precious stones and pearls were valued at $3,145,503.49, and the uncut $585,594.21, the great increase over the previous year being in the first-mentioned class. The uncut stones, principally diamonds, aggregate in value but slightly more than the rough imported in February of last year.

That the continuance of the large importations of gems bespeaks confidence on the part of the members of the precious stone trade goes without saying. The newspapers of the country have even taken the attitude that it indicates the fact that the era of prosperity in this country has returned and is on a solid foundation.

A comparison of the figures showing the importations of gems at New York during February in the last 14 years is interesting, and may be made from the following table:

Feb.	*Cut.*	*Uncut.*	*Total.*
1910....	$3,145,509.49	$585,594.21	$3,731,103.70
1909....	2,348,012.42	568,698.13	2,916,710.55
1908....	175,859.33	24,573.81	200,443.14
1907....	3,456,284.00	819,016.00	4,275,300.00
1906....	1,999,475.95	1,067,560.25	3,067,036.20
1905....	1,732,965.39	674,123.64	2,407,089.03
1904....	1,170,436.85	637,943.02	1,808,379.87
1903....	1,036,783.32	646,577.19	1,683,360.51
1902....	1,023,154.32	434,177.36	1,457,331.68
1901....	1,171,313.60	604,760.14	1,776,073.74
1900....	533,796.70	44,244.09	578,040.79
1899....	737,180.69	482,802.46	1,219,983.15
1898....	338,309.17	629,473.60	967,782,77
1897....	43,696.80	156,141.72	199,838.52

Two Examples of Injustice to Jewelers.

JEWELERS have had much for which to thank the prosecuting authorities of their various towns in the past for the aid given them, not only in capturing malefactors but in protecting their stocks, but that they can be victims of misjudgment on the part of these same authorities is clearly evident in two stories which appear in the columns of this issue. In both these instances the jewelers, though apparently innocent of any wrongdoing, and themselves victims of crooks, have been made to suffer severely for the unfounded suspicion of the police, who in one case caused the conviction of an innocent dealer and his clerk on apparently no evidence, and in the second caused a jeweler who had been robbed by thieves to appear before the community as having robbed himself and then making a false charge. In neither case do the victims of the police appear to have any substantial redress.

> Business success is built, in great part, on good advertising.

The first instance shows an unusual miscarriage of justice. A New York jeweler who was visited by a check swindler and offered a check of which he was suspicious sent his watchmaker over to Jersey City to have the check certified at the bank. As it turned out, the check was genuine, but had been raised by the swindler from $2.25 to $65. When the watchmaker presented it at the bank the drawer of the check was notified and the watchmaker was arrested. Later, when the jeweler came over to inquire what had become of his watchmaker, he, too, was arrested. Despite the fact that the real swindler was later convicted in New York and sent to prison, the jeweler and his watchmaker were tried in the New Jersey court and both convicted of forgery. Had it not been for the fact that a number of friends of the victims interested themselves in the case these two men would have been railroaded to jail. However, an investigation disclosed there was no evidence against them whatsoever; that they were the forger's victims instead of his accomplices, and they had done nothing that an honest merchant would not do under the circumstances. The court on March 1 honorably discharged them with regret for the mistake that had been made. But in the meantime the men have not only lost what little money they owned, but in addition have suffered injury to their reputation through the conviction.

The second instance was that of a Philadelphia jeweler who, early last month, reported that he had been robbed of about $9,000 worth of stock by burglars who drilled through the back of his safe and abstracted the most valuable articles that he carried. Instead of co-operating with him in running down the burglars the Philadelphia police immediately began to cast suspicion on his story and find incidents in his past life which they thought would reflect upon his credibility. Not only did they do this, but they made their suspicion public in interviews with the newspapers in such a way as to hurt the jeweler's reputation. Unfortunately for the police, however, absolutely no motive could be shown for such action as they accused the jeweler of, as the loss fell entirely upon the jeweler, who owed practically nothing for the stock and had no burglary insurance of any kind.

While in the New Jersey case the action of the authorities may be put down as overzealousness and the fact that the jewelers' interests were not properly taken care of by their attorneys, the Philadelphia case offers

He was then asked if he had not forgotten to declare anything dutiable. He made no response. He was searched and three cases of jewelry were found concealed about his person, part of which was in an overcoat. The jewelry included a number of diamond rings. He was arraigned before United States Commissioner Ross and remanded to police headquarters. He was later held to await trial.

The executive committee of the New York Board of Trade and Transportation has decided to call a State convention to be held in the rooms of the Chamber of Commerce, Rochester, N. Y., beginning on Wednesday, March 30, at 10 A. M., for the purpose of considering the advisability of amending the State law for the taxation of manufacturing corporations, so that their taxation upon capital and surplus, outside of real estate and special franchises, will be uniform throughout the State, and will protect them from inequitable taxation upon their machinery, tools, etc., as is done in other nearby States, greatly to the advantage of their manufacturing corporations, and to the advantage of such States by increasing the value and amount of their taxable property, and by the increase and expansion of manufacturing in such States.

A unique invention for automatically lighting and extinguishing the gas in the jewelry store at 370 Fulton St., Jamaica, has been installed by B. R. Smith. The invention grew out of the discomfort entailed by the proprietor in making journeys Sundays, nights and mornings, from his home at 83 Flushing Ave. to his store for the purpose of seeing that the gas was lighted all night. The scheme was finally worked out. A master clock was secured. A copper plate with points of contact was attached to a striking wheel in the clock. These points of contact were so arranged that at the required hour, revolving as the plate revolved, they touched the projecting wires connected with an electric battery. This contact completed the circuit and the electricity running through the wires tripped the magnet attached to the mechanism on the jet. This in turn lighted or extinguished the gas by means of a stopcock. The gas is now automatically lighted at 8 P. M. and put out at 6 P. M.

Over 100 antique gold snuff boxes and bonbonnieres, together with some specimens of Japanese ivory carvings, comprising the collection of the late James A. Garland, were sold at auction in the rooms of the American Art Association recently. They brought a total of $51,009. The collection, which was considered the most important one in this country and second only to the Jones collection in the South Kensington Museum in London, contained specimens of such goldsmiths of the reigns of the Louis, the Directoire and the Régence as Roncel, George, Babel, Auguste Laterre, Jacques Roettiers, Pillieux and De Machy. Some of the miniatures are attributed to Petitot. The box to fetch the highest price was an octagonal gold snuff box with a lid on which in a field of green enamel over an engine-turned gold ground is painted a subject, "Sportive Cupids," in the manner of Boucher. The maker's mark is "L. R.," Vieux, Paris, Louis Regnard, 1743. This box was sold to O. G. Smith after spirited bidding with Duveen Bros., for $4,050. After the Garland sale a collection of 55 old watches belonging to F. T. Proctor, Utica, N. Y., was sold at auction. They brought $1,034. A gold case watch with white enameled dial, with back enameled in blue surrounded with brilliants, with a miniature of a young lady and gentleman, maker unknown, Louis XVI., was sold to George D. Dery for $35.

An involuntary petition in bankruptcy has been filed in the United States Court of the Eastern District, against Thorvald C. Gay, retail jeweler at 105 Hamilton Ave., Brooklyn, by these creditors: Theo. Yankauer & Co., $1,152; Hayden W. Wheeler & Co., $1,289; Rothschild Bros. & Co., $79. The petition alleges an act in bankruptcy founded on the statement that the jeweler has acknowledged in writing his ability to paid his debts in full and has consented to the adjudication. In the petition asking for the appointment of a receiver the total liabilities are said to be about $4,000. John J. Hastings was appointed receiver under a bond of $1,000. Prior to the filing of the petition in bankruptcy the alleged bankrupt circulated a composition agreement among his creditors for a settlement at 30 cents on the dollar and a majority in number and amount of his creditors accepted it, including the petitioning creditors in this bankruptcy action. The filing of the petition in bankruptcy was made necessary, it is said, by reason of the fact that several creditors refused to accept the composition unless paid in full. Mr. Gay was originally in the employ of Theodore Kartevold in New York as a watchmaker and for several years afterward with J. G. Norman at the present address, 105 Hamilton Ave., in charge of the jewelry department. In September, 1907, he bought the jeweler's stock and good will and took a six years' lease of the store.

William J. Gilhooley, who was arrested back in 1902 on a charge of stealing $3,000 worth of diamond rings from the store of A. A. Webster & Co., 440 Fulton St., Brooklyn, and who afterward jumped bail, but was arrested on another charge in New York and sentenced to seven years in Auburn Prison, completed his sentence last week and was brought back to Brooklyn by Lieutenants Van Wagner and Murphy of the District Attorney's office. When his term was about to expire District Attorney Clark was informed of the fact and took steps to bring the man back to Brooklyn on a bench warrant. Judge Jackson, in Part 2 of the County Court, held the prisoner in $2,000 bail, in default of which he was sent to the Raymond St. jail. Gilhooley is 30 years old. The indictment under which he is now being held charges him with grand larceny in the first degree as a second offense. He called at A. A. Webster & Co.'s store, Aug. 19, 1902, and asked to be shown some diamond rings. A tray containing a number of rings was shown him, and when he had diverted the attention of the clerk he decamped with the gems. He was identified by a picture in the Rogues' Gallery and was run down by detectives who knew him and his manner of operation. His bail at first was fixed at

Included in the list of names announced last week by Mayor Gaynor as members of the committee to represent the city at the official reception to ex-President Roosevelt on his return to this country, are the following jewelers: Ludwig Nissen, of Ludwig Nissen & Co.; August V. Lambert, of Lambert Bros., and Wm. D. N. Perine, of Dreicer & Co.

John Oakes, who for over 60 years conducted a store in the Maiden Lane district, died Thursday at his home, 15 Lincoln St., Glen Ridge, N. J. He was the oldest resident of that place, being 91 years old. While in business in the Maiden Lane district he made a specialty of chronometers and nautical instruments. He retired from business a few years ago.

A fire in the building at 52 Park Pl., in which is located the firm of Geoffrey & Co., did some damage last Thursday before it was extinguished. The fire started between the ceiling and the roof of the elevator shaft, probably caused by defective insulation of an electric motor. An automatic alarm summoned the firemen. A quantity of jewelry was on the benches of the factory, and the men carried it to a safe and then went out the other side of the building, which extends to Barclay St.

The board of directors of the Jewelers' 24-Karat Club have recommended that another beefsteak dinner be given by the club. The previous events of this kind proved very enjoyable, and it is expected that this year the dinner will call out a large number of the club's membership. It is planned to hold the dinner about the middle of April in conjunction with the April meeting of the club. The dinner will be given with the compliments of the club, to members, and to members only. Notices will be mailed to members of the organization during the week, giving the date and place at which the dinner will be held.

On an appeal from the Circuit Court of the United States Southern District of New York to the United States Circuit Court of Appeals in the case of the United States vs. Benziger, it was held that rosaries are dutiable according to the component material of chief value. The articles in controversy consisted of rosaries composed principally of beads. The collector classified them as articles in part as beads under Par. 408. The importers contended that the articles were dutiable according to the component material of chief value as manufactures of wood, metal or pearl, as the case might be. The decision of the lower courts against the Government was affirmed.

Jacob Reid, who is about closing up his watchmaker's shop at 344 Hudson Ave., Brooklyn, was arrested recently by Detective Walter Conlin, charged with the larceny of a watch which had been left with him to be repaired. The owner of the watch is Alfred C. Richartz, of 273 Grand Ave. He had given the timepiece to Reid about three months ago, and he had been trying to get it ever since. Every time he wrote or called for it something else was wrong. Richartz, whose patience had become exhausted, last week went with the detective to the store, only to find that Reid was giving up business. He made a grab for the jeweler, who took a pawn ticket from his pocket and tore it up. The detective pieced the fragments, and found that it was a ticket for Richartz's watch. It had been pawned for $3. The accused pleaded not guilty to a charge of larceny, and Magistrate Tighe held him for hearing.

The next exhibition and dinner of the Engravers' Art Club of New York will be held April 2 at Allaire's Hall, 192 Third Ave. The larger part of this organization is composed of general letter engravers employed by the leading retail silversmiths and jewelers of New York. Men engaged in kindred trades, however, are eligible to membership. The club is now in its fifth year and has accomplished much towards creating a social and professional brotherhood for engravers of this city who are unable otherwise to meet often. It is the custom of the club to place the best specimens of work obtainable on the walls of their meeting rooms and discuss all subjects pertaining to their craft. The club is now completing an alphabet of the Old English letters; each letter is discussed and criticized at the meetings of the club, and each form is voted on and finally passed as bearing the majority's approval. It is the intention of the club to follow up this scheme with other alphabets. The annual exhibition of engraving, stationery, bank note work, illuminating stamping, die engraving, etc., has attracted a large amount of very favorable criticism and the present aim of the club is to extend this work and bring it to the attention of a larger audience. It is expected that the dinner will be attended by over 100 members and guests of the club.

The United States Circuit Court of Appeals will probably hear argument this week in a case as to classification under the tariff of 59 pearls, purchased by Morris Guggenheim in Paris and intended for a necklace for Mrs. Guggenheim. The pearls were purchased at the Paris store of Tiffany & Co., but were delivered to Mr. Guggenheim from the firm's store in this city. The case has been in the courts for a long time, the question involved being whether the pearls in question as imported were dutiable as pearls in their natural state, not strung or set, and subject to a duty of 10 per cent., or whether they constituted a necklace, and as such fall within the provision of the tariff providing for a duty of 60 per cent. on pearls strung or as jewelry. The pearls were imported in 1902 and were classified at the customs house as pearls in their natural state. Several months after their entry the information was received by customs authorities which started an investigation into the circumstances attending the importation of the gems. The Collector of Customs later made a reliquidation of the entry demanding a duty of 60 per cent. on the pearls. The matter has been argued in the lower courts and decision rendered in favor of the importers, following the decision of the Board of General Appraisers to this effect. The appeal, which now comes up in the United States Circuit Court of

New York Notes.

(*Continued from page 87.*)

Appeals, when settled will be of much interest to the trade.

H. Esaac, of Kahn & Co., 194 Broadway, returned last week from a trip to San Francisco.

The Meriden Co. announces that after May 1 it will be located at its new store, 49 W. 34th St.

M. B. Rosenback, of Wm. I. Rosenfeld, returned from Europe Saturday morning on the *Lusitania.*

Newton H. Rogers, of Hayden W. Wheeler & Co., 170 Broadway, returned from Europe, Saturday, on the *Lusitania.*

The Manufacturing Jewelers' Board of Trade has rented an office in the Silversmiths' building, 15 Maiden Lane, and will open it May 1.

Edwin P. Lobel, who it was announced recently had decided to represent another firm in this city, has decided to remain at his present office and will continue in business for himself.

Judge Hough, in the United States District Court, granted a discharge in bankruptcy, Monday, to H. & A. Abrams, 377 Broadway. The liabilities are $18,173. The nominal assets were placed at $9,029 in the schedules filed some time ago.

Robt. H. Ingersoll & Bro., 45 John St., are having plans drawn for a three-story factory building to be erected at Trenton, N. J., as an addition to their present plant in that city. C. H. Ingersoll, of the firm, is at present in Mexico on a business trip.

S. Richard Gross denied, last week, as without foundation and as untrue the announcement that he was to cover the south and go to the Pacific Coast for the Steeber, Kraus Co., Newark, N. J. Mr. Gross represents the E. A. Bliss Co. and covers that territory for this house.

Lazar Peischow, a jeweler at 1872 Third Ave. until he went into bankruptcy, last December, was arrested last week by Marshal Henkel on a writ of ne exeat, signed by Judge Holt of the United States District Court. Peischow, who is alleged to have concealed a part of his assets, was put under $10,000 bonds.

Andrew J. Dachtera, an optician in business with his brother at 312 Madison Ave. and in Harlem, died at his home, 54 E. 129th St., Friday, in his 34th year. The firm of Dachtera Bros., of which the deceased was a member, was established by Paul J. Dachtera in 1896. On Jan. 1, 1909, he admitted his brother, Wm. M., as a manager of their Columbus Ave. store. Andrew J. Dachtera was admitted in 1902.

The partnership heretofore existing between Morris Eisler and Nathan Sussman under the style of Eisler & Sussman, at 51 Maiden Lane, dissolved March 2d by mutual consent, Mr. Sussman having found it necessary to devote all his time to his retail business in Brooklyn, which has grown to such an extent as to warrant this action. Mr. Eisler has bought out Mr. Sussman's entire interest in the New York business and will continue the manufacture of mountings at the same address under the style of Eisler & Co.

Attleboro.

John Clarke has resigned his position as foreman of the Bristol Mfg. Co.

Charles M. Robbins and A. R. Crosby are touring Florida, Cuba and Nassau.

Alfred H. Baer left last Monday for the west in the interests of the Attleboro Chain Co.

Harold E. Sweet left last Saturday for Atlantic City where he will enjoy a short stay.

Louis Sadler and Fred Perry, of the F. H. Sadler Co., were in New York last week on business.

The W. H. Saart Co. has been compelled to increase its floor space owing to the growth of its business.

Kelly Bros., electroplaters, County St., have enlarged their floor space and installed considerable new machinery.

Harold E. Sweet, of the R. F. Simmons Co., a graduate of Tufts college in 1898, has been nominated as alumni trustee.

The school for manual training which has recently been established is proving to be very satisfactory to the citizens of the town.

George E. Kissick, formerly salesman for Maintien Bros. & Elliott, North Attleboro, has accepted a position with the C. D. Lyons Co., Mansfield.

As noted last week, Tyndall Bros. have incorporated under the name of Tyndall Bros., Inc., with a capital of $25,000. John Tyndall is president and James Tyndall is treasurer.

The A. M. B. Co. is the name of a new concern starting to manufacture jewelry novelties at 30 County St. The members of the firm are: H. E. Avery, S. E. Brown and J. E. Murphy.

The new factory of the Frank Mossberg Co. was dedicated last Wednesday by a public reception. The handsome quarters were inspected by hundreds of people. Each visitor was given a souvenir.

A number of the Attleboro manufacturing jewelers have petitioned the railroad commissioners of the State asking that they give a hearing relative to the establishing of new commutation rates between Attleboro and Boston.

Following the announcement a few days ago that the Adams Express Co. had raised the minimum rate on small packages from 15 to 20 cents, jewelers have been discussing taking some action through the Board of Trade and other associations. It is pointed out that the jewelers are especially hard hit on account of the many small packages which they send out.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended March 5, 1910.

The deceased was born in Meriden, Oct. 23, 1859, and was at one time with the Wilcox Silver Plate Co He was a director of the Home National Bank, trustee of the City Savings Bank and was associated with several fraternal organizations.

TRUSTS AND THE RETAILER

IF TRUST methods should be successfully introduced into the jewelry business, it is not to be expected that the Retailer would escape their influence.

¶ In other lines of trade where trusts have broken in and made headway, they have boldly set up chains of competitive stores with cut prices deliberately aimed to drive the independent Retailer to the wall.

¶ The octopus has many tentacles and they are aimed in all directions. The fight is on. Right-minded Manufacturers, Jobbers, Retailers, all who have a spark of manly independence, are concerned together. Help the fight by *dealing with independent houses.*

¶ We are sure this is a bad year for trusts. There are signs and omens. In any event, one thing is certain: this house will continue to stand firmly upon the bedrock of absolute independence.

D. C. PERCIVAL & CO., Inc.

373 Washington St., BOSTON, MASS.

LOYALTY TO THE RETAILER

THE POLICY of this house is to conserve the interests of the retail trade by conducting business along strictly wholesale lines. We do not sell at retail. This established principle is well known and appreciated. Lines include

e number of jewelers, principally rs, last Thursday night, attended al banquet of the Pittsburg Asso- f Credit Men, held at the Fort el. Nearly all of the Pittsburg wholesale houses were repre- d. The members in the trade have s organization to be a good thing to be connected with, because of the manner in which it looks after credits. One of the features of the evening was a guessing contest in which the women participated. A minstrel entertainment also was a feature of the entertainment, while popular songs were sung during the serving of the menu. No speechmaking was indulged in.

Sam F. Sipe has received a settlement from the insurance companies as a result of the recent fire, during which his establishment was damaged by water. Mr. Sipe went ahead and repaired the damage to the ceiling and walls and will take chances with the owner of the building in being allowed for this expense. His stock was insured in eight different companies and a settlement was agreed upon March 1, when he received a check the following day for his loss. Mr. Sipe was even allowed damage on some watches which were in his safes and which it appeared had been damaged because of the dampness of the building. This loss, however, was only trifling. Mr. Sipe is now conducting a fire sale.

One almost imagines he is walking in the halls of a palace as he passes through the corridor of the enlarged establishment of the W. J. Johnston Co. Marble partitions and counters, the framework of marble and the windows of beveled edge plate glass, make a picture beautiful to behold. The corridor is 30 feet in length and the new rooms added to the establishment are situated on either side of it. Painters and decorators were still at work, last week, on the quarters of the company, which are situated in the Union Bank building. There is no better fitted establishment in Pittsburg than this concern. One must see it to appreciate just how pretty it is. The store is to be refurnished. Special quarters have been provided for the women employes of the place.

Traveling representatives visiting the trade at Pittsburg last week were: William Holme, B. A. Ballou & Co.; Mr. Sylvia, Pairpont Corporation; F. F. Gibson, Gibson, Krugler Co.; S. W. Pickering, A. Ludeke & Co.; T. K. Benton, G. W. Parks Co.; H. F. Morway, E. Ingraham Co.; William F. McGowan, F. T. Pearce Co.; Mr. Vaslett, Fletcher-Burrows Co.; Mr. Pierce, T. I. Smith Co.; H. A. Bliss, Wordley, Allsopp & Bliss Co.; A. Rutherford, Taylor & Co.; Mr. Williamson, J. J. Sommer & Co.; A. E. LaVigne, Mathey Bros., Mathez & Co.; J. M. Morrow, American Watch Case Co.; A. L. Halstead, Barbour Silver Co.; James A. Goewey, David Kaiser & Co.; George H. Thomas, Scharling & Co.; F. C. Winship, Wright Rich Cut Glass Co.

The banquet committee of the Jewelers Twenty-four Karat Club, of Pittsburg, held a meeting, last Tuesday night, and decided to give their annual banquet Tuesday, March 29, the Tuesday following Easter. The banquet will be held in the English room of the Fort Pitt Hotel. Speakers have been invited from New York, Boston and Philadelphia. The presidents of all of the jewelers' social clubs have been invited to be present, as honor guests of the occasion. The club will this year appoint an entertainment committee to arrange for Summer outings, athletic events, both of outdoor and indoor sports. The club also will likely make provision for admitting to membership those clerks who compose the Retail Jewelers' Bowling League and the baseball teams. The members of the banquet committee are W. O. Harrison, of the Marsh, Brown, Mather Co.; Otto Siedle, of R. Siedle & Son; J. A. Reed, of J. R. Reed & Co.; August Loch; Charles Holyland; Harry Heeren, of Heeren Bros. & Co.; Sam F. Sipe; C. S. Wiley and B. K. Elliott. Other members will be added to the committee later. Steele F. Roberts, the president of the club, may be induced to serve for another year, and will do so if the members want him. The meeting to elect officers will be held at the rooms of the Pittsburg Chamber of Commerce, March 14.

Harrisburg, Pa.

TRADE CONDITIONS.

There has been a slight improvement in business among Harrisburg jewelers through the advent of fine Spring weather, and the prospects for the Easter season trade are now good.

George W. Hess, of Bloomsburg, has been ill from the grippe for several days.

W. H. Ludwig had the contract to place transparent dials four feet six inches in diameter on the Chambersburg town clock.

L. A. Faunce is a member of the newly appointed auditing committee of the Motor Club of Harrisburg. C. C. Cocklin is a member of the roads committee.

Francis Yoder, a Shamokin printer, has foresaken the case to enter into partnership with his father, Enos D. Yoder, in the jewelry busines in that town.

William Campbell, a Rockhill jeweler, who recently sprained an ankle by a fall on the ice, is in a serious condition. His age retards his speedy recovery from the effects of the fall.

Application has been made for a charter for the Carlisle Board of Trade with 100 members and these officers: President, James W. Eckels; secretary, C. F. Humrich; treasurer, D. E. Brindle.

Kubin & Rubin, of this city, began a closing out sale of their stock of jewelry, etc., at their branch store, 18 N. Hanover St., Carlisle, the sale of the building necessitating their moving before April 1.

The Seth Thomas Clock Co. is placing the eight-day five-foot dial clock on the new Telegraph building on Federal Square. It has a pendulum ball weighing 28 pounds, and the whole equipment weighs 500 pounds. A small dial located on the works of the clock on the attic floor of the new building will be connected by tubing with a large dial on top of the wall, and all correction of time will be made from the small dial on the attic floor.

Gustave G. Rangelle, 1507 Poydras St. New Orleans, La., recently reported to the police that his store had been robbed of watches and jewelry valued at $84. The robbery occurred while Mr. Rangelle was absent from his establishment.

Otto Loomis, Lakeview, Mich., has moved to Northville, in the same State, where he has purchased a jewelry store. He sold part of his stock in Lakeview and moved the balance to the new location.

We supply our product to a limited number of the best wholesale watch houses in the country. They push the sale of Illinois movements — not because of the superior quality alone — but because of the established selling prices, which insure a satisfactory profit to them as well as to their customers.

dwig Nissen Co.; H. J. Dietz.

"Tom" O'Neill charged by Emil Noel, diamond dealer in the Heyworth building, with larceny by bailee, skipped his bail, last week, but was arrested a short time afterwards and will be tried this week.

The family of W. R. Stevens, who represents the Bay State Optical Co., are quarantined on account of scarlet fever, two out of the three children being affected with it. Mr. Stevens is on a trip to the Pacific Coast.

Mrs. Amelia Metzenberg, mother of Lee Metzenberg, jewelry buyer for Sears, Roebuck & Co., died March 4, aged 59 years. Furneral services were held at Furth's Chapel last Monday, the interment being at Mount Israel cemetery.

Adolph Zadeck, whose affairs have been in the hands of a trustee, is offering a settlement at 25 cents on the dollar. He has already paid 30 cents, but found himself unable to meet his payments. He owes $3,637, of which $2,000 is for borrowed money. His assets are estimated at $1,637.

Mary Whalen, 30 years old, 315 Austin Ave., was fined $5 and sentenced to 30 days in the House of Correction by Municipal Judge Newcomer at the Desplaines St. court, last week. She was arrested after breaking a window in the jewelry store of John C. Leppart, 917 West Madison St.

Al Kolker, traveler for the Juergens & Andersen Co., writes to friends here that he narrowly missed being a victim of the land slide that swept away the two trains on the Great Northern road, at Wellington, Wash., last week. Mr. Kolker was just one train ahead of those that were wrecked.

Loftis Bros. & Co. entertained their employes at a banquet and theater party on the night of March 1. Plates for 450 were laid at the "College Inn" and seats for a like number were reserved at the Colonial Theatre. A toast by Joe Finn was neatly responded to by S. T. A. Loftis and the affair was voted a success in every way.

Among the buyers in town last week were: E. H. Hahn, Stolte, Dangel & Foss Co., Reedsburg, Wis.; A. W. Nisbet, Dimondale, Mich.; W. J. Gamm, Madison, Wis.; L. Will, Rahm & Will Iron Mountain, Mich.; N. Peterson, Superior, Wis.; J. A. Sommer, Hindsdale, Ill.; J. I. Green, Pratt, Kans.; J. C. Culbertson, Piper City, Ill.; H. S. Siebel, Saginaw, Mich.; H. D. Wupperman, Barron, Wis.; E. B. Wade, Galesburg, Ill., and W. T. Jennings, Sterling, Ill.

A petition in involuntary bankruptcy was filed here, last week, against the Trinity Electric Clock Co., 92 Lake St., the petitioners alleging that the concern had confessed judgment on Feb. 28 to Fritz Goetz for $1,420. The petitioners also allege that the corporation owed $26,000 and has assets of $21,000. The American Trust & Savings Bank was appointed receiver.

Jos. Rifkin, of L. Heller & Son, is on his way to this city, where his arrival is awaited with a great deal of interest. He is bringing along with him the first specimens of the new synthetic (Hope) sapphires. Their appearance in New York recently, stirred the jewelry district to some extent, and they are now expected with great interest here. The new synthetic sapphire was discovered recently by the eminent French chemist, Prof. Verneuil, and his American assistant, I. H. Levin, at the laboratories of the Hellerite Co. in Paris. This discovery has been since spoken of in the American press.

The announcement that Morris H. Berg had sold out his interests and withdrawn from the firm of Hyman, Berg & Co., came as a great surprise to the trade here, last week. Mr. Berg had been connected with the jewelry trade here for 42 years, beginning his connection in 1868 with Wendell & Hyman, and when this firm dissolved he went with S. Hyman & Co. In 1889 he was admitted to partnership in the present firm and has always had charge of the diamond department. Mr. Berg will spend the Summer in Europe, accompanied by his wife, and will return here in the Fall. Regarding his plans for the future Mr. Berg is reticent.

The regular annual meeting of the stockholders of the Illinois Watch Co. was held at the office of the company in Springfield, Ill., on Monday, Feb. 28. The reports which were made to the stockholders were of most encouraging character, and after consideration of the same they proceeded to the election of directors of the company for the ensuing year. The following were chosen as directors: John W. Bunn, Henry Bunn, Geo. W. Bunn, Jacob Bunn, Geo. A. Bates. The directors then held the first meeting of the new year and selected as officers of the company the following: Jacob Bunn, president; Henry Bunn, vice-president, and Geo. A. Bates, secretary.

The Herman Keck Mfg Co., through its attorneys, March 1, filed, in the United States Circuit Court of Appeals, a transcript of record on appeal from the decision of the United States District Court adjudging the Keck Co. insolvent. It is reported that the lawyer fees in the Keck Mfg. Co. case now amount to $16,325 and that all of the bills are not in. Intervening petitions have now been filed on behalf of Amanda and Emma Keck for money loaned, for certain creditors of the Duhme Jewelry Co. and for the attorney, Judge Bode, on a claim. These also have been referred to Referee Greeve. Judge Sater of the United States District Court, Saturday, ordered that the sum of $2,050.00 be advanced to Bankruptcy Referee Greve for services rendered in the Keck Co. bankruptcy case. This is not to prejudice any additional claims that may be put in later

Columbus, O.

A bill modeled after the New York law, making it an offense for a merchant to obtain credit or extension of credit by making false statements concerning his financial affairs, passed the House of Representatives last week, and will undoubtedly pass the Senate without any material opposition. Credit associations composed of business men and credit rating agencies are working for the bill.

M. J. Daniel, against whom an involuntary suit in bankruptcy is pending in United States Court here, returned to Columbus, Thursday evening, from Hot Springs, Ark., where he had been with his wife. A more speedy adjustment of his affairs and a more satisfactory one is expected now, as he can be of assistance to the attorneys, who were practically at a standstill on account of his absence.

The police last week sent out the following description of the colored man who stole a diamond ring from a tray in the store of L. W. Lewis: Age, 35 to 40 years; dark brown complexion; 6 feet tall; weight, 180 pounds. He wears a mustache, and the second finger on his left hand is off at first joint. He has large hands. The man may wear or have with him a K. of P. emblem. He is a fluent talker.

Albaugh & Pickering, 86 N. High St., were victims of a confidence man last week. He went into the store at a time when Mr. Pickering was absent, and introduced himself as a relative of Mr. Pickering, saying he was working at the Norfolk & Western shops. He bought a watch and gave an order on his salary for the amount. When Mr. Pickering came in the fraud was discovered and the police were notified. The watch was recovered the next day in a pawnshop.

The next annual convention of the Ohio Retail Jewelers' Association will be held in Columbus May 2, 3 and 4, according to a letter received by L. W. Lewis from the president of the association, Frank D. Ausman, of St. Mary's. The decision to meet in Columbus was arrived at by the executive committee, which recently met. This will be the first meeting of the association at Columbus. An effort will be made to organize the Columbus jewelers before or during the convention.

Omaha.

L. E. Griffith is making a business trip through the State.

C. C. Katleman, with H. Greenblatt & Co., is in Iowa on business.

S. W. Lindsey has been confined to his home for a week by an attack of rheumatism.

Harry Greenblatt, of Harry Greenblatt & Co., is traveling through the State on business.

O. C. Homan, with the C. B. Brown Co., visited Des Moines, Ia., for a few days, last week.

J. A. Hardig, traveling representative for A. F. Smith Co., is making a business trip through Iowa.

J. W. Wallace, Bancroft, Nebr.; Don Weber, Arlington, Nebr.; Harry Dixon, North Platte, Nebr., and Mr. Fitzgerald, Columbus, Nebr., were in this city during the past week, replenishing their stocks.

Lured by the display of hundreds of flashing rings in a window of Gustafson & Hendrickson's jewelry store, a thief smashed a section of heavy plate glass with a piece of iron pipe, early last Wednesday morning, and made away with two trays of cheap rings. According to the proprietors, the loss is about $200. Gustafson & Hendrickson, a few weeks ago, were relieved of several diamond rings. The thief, entering the store one Saturday when the place was crowded, deliberately went to the show window and helped himself.

A new jewelry store has been opened on the third floor of the Paxton Block by Fritz Sandwall, formerly in business in South Omaha. He sold out his interest there to the Jacobson & Furen Co. Mr. Sandwall then left for a European trip of several months, arriving home late in the fall. Associated with Mr. Sandwall is C. A. Johnson, formerly in business in Creston, Ia., for 10 years. Mr. Johnson is a graduate optometrist. Twenty years ago both men were with the late A. B. Huberman and have since been in business together in Des Moines.

The following traveling representatives called on jewelers in this city, last week: Mr. McDonald, Wolcott Mfg. Co.; Mr. Noyes, Bates & Bacon; Bert Ganz, Leroy Mfg. Co.; C. M. Davis, De Passe Mfg. Co.; Jul. F. Schuman, Jr., Wm. Kinscherf Co.; R. B. Carr, Wordley, Allsopp & Bliss Co.; Ed. B. Thaw, Aiken-Lambert Co.; C. A. Starr, M. J. Averbeck; G. A. Jewett, Hamilton & Hamilton, Jr.; L. Zuzzelman, S. W. Farber; Herbert A. Kidder, William Scherr; H. B. Bliss, B. M. Shanley, Jr., Co.; Wm. Green, George L. Brown & Co.; James R. Palmer, Henry A. Kirby; Jack Rothschild, Jacob Rothschild & Co.; Fred C. Kopf, Powers & Mayer; Nelson Hagenauer, Eisenstadt Mfg. Co.

While looking at some rings in the store of C. Rawitser, Memphis, Tenn., an unidentified negro left 50 cents on the counter and grabbed several of the articles and made his escape. The police are now looking for the man.

ent hearing held before Judge the Milwaukee Circuit Court r of F. W. Teschner, of the F. er Jewelry Co., the Court set ransfer of stock and fixtures, chner made to his wife, Ida, hs ago, and also set aside the n of the corporation, the F. W. ewelry Co. Teschner went into luntary bankruptcy, some time he had carefully turned over all y to his wife and had formed Teschner Jewelry Co. Suit was ht against the corporation on behalf of the creditors, but no answer was made and nothing further could be done. The next move on the part of the lawyers for the creditors, Austin, Fehr & Gehrz, was to bring suit against the individuals of the jewelry corporation on a note due at the Merchants and Manufacturers' Bank of Milwaukee. Perfected judgment will be awarded at once and a thorough investigation of the whole affairs will be made In behalf of the assignee, Hugo Kranzlein, possession will be taken of the stock and fixtures and a settlement will be made for the creditors. The court has referred the matter to Court Commissioner McElroy, who will make a thorough investigation of the case, order an inventory and realize as much as possible for the creditors.

Indianapolis.

E. M. Craft has recovered from his recent illness.

J. H. Reed is in Brown County looking after his farm for a few days.

L. W. Arnold, with the Western Clock Co., visited the local trade, last week.

H. A. Winn is erecting two double dwellings at the corner of New Jersey and 28th Sts., at a cost of $3,600 each.

Mr. and Mrs. Charles Mayer gave a box party at the opening of the new Murat Theater on the evening of Feb. 28.

During the last week, Gray, Gribben & Gray moved from 35-37 N. Illinois St. to the northwest corner of Illinois and Ohio Sts.

At a meeting one night last week the Tenth Ward Republican Club indorsed Asher Gray, of Gray, Gribben & Gray, for the nomination for County Clerk.

The 1910 city directory, just issued, shows that there are 70 retail, 11 manufacturing and seven wholesale jewelers in the city. The number shows a gain of 10 retail jewelers.

A number of Indiana jewelers were in this city, last week, among them being: I. H. Barnes, Greenfield; J. A. Pickett, Newcastle; Mr. Cooper, Mooresville; John W. Hudson, Fortville; F. R. Fisher, Kirklin; Gurney C. DeCamp, Shirley, and J. F. Kiser, Muncie.

The police at Anderson have arrested John A. Mitchell, alias Walter H. Miller, for the theft of $1,350 worth of silverware from the C. T. Adams Co., Chicago, for whom he acted as agent. He was formerly a soldier in Company C, of the Tenth U. S. Infantry, stationed at Fort Harrison, near this city.

The Indiana Ave. Merchants' Association was organized last week with about 25 members. Among the members are: W. F. Burns, Albert C. Joss and Edward J. Kappeler, retail jewelers. The association expects to install an elaborate street lighting system in Indiana Ave. from Ohio to Vermont Sts., at the expense of the merchants.

Charles B. Dyer has received an order for 24 bronze, silver and gold watch fobs to be given as prizes at the annual Manual Training High School indoor track meet, this week. The design of the fob pendant is a winged foot surrounded by a laurel wreath and the inscription, "M. T. H. S. Indoor Track Meet, 1910." Mr. Dyer is also making the principal's medal for the meet from a $5 gold piece. Gold medals for each member of the relay team will be donated by Mr. Dyer.

Local jewelers are much interested in an investigation of electric light and power rates charged by public service corporations, which is being conducted by a special committee from the Commercial Club. The companies are permitted to charge a maximum of 10 cents per kilowatt hour. There is a demand for a lower maximum rate, which will have a tendency to assure uniform commercial and domestic rates.

Charles Kenyon, New York, has been arrested at South Bend for the theft of several diamonds from the Frank Jewelry Co., in the latter city, one day last week. Entering the store, Kenyon asked Mrs. Frank, wife of the proprietor, to show him some diamond rings. A tray was placed on the case and, grabbing a pair of earrings worth $150, a ring worth $85 and another ring worth $100, Kenyon ran from the store. When pursued, Kenyon threw the jewelry into a snow drift and the $100 ring has not been recovered.

Local police believe that in the recent arrest of J. Dugger they have captured the man who has smashed the windows in a number of jewelry stores. Dugger has already confessed to breaking the window in the store of Andrew Streng, at 505 Massachusetts Ave., and robbing it. Dugger is a private in Co. E, Tenth Infantry, at Fort Harrison. In breaking the window he cut his hand, and the conductor of a street car recalled taking a man to the fort whose hand was bleeding. Detectives went to the fort and finally located Dugger and his injured hand, Dugger confessing.

San Diego, Cal.

Mrs. H. W. Meadows has succeeded W. W. Meadows & Son.

The bank clearings indicate that business is good throughout the city, those of one week recently showing a gain of 50 per cent. over the corresponding week of last year.

J. Jessop & Sons have been given an order by the San Diego Woman's Club for 150 membership buttons. The buttons are to be of gold and the design is an engraved representation of California poppies, one a bud, half opened, and the other a flower in full bloom.

C. W. Ernsting, of the Ernsting Co., has just paid $106,000 for a 50-foot lot on 5th St., on which a portion of his establishment has been established for 14 years. It is planned by the company to erect a modern business block in the near future, the entire ground floor of which will be occupied by the firm.

Earl Scolen, a boy of 17, pleaded guilty to larceny last week and was sent to the reform school at Concord on a charge of swindling R. C. Hollister, Westfield, Mass. Scolen visited the jewelry store and picked out a ring which he asked to have laid aside for a few days. Later, waiting until but one clerk was in the store, he entered and then asked for the ring, insisting that he had paid for it on the previous visit. The clerk surrendered the ring and the boy disappeared with it. He was later located and arrested by the police and the ring recovered.

ROSE LIGHTING FRENCH GREY

THE GLOW OF SPRINGTIME

ROSE and grey together form an effect so rich as to constitute what may be called a class combination. To wed these colors is one of the fancies of Spring, when the same tone prevail in nature. The artistic possibilities of this charming union are revealed in the Cor and French Grey Jewelry introduced by this house. Accords tastefully with spring modes and milli nery, which establishes the popularity of the line. Innumerable designs in CORAL AND FRENCH GREY LONG CHAINS, HAT PINS, SASH PINS, BROOCHES, NECK PENDANTS.

A. Epstein is president and D. E. Hoken secretary of the Guaranty Jewelry Co., which recently opened a store at 252 Nicollet Ave. They expect later to incorporate and will probably establish branch stores in St. Paul and Fargo, N. Dak.

Among the out-of-town jewelers who visited Minneapolis during the past week were: A. L. Walker, Faulkton, S. Dak.; Mr. Guy and Mr. Carter, with Fritz Guy, St. Cloud; C. A. Brown, Appleton, Minn.; Mr. and Mrs. Max Rabinovich, Grand Forks, N. Dak.

Max Blumencranz, of the Blumencranz Jewelry Co., has gone into the real estate business as a side line, while still continuing in the jewelry business at 235 Nicollet Ave. With A. M. Diamond and a silent partner, he has incorporated as Diamond, Blumencranz & Co.

Local jewelers have been visited by a number of traveling representatives of wholesale houses during the past week. Among the callers were: A. M. Silberragel, Jonas Koch; A. C. Wilson, Kennedy Optical Co.; Mr. Edwards, Whiting Mfg. Co.; Julius Dreyfus, Dreyfus Mfg. Co.; Max Noel, Despres, Bridges & Noel.

The Paegel Jewelry Mfg. Co. is making extensive improvements in its shop at 22 S. 3d St. Repairs are being made, new machinery and benches are being put in, new electric lights are being installed and the entire shop remodeled. When the work is completed the shop will be one of the most modern and best equipped in the city.

Local jewelers are looking forward to an unusually good trade this Spring. The large quantity of snow which fell this Winter, insuring plenty of moisture, and the early breaking up of Winter combine to give promise of an excellent season for the farmers of the Northwest. With a splendid outlook for good crops this Summer and the feeling of confidence which that will instill they are expected to buy still more freely as soon as their Spring seeding is done. Prosperity for the farmers means prosperity for the whole Northwest; hence jewelers are anticipating a good business season.

Toledo.

Mr. and Mrs. Will F. Broer left Wednesday for New York, and from there will go for a month's sojourn in the Bermudas.

Mr. and Mrs. J. J. Freeman left the first part of this month for a trip abroad. They will take the Mediterranean trip and visit other points of interest.

The George Kapp Co., with a capital of $100,000, has been incorporated by J. G. Kapp, J. G. Kapp, Jr., John Kapp and H. Bruce Stone. The company will take over the retail jewelry business heretofore conducted by J. George Kapp, at 415 Summit St. The stock of the new company will be owned by the Kapp family and several outsiders, the stockholders being J. George Kapp and his two sons, J. G. Kapp, Jr., and F. A. Kapp, the latter a student at Ann Arbor, and John and William F. Kapp, brothers of J. G. Kapp. The other stockholders are A. P. McKee, a local attorney; A. M. Schliff, now in charge of the jewelry repairing department, and H. Bruce Stone, the company's watchmaker. The concern has recently added a manufacturing department to its retail business, and expects in the future to greatly widen the scope of its business.

St. Louis.

The Fisher Jewelry Co., Victoria building, has opened a branch store at Alton, Ill.

F. H. Niehaus, dean of St. Louis retail jewelers, is confined to his home by rheumatism.

A. C. Kennedy, president of the Kennedy Jewelry Mfg. Co., is spending a few days in the country.

A new merchants' license has been issued to S. Van Raalte to do a jewelry business at 413 N. 6th St.

A merchants' license has been issued to Fred W. Kuhn to do a jewelry business at 3607 N. Grand Ave.

E. Massa, vice-president of the Bauman-Massa Jewelry Co., has just returned from a business trip to Des Moines, Ia.

The business of the Crescent Jewelry and Loan Co., at 6th and Olive Sts., owned by W. A. Gill, is being closed out at auction.

The Maritz-Kober Jewelery Mfg. Co. has filed suit in Justice Kleiber's Court against Adolph R. Grund on notes aggregating $498.40.

F. W. Hoyt left Wednesday for Texas, and will travel through the south for a few weeks. I. T. Fuller, of the Hoyt Jewelry Co., is in Kansas.

B. Ritzer, for a number of years located at 802 Franklin Ave., has moved to 816 Franklin Ave., the store recently vacated by the Punch Jewelry and Loan Co.

Daniel C. McCarty, Charleston, Ill., stopped in St. Louis last week on his way home from Hot Springs, where he spent some time for the benefit of his health.

Many dry goods merchants who carry jewelry as a side line have been in St. Louis from the southwest during the past week visiting the wholesale jewelry trade.

George J. Hess, president of the Hess & Culbertson Jewelry Co., left Thursday for New York. He will visit other eastern cities and will be gone about three weeks.

H. L. Baker, who has been in business for many years at Brinkley, Ark., is closing out his stock with the intention of retiring to a farm and devoting himself to rice raising.

A. W. Long, of Tower & Long, returned Wednesday night from a trip through Arkansas. W. E. Tower will go ont the first of the week on a trip through Oklahoma and Kansas.

S. A. Godshaw, manager of the Smith Credit Jewelry Co., was called to Columbus, O., Wednesday night by the sudden death of his father. He will be gone a week or longer.

Alfred Clark, St. Louis agent for the Oneida Community, is occupying temporary quarters at 407 Victoria building while his permanent office at 410 in that building is being redecorated.

Louis Bernheim, of Bernheim & Beer, New York, passed through St. Louis last week on his return from a trip through the south. He reports fine business conditions in the south.

The case of Sam Gold against the S. Pain Time Payment Jewelry Co., in which damages are sought for alleged slander, was set for trial in Judge Fisher's court last week, but was continued.

In the bankruptcy proceedings against the Sempire Clock Co., a final meeting of the creditors was held, the trustees' final account was examined and approved, and the trustee was discharged and the estate closed.

In the bankruptcy proceedings against Ernest A. Niehaus, Referee in Bankruptcy Coles has allowed W. O. Anderson $41.12, Lee W. Grant and R. B. Kennedy $41.11, and Louis H. Bauman $20 for legal services rendered.

Word has been received in St. Louis at the offices of the Aller-Wilmes Mfg. Co. that W. F. Wilmes, of Kansas City, vice-president of the company, recently fell and fractured his wrist at the Union Depot in Kansas City.

The Hess & Culbertson Jewelry Co. will give the second of its series of salesmen's dinners about the middle of March at the Mercantile Club. Some particular branch of the business will be taken up and discussed by officers of the firm.

Mrs. Annette Robbins, who has taken entire charge of the business of the Robbins Jewelry Co. since the death last month of her husband, Z. B. Robbins, is planning to extend her trade along jobbing lines. In the early fall she will send a man out on the road.

M. and E. Stiffelmann, M. Schneider and S. Covinsky, of M. Stiffelmann & Co., are closing up a campaign for city business and will shortly take to the road. Mr. Schneider will be the first one to leave town. He will start next Thursday on a trip through Illinois.

J. J. Burke, president of the Brooks Jewelry and Optical Co., who has been traveling in Mexico, accompanied by Mrs. Burke, has reached San Antonio on his homeward journey. He and Mrs. Burke will stop at Fort Worth and Austin, and will arrive in St. Louis about the middle of next week.

Goodman King, president of the Mermod, Jaccard & King Jewelry Co., has been re-elected a director of the Louisiana Purchase Exposition Co. for a term of three years. It is necessary to keep the board of directors in existence for the purpose of defending pending suits and disbursing funds still on hand.

A judgment of the L. Bauman Jewelry Co. against John W. Smith, 5036A Morgan St, which had been permitted to lapse, was revived last week, by Circuit Judge Sale. It is for a debt of $358.20 and $68.40 costs. Smith did not resist the application for a revival of judgment and the action was taken by default.

The annual meeting of the stockholders of the Whelan-Aehle-Hutchinson Jewelry Co. was held Tuesday, at the office of the company, 621 Locust St. The old officers were re-elected: P. T. Whelan, president; C. P. Hutchinson, vice-president, and C. S. Aehle, secretary and treasurer. The reports of the officers for the past year were very satisfactory.

E. E. Smith, president of the Smith Credit Jewelry Co., has returned from Salado, Ark., near which place he recently purchased 200 acres of land as an investment. He was accompanied on the trip by Mrs. Smith. If Mr. Smith does not have a chance to dispose of the farm to advantage he will retire to it when he gets tired of making money in the jewe[l] ness.

Morris Eisenstadt, president of [E]enstadt Mfg. Co., was elected exal[t] of the St. Louis Lodge of Elks annual meeting. A distressing inci[d] the collapse of Dr. John B. Loga[n] stroke of apoplexy as he was p[la] Eisenstadt in nomination. Dr. Lo[gan] taken to Centenary Hospital, w[here] said to be recovering.

The jewelry business was w[ell] sented at a complimentary ba[n]q Thursday night at the Mercan[tile] by the Scottish Rite Masons [in] to A. C. Stewart. The guests i[n]c[lu]d Eisenstadt, Herman Mauch, S. D. son and S. E. Bamber. Ge[orge] was on the committee of arr[ange]m but left on a trip to New York [be]fore banquet.

Frederick Bingeli, who was att[acked] a robber with an iron bar in [his] store, at 104 S. 4th St., and was s[ent] City Hospital, as told in last [week's] of THE JEWELERS' CIRCULAR-WEE[KLY] so far recovered from his injuries [as to] able to return to his place at [once]. His skull was not fractured, as was supposed. The robber, who got a[way] three watches, has not been apprehended.

Rosa Bolland and others have fi[led] office of the Recorder of Deeds a p[etition] attorney to Charles H. Lyle to their interest in a leasehold from [the] Louis Public Schools to John [Bolland]. The action is in furtherance of an [agreed] proceeding to enable Mr. Bolland, [trus]tee, to make a surrender of a l[ease] advantageously to those for whom acting.

The following out-of-town jewe[lers] in St. Louis during the past we[ek]: Chambers, Bonne Terre, Mo.; A. J piser, Edwardsville, Ill.; A. J Louisville, Ky.; T. A. Woolford, S Ill.; Mr. Pearlman, of Pearlman & Vicksburg, Miss.; F. Simon, Jr., ville, Ill.; B. H. Barnes, De Soto C. H. Gieseke, Trenton, Ill.; Roy G Alton, Ill.; C. S. Seanlin, Ind., Ind.

O. H. Kortkamp, president of t[he] Kortkamp Jewelry Co., was at [his] of business on 612 N. Broadway, [on] day, for the first time since Jan. [1] he went home to prepare for an [op]eration for the removal of a cataract [from] eye. The operation was performed [at] Luke's Hospital, following a [call] formed some months ago at the [same] and was a complete success. Mr. kamp can now see as well as [ever] affliction came upon him, and is [receiving] the congratulations of his friends.

At a meeting of the officers and [directors] of the Hess & Culbertson Jewelry [Co.] the offices of the company, [the] eers and directors were re-elected [as] lows: George J. Hess, president, Culbertson, vice-president and [treasurer] Samuel E. Bamber, secretary, G[eorge] Hess, S. D. Culbertson, Rolla W. [Hill] Samuel D. Bamber, directors. [The] pany's business year closed the [last] February. The reports of the [officers] showed that the business for the [year] been beyond expectations, particular

Cooke-Rogers Jewelry Co., recently
d, who purchased the business of
Gauen Jewelry Co., at 703 Mar-
as closed the Market St. store
and opened up on a larger scale at 511 Chestnut St. E. C. Zerweck, East St. Louis, is president of the company, J. L. Rogers is vice-president, and G. E. Clarke is secretary and treasurer. Mr. Clarke was formerly in business at Mer Rouge, La., and at McGehee, Ark. After selling out at the latter place he was on the road in the northwest for the Eisenstadt Mfg. Co. Mr. Rogers was formerly of the firm of Hafner & Rogers, De Soto, Mo. He sold out recently to Mr. Hafner. R. Saloch, formerly with the G. Eckhardt Jewelry Co., has taken a position as watchmaker with the firm. Mr. Taussig, who had that position with the Gauen firm, is now with the Mermod, Jaccard & King Jewelry Co.

Beginning to-day, practically all of the manufacturing jewelers of St. Louis will close their places of business at 12 o'clock on Saturday. This will continue until Sept. 1. Most of the jobbers and some of the manufacturers have been closing Saturday afternoons since Feb. 1, when Secretary W. F. Kemper, of the St. Louis Jobbers' Association, circulated an agreement to that effect. At that time it was not possible to get entire unanimity of action because some of the manufacturers had work on hand that would not permit them to close. One of these was the Kennedy Jewelry Mfg. Co. But President A. C. Kennedy, of this company, notified the other manufacturers during the past week that the company would close at 12 o'clock Saturday and all the manufacturers, with one or two exceptions, agreed to do likewise. This is a month earlier than the manufacturers have been closing in former years.

Arnold C. Johnson, trustee of the defunct Vahlman & Jacobs Co., East St. Louis, Ill., sold at auction Friday afternoon, at his office, 301 Metropolitan building, East St. Louis, 14 pawn tickets, formerly the property of the Vahlman & Jacobs Co. They were on diamonds and other jewelry of the aggregate value of $4,450. Prospective bidders who wanted to inspect the goods represented by the tickets assembled at Mr. Johnson's office Thursday, and Mr. Johnson escorted them to various pawnshops in St. Louis, where the articles had been pawned. At the auction C. G. Derleth, of East St. Louis, bid in the pawn tickets for $1,005. He will now have the privilege of redeeming the goods. Mr. Johnson, who was appointed trustee at a recent meeting of the creditors, is making collections as fast as possible. He says the creditors will receive not more than 15 per cent., and probably not more than 12 per cent.

Members of the Retail Jewelers' Association of St. Louis have decided that they will increase the membership of the association before making war on jobbers who sell at retail. This course was decided upon after a general discussion of trade abuses at the meeting held last week at the American Hotel. The attendance was larger than at any previous meeting, and this fact encouraged the members to plan a campaign for new members. At the preceding meeting a plan was tentatively agreed on to invite jewelers who are not members of the association to meet with the association and join in any action that might be decided upon, but on more mature consideration it was decided that the co-operation of those now on the outside of the association would be made much more effective if they would first become members of the association. Regular meetings are to be held the fourth Thursday night of each month, and a strong effort is to be made to increase the membership. A special committee is to be appointed by President Joseph Ebeling to hustle for new members. President Ebeling appointed at last week's meeting the following well-known jewelers as delegates to the State convention of jewelers, to be held in June, at Kansas City: Herman Mauch, Otto Buder, John F. Zeitler, Joseph Eberling and E. C. Zerwick. At the close of the meeting there was a luncheon.

Kansas City.

TRADE CONDITIONS.

Trade conditions here, although quiet, are fully as good as a year ago, and collections are fairly good. Dealers, as a rule, seem to be satisfied with not only existing conditions, but with the outlook.

M. L. Woods, Newton, Kans., is taking a post graduate course at the Kansas City Polytechnic Institute.

Ray Kennon, an employe of A. Y. Boswell, Tulsa, Okla., has completed a course of engraving at the Kansas City Polytechnic Institute.

A. E. Gorden, in the jewelry business at Shreveport, La., was in this city, last week, buying goods for the purpose of opening a branch store at Mena, Ark.

Fuhrman Bros., watchmakers for the trade, have removed from the Gumbel building, 8th and Walnut Sts., to larger and more convenient quarters at 105 E. 9th St.

Clarence Labrum has been added to the working force of the Greene Jewelry Co. as a jeweler. A. Pooles, recently employed by the same company, has resigned and gone to California.

The following traveling representatives called on the trade here last week: H. L. Noyes, Bates & Bacon; Theodore Parker, Smith & Crosby; Jas. O. Otis, Harvey & Co.; Max L. Jacoby, Manchester Mfg. Co.

The Greene Jewelry Co. has recently turned out a solid silver automobile, with gold ornamentation, to be offered as a trophy for an endurance run between two western cities to be determined on later. It is a very handsome piece of workmanship and cost $200.

The following jewelers were in the city during the past week: B. G. Gustafson, Lawrence, Kans.; W. T. Peters, Eureka, Kans.; C. E. Wardin, Topeka, Kans.; J. A. Zimmerman, Warrenburg, Mo.; R. C. Libby, Weir City, Kans.; Lon Thomas, Topeka, Kans.; Geo. A. Young, Moberly, Mo.; J. E. Baker, Chelsea, Okla.; H. L. Noe, Hill City, Kans.; Mr. Doolittle, of Beaulieu & Doolittle, Sabetha, Kans.; Ed Stone, Blue Rapids, Kans.; Mr. Rinehart, of the Crescent Jewelry Co., Smith Center, Kans.; R. E. Bertholf, Cherokee, Kans.; A. Buchmann, Clay Center, Kans.; Mr. Mosher, Burlington, Kans.; E. H. McClintock, Thomas, Okla.; A. Y. Boswell, Tulsa, Okla.; J. W. Schmandt, Holden, Mo.

Buffalo, N. Y.

Philo Martin, optometrist, has been absent from his business for a time, because he has been a victim of scarlet fever.

Among the jewelers who recently visited the Buffalo market were H. W. Baker, Boston, N. Y.; W. H. Fuller, Silver Creek, and C. L. Kerr, Silver Springs.

A. and R. Bergman are contemplating going out of the jewelry business. They expect to sell out their store on Main St., and continue their optical department.

Albert Zilliox, president of the Buffalo Retail Jewelers' Association, was among those who recently made a formal complaint against the east side street car service.

Roger F. Williams, optometrist for the Failing Optical Co., will be prominently connected with the power boat and sportsmen's show, to be held at Convention Hall later this month.

G. Hahnemann's jewelry store in the Odd Fellows' Temple, 380 William St., was closed early this week on account of the death of Mrs. Louise Prosch, the mother-in-law of the proprietor.

Eugene Bock, who sells rings for King & Eisele, has departed on a trip through Kansas and Nebraska. C. F. Smith and W. A. Wander represented that firm at the recent banquet at the Buffalo Retail Jewelers' Association.

A medal suggested by former President Roosevelt and struck off at the Philadelphia mint has just been received by M. A. Clark, a former Buffalo conductor, who is now located at Panama. He has received the medal for continuous service of two years or more on the Isthmus of Panama.

The Buffalo Wholesale Merchants' Association, of which some jewelry firms are members, are planning to conduct an outgoing trade excursion in April. The merchants propose to charter a special train to take in the towns within a radius of 100 miles of Buffalo and advertise Buffalo-made products.

At a recent meeting of the Buffalo Optometrical Society the folowing officers were chosen for the coming year: E. G. Wiseman, (reelected) president; W. J. Weeks, vice-president; Julius Hansen, secretary (reelected); Ray Oaks, treasurer; J. P. Simcox and A. J. Grey, members of the executive committee. E. V. Syrcher was renominated treasurer, but declined to accept the office.

Louis Meyers, who has conducted a jewelry store at 183 Main St. for the past 21 years, has bought the stock and fixtures of N. Desbecker's cigar store, at 271 Main St. Mr. Meyers is disposing of these goods and at an early date will remove his jewelry stock to his new location. An addition of 28 feet will be made to the store and new lighting and other improvements will be introduced.

According to printed reports Julius Boasberg, a Buffalo diamond merchant, is suing "Battling" Nelson, the prizefighter. It is said that Nelson and his manager, John Robinson, are made defendants in a suit for $1,000, filed in the Municipal Court in Chicago, by an attorney representing Boasberg. The petition alleges that the plaintiff sold a diamond ring valued at $1,000 to the defendants, last December, and that they have not paid for it.

The Traveling Triangle, whose workmanship has many evidences of the jewelers' art and which was at one time in T. C. Tanke's window, has been heard from again. The triangle which passed through Buffalo a year ago as it was going from one chapter of Royal Arch Masons to another in its journey around the world is now in Chicago. From there it will be carried westward. The Triangle was started from St. Patrick's Chapter in Toronto. Buffalo was its first stopping place and from here it was carried to Cleveland.

Among the travelers who recently visited the Buffalo trade were: W. J. Harber, Enos Richardson & Co.; Lawrence Bodenheimer, Bodenheimer & Jaskow; Mr. Hirsch, Nathan Hyman Co.; A. L. Halstead, Barbour Silver Co.; S. W. Pickering, A. Ludeke & Co.; M. F. Price, Barry & Co.; Geo. F. Johnson, G. A. Henckel & Co.; Geo. W. Beardsley, Allsopp & Allsopp; S. Glenn Walmsley, Herman Baum; K. Wyndham Anderson, Bride & Tinckler; F. C. Allen, Allsopp & Long; W. T. Francis, Waterbury Clock Co.; Chas. T. Dougherty, Osmers-Dougherty Co.; Harvey P. Day, Omega Watch Co.; C. A. Holbrook, Sloan & Co.; Abel King, Emrich, King & Schorsch; A. Laper, Simpson, Hall, Miller & Co.; Mr. Bayer, Bayer & Pretzfelder Co.; Mr. Stern, Herald Novelty Co., and J. McClannin, Wilcox Silver Plate Co.

Canada Notes.

C. G. Schulze, Halifax, N. S., has assigned to G. E. Faulkner.

Bertram Myers, Carlyle, Sask., has been succeeded by George Radford.

A meeting of the creditors of James Ed. Fowler, Havelock, Ont., was announced to be held on Monday, March 7.

The estate of Mary Gowland, deceased, of Toronto, Ont., recently sustained a loss by fire, partly covered by insurance.

Harry F. Parker, Trenton, Ont., has renewed the chattel mortgage he gave to A. E. Bywater, of the same city, for $2,173.

Mr. Proctor, representing Austin & Co., Toronto, Ont., has been among the callers on the trade in Montreal during the past week.

McManus & White, Chilliwack, B. C., who have been conducting a jewelry and piano business, are discontinuing the jewelry business.

J. A. Vandewater, who recently disposed of his jewelry store at Yaker, Ont., has gone to the Northwest in search of a desirable business location.

Out-of-town jewelers calling on the Toronto, Ont., trade last week, included: George D. Pringle, Guelph; George Hynds, Acton; J. L. Wilson, Woodstock; J. J. Hollingshead, Tottenham, and J. H. Young, Brantford, all Ontario.

The creditors of Narcisse Beaudry & Son, manufacturing jewelers, Montreal, have recently agreed to an arrangement whereby those to whom $600 and under was owing accept payment forthwith of 50 cents on the dollar, and in regard to the larger debts an extension of time for settlement has been accorded.

The semi-annual examinations in optometry for the province of Manit held in Winnipeg, Feb. 14-16. Th ful candidates were: John Moor horn; R. S. Ramsay, Winnipeg; L Virden; C. F. Hassenfield, Dolor A. Robertson, Brandon; L. V. Crystal City, and C. C. Parker, F. Dudley, Winnipeg, completed fully his examination begun in Oc is stated that since the system w lished, the class of itinerant fakirs glass peddlers, once so numerous, most disappeared from the pr v that, although the holding of a cer not compulsory, the public has cated to discriminate in favor of istered optometrists."

The annual meeting of Wm. A Ldt., was held at Toronto, Ont. Feb. 24. The annual statement s profits for the year of $301,40 ital investment of $900,0 stock and $750,000 common stock dition to the 10 per cent dividend ing the year the directors dec ar bonus dividend of 25 per cent. t stockholders, to be paid out of t at credit of profit and loss ac standing at $235,690. Reserve amounting to $450,000 have bee out of surplus profits. Quick asset to $1,260,621, being an excess o over liabilities. The shareholders a by-law authorizing the increase ital stock by the issue of $750,000 common stock.

An extraordinary incident is from St. John, N. B. When b gage at the Union Railroad station on night a traveler's sample trunk, c at least $20,000 worth of jew standing without an owner or c the train shed outside the bagga The baggage men were troubled exposure of the valuables, but t adhere to the regulations which the railroad will not take the resp for baggage which is not check trunks had been delivered at the s 4 o'clock in the afternoon by an team, but the owner had not ap midnight, by which time the last fore 6 o'clock on Tuesday morni parted, and business was suspended baggage rooms locked up. It is procedure of jewelry travelers, in the great value of their samples company their trunks to the s check them immediately. In those mentioned, the luggage one alternative except to leave the t the shed. A special watch was k them, however, and early next when a naturally perturbed tra and proved his claim to the valu relief to the railway officials' ow something in proportion to his ow traveler had missed the late tra treal, and the express man had c the order to take his trunks to t too literally. His order had only to the trunks containing his pr longings.

H. L. Parker, Lyndonville, Vt extensive damage by fire. The los ered by insurance. The fire start explosion of a gasoline stove in ing restaurant.

PUBLISHED BY

THE JEWELERS' CIRCULAR PUBLISHING CO., 11 John St., New York

Lancaster, Pa.

F. L. Pfiester, Brooklyn, has been visiting his father, L. F. Pfiester.

Marcus Edelstein visited Philadelphia last week.

James Irons, watchmaker for E. G. Hoover, Harrisburg, visited Lancaster last week.

J. C. Bair, of Hanover, Pa., has taken a position with T. Wilson Dubbs as watchmaker.

A. F. Hostetter, of the Non-Retailing Co., was last week elected a manager of the Manor Turnpike Co.

W. S. Oberlin, Columbia, was, last week elected a member of the executive committee of the newly-organized Columbia Business Men's Association.

Louis Weber & Son have remodeled their store to some extent in order to change a couple of departments. The jewelry department has been placed at the rear and the diamond department moved to the front.

Frank B. Vondersmith, head salesman for Louis Weber & Son, has recovered from his recent attack of illness. The firm has placed on the sill of one of the show windows a chronometer set in a handsome copper case.

W. W. Appel, who was among the victimes in the late big fire, has leased a storeroom at 131 N. Queen St., in the Snyder building, which he will occupy about April 1. His fire loss has not been completely adjusted yet.

Probably the highest price ever paid in Lancaster County for a "grandfather's clock" was paid a few days ago at the Metzler estate sale, in Salisbury Township, when Abram Metzler bought for $336 a particularly fine specimen.

Among those drawn last week for jury service in the coming terms of court were three members of the trade, H. S. Meiskey, of the H. S. Meiskey Co.; George R. Weber, of Louis Weber & Son, and G. Edward Forrest, silver worker.

Among the jewelers who visited Lancaster last week were W. J. Frazer, Lincoln; P. L. Paterson, Scranton; S. H. Miller, Mt. Joy; H. E. Heberling, Parkersburg; C. E. Hinkle, Mt. Joy; Edward Fieles, Pittsburg; Ralph T. Gochnaur, Cleveland, Ohio.

Oscar Kranich, watchmaker for Pirosh & Simmons, York, has entered the Ezra F. Bowman Technical School as a student in engraving. Ammon W. Arter, Sunbury, has returned to the school, having been absent because of illness. Gordon L. Gardner, Fort Mead, Fla., a former student of the school, has engaged in business for himself at Fort Mead.

A stranger giving the name of Irwin Miller recently obtained employment with Rev. E. M. Engle, near Mt. Joy. A few days ago he called on Jeweler Fegley at Mt. Joy, and told him he had been sent to town by Mr. Engle for some freight, but some charges had to be paid first. As Mr. Fegley knew Rev. Engle, he loaned the man $3.50, and that was the last seen of the stranger, who fleeced others with the same story before disappearing.

The following traveling representatives visited Lancaster, Pa., recently: Mr. Corwin, Powers & Mayer; J. W. Timberlake, R. A. Patterson; J. P. Stearns, Unger Bros.; J. H. Sylva, New Haven Clock Co.; Charles A. Smith, M. B. Bryant & Co.; Fred Crane, Mandeville, Carrow & Crane; L. A. Burt, R. Wallace & Sons' Mfg. Co.; R. C. Chapin, Chapin & Hollister Co.; L. J. Storch, Enos Richardson & Co.; W. H. Rowland, International Silver Co.; A. G. Lee, E. Howard Watch Co.

Texas.

S. H. Kavanaugh has established a store at Richmond.

J. W. Hultz has opened a watchmaker's shop at Eastland.

Lee S. Smith has opened a watchmaker's shop at Miles, Tex.

C. M. Bailey has succeeded to the firm of Bailey & Mendell, Dallas.

M. Shane & Co. have opened a trade-shop at 1017 Main St., Ft. Worth.

O. Levytansky, San Antonio, has just closed a very successful auction.

J. A. Jenson, Weatherford, has sold his stock and is seeking a new location.

J. L. Welborn, Terrell, has purchased the jewelry stock of J. C. Martin, Dallas.

John Johnston, Big Springs, has just moved into his new store and has increased his stock.

W. A. Bickford, who recently moved to San Antonio, has closed out that store and opened in Cuero.

L. F. Rogers, Mt. Pleasant, has returned to his old home in Mississippi, owing to an illness in his family.

The firm of Wilson & Watson, Anson, has been dissolved, J. M. Wilson assuming full control of the business.

K. E. Clark, formerly with R. C. Glover, Dallas, has gone to Pflugerville, where he will engage in business for himself.

F. J. Woods, Springtown, is closing his business at that place, moving to Henrietta, where he will open on a larger scale.

The Noah Deal stock, Arlington, which was sold by receiver was purchased by George Upchurch and moved to Alvin.

Mrs. Bleuer, wife of R. P. Bleuer, Clinton, Okla., is recovering from a successful operation which was performed about two weeks ago.

H. H. Johnson, Athens, was in Dallas recently making purchases of jewelry. Mr. Johnson is a watchmaker and has not heretofore carried any stock.

E. J. Leben has opened a watch, jewelry and optical store on Pearl St., Beaumont, Tex. Mr. Leben was formerly connected with Kolter Bros., of that city.

W. J. Blair, who has been employed as watchmaker for H. H. Hawley, Stamford, has severed his connection and opened at Knox City with a small line of jewelry.

Frank Miesch, Clarksville, has just returned from an extended trip through Oklahoma, having stopped for about a month with his brother, Mike Miesch, Muskogee.

G. C. Newton & Son, Waxahachie, suffered a loss by fire of his house in Dallas. Mr. Newton's loss is about $2,700 on the house, with but a small amount of insurance.

The Pratt Jewelry Co., which carries a large jewelry stock at Cisco, had its place completely gutted by a fire which destroyed the whole block in which their store was located.

In the fire at Forney, Tex., which did so much damage, th store of Sam Wilhoit was destr Wilhoit's loss will reach about $ insurance.

Jessie Smith, Canton; A. S Wichita Falls; Z. Glick and T H rell; T. C. Allen, Brady; M. Walk hachie, and I. Goodman, Wac w visitors to Dallas.

C. F. Lueddeke, who rece y Dallas, was called to his father's New Ulm. It is not expected t return to Dallas, but will purs as watchmaker in New Ulm

Benjamin C. Taber, at one ti in business with his father i died recently at his home Tex. The deceased was born and later resided in St. Louis, M

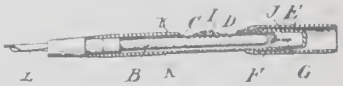
In a self-mounting case for watches and watch-clocks, the combination with a case-body having an outwardly extending self-mounting flange formed with an externally threaded spacing-shoulder extending forward at a right angle from

it, of a self-mounting ring carrying the watch-crystal and provided with an inwardly extending internally threaded spacing-shoulder for coaction with the spacing-shoulder first mentioned in binding the self-mounting flange and self-mounting ring upon the opposite sides of the flap or part in which the watch case is mounted.

950,815. POCKET MATCH-SAFE. John A. Burr, Feeding Hills Mass., assignor of one-half to Frank A. Champlin, East Long Meadow, Mass. Filed June 29, 1907. Serial No. 381,405.



A pocket match-safe comprising a rectangularly shaped box substantially as shown, having a cover or lid at one edge adapted to be removed for the insertion of matches and having a recess in the opposite edge for the reception of a single match, said match-receiving recess being open at the top end of the box to permit the passage of a single match, a narrow slit being formed at the lower or inner end of said match recess to permit the passage

of the extractor end, guides on the outside edge of the box adjacent the match recess, and an extractor rod equal in width to the width of the slit and mounted to slide in said guides and having its inner end portion projecting through said slit to engage a match and having a finger-piece 15 on its outer end shaped to extend over and close the match outlet opening, the extractor rod being of a length to extend from the bottom inner end of the box to the top outer end, whereby when the extractor is closed the slit is closed by the extractor rod and the outlet opening is closed by the part 15.

950,817. FOUNTAIN-PEN. William I. Ferris, Westfield, N. J., assignor to the L. E. Waterman Co., New York. Filed Aug. 23, 1909. Serial No. 514,264.

In a fountain-pen the combination of a writing-pen, an inelastic casing or holder, an elastic ink reservoir within said casing, an ink feeding device between the writing-pen and said elastic reservoir, a presser bar within said inelastic casing but outside the elastic ink reservoir and secured within said casing by a spring attached by a link to the

presser bar for holding the presser bar in place within the casing, said presser bar having an outward bowed portion which projects into the slot in said outer casing, said outer casing having a slot for the insertion of the finger for compressing the presser bar and elastic reservoir, said outer casing having a sleeve secured thereon but

Important Announcement!!!

W. H. BROKAW, Jewelry Auctioneer, 14 Maiden Lane, New York City, will conduct all sales in future *personally*. If you engage Mr. Brokaw you will not get a substitute at the last moment.

I give below a letter from Mr. R. L. Keplinger, Franklin, Pa.:

Mr. W. H. BROKAW, New York City.

Dear Sir:—At the conclusion of our auction sale which you conducted fo in so highly a successful manner, realizing a profit of over 20 per cent. above the of the goods and disposing of all our hard stock, in addition to making many customers for our store, we know from our experience in this sale, which has attended by the leading citizens of our city, that your extensive knowledge of merchandise and the gentlemanly manner in which the sale has been conducted always bring success. We take great pleasure in recommending you to any of brother jewelers who may wish for your services. Yours very truly,

R. L. KEPLINGER

The Most Widely Known and Successful Man in the Business

Sales conducted for Established Jewelers to their financial advan e and their good name and reputation left unsullied.

I give you the benefit of my years of experience in selling for e Established Jewelers of the United States.

UNITED STATES TRADE-MARKS.

The following trade-marks have been adjudged to registration under the Act of Feb. 20, , nd are published in compliance with Sec- f said act. Said section provides:

"A person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."]

TRADE-MARKS PUBLISHED MARCH 1, 1910.

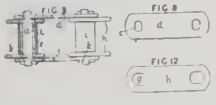
76,957. LOCKETS AND BRACELETS. Attleboro Chain Co., Attleboro, Mass. Filed Sept. 11, 1909. Serial No. 44,645. Published Dec. 28, 1909.



BRITISH PATENTS.

(Abridgments of Specifications, 1908, from *The Illustrated Official Journal.*)

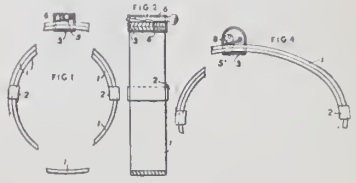
ISSUE OF JAN. 26, 1910.

20,959. CHAINS. T. R. Murray and W. L. Philip, Wiltshire. Oct. 5.

The pins and bushes of conveyer and driving chains are formed with flattened or other non-circular ends engaging in correspondingly formed holes in the outer and inner links respectively. The pins *a* are of steel and their ends are flattened to fit holes *c*, Fig. 8, in the outer links *d*. Over

the pins are pased steel bushes *e* which preferably bear over the greater portion of the surface of the pins *a*. The ends of the bushes are flattened to fit holes *g*, Fig. 12, in the inner links *h*. Rollers *i* are preferably passed over the bushes, and cotter or split pins *j* are passed through holes *k* in the ends of the pins.

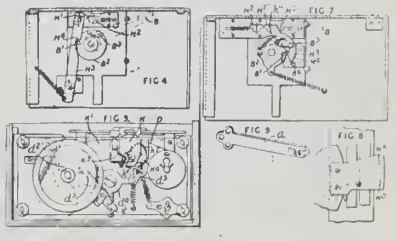
20,976. ELECTRIC CLOCKS, ETC.; BAROMETERS. W. Fairweather, London. (Aktiebolaget L. M. Ericsson & Co., 5 Thulegatan, Stockholm.) Oct. 5.



Relates to the driving of electric clocks and similar apparatus, such as self-registering barometers. To avoid the sparking due to interruption of a current, electro-magnetic actions are obtained by charging and discharging a condenser

instead of by passing a continuous current. Fig. 1 shows the arrangement diagramatically. The battery 1 charges the condensed 2 when the switch 5 in the main is closed, and the condenser is discharged when the switch 6 in the bridge is closed, one switch being opened when the other is closed. Fig. 2 shows the application of the invention to a pendulum. The cross-bar 15, pivoted with insulation at 16 on the pendulum rod 9 under a weak controlling-spring 17, makes and breaks contact at terminals 18, 19 of constant potential. The condenser 20 is charged through the left half 13 of the cross-arm 15, the spring 17, an insulated wire in the rod, the electro-magnet 11 under the bob, the rod itself, and the fixed electro-magnet 12 below. It is discharged by the reverse route and the right half 14 of the cross-arm. The arm 15 may operate a ratchet-wheel.

20,982. BRACELETS; FINGER-RINGS. P. Doppenschmitt, Forzheim, Germany. Oct. 5.



A bracelet or finger-ring is formed of a flexible strip 1, the ends of which overlap and are provided with guide-loops 2. To clamp the overlapping parts, a slide 3, Figs. 1 and 2, having an inside

wedge-shaped liner 5 is provided, and a wedge-shaped key 6 when pressed in the slide clamps the parts in position. In the form shown in Fig. 4, the clamping is effected by an eccentric 8.

20,993. WORKMEN'S TIME-RECORDERS. F. M. Russell and A. J. Jung, London. Oct. 5. Period for granting patent not yet expired.

In workmen's time-recorders for use particularly in connection with tramway routes to record the entrance and departure of a vehicle from a section, the operators' keys are constructed to effect a connection between a hand-lever and the printing-hammer and are each provided with a distinctive number to print on the record sheet. The key is arranged to occupy different positions to print the number in the "in" or "out" column, and differently colored ink-ribbons are provided. The key slot is normally closed by spring-controlled slides H^1, H^2, Fig. 4, the latter being connected by a pin and slot to a lever H^3 provided with a notch H^4 which locks the operating-lever by means of the pin B^1 until freed by the insertion of the key. Printing is effected by a projection B^3 on the lever B striking a projection K^3 on a lever K^4

pivoted at k^3, Fig. 3, a cam piece K^2 thereon striking a lever K^1 carrying the printing-platen K, which forces the record strip D and the ink ribbon against a key and the time-printing disks. The key is notched at *a*, Fig. 9, to act with a slide to determine its position. The lever K^4 is connected by a link d^5 to a bell-crank d^4 which feeds on the record strip through a lever and a ratchet d^2, d^3. A clutch *e* is provided to feed on the ink ribbon. In a modification, two entrances H^9, H^{8}, Fig. 8, are provided to allow the key to take up different printing positions, and the actuating-part B^3 is carried on a spring-controlled lever H^3, Fig. 7, pivoted to the part B^2 of the lever B. Three slides, H^1, H^2, H^6, are provided, of which the H^4 on the lever engages with a shoulder B^4 on the part B^2, and a pin B^6 serves to keep these two parts in engagement when the printing-lever is depressed. The casing is constructed of metal slides, H^2, H^6, are directly controlled by springs, and the slide H^1 carries a pin h^4 engaging with the lever H^3. When inserted into the opening H^9 the key directly actuates the lever H^3. A projection and made in two parts adapted to engage with one another to prevent the entrance of water.

21,024. WORKMEN'S TIME-RECORDERS. J. J. Stockall and F. Brook, Huddersfield, Yorkshire. Oct. 6.

Late time is printed in a different color. A two-color ink ribbon passes through guides 8 sliding on the sides of the card holder and having teeth to engage a fluted roller 19^1, which gears with a mutilated pinion 20, the recess in which is always urged by a spring controlled pin 23 in a plate pivoted on the spindle of the pinion. A forked link 24 pivoted to the operating lever also embraces the pin 23. Normally motion of the pin 23 and pinion 20 is prevented by a cam 18 on the roller 19^1 engaging the head 16^1 of a spring plunger 16 which contacts with a disk 12 driven by the time wheels, but when a recess in the disk 12 is presented to the plunger the ink ribbon guides are

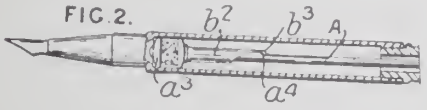
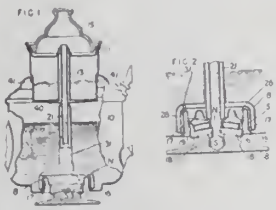
...370 WATCH SUPPORTS. L. D. Crossett, ...Seattle, Wash., U. S. A. Oct. 9.



...wh... support comprises a front case for the

...h and a rear bell-shaped sucker 19, and is ... ...ubber or similar material. The edge 13 of the front presses against the glass of the watch, thus excluding dust, and the head of the watch fits into the recessed part 8. The sucker is attached by a narrow part 14, and the width of the sides 15 decreases towards the mouth, which is shaped with conical edges 16 and has a sharp peripheral edge 17. The mouthpiece is less vulcanized and rigid than the rest of the holder. A thumb-piece 20 is provided to release the sucker.

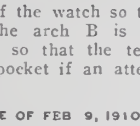
21,439. PENS. F. Swan, Yardley, Worcestershire. Oct. 10.



The piston a^3 of a fountain-pen or stylograph is slidably mounted on the piston-rod A, and is provided with a tubular extension b^2 which can be connected to the piston-rod by a spring catch or projection b^3 and a recess a^4. After the pen is

filled by the piston in the usual manner, the piston and rod are disconnected by turning the rod, so that the piston may be left at the top of the reservoir while the rod is returned into the barrel. According to the provisional specification, the piston and piston-rod may be detachably connected by a hook, spring, washer, swivel, catch or pin.

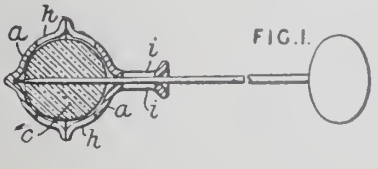
21,551. COFFEE PERCOLATORS, ETC. J. R. Holley, Bristol, Conn., U. S. A. Oct. 12.



In coffee percolators, etc., of the fountain type, the heating-chamber 16 is isolated from the reservoir 10 by a space 17, and contains an air-chamber 19 which is supported by a perforated flange 19^1 and has air-tight connection with the ejector tube 21, preferably by a screw-thread. The hot water is converted into steam in a chamber S hav-

ing a nozzle N, and is prevented from returning to the reservoir by a cup 26 having perforations 28. Loss of heat is prevented by a hollow bonnet B adjustably attached to an air-tube surrounding the tube 21. The water is sprayed under a glass hood 15, and holes in a central tube 13 permit excess of water to return to the reservoir from the infuser 11, which may engage the reservoir 10 by means of bayonet-joints 41 and be held in place, together with the parts of the fountain, by a spring blade 40. Heat is imparted to a base-plate 18, which is preferably attached by passing a boss 18^{11} through an aperture in the cup 16 and heading-over the edge.

21,735. WATCH OR LIKE PROTECTORS. C. G. Biggs, Stratford, London. Oct. 14.



The device is made from steel or other suitable material in the form of an arch B with curved and toothed return ends A, one of which passes

through the bow of the watch so that they project on each side. The arch B is attached to the watch-chain swivel so that the teeth A catch in the lining of the pocket if an attempt is made to snatch the watch.

ISSUE OF FEB 9, 1910.

21,903. HAT-PINS. W. J. Woodland, Southville, Bristol. Oct. 16.

A point-protector embodies in combination the following known features. The shell *a* is made in halves, and encloses a ball of resilient material *c*. It is perforated at *h* for lightness, and terminates in a bell-mouthed split shank *i*.

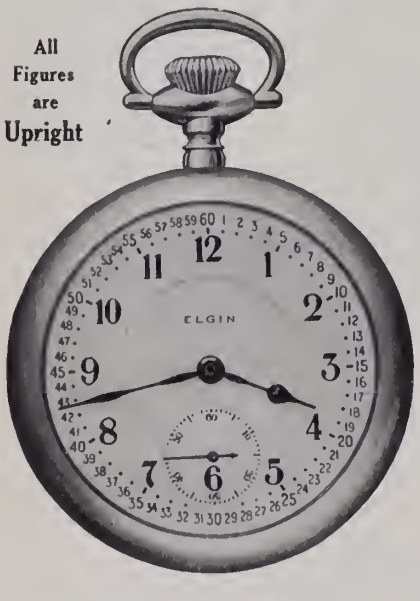
This New Minute Numeral Dial

(MONTGOMERY PATENT)



With Upright Figures

was designed by the chief watch inspector of a large railway system, for railroad men's use and is now supplied on any of the

Railroad Models of the Elgin Watch

All Figures are Upright

Each minute is numbered with clear, sharp, upright figures. The figures of the even five numbers in the minute circle are printed in red. This dial is so well designed that the complete time is read at a glance, doing away with even the momentary calculation necessary with old style dials. Railroad men want Elgins with this dial. The complete line of Elgin Railroad Watches with this dial will be well advertised in railroad men's publications. Be prepared to furnish them to your trade.

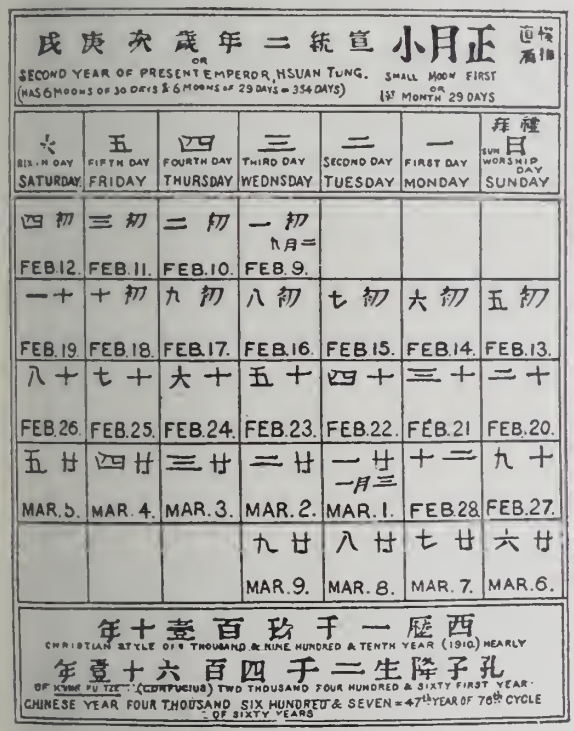
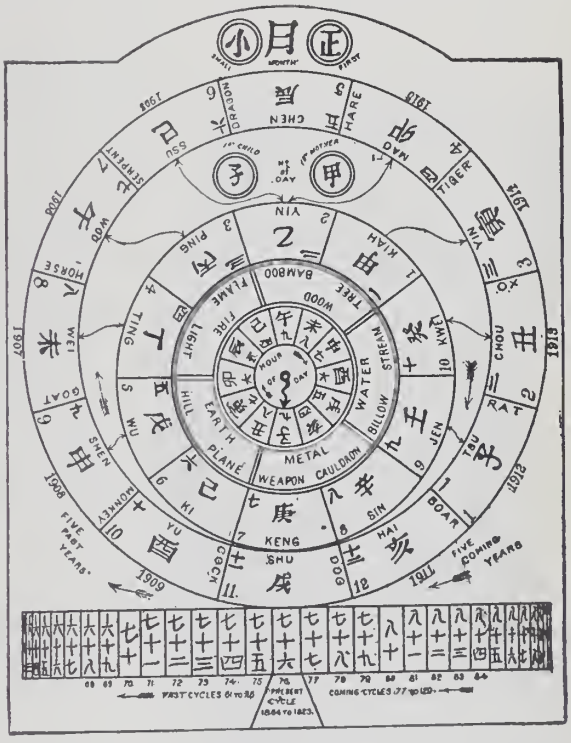
THE HOROLOGICAL REVIEW

Time as Reckoned by the Chinese.



By Daniel Arthur, in the *Scientific American*.

GOD fortune, long life, and happiness to the Chinese. Their new year day has been. It will be the year second of the present emperor, Hsuan Tung. It will also be the 1st year of their great man Kung Fu whose name we have latinized into Confucius. It is also the year 4607 from the beginning of the reign of the yellow Emperor Hwang Ti, and as the sexagenary system started in the 60th year of his reign Nao the Great (the then prime minister) makes the coming Chinese year 4547, or the 47th year of the 76th cycle of 60 years. Some American almanacs make the mistake of assuming that the 76th cycle is complete and that the Chinese have entered upon it to the extent of 47 years. That is to say, if they multiply 76 by 60 and add 47, the result they should make it thus 75 cycles of 60 completed plus 47, which is the distance we have into the 76th = $75 \times 60 + 47 = 4547$. The conflict may have come about in the assumption that the sexagenary system began with the reign of Whang Ki 2697 B. C., instead of at the 60th year of his reign, 2637 B. C. But in that event we would have to say that the coming Chinese year was the 17th of the 77th cycle. It is quite well established, however, that the cycle system began in the year 2637 B. C. Add to this our A. D. date, 1910 = 4547. This also fits the contention that the current cycle runs from 1864 to 1923.



When we go a few thousands of years into B. C. history of China, we find the rulers living to the age of hundreds of years. When I jokingly asked my friend in the Chinese consul's office in New York if it might be possible that these were "short weight" years, he strenuously said, no, no, that these Chinese gentlemen knew how to live. Our jolly Chinese scholar and diplomat, Wu Ting Fang, said he would pay America another visit in 1959. This will be the year of the Boar Ki Kai, or the 36th year of the 77th cycle.

On Tuesday night of the month of February, as twelve struck on New York bells, the arrival of Wednesday the 9th was announced and with it the new year day of the first installment of United States Chinamen. Very few of these Chinamen living in our eastern time zone, which includes the capital at Washington in its zigzag boundary line, realized that they were ushering in their year some twelve hours before it arrived in their home country, while they should have been about twelve hours after China. American almanacs quite properly say that Chinese new year day is Feb. 19. The Chinese merchants and bankers of the United States still continue to make this curious mistake, which began in a very simple way. The Chinamen coming east across the Pacific "against the sun" arrived, with their almanacs and calendars, at San Francisco, and then journeyed across the continent to New York.

Other Chinamen left China and traveled across Europe "with the sun" and then to New York via the Atlantic, also bringing

COMPLETE SEXAGENARY CYCLE WITH TRANSLATIONS.

months, or let us say twice in every five years. This means that two years out of every five years contain 13 months, or say 383 or 384 days, the other three years being 12 months long, consisting of say 354 days. Although the 29 and 30 day month is planned to keep seasons correct so far as long periods are concerned, it will readily be seen that within these five-year cycles seasons go wrong more than a month. This leads to the necessity of having a set of planting, reaping, fishing and hunting instructions for every year, which partly accounts for the numerous pages in the Chinese almanac.

This curious book, which has no advertisements, and is said to have the largest circulation or sale of any book in the world, shows that the closing year, the year of the bird or chicken, or rooster, or cock, had 13 months, consisting of a first month, a "true" second month, an intercalary second month. Then come the third, fourth, fifth, and so on up to the twelfth and last month, which is really the thirteenth. This year contained 383 days and began in America Jan. 21, 1909, and ended Feb. 8, 1910. But to come back to the calendar month, the eight characters other than the ones above mentioned mean second year of the present Emperor Hsuan Tung.

At the bottom of the cut the line of 9 means Christian style 1910 nearly. The lower set of 12 characters reading toward the left mean Confucius, year 2461. This great man's family name was Kung and his given name Tze. We would read it Mr. Tze Kung. China gave him a sort of honorary title called Fu in Chinese, so he became Kung Fu Tze, as his countrymen knew him. We have latinized this whole proceeding into Confucius.

The top rows of squares show the days of the week, beginning with special sun worship day, followed by first to sixth days, Monday to Saturday. Why seven days? Some say because these were seven original stars to the Chinese. Others point out to us that China has 28 stellar mansions, numbered 1 to 28, and that the 4th, 11th, 18th and 25th of these were halting places for the sun, and correspond with our western Sundays. They were also observed in ancient China as days of rest for men as well as for the sun. Now we come to the squares for dates beginning with the first day (Chinese new year day), being a single horizontal line or dash in front of which (to the right) is a fancy character which can be freely translated into day, meaning day 1, day 2, day 3, being 1 dash, 2 dashes, and 3 dashes.

Then comes the box-shaped character 4; the digits can be followed up to 10, which consists of a cross like a plus sign. This is the last numeral which has to be preceded by the character "day," it being assumed after that. For 11 we have a cross and a dash meaning 10 and 1 = 11, followed by 12 a cross and two dashes. By following this plan we arrive at 19, consisting of the cross and the Chinese digit 9. Thus we have reached 20, which is just the reverse of the Chinese 12, that is to say, we find two dashes followed by the cross. This means 2 times 10 = 20. When a small number precedes a larger one, it is always a multiplier, but when it follows the larger number it is always added. Twenty-one usually consists of this same combination followed by a single dash, making it read 2 times 10 and 1 = 21.

For convenience, however, a condensed form of 20, to be used from 21 to 29, has been devised, so that these numbers can be constructed with two characters instead of three. This abbreviated 20 consists of two vertical strokes with a horizontal dash across them at the middle and a small link at the bottom. This condensed form followed by Chinese digits 1 to 9 carries us up to 29, This number brings us up as far as the end of Chinese months, but as we will refer shortly to the 76th cycle of 60 years, it

however, these signs of the stems
nches or mother and children have
mean numbers only, 1 to 10 and 1
2. They still retain one-syllable names,
oximate sound of which is given in
columns. You will notice that it
sets of stems to make a column of
60 and five sets of branches, and as these five and six sets overlap each other on a sort of slide-rule plan, no stem or branch meets more than once on the horizontal lines. This makes 60 different combinations or pairs of stem and branch characters, thus forming 60 two-syllable words, no two of which are alike. Thus, the first year of this or any other sexagenary cycle of 60 becomes Kiah-Tsu; the 46th of the cycle just coming to a close is Ki Yu. The new year, the 47th, becomes Keng-Suh. The last syllable of it means dog. Hence the new year will be "dog year" on the cycle-of-12 plan.

The reader may get the impression that the Chinese calendar is so bad that it could hardly be worse. This is perhaps partly true. But what answer could we give an educated Chinaman if he asked us why we adopted his ancient seven days for a week, or still use his months in their sadly confused form of 28, 29, 30, and 31 days, in such an irregular order that we have to memorize a silly rhyme to know how many days are in a certain month? We could, of course, point with pride to the fact that Pope Gregory gave us a year which does not go wrong over a month, as the lunar one does, but less than a day.

The Chinese or Japanese calendar clock shown is drawn from fragmentary information and such odd parts as have come to the writer's notice. The hour, day, month, year and cycle are set to indicate the Chinese new year as above mentioned. The small bent hand or pointer in the center indicates the hour of the rat (two hours long), the center of which unit corresponds with our midnight. There are many interesting points regarding the clock proper that I would like to speak of here, but, as the subject is calendars, we will not depart now. The day begins and ends when the hand is at the bottom on this clock. Therefore, we will assume that the last day of the 46th year of the 76th cycle has just departed and that the first day of the first month of the 47th year is moved into proper position.

We look for the two small circles marked "1st month" and "1st child," giving us the double syllable name or number of the first day. Then at the top the two circles on either side of the month character we show movable characters, meaning first and small. That is to say this particular month has 29 days. The large ring containing the 12 branches has been moved one space, bringing the new year animal name "Shu" into proper place at the bottom to read "Dog year" to those using the separate cycle of 12. But this large ring is an internal year of 12 teeth or any multiple of 12 traveling in unison with another ring, which carries the 10 stems, but with teeth on its outer edge in the ratio of 10 to 12, as compared with the internal gear. Therefore it takes six complete rotations of the stems to each five complete ones of the branches. It also follows that, as the stem ring has made 4 rotations and 7 spaces, it reads $4 \times 10 + 7 = 47$ year, or, as the large ring of branches has gone three times around and 11 spaces, it reads $3 \times 12 + 11 = 47$ again. This brings the seventh stem, Keng, directly over the 11th branch, Shu, and with these two single syllables made into a two-syllable word, we again have 47, or Keng Shu, the present year.

The five pairs of stems and branches which are breaking company on the left show the past five years, and double-headed arrows indicate how these stems and branches change partners to mark the five coming years. The Chinese numeral on the left top corner of each space indicates the numeric equivalent of each stem and branch when they are used separately. They are geared together here, however, to get the sexagenary period. No odd and even branch or stem ever coincide, but always even and even or odd and odd. In other words, the top stem always jumps over the top branch to select its new partner. When these 10 stems and 12 branches complete their 60 different partnerships, the 76th cycle of 60 years will be complete. Then the horizontal wheel at bottom will move to the next cycle, bringing the Chinese number 77 on the center line, or, as it reads, by literal translation, 7 times 10 and 7. This same order will continue up to the 120th cycle or $2 \times 60 \times 60 = 7{,}200$ years from the beginning of this system. This whole proceeding of course depends on keeping the machine going and attending to the intercalary connections to keep seasons from rotating. To repeat, let us say that this calendar reads as it now appears in the illustration: *1st Hour of 1st Day of 1st Month of* 29 *Days of the 47th year of the 76th cycle of* 60 *years*, which is also the 2,461st of Confucius, or second year of Emperor Hsaun Tung, or the 4,547th year by the sexagenary system of 4,607 from the time the Yellow Emperor Hwang Ti ascended the throne. It is also most nearly associated with our year 1910.

Refer to the annular space between the clock dial and stem ring. This space has five spokes which divide the world into the five original elements (as the Chinese supposed) "Earth," "Metal," "Water," "Word," and "Fire." The affinities or extremes of earth are Wu, a hill or mountain, and Ki, a level field or plain. Metal extremes are Keng, an implement of war and sin, a cauldron, an implement of peace. Water was of two kinds, rough billows or waves and placid streams. They are Jen and Kwei. Wood consisted of Kiah, a heavy tree, and Yin, light bamboo. Fire was made up of Ping, a sort of flame, and Ting, meaning light. These ten stems are the result of the Yang and Yin, or positive and negative, or extremes of the five elements.

The 12 stems are frequently used at the 120 minute hours of Japan. No. 1 or "rat" is midnight (after 60 minutes of it are used). The sixth stem or "horse" therefore becomes noon, but not till the middle has been reached. That is to say, the first half of "horse" is still forenoon, the latter half is afternoon, and the exact middle is full horse or true horse, meaning exact noon. When these 12 stems are used under the proper radical to represent the stars, "rat" becomes Taurus and horse Scorpio. When we come to the twenty-eight stellar mansions, however, the stems and branches are laid aside for twenty-eight characters, which Dr. Carus, in his "Chinese Thought," supposes to be an ancient form of the lunation before it was properly measured. I am more inclined to think that it was a sidereal lunation taken on the broad view of the universe, making a year of 13 = 28

A New Signal Clock.

THE signal mechanism illustrated herewith has been constructed because, in many businesses, the signal times on certain days of the week, Saturdays, especially, are necessarily different from those on ordinary days of the week. Very often, on Saturday, the dinner hour is curtailed, the afternoon rest is entirely omitted in Germany, and instead the work ceases earlier. The arrangement in the clock is so devised that the signal wheel S (Fig. 1) has two circuits; contact screws can be screwed into these two circuits. These screws, by means of two springs, placed above the wheel, close the circuit. The arrangement is so devised that on the outer signal circle all the mo-

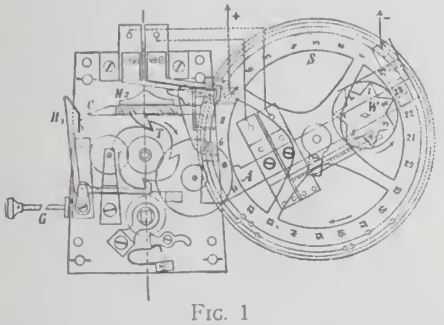

FIG. 1

ments or periods are placed at which the clock, on week days, is to ring, and in the inner circle all the periods are placed that have to be used on Saturday only. From the two contact springs 1 and 2 (Fig. 2) placed above the signal wheel, the current is conducted into two small springs 3 and 4, of which, in turn, one of each is located

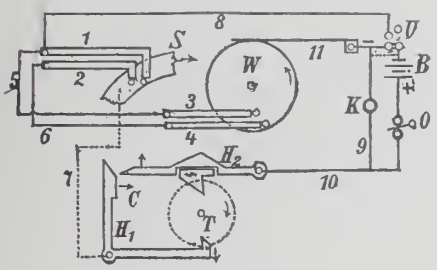

FIG. 2

over a contact circle, in fact, over a disk W, that is in contact with a seven-pointed star. This seven-pointed star is so moved ahead that a pin on the 24-hour signal wheel each night forces the star one point ahead, so that in a week it has completed a revolution. The Figs. 1 to 7 correspond to the seven days of a week, beginning with Monday. From this star, or from the disk under the star, the current is carried on by the spring 11. Of course, only those signals can be given of which the circuit is closed, and thus, from Monday to Friday, contact is established between the pin set in the outer circle of the disk W and the spring 4, whereas for Saturday a pin is set in the inner circle, which establishes contact with the spring 3, so that on Saturday the other signals are sounded.

If for Sunday no signals are required, then the week-day disk W has no contact pin for the seventh point, thus all signals are omitted. The arrangement, says the *Allgemeines Journal der Uhrmacherkunst*, can be changed as desired; thus, for schools the contact pins can be transposed to give, on Wednesdays and Saturdays, different signals, and on any other day desired. When, however, in a factory we want to take care of some exceptional holiday other than Saturday, we must be able, four or five times in a year, to switch in the Saturday circuits. For this purpose a special wire 3 can be conducted from the spring of the inner signal circle 1, which leads to a binding clamp of the switch M in the plan of the wiring. The clock will therefore take care itself of all the ordinary switchings, only in the case of the four or five extraordinary holidays would switching with the aid of the switch be necessary.

In the wiring plan, Fig. 2, B is the battery, O the bell work, K a press button for giving signals by hand. The two levers H_1 and H_2 are the contact levers, the touching of which at C closes the circuit. The working of this lever may be gathered from the preceding description; first, H_2 falls off, then H_1. The button G serves to change the length of signals; by it the pivoting point of the lever H_1 is changed, so that this lever, in relation to lever H_2, can be set to fall earlier or later. The entire arrangement can be just as well applied to a signal clock with contacts displaceable at five-minute intervals; in that case the disk T of the cannon pinion has 12 points, and the signal wheel must be equipped with a corresponding number of threaded holes for the contact screws.

Horological Notes.

LESLIE A. MITCHELL, Detroit, is the owner of a watch which bears the engraved date "1638." This history of the watch can only be traced back three generations. It has a very thick outer case of curved shape. There is also an inner case protecting the works, which are held in an engraved gold guard. It is about two inches in diameter and an inch and a half in thickness, all the parts being of the finest hand-work.

F. L. Bryant, Indianapolis, Ind., has received for repairs a watch of English manufacture estimated to be 150 years old. It was made by Charleson, of London, and is believed to be one of the first English watches placed on the market. The works are inclosed in three different cases, being fastened to the inner case by a hinge. The movement runs by means of a chain and is wound by a key, the winding being backwards. It is owned by Louis O. Schaefer, traveling passenger agent for the Cotton Belt Route. Mr. Bryant has also just repaired a Macedonian watch of Swiss manufacture, which was purchased in Jerusalem. He has among uncalled for repairs a Spanish watch with a lever escapement, three-quarter plate movement, with a gun-metal and gold case. It was left with him by a Spaniard a few days before the Spanish-American war was declared, in 1898. The Spaniard left the city and never returned.

"Snags frequently met by watch repairers," originally and interestingly treated, will soon be published in this department.

Mr. Jobber:

We do not take you by the throat and say, "take this dose or get off the Earth."

We want your business, but if we cannot get it without humiliating you before your customers, the Retailers, without forcing you to lose your self respect and business dignity, we do not want your business. Such methods to get your business cannot help but be nauseating to you.

"Must" is a hard word to make an American Citizen swallow. When a Trust says "You must," that is the time for you to say "I won't." If a Trust succeeds in making you swallow one dose what will the next dose be? Surely something more unpleasant.

NOT IN A TRUST

Pennsylvania Watch Case Company

Lighting the World

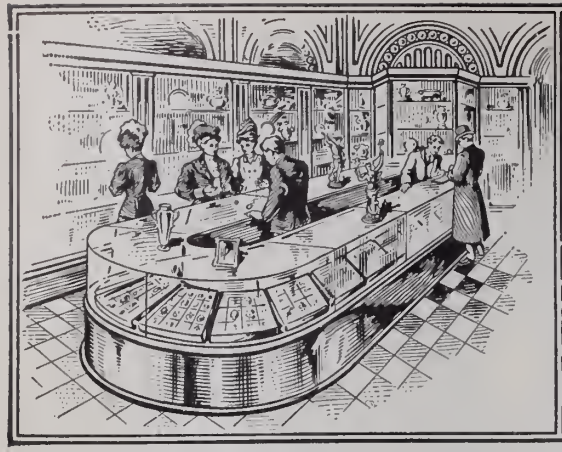
The perfection of the General Electric MAZDA Lamp marks the greatest advance in electric lighting since Edison's invention of the incandescent lamp.

Compared to the electric bulb now commonly in use, the General Electric MAZDA Lamp gives nearly three times the light without requiring any additional current.

General Electric

MAZDA LAMPS

The use of this lamp so reduces the *former cost* of electric lighting that this modern system of lighting is now easily within the reach of all who live within the borders of a lighting circuit.



Every store, office, home or factory can now have the safest, cleanest, most healthful and most brilliant light at one-half its former cost.

All progressive lighting companies and electrical supply dealers carry a full line of General Electric MAZDA Lamps.

Be sure you see the famous G. E. monogram on every lamp.

of the New York Bar.

(Continued from issue of Feb. 23.)

No Formalities Required.

Particular formalities for entering into a partnership are required. No seal is necessary, no subscribing witnesses; no formal agreement need not even be in writing. Too much stress cannot, however, be laid upon the importance of written articles of co-partnership. It is usually the best and convincing proof of the intention of the parties to it and removes all chance of ambiguity—of course, if carefully drawn.

When a Writing is Necessary.

An agreement to enter into a partnership for a future, which is not by its terms to be performed within one year, or an agreement to make a present partnership to continue for more than a year from its date or commencement, is void and of no effect, if not in writing.

Rules to Determine Existence of Partnership.

In these days of commercial trickery and deceit it is a matter of great moment to know the legal responsibility of the one with whom a person is dealing, to understand the legal import of his representation, and what is involved in extending credit to persons holding themselves out as partners or associates. So.

The question whether a partnership was actually created between two or more persons, one or all of whom deny it, frequently arises in many cases. Such questions usually arise between the partners themselves.

1. Where an enterprise or venture in which the parties have in some way been engaged turned out to be very profitable, and one or more pretending partners endeavor to compel a division from the others who deny the existence of a partnership.

2. Where an enterprise has proved disastrous and one or more pretending partners seek to enforce contribution from others who deny that they were partners.

Such denials frequently seriously affect persons who extended credit to them in the belief that they were partners.

As has already been explained, partnership is the result of an agreement—a common understanding between the parties. Therefore, the parties, or some of them, say that they intended to become partners, it becomes at once necessary to determine the legal effect of their relation, as shown by contracts.

In connection with this question it must be remembered that it is not what the parties themselves call their relation, but what the courts construe it to be, that must be given effect. The court presumes that the parties intended that which their conduct fairly indicates, rather than their declared intention. The court, therefore, presumes the legal consequences of their acts and contracts. They intend the acts they must also be held to intend the legal consequences of their acts.

Where, therefore, the question arises between themselves, or between the parties and third persons, if the legal effect of their acts and contracts is to create a partnership, the parties will be held to be partners, notwithstanding their stout protestations that they did not intend to be so bound.

INTERIOR VIEW OF THE STORE OF LIPPMAN BROS., ALTOONA, PA.

Keeping in mind the definition given that a partnership is based upon the agreement of the parties to unite their property, labor, capital or skill in carrying on business as principals of and agent for the other, several tests are afforded in determining when such an agreement exists.

Sharing of Profits and Losses.

An arrangement to carry on business in which the parties are to have a community of interest—which they are to own in common, in which each is to be a principal owner or proprietor, as distinguished from a mere agent or employe—and the profits and losses which they are to share as such owners, principals or proprietors, is the typical form of partnership.

Such an arrangement gives rise to a partnership as a matter of law. A and B made a verbal contract that A should put in $2,000 and a brick building and B should put in $4,500 for the purpose of trading in cut glass; that they should share losses and gains equally, and hire an agent to represent them. They entered into no written articles of co-partnership.

They were held to be partners, and all the property used in the business, including the brick building, was partnership property. (Moulton *vs.* Aetna Fire Ins. Co., 49 N. Y. Supp. 570.)

Where one participates in the profits as such he will be held to be a partner as to third persons, and liable for partnership debts. (Leggett *vs.* Hyde, 58 N. Y. 272.)

On the other hand, that where a party is only interested in the profits of a business as a means of compensation for services rendered or for money advanced he is not a partner. (Smith *vs.* Bodine, 74 N. Y. 30.)

A loan may be made to a partnership firm on conditions by which the lenders may secure a limited or qualified interest in certain profits of the firm without making them partners in the general business.

The test is whether the person sought to be held did or did not receive his share of the profits on account or by reason of an interest in the business. (Curry *vs.* Fowler, 87 N. Y. 33.)

Persons who agree to contribute property or funds for a common enterprise and to share the gross returns of that enterprise in proportion to their contributions, are not thereby rendered partners.

Where a party sold goods to two parties and believed they were partners and that a partnership existed between them, and one of them was admitted to be a member of the firm, and the other, while engaged in the business of the firm, declared himself to be a partner, such parties cannot deny the existence of the partnership when sued for the price of the goods sold to them. (Griffin *vs* Carr, 21 App. Div. 51.)

FIRST GLASS BEADS MADE IN THE UNITED STATES AT JAMESTOWN, VA.

manufacture of glass beads for trade with the Indians and the accompanying illustration shows the product of the early Colonial factory in the manufacture of these articles.

Probably the first flint glass factory in the present territory of the United States was erected by Baron Henry William Stiegel at Manheim, Lancaster County, Pa., about 1762. This factory continued in operation until 1774, producing utilitarian wares including jugs, sugar bowls, salt cups, glass tumblers, bottles, etc. The glass was of better quality than any produced elsewhere in this country down to the period when its manufacture ceased. It was made in four colors: white, dark blue, rich purple and emerald green.

The enameling of glass in vitrifiable colors was attempted here for the first time in the Colonies and at least four different patterns were used to decorate tumblers and other articles. Relief designs were produced by blowing glass and figured moulds.

The Stiegel glass was distinguished by its decorative quality of relief pattern, its beautiful coloring, its quaintness of form, its thinness and its remarkable resonance when struck sharply. The manufacture of this glass was at one time sufficiently extensive to supply the demands in Eastern Pennsylvania and considerable quantities were shipped to Boston and other more distant points. A representative collection

w be seen from the illustration here-
e trophy is in the form of a large
e verlaid with silver.

The unique feature of the cup lies in the fact that the body is not made of glass or metal but of a high grade of Para rubber, similar to that which is used in the body of fountain pens. The rubber part was made at the Waterman factory, while the silver mounting or overlay was done by the Aikin-Lambert Co., New York.

RECENT PUBLICATIONS

"THE EXPORTERS' ENCYCLOPEDIA FOR 1910." A complete export shipping guide. Cloth, 777 pp., 8 x 5½ inches. Published by Exporters' Encyclopedia Co., New York. Price, $.500 (including monthly corrections and *Exporters' Review.*)

THE latest edition of the "Exporters' Encyclopaedia" for 1910, which is the sixth edition that has been issued by the publishers, has just made its appearance and will no doubt be welcomed by all merchants and manufacturers having business with foreign countries, as the mass of information that it contains cannot be found elsewhere in such compact form.

Beginning with general shipping instructions, covering every branch of the export business, to which about 40 pages are devoted, the volume continues with a mass of general information of all kinds with detailed information covering nearly every country in the world which buys from the United States, in such a way as to enable the shipper to send goods to any foreign country with full security against delays, fines, etc.

The exporter will find that the volume tells him every practical route to every place, whether he can get a through bill of lading or, if not, which is the nearest port to which a through bill of lading can be obtained. It tells him whether any consular regulations must be observed and the exact cost of same. It tells him what the transportation companies require as to bills of lading, payment of freight, and, in fact, answers every question that comes up in making an export shipment.

When consular invoices are required the encyclopaedia tells where they are to be obtained, the cost of the blanks per set, the exact charges for certification, up to any amount, and also shows a fac-simile invoice, with English translation.

The Encyclopaedia tells whether freight must be prepaid or otherwise; how many bills of lading are required, and what statements must appear thereon; whether hazardous cargo is carried; the lowest cost for which a shipment can be made to any port, etc.

Every practical route from the United States to every foreign country is given, showing the direct ports of call, the frequency of sailings (or sailing days), the ports reached by transshipment and how interior cities are reached.

Officials of the Dilworth Co. last week discovered the hiding place for the plunder secured by the gang of thieves who have been working the mining towns along the Monongahela River in western Pennsylvania. It is located in an abandoned shaft along the river opposite Frederickstown.

Decline of Wood Carving in Switzerland.

IN a recent report, Consul-General R. E. Mansfield, of Zurich, writes as follows of the gradual decline which the wood-carving industry of the Swiss Oberland has experienced in recent times:

"Wood carving, for centuries an important national industry in Switzerland, has suffered a crisis during the past year which threatens to affect the business permanently, following upon practically a monopoly and a long period of prosperity. These carvings have been especially popular with tourists, hundreds of thousands of whom visit Switzerland every year, and a large export business has been established with other countries, including the United States. This is especially true as to church emblems and articles representing historic scenes and events.

"An important Swiss wood-carving center is at Einsiedeln, a historic village in the mountains in the canton of Schwyz, where there is a celebrated pilgrimage, a wealthy Benedictine monastery and a splendid church. The industry centers in the Bernese Oberland, where wood carving is the chief occupation. The church emblems of Einsiedeln, the bears of Berne, the lion of Lucerne, the St. Bernard dogs, cows, and the quaint Swiss chalets are all reproduced in wood and sold at the curio shops. These objects have found their way into practically all Continental towns, and Swiss wood carvings are almost as well known in other European countries as at home.

"Various circumstances have contributed to the present crisis, among which is the increased cost of raw material, much of which is imported, making it necessary to advance selling prices without increasing real values. This has invited competition from other countries, especially Austria and Germany. Furthermore, Austria recently placed a heavy import duty on souvenirs, under which wood carvings are classified, and in France they must be stamped "Imported," which, it is alleged, has affected the sale to such an extent that the imports from Switzerland have been greatly reduced.

"The passing of the Swiss wood-carving industry is further evidence that industrial progress is gradually eliminating from the commercial world rural industries built up and maintained where wages are small and the expense of living low. Modern machinery and methods, increasing competition and the inexorable laws of trade are driving out primitive concerns, or forcing them into combinations. This is cause for regret, as many of the people living in the Bernese Oberland have for generations depended upon wood carving for maintenance. They have acquired great skill in this, and, being slow to accept innovations, it will be difficult for them to adopt new methods."

G. W. Bowers, Marion, O., commenced an auction of his stock Wednesday, March 2, at 2.30 P. M., which will continue daily at his store, 112 S. Main St., with sessions in the afternoon, beginning at 2.30 P. M. and in the evenings at 7.30. James L. Hand, jewelry auctioneer, is in charge of the sale.

What Specialization Means

True factory economy does not permit of doing by hand what can better be done by machinery.

In like manner it is false economy to do for yourself what can be done for you better, as well as more cheaply, by specialists.

We are specialists in the melting and rolling of Sterling Silver. The advantages of specialization are made manifest in the superior quality of the output of our well-ordered plant.

ON No. 2429.—**Relief for French** *What kind of preparation can I use oxidized silver novelties in French Have used pumice and water, but es it too rough.* *R. F.*

ER:—Do not use new and sharp but such as was used for other i and has gathered in the bottom of s. This should be put in a dish ed up with a little water to make a e. Add about one-tenth part com- ur. A well-worn tampico brush e used on a slow running lathe. nice paste is applied, and this will he oxidizing, leaving a good sur- nch gray.

TION No. 2430.—**Removing Drag ks from Gilding.**—*After gilding and rushing I notice many drag marks, ry the scratch brush. How can I them?* *R. D.*

ER:—The drag marks may be avoid- sing a little licorice root or soap he water by which to lubricate the This will soften the water so the ill not be so noticeable. Perhaps method is to deposit a light coating n the scratch brushed pieces, or, as in Germany, simply hang the ar- a few moments in a hot gilding with the current shut off, which olve a little of the gold from the and consequently remove the drag s

TION No. 2431.—**Transferring En- s.**—*How can I make a pattern so I sfer engravings on cane and um- ndles?* *T. E.*

ER:—To transfer engraving, first one piece, then lay a thin and not too hard piece of pasteboard over the engraving, holding it firmly in one place, and rub over the pasteboard with a burnishing tool just enough so the impression will be formed on the paper. If the paper is too hard, then it is best to moisten it very little. The rubbing with the burnisher should be as hard as the paper will permit; also rub over the edges so the impression will be a guide to lay on the next piece. The pieces to be engraved should be polished, and, when ready, take the pasteboard with the impression and rub it several times over your hair; then lay it on the polished pieces and rub over lightly. The natural oil of the hair will be sufficient to print the engraving on enough to set as a guide for the engraver. A number of pieces can be printed this way.

QUESTION No. 2432.—**Bronzing Metal Objects.**—*We contemplate manufacturing ornamental lamps, chandeliers and novelties; the base metals used are zinc, brass, iron and lead. We want to bronze finish them so they will be a good imitation of red bronze. Please give us some information as to how we can do this.* *B. M.*

ANSWER:—The bronze finisher may be applied with a brush, and by careful manipulation the objects can be made to appear like real bronze. The *Bronzewaren-Fabrication,* by L. Mueller, gives the following version for using bronze by the brushing method: A good linseed oil varnish is recommended. For a gold bronze finish rub up a little ochre as fine as possible with the varnish, adding black and blue until the color looks a dirty green. With a soft brush apply the first coating, and when thoroughly dried apply another and let dry. The third coating is applied and, when partly dry, brush on the bronze powder with a fine camel's hair brush. The hollows and depressions are not to be covered with the bronze powder, but are left to show in contrast. When the bronze and varnish have dried the loose powder is brushed off with a stiff brush. When a solid gold bronze color is wanted use a gold varnish and cover the object entirely with gold bronze powder. A method much in use is to coat the objects with varnish paint; subsequently coat or dust over with leaf gold, mosaic gold or gold bronze powder. The application of a good bronze lacquer will give a soft luster, and the objects will be hardly distinguishable from real bronze. *Copper Bronze*—To copper bronze iron and zinc, coat the objects first with a brown varnish paint, and when this is nearly dry apply bronze powder, as in other cases. Copper bronze powder can also be mixed with spirit varnish and the two put on together. The brown copper, like bronze for zinc objects, consists of spirit lacquer, with which is mixed a color rubbed up in alcohol. The objects must first be made perfectly bright and clean. Brushing and scratch-brushing with a fine copper brush will produce a reddish coating, which is to be varnished over with a thin colored spirit lacquer. Red bronze is produced by red lacquer, red bronze powder or mosaic gold. Before applying red bronze lacquer the objects must be made bright and clean, as every spot will show through. Warm them and brush on the lacquer. If metallic bronze is to be used, coat the objects first with a varnish color, and when this is nearly dry dust on the bronze with a soft brush. Green bronze can be produced on tin, zinc and lead by means of a green, dead-luster bronze lacquer or a green varnish color. Frankfort black or chrome yellow make the best mixture for the color. Bronzing for cast iron can be done with lacquer or varnish mixtures, but they must not be too lustrous, or the object will not look like metal. Sheet metal objects are also bronzed by first lacquering them, and when the lacquer color is dry apply metallic bronze, red, yellow, gold, white or silver by wiping it on. Before lacquering the piece must be rubbed with powdered pumice stone, ashes or hartshorn. Fine articles should generally be polished after each application of varnish. If there are figures, flowers or other decorations the final polishing is not to be done until after the painting has been varnished. Sheet metal objects are usually coated with a light colored transparent varnish after the bronzing is finished. For small objects of cast zinc only the best and oiliest lacquers must be used, otherwise they would soon be spoiled by the action of water. If such objects have been cast in sand molds they must be well chased. In the case of large objects of cast zinc, such as chandeliers, etc., chasing is not necessary, provided the casting was successful, as the lacquer will conceal many rough or imperfect places. The lacquer colors for the cast zinc objects of monumental size must not be too brilliant, but should have a dull, quiet tone. The luster can indeed be subdued by rubbing on metallic bronze, but the effect is more beautiful where this has not been done. Mosaic gold is to be mixed with four parts of washed chalk to one part of gold and applied to the copper or brass object with a moistened wad of linen. The metal will take on the appearance of gold, and the coating can be protected by a good elastic lacquer.

Platinum Peculiarities.

PLATINUM deposits are always hard and cannot be scratch-brushed with a brass scratch brush. A steel scratch brush should be used.

Although platinum plating can be done successfully and forms a bright, adherent electro-deposit, it is not used at all in the manufacture of jewelry or other objects of ornament. The color of platinum very nearly resembles nickel.

The platinum deposit obtained is quite hard and durable.—*The Brass World.*

SMEL FOR TH

A Complaint and an Explanation

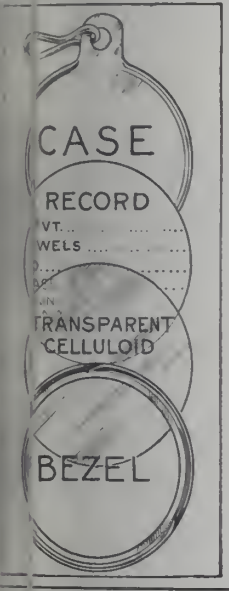
Mr. C. O. Snyder, a well-known and experienced watchmaker and jeweler of Bloomville, Ohio, complained to the Fulcrum Oil Co. that he was not getting good results from

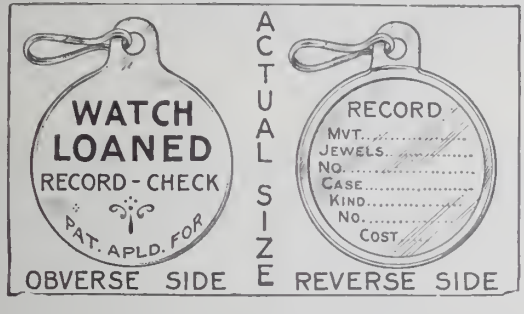
Fulcrum Watch and Clock Oil

The nature of the complaint indicated that he was using too much oil. An explanation of this fact was communicated to him, and here is his answer, dated Feb. 19, 1910:

"Your explanation is satisfactory, for I had diagnosed the trouble before hearing from you. I had been using the same amount as I did with the old ---- and ---- oils (mentioning two old well-known brands), **but I reduced the quantity and the results are marvelous.**

"Escapements that have been sluggish, have with the new FULCRUM OIL taken on new life, and it seems a pleasure to put a watch in order with this oil."





This is just one of the many letters received every day telling of the superiority of FULCRUM OIL to any that has ever before been used for watches and clocks.

Try it once and see for yourself—it means an end to all your oil troubles.

35c. a bottle—For Sale By All Jobbers—$3.75 per dozen

WATCH LOANED Record=Check

Use this check in connection with the paper tag usually employed when a customer leaves his watch for repairs, but only when you lend him a watch. The check is an **Unfailing Reminder** and an absolute protection against loss of loan watches.

It contains its own record, which will prove whether the watch returned is the same one you loaned. It contains a complete invoice of the loan watch. It will enable you to locate any particular watch used for loan purposes at any time.

Enter the record on the printed slip within; once only. It will not wear out and may be used repeatedly. Two extra slips accompany each check to be used in case one is blotted when you make record. The check proper is made of aluminum, hence, very light and convenient.

Stone Goods of Great Variety

The reigning fad in Men's Jewelry at present is something in a stone button or scarf pin.

We have them in endless variety of stones and styles; all real stones and handsomely mounted, and the latest ideas.

We don't copy; we originate. A jeweler who is wide-awake will take up new things and push them to a finish while they are popular.

Our goods are equal in finish to any 14-K. line made, and prices much lower. The accompanying illustrations can only give you a faint idea of the excellence of the Line.

Send for memorandum package, or see our salesman when he calls.

A 10-Karat Line
that is 10-Karat

The Keller Jewelry Mfg. Co.

64 Nassau Street
New York

Factory, 251 N. J. R. R. Avenue, Newark, N. J.

TO THE TRADE:

"A principle which we have always fought for has been to keep the market open for all watch cases, no matter of what manufacture, believing it to be for the best interests of the trade to allow them to buy the watch cases which they consider the best on the market and by so doing stimulate all manufacturers to their best efforts, with a view of establishing a high standard of excellence. The Dueber Watch Case Mfg. Co. in all its many years of existence has never sought to dictate to any jobber what watch cases he should use. It has never used, directly or indirectly, any method of coercion or force to either restrict the product of any watch case manufacturer, or to force the production of its cases upon any wholesale or retail jeweler to the detriment of any other manufacturer of watch cases. It employs the 'open door' policy in selling merchandise and believes that the trade should be open to all manufacturers and jewelers alike and to that end will bring all its energy to bear for the good of the entire trade."

Winning on Merit Alone

There are many ways of trying to win in the business world.

One may adopt Brute Force. That is the method of the highwayman, when he hits you on the head and takes your wallet.

Or one may seek success simply on the MERIT of his products in an open market. That is the approved method in civilized communities. It succeeds.

Jobbers, dealers, consumers, everybody responds to considerations of MERIT, and no Chinese Wall can shut it out.

For years

Wadsworth Watch Cases

have been winning on merit. The cases have been sold, and the business developed on the idea of QUALITY, including superior SHAPES, STYLES and ENGRAVINGS. The Cases will continue to be sold and the business to be developed along the same lines.

The Big Stick is no part of our office furniture. Dealers DON'T HAVE TO buy these Cases.

But they WANT TO and will buy them because of their MERIT, because of the PROFIT there is in them, and because there is always certainty of a SQUARE DEAL and no coercion.

There is always a demand for a medium priced line.

A line with a reputation.

A line made by a house of unquestioned integrity.

The D. F. B. Co. line is all this, combining with QUALITY and popular price, superior FINISH and artistic DESIGN.

Our improved method of finishing insures the wearing qualities and results in a finish UNSURPASSED by any.

We sell the Jobbing Trade only

1000 BAGS DAILY

It is estimated that there are fifty million women in the United States. Not over two million have mesh bags. **We** must supply the other forty-eight million with machine-made mesh bags.

The reason why machine-made Mesh Bags are better than hand-made Mesh Bags is

that we use **much harder wire** than used on hand-made bags, and machines harden it still more in working, making wire **stiff and strong,** no **rough joints to catch,** and wear the dirt. Stronger and better than soldered mesh.

We also make the only **ABSOLUTELY SOLDERLESS FRAME EVER MADE,** other **so-called solderless** frames have joints or some parts soldered.

We are the **sole** manufacturers of machine-made mesh with **solderless** frames.

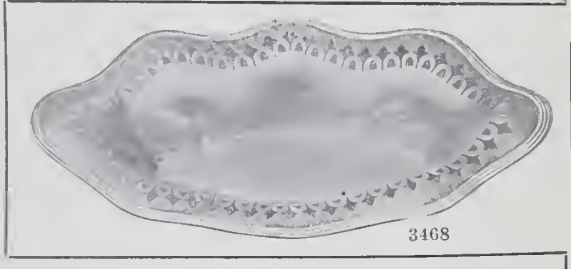
Your Opportunity To Make More Profit

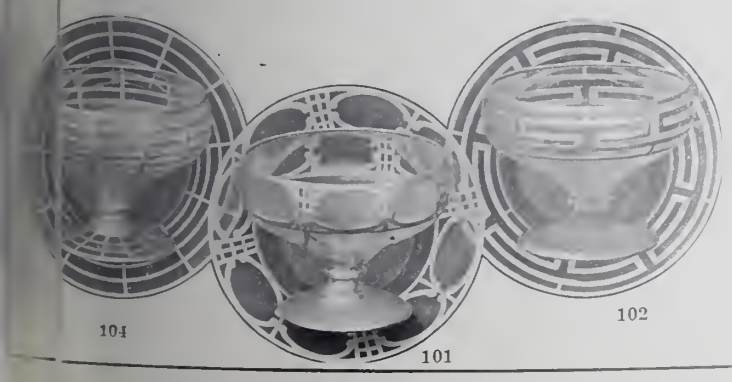


TRADE W MARK

Stand out for quality and look for price. That is the slogan—the only chance of success in the keen competition of to-day. You cannot afford to pay a salesman's salary and expenses on every bill of goods you buy. We want to co-operate with you for the betterment of your business, by selling you silverware at prices based on factory cost solely. We can do it because we sell you by mail, thus eliminating practically all selling expense. The economy effected enables us to offer you WOODSIDE STANDARD deposit ware and sterling silver at

15% to 20% OFF FORMER PRICES

Understand, the only change is in the elimination of ead expense. The same designers and the same xpert workmen will continue to produce the same eautiful creations of their skill that have long made ur productions famous for their individuality and ue worth.



3468

We again call your particular attention to our complete line of sherbet glasses, three specimens of which are here illustrated. Their remarkably low price is making itself felt in a call for them that is unparalleled. All our deposit ware shows pure white inside, and the silver is guaranteed not to come off. If it does we will give you a new piece at any time. An idea of the beauty and individuality of our sterling silver is conveyed by the two pieces here shown.

Write for the prices of these pieces or anything else you need and learn just how much more profit our selling plan means to you.

Get your name on our mailing list for our New Spring Catalog and

Profile

Sterling Silver Toilet Ware

We illustrate above several pieces in one of our new patterns in Sterling Silver Toilet Ware.

Especial attention is called to the delicate model, emphasized by the profile view of the mirror.

All the pieces in this pattern have the same grace of outline as in the articles illustrated and all are made in substantial weights. The die work is clear cut and imparts a decided degree of character to the design.

The finish is a beautiful soft grey, with bright shield.

Durability Doubled

The one line of plated flat ware that you can absolutely depend upon to give perfect satisfaction from both your own and your customer's point of view, is the ware with the name—**SIMEON L. & GEORGE H. ROGERS COMPANY XII.**

Every piece is plated by our unrivaled Sectional Process. This new method of plating protects the parts most exposed to wear with an extra deposit of silver that doubles the durability of the piece. We guarantee our XII line to strip 50% more silver than standard plate and to outwear any other brand of silver plated ware.

Our designs make sales easy. Our Sectional Process makes sales permanent. Our prices make sales profitable. Our line will make a reputation for you as the dealer carrying the finest silver plate in town.

Our full corporate name is our trade-mark—not easily confused with similar names on inferior goods. It marks the finest product of the silversmith's art.

Not just as good, but BETTER

"The Case That Courts Comparison"

Mr. Retailer:

It required a quarter of a century to bring SOLIDARITY GOLD WATCH CASES up to their present point of perfection.

Merely stamping "SOLIDARITY" on the *inside* of our cases did not do it.

It is the SOLIDARITY **Individuality** on the **outside** of our cases that did it. Individuality is the hardest thing to buy and the easiest thing to sell. SOLIDARITY CASES have it.

SOLD ONLY THROUGH THE WATCH JOBBERS

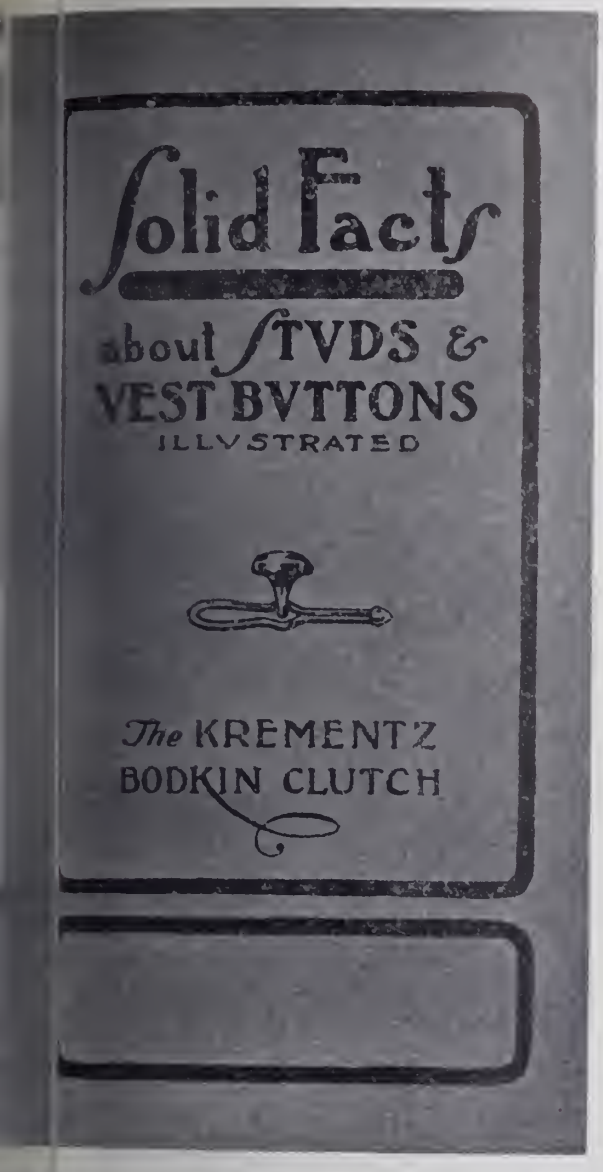
NEW MEDALLION PENDANTS



THE FUTURE NECKLACE

THE RESPONSE to the recent announcement of Medallion Neck Pendants introduced by this house, was so instant and appreciative as to justify further extensive developments of notable Cartier ideas. In these latest examples the diversity of effects is nothing short of infinite. A pleasing conceit is to have the metal colored to match the stone. At the same time Sapphire or Coral with French Grey continues strongly in favor. Conditions warrant the assertion that the Medallion Neck Pendant is pre-eminently the *necklace of the future.*

Creating Importers of

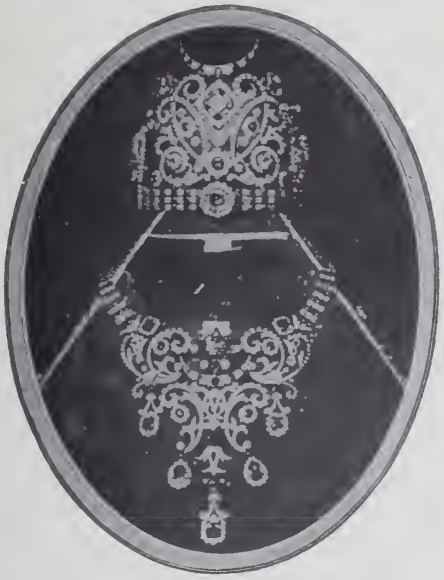
Remnant of the Famous Golden Service of the Hohenzollerns.

preserved at the Hohenzollern senm in Berlin a gold plate as the rt of the once famous gold table f Frederick the Great. The set made at one time, but on two King Frederick I. left a collec- lden vessels, 201 in number, which ne were valued for their metal bout 106,000 thalers. On the death Frederick Wilhelm I., who had he collection to the keeping of Sophia Dorothea, it came into the n of Frederick the Great. On his was melted down in 1741, the ng destined for the production of id gold service. The court gold- eberkühn, received for its execu- 44 thalers; the total cost was 126,- rs.

Dorothea, however, had a collec- ner own, the "golden cabinet" of n, in which especially the candela- cket, candlesticks, gueridons and for the chimney piece were promi- hen the Queen died, in 1757, this also, valued at 74,621 thalers, de- to Frederick the Great, who by greatly increased it. The whole d the frequently mentioned cere- vice, for use on conspicuous occa- o give an idea of its magnitude, Seidel states that it included eight tes and six dozen each of knives, d spoons. Then there were six es with handles, 18 medium dishes de dishes.



vessels of precious metal, which, nt of their interest as works of often well worthy of preservation, unately very easily converted into ney. This has occurred on many Frederick the Great himself had mmense silver treasure of his d grandfather coined into 1,250,000 1745, in order to carry on a war. golden service saw its doom when 's troops occupied Prussia and a mnity had to be paid. In this sor- ime King Frederick William III. people a good example and sacri- the necessities of the fatherland. er precious relics, the golden

yal Seehandlung effected, in 1808, its bookkeeper, Sasse, the melting he sale of the gold in Hamburg. s weight was 1,246 marcs (one als eight ounces), and it lost in in round figures, 245 marcs. The ceeds, after deducting expenses, to 229,619 thalers. In 1764 the e of the service was calculated at halers; to-day its value would be ,000 marks ($177,500).

entire treasure (with the excep- tion of a few gilded brass handles) only a single plate is left. Queen Louise must have regarded this last relic of splendor with sadness when she had it sent to Königsberg, in 1809. Emperor William II. presented the valuable relic to the Hohenzollern Museum.

Jewels of Ex-Sultan of Morocco, Pawned at Paris, Redeemed in Time to Prevent Them From Being Sold.

WHEN at the end of December there appeared in the Paris papers a notice that the National Pawnshop of France would sell at public auction the jewels pawned by Abdul Aziz, ex-Sultan of Morocco, there was much scurrying about in the French capital on the part of the Moorish diplomats to prevent the sale.

PART OF ROYAL JEWELS PAWNED BY THE EX-SULTAN OF MOROCCO.

Two years ago the then Sultan of Morocco pawned the crown, necklace, 20 watches, six snuff boxes and an opera glass, all studded with pearls and diamonds of priceless value, for the comparatively small sum of $300,000. The interest was paid regularly until the Sultan was deposed, and as neither capital nor interest was offered at the end of 1909, "Ma Tante" advertised them for auction.

Abdul Aziz, despite reports to the contrary, is bankrupt, but his brother, the present ruler, had enough family pride and patriotism to prevent the sale. As was announced by cable recently, the sale was postponed for a month by order of the Judge of the Tribunal of the Seine, and an emissary planked down $300,000, with interest, and by this time the precious jewels are probably safely deposited in the strong boxes of the palace at Fez, Morocco.

Fine Memorial Tablet of Bronze and Colored Enamel Commemorating the Algeciras Conference.

ON the front cover of this issue appears an illustration of the handsome memorial tablet which the Spanish authorities have caused to be affixed in the hall at Algeciras, where the important international conference took place in 1906. This tablet is remarkable on account of the fact that the whole inscription is done in colored enamel—to be more precise, in champlevé enamel. The background of the tablet is gilt bronze, from which the lettering in opaque and transparent enamel of various colorings stands out most effectively.

The execution of this eminently difficult task was successful only after several repetitions. The inscription plate is about one yard long, and as such a large work in the laborious and difficult technic of champlevé enamel had never been attempted before it was entrusted to a jeweler who has been particularly successful in this field, viz., Fritz Steiger, of Halle, Germany, who recently completed another wonderful piece of enamel work, the candelabra presented to the German crown prince couple by the province of Saxony, and illustrated in a recent issue of THE JEWELERS' CIRCULAR-WEEKLY. These two examples of enamel work, the above-mentioned memorial tablet and the candle-holder, are supposed to be the largest specimens that have ever been produced in one piece in champlevé enamel.

Above the inscription plate will be seen in neat and faultless execution the coats-of-arms of the countries which participated in the conference. These coats-of-arms are likewise in champlevé enamel, all the colors being faithfully reproduced. It may be well to mention here that through an error the Swiss coat-of-arms appears instead of the Swedish one (last one on the right). This mistake, however, was rectified in the original soon after the photograph was taken. At the bottom is the colored coat-of-arms of the city of Algeciras.

The inlays consist of four bronze reliefs, the upper one on the left signifying "Peacefulness," while the corresponding one on the right represents "Envy." On the left below is typified the greatest of all political virtues, "Wisdom," and on the right the meanest vice, viz., "Covetousness," which is here represented as in fetters and crouched to the ground, whereby it was endeavored to indicate that through wisdom at the conference all selfish and unjustified thoughts were kept down.

All these details are united into a whole by a handsome frame of varicolored wood with fine ivory inlays. The charm of the piece lies, of course, in its color effect, which is magnificent and of which a half-tone cut can convey no adequate idea.

TRADE-MARK TALKS

NUMBER TWO

A Trade-Mark Standing for Unquestioned Quality

No. 1855
Ladies' Ring m
Amethyst, Topa
Turquoise Matr

The National Stamping Law compels every Manufacturing Jeweler to do one of two things—make gold jewelry the exact quality it is stamped or omit a QUALITY STAMP.

This law is to prevent fraud and misrepresentation and if a Gold Jewelry Manufacturer does not put a QUALITY STAMP on his goods, BEWARE.—If he does not put a TRADE-MARK alongside this QUALITY STAMP, he evidently does not care to be identified as the producer of that article.

If you are a dealer in honest merchandise, and want to give your customers a square deal, buy gold jewelry that is stamped with its respective QUALITY MARK and this TRADE-MARK, as shown in the above cut.

On every Locket, Sleeve Button, Vest Button, Shirt Stud or Ring we make is the QUALITY MARK and alongside of it our U. S. REGISTERED TRADE-MARK. We know what we make and we are willing to guarantee the quality to be exactly as it is stamped.

Next week's Talk, Number Three, will be entitled, "Construction is an Important Factor in Trade-Marked Jewelry"

REPOUSSÉ WORK AND CHASING

ILLUSTRATED AND DEMONSTRATED BY AN EXPERIENCED ARTISAN

(Continued from issue of Feb. 9.)

It is decided to carry out an inscription or quotation by way of decoration in front of the clock-case, it is advisable to carry out each line of lettering on a sunken panel, so to speak. This is of advantage to the general design, as it holds the whole together better, and also simplifies the actual work. When working up the letters on a large surface the great difficulty always is to successfully merge the ground which had been set down around each letter into the general surface a little farther away from the letter, which difficulty can be avoided here by first working the lettering and the inclosing line of the panel all around and then setting in the small pieces of ground between the letters up to the enclosing line of the panel. It should be noted here that the two faces—*i. e.*, the top and bottom—of the letters touch the line of the panel. This line should be traced around the letter, but the surface of the letter should be allowed to remain level with the surrounding surface. When the small pieces of ground have then been set down, the outlines of the letters at the top and bottom can be defined by a very fine tracer and, for the sake of appearance this should not in any case be so deep as that which is traced in order to set down the ground. In many cases, in fact, it is better to omit altogether (Fig. 1.).

A sketch of the lettering explains the method of working this; the first line is simply marked on, the second line traced to show that the letters are only traced in, the ground has to be set down; the tops and bottoms of the letters not being affected in), the third line shows the ground set down, while the fourth line

FIG. 1—HOW THE LETTERS ARE FORMED.

shows the final stage where the tops and bottoms of the letters are finished.

The lower sketch represents a section of the base, showing construction.

Before the body of the clock-case has been completely finished, *i. e.*, the decoration carried out and the sides turned down and soldered—the base had better next be attended to (Fig. 2.).

The first piece of this to make is the one marked "A" on the sketch. It can be made out of a piece of metal measuring 5¼ in. by 5 in., using slightly stouter metal than that used for the body of the case. For this piece of metal an oblong, measuring 5 in. by 4¼ in., should be set out, the size representing the bottom of the body of the case already made. After scoring half-way through the metal on this line, and cutting small pieces out of the corners, the curved sides of this piece can be easily set back if a tool is made for this purpose, using a hammer the face of which is also shaped as nearly as possible to the curve required. When the desired angle and curve of the sides of this piece have been obtained the corners should first be soldered, as well as a little solder run into the scored cut all around, and then it can be finally planished over.

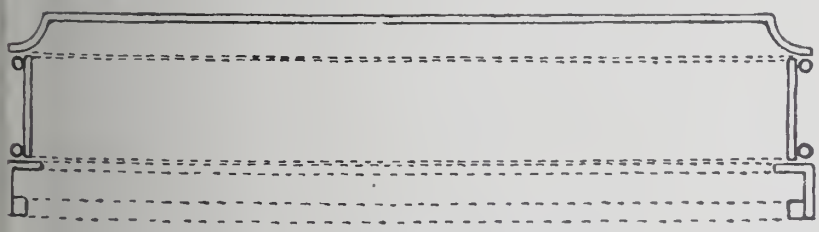

FIG. 2—SECTION OF BASE, SHOWING CONSTRUCTION.

The next piece, marked "B" on the sketch—*i. c.*, the upright piece on which the piercing is shown on the front elevation shown last month—should now be made. A strip of metal 19½ inches long and one-half inch wide, shuld be divided into four, so as to give alternate pieces measuring 5¼ inches and 4½ inches respectively. This piece, after scoring through the divisions and mitering each end, can be turned up and soldered together, and after carefully setting can be soldered on to the piece "A" already made. It should come about 1-12th inch inside the outer edge of "A," so as to leave room for the twisted wire shown in the elevation. Before soldering the two pieces together it is advisable to cut a number of stitches all round on "A," so as to preclude any possibility of shifting when soldering, as an uneven margin would be very noticeable when the twist is put on. The twist is most easily soldered on in two pieces, as if soldered on in four, the wires are apt to roll round when made hot, and so spoil the miter at the corners. To solder the whole on in one piece is practically impossible, as the wire is certain to expand when made hot, rendering an accurate fit impossible. If made in two one can, of course, allow for this at each end.

It should also be mentioned that if the piercing indicated on sketch is carried out, it is advisable to do this before soldering the two pieces together, as one can work at it from both sides, which, of course, after soldering is impossible. This piercing is open to innumerable variations, and almost any simple repeating pattern will do equally well so long as it is effective and it is remembered to make the individual pieces to be cut out simple in shape.

The lower part of the base, marked "C," can be made in a similar way to the first piece, the piece of metal required measuring 5⅞ inches by 5⅛ inches. A line should be marked all round 3/16 inches away from the outside edge, and after scoring through and cutting out the corners, the sides can be turned down at right angles and soldered. It is not advisable, however, to leave all this quantity of metal, and another line should be marked 3/16 inches away from the corner, and the centre can then be entirely cut out. This right-angled step can be soldered on to the pierced band then, and after soldering round another twisted wire to correspond to the one above, the base is practically finished. In order to strengthen the bottom edge—*i. c.*, the edge on which the clock is actually resting—it is a good plan to solder a square wire all round the inside flush with the bottom. This will make the base far more rigid, and prevent it being easily bruised.

The roof of the clock consists of a shaped piece with a square step underneath. The shaped piece measures 5¼ inches by 4½ inches across its widest part, and can be made out of a piece of metal of about the same size or a little larger. All the shaping required can be done on a sand bag, and the four miters which run towards the center and die away into a flat table (on to which the small pedestal carrying the group is fitted) can be tooled up on a pitch block. The square step underneath this shaped piece can be made in exactly the same way as that forming the lower part of the base, also cutting away the center of the metal before soldering the two parts together, so as to reduce the total weight as much as possible, which, in any case, will be considerable.

The question now arises as to the best way of fitting the three main pieces—*i. e.*, the body of the case and the roof and base together. To merely solder the three parts together in the ordinary way is quite unsatisfactory for several reasons. In the first place, it will be found that when soldering the body of the case either to the roof or base, the sides of the body will have a decided tendency to buckle and go out of shape in the fire just when the solder is running, even stitches, which in

Reigning Jewelry Fashions Noted in Paris.

Dainty Novelties in Jewelry, Watches, Novelties, Umbrellas, Etc., Now in Demand Among the People of Taste in France's Capital.

PARIS, March 1.—Just now there seems to be but few new models in jewelry, changes in stones and assorting of colors being applied to the designs already seen at the beginning of the season. However, a novelty remarked at one of the art jewelers was striking in its originality. It was a long *sautoir* in heavy tarnished gold links set with plaques of old ivory delicately sculptured in a Greek frieze pattern. These ornaments, which were at least half a finger in length, were set lengthwise and consisted of two plaques on each side, which formed the *garniture* of the bust. Between and connecting them was a horizontal bar of ivory at least five inches long and which set across held the chains in place. The effect was enhanced by a great clear topaz, which held the place of honor in the center. This ornament was suggestive of early Greek methods and was both artistic and elegant.

In nothing is so much latitude possible as in the necklace and pendant, without which scarcely a costume for day or evening is complete. At a modern craftsman's shop I was struck by a most ornate necklace of striking design and execution. A couple of sea horses with emerald scales and blazing ruby eyes held in their wide-open mouths a string of twisted pearls, while from their tongues was held suspended one of large size. Terminating their twisted tails were two flat baroque pearls in the shape of a shell, and which were separated by delicate gold and pearl loops, from which fell pendant strings of irregular shaped pearls. A negligee pendant was of aqua-marine, very large and pure, surrounded with tiny brilliants set in a circular hoop of gold filagree. A fetching dog-collar was formed of a pointed trellis work of narrow chains, each intersection strung with a scintilating diamond, from which depended a square ornament set with a great amethyst encircled with brilliants. An oblong topaz *brule*, in a leaf and flower design picked out with diamonds, made an effective pendant, the finish being several drops of baroque pearls in a yellowish tint.

A striking corsage pin was a bar of dead gold studded with peridots as big as the thumb nail, each end of the bar finished with points of gold incrusted with diamonds.

Tiny gold bags which can be slipped into the palm of the glove contain a division for gold, and in another is a miniature mirror big enough to view the tip of the nose.

Several gold balls as big as a haze' nut and thickly incrusted with pearls hang from a slender pearl chain. Some of the more important richly jeweled pendants are so arranged that they can be utilized as brooches.

Much enamel is used in conjunction with semi-precious stones.

Showy bandeaux for the hair are of linked hoops of gold enclosing pendant stones caught by sprays of blossoms.

A new idea for a brooch is a bow made of narrow velvet ribbon, the edges rimmed with tiny brilliants. Another imitates a knot of lace made of delicately carved aluminum incrusted with diamonds with a huge stone in the center and a pendant baroque pearl.

A heavy and showy ring has the hoop formed of the body of a serpent, the tail and head emerald and ruby studded, which sustains a splendid pearl as large as the thumb nail and of the thickness of a finger.

Marquise or narrow oblong diamonds are a favorate shape for ornaments. Peridots in mill-grain setting are effective.

The sautoir, made of four rows of small pearls and which resembles a pure white ribbon, is a favorite ornament for young girls; at intervals are set small balls of diamond incrusted.

Rather quaint are gentlemen's scarf pins—little calves' heads of white enamel with protuberant ears and gold muzzles.

An unusual hat pin is a cat's head in reddish tortoise shell with blazing ruby eyes.

Long barettes of white carved horn are studded with baroque pearls, like berries with enamel leaves. Convenient is a ball of perforated silver pendant from a chain on the wrist, and which holds a ball of knitting silk.

An umbrella top is of faceted crystal, the apex set with a big topaz.

A barbaric but attractive necklace shows three dark brown topazes engraved with mystic sentences and connected with many looped chains of blackened silver.

In little silver novelties there are puff boxes with a place for a photo inside of the lid. These are also made in carved ivory and blonde tortoise shell. Pretty are silver potpourri boxes shaped like an old-time warming pan.

Sealing sets are provided with a broad silver spoon for melting the wax over a little spirit lamp. The match box and silver seal lie on the tray.

Inkstands are of ambitious proportions, many of them provided with a perpetual calendar of celluloid. There are graceful female figures supporting the calendar, one a Rebecca at the well keeps watch over a great silver inkstand.

For jewels there is an oblong gilded box with an exquisitely carved ivory bust, the decoration being in gold. In Georgian style are a pair of heavy fluted urns set on a square base on which are figures in low relief. For long-stemmed flowers are four vases of silver in the shape of convolvuli held together with twisted vine stems. For a small present tiny ivory or gilded busts contained in satin-lined velvet cases are suitable.

Low-branched silver candelabra or those of old Saxe, now light up the dinner table.

Paper cutters of ivory have beautifully sculptured heads of monks, nuns and warriors with gilded head dresses.

Fans are elegant accessories of the toilet, an artistic one showing sticks of *vernis martin* mounted on chicken skin on which

Plated ware	42,344	54,413	388,889	508,106

Port au Prince: 9 cases clocks, $158.
Rangoon: 12 cases clocks, $232.
Rio de Janeiro: 17 cases clocks, $237; 2 cases plated ware, $181; 3 cases jewelry, $470.
Rotterdam: 5,126 nickel plates, $86,255.
Sheffield: 9 cases jewelers' sweepings, $5,800.
Singapore: 51 cases clocks, $779.
Southampton: 1 case jewelry, $400.
Sidney: 7 cases plated ware, $1,180; 48 cases clocks, $1,716; 4 cases optical goods, 524.
Tampico: 2 cases plated ware, $105.
Trinidad: 4 cases plated ware, $332.
Valparaiso: 4 cases plated ware, $311; 1 case jewelry, $120.

Conditions of the Premier Diamond Mine in the Transvaal.

A cable despatch from Johannesburg, dated Feb. 23, gives some details of the annual meeting of the Premier Diamond Mining Co., which was held there Feb. 2, as follows:

Thos. Cullinan, who presided, after reviewing the report and accounts, which have been passed and already published, said that the past year had enabled the company to face any contingencies that arose. They had come to the end of a large expenditure on capital account, and they had also created a fund for trading and emergency purposes, resulting in the whole profits being available in future for dividends. The costs had been brought down from 4s. 7d. to 1s. 11d. per load, and they had a sufficient supply of labor. The diamond market had improved and, while recognizing that the market had to be studied by producers, Mr. Cullinan declared that they only claimed a fair share of the trade. "There need be no fear that we are going to bring down prices," Mr. Cullinan continued, "for the simple reason that we cannot afford to do so. On the contrary, we must protect the market as far as possible, hence the creation of trading and emergency funds."

Adolph Wagner, a director of the company, then dealt with the future. The calculations of the future expenditure of the company, he said, were based on very conservative estimates, and they had taken the revenue on the basis of last year, which was the worst year the company had ever had. They expected shortly to treat 850,000 loads monthly, which estimate had already been reached during the current months. He estimated that the whole plant would be completed and would begin full work in November. Later on they should produce 1,000,000 loads monthly. When treating 850,000 loads monthly the profit would rise 47½ per cent., against an increased expenditure of 28 per cent., but when treating 1,000,000 loads monthly the additional profit would be 85 per cent., as against an increased expenditure of 45 per cent. The value per load for the past three months had increased 2.32d., as compared with the whole of the previous year. Based on the actual sale of diamonds, an increased value of 1d. per load on 1,000,000 loads monthly would mean an increase of 1s. 3d. annually in the dividends on the deferred shares.

Mr. Wagner, dealing with the Transvaal law for the payment of a 60 per cent. royalty to the Government, admitted that when the law was passed, in 1903, that royalty might have been fair, but subsequently the yields had shown a falling off. It was the wish of the shareholders and the directors to use the profits constantly for a further expansion of the company, which still remained a huge taxpayer on the 60 per cent. scale. If the directors had not adopted that policy of expansion the mine could not have been worked to-day, and the Transvaal Government would not have derived any income from it.

Claud M. Wheeler, Columbia, Mo., and secretary of the American National Retail Jewelers' Association, expects to move, about April 1, from his present location, 820 Broadway, to 918 Broadway. The store that Mr. Wheeler will occupy was owned and occupied for years by O. E. De Werthern, and was sold to N. E. Evans, who is remodeling it. When completed it will be one of the handsomest little shops in this part of the country. Mr De Werthern will open a jewelry department in Tilley's drug store

noth Decision in Long Litigation Gr ing Out of Patent on Jewelry Pin Tongues.

ovENCE, R. I., March 9.—The long vn ut patent controversy concerning it of claim for the invention of a rpin tongue that has been in the d states courts here and at Washnce September, 1901, and in which have been "see-sawed" first in one side and then the other, was the subject of an opinion handed Judge Arthur L. Brown in the States Circuit Court in this city. is entitled Dover *vs.* Greenwood decision of yesterday gives a r the complainants, George W. d the George W. Dover Co. The olves an interference of patent d the question of priority of in- f a certain form of pin tongue rs' use.

gh not a review of the action of it Court of Appeals of the Dis- Columbia, Judge Brown's decision an effect directly contrary to that Washington tribunal, which latter, ing the action of the Examinersnd the Commissioner of Patents, ded in favor of the Greenwood

se went to the court here on a bill to compel the issue of letters pat- complainants. The respondents are F. Greenwood and David M. Wata Frederick H. Watkins, co-part- D. M. Watkins & Co. The nt, Dover, claimed to be the nventor of an improvement in pin sed in brooches and other forms y, and filed an application for a Sept. 11, 1901 Dover further that the defendant, Greenwood, ously appropriated the invention. ood filed his application for a April 15, 1902. The patent exound for Greenwood. On appeal al Board, or Examiners-in-Chief, Commissioner of Patents, each in rded priority to Dover. Next the ourt of Appeals of the District of reviewed and reversed this dend decided for Greenwood, and s last decision the Patent Office ed to issue letters patent to Dover. dants deny all unlawful acts and t the application of Dover if refused by the Circuit Court of of the District of Columbia.

timony on the bill in equity, taken e to time, has been voluminous. nal hearing the complainants subeir case upon the proposition that application, filed in the Patent pt. 11, 1901, establishes for Dover f invention earlier than any date s the date of Greenwood's invenie defendants insisted upon their rove their case by evidence taken of Greenwood in the interference gs. On this point Judge Brown, exhaustive examination of authoris that the public interest does not e court to receive the secondary offered by the defendant.

ase then stands for decision upon er and the proofs taken and add the present cause," says the court: and further, it is said that in making use of the opinions of the Examiners-in-Chief and of the Commissioner "we refer to them not as evidence in this case, but merely for the purpose of showing the views of expert officials as to the sufficiency of this exhibit to prove the making of the invention of the claims."

Referring to the finding of the Circuit Court of Appeals for the District of Columbia, Judge Brown says that "the finding that Greenwood had a prior conception of the invention of the claims is based upon a finding that he had conceived and disclosed the pin tongue before the earliest date found for Dover and that the conception of the pin was substantially a conception of the combination of the claims."

Judge Brown, however, is able to find no other ground for the decision than the opinion that the real invention was the pin tongue and that this embraced the invention of the combination now in issue, so that no specific disclosure of that combination was necessary. In view of the painstaking opinions of the Examiners-in-Chief and of the Commissioner, Judge Brown finds a difficulty in accepting the view that the conception of the pin tongue alone was equivalent to the conception of the combination issue.

"Assuming," he says, "that the excluded testimony taken on behalf of Greenwood in the interference case has the limited scope given it in the opinions of the Circuit Court of Appeals, the Commissioner and the Examiners-in-Chief and is restricted to proof of the making of the Greenwood exhibit and to disclosures of the pin tongue alone to Dover and others, it would, if admitted, be insufficient, in my opinion, to show that at any time prior to Dover's application date Greenwood had invented the very narrow and limited combination of the claim in issue.

"With due respect to the opinion of the Circuit Court of Appeals, I am of the opinion that it states no satisfactory reasons for a reversal of the conclusions of the Commissioner and of the Examiner-in-Chief. A decree for the complainant may be presented accordingly."

D. M. Watkins, who is the actual defendant and is backing Greenwood in this fight, has taken steps to take an appeal to the United States Circuit Court of Appeals.

Alexander P. Browne and Horatio E. Bellows have represented complainants and Wilmarth H. Thurston the defendants in the long-drawn-out contest.

Bids Solicited by Government to Supply Clocks, Plated Ware, Etc., to Various Departments.

WASHINGTON, D. C., March 9.—The General Supply Committee is calling for proposals until April 5 for articles required by the various departments of the Government during the fiscal year ending June 30, 1911, and among the items called for are the following:

For 32 oak regulator clocks, No. 2, of which three are for the Treasury, one Navy, 10 Interior and 18 for the Agricultural Department.

For four mahogany regulator clocks, No. 2, of which three are for the Treasury Department and one for the Navy Department.

For 10 walnut regulator clocks, No. 2, nine for the Treasury and one for the Navy Department.

For 30 dozen silver-plated table forks, extra heavy tipped, for the Interior Department.

For 12 engravers' eye glasses; 10 dozen magnifying glasses, No. 56, B. & L., or equal; eight reading glasses, two inches; 21 reading glasses, three inches; 29 reading glasses, four inches; 20 reading glasses, five inches.

For 28 dozen heavy plated tablespoons and 28 dozen heavy plated teaspoons.

WASHINGTON, D. C., March 9.—Among the items being called for by the General Supply Committee for the use of the weather Bureau during the fiscal year beginning July 1, 1910, are the following, for which bids will be opened on April 5: 500 maximum thermometers, 60 days; 100 mercurial thermometers, 60 days; 500 minimum thermometers, 60 days.

Wealthy Attleboro Manufacturer Reported to Have Been Fleeced by a "Wire Game."

PROVIDENCE, R. I., March 11.—A prominent and wealthy Attleboro manufacturing jeweler, whose name is withheld by the police of this city, lost, it is claimed, $10,000 here by the "wire game" a short time ago at the hands of the same operators who were instrumental in fleecing Coleman, the defaulting bank cashier of Cambridge, Mass. Police Commissioner William H. Luther, who is head of the manufacturing jewelry concern of William H. Luther & Son, admits that such an incident occurred here, but refuses to make public the name of the victim, because the latter had made no complaint to the police authorities that he had been swindled. The information reached the commissioners in a roundabout way, but was finally admitted by the Attleboro man, when asked concerning it by the police.

The only information concerning the matter that the police would give out is that a man who at the time had an office in the Union Trust building, corner of Westminster and Dorrance Sts., directly over the office suite of the then Police Commissioner Gross, was taken into custody by headquarters inspectors and taken before Chief Inspector Horton. The man, it is said, agreed to close up his office and leave town. As there were no complaints against him he was allowed to fold up his tent and depart.

But the suspect did not get out of town for good. He has been living with his wife and daughter on Elmwood Ave. here up to last week, when he got a telegram from his mother in Brooklyn, N. Y., stating that she was ill and asking him to come to her. He went and is there now, according to the chief, who has had the man under surveillance since he closed his office. The man was once arrested in New York, according to the police, charged with stealing a valuable diamond ring from a jeweler. He is alleged to have "operated" in this city for about two months before he was shut up.

THE SYNTHETIC SAPPHIRE

thanks to its high merits, acknowledged by scientists the world over and given the widest possible publicity by the press, at once takes its place among the class of gems most popularly known and appreciated

The real Synthetic Sapphire is produced exclusively by us and is the only sapphire that is the exact counterpart of the natural.

None but those sold under the name of

"HOPE SAPPHIRES"

Registered United States Patent Office

are the genuine Synthetics.

To distinguish an ordinary Scientific Sapphire from the natural or our Hope Sapphire, apply the Hydrofluoric acid test. This acid reacts on glass, but has no effect on either the natural or our Hope Sapphire.

Answ[er] Filed to Gorham Mfg. Co.'s Su[it] Against F. & M. Weintraub Over Trade-mark.

[A]nswer to complaint filed in Decem-[b]er by the Gorham Mfg. Co. of New York [i]n evidence against F. & M. Wein-[t]raub, New York, alleging an infringement [o]f complainants' trade-mark (a lion, an [a]nchor and the letter G in old English [t]ype) was filed Thursday in the United [S]tates Circuit Court, New York, by Benno [L]evy, counsel for the defendants. The [a]nswer is a voluminous document which re-[v]iews the case and contains a number of [e]xhibits in the way of illustrations taken [f]rom authoritative works on the subject of [m]arks," together with exhaustive quo-[t]ations from the English laws, in support of [t]he defendants' contention that the symbols [c]omplained of were used by others long be-[f]ore the Gorham Mfg. Co. was in existence. [P]ending the settlement of the litigation a [t]emporary injunction has been obtained by [t]he complainants restraining Messrs. Wein-[t]raub from using the alleged infringing [m]arks.

The defendants in the answer just filed [d]eny that the mark consisting of a figure of [a] lion, the representation of an anchor and [t]he letter "G" in old English type was [u]sed with the complainant or its predecessors in business, or that they were the [f]irst to use the trade-mark in connection [w]ith silverware. On the contrary, the defendants allege that the marks as used by [t]he complainant is a fraud upon the public [a]nd the registration thereof in the United States Patent Office by the complainant was a fraud upon the Commissioner of Patents.

It is set forth in the answer that the [s]ymbols were used long before 1831 [t]he year in which the complainants' business was first established), and that each [h]ad a definite meaning which had been [g]enerally understood for centuries by people connected with the silverware trade and [m]anufacturers and purchasers of silverware [i]n all parts of the world where such silverware is sold. It is explained that the [m]arks were known as "hall marks," and as [t]o where used upon gold and silver as far [b]ack as the 15th century; the lion to indicate sterling silver, the anchor the place of manufacture (Birmingham, England), [a]nd the old English letter "G" the year [o]f 1831.

It is pointed out that tables containing [t]he "hall marks" have been on public sale [f]or years in England and America for [y]ears and that by reference to these tables [t]he meaning of the marks could be determined. The marks under litigation, it is [a]lleged were required by an act of the British Parliament, passed in 1773, "for [t]he better appointing wardens and assayers for assaying wrought plate in the [t]owns of Sheffield and Birmingham." An [a]ct passed by the British Parliament in 1824 [is] quoted in support of the defendants' [c]ontention.

It is alleged that the complainant by the [u]se upon their silverware of the marks in [q]uestion consisting of a lion, an anchor and [t]he letter G, indicate improperly to the [p]ublic that the silverware is of sterling [s]ilver made in Birmingham, England, in [t]hat whereas, it is admitted by the complainant, that the goods are made in the United States.

The defendants also allege that the shape, size and general appearance of the figures, letters and emblems placed by manufacturers upon parallel panels during the past four centuries have been pictured in various shapes; that the lion has been pictured as looking both to the right and left, and that the anchor has been shown with and without cable tow and that the letter "G" has been pictured in various forms, both as a capital and as a small letter.

It is also set forth that the so-called "hall marks" have been for years used on a variety of objects such as cigar holders, pipes, etc., in common use throughout the United States, manufactured both in this country and abroad and then imported into the United States and all, whether imported complete or as parts of articles of merchandise completed and manufactured here, enter into interstate commerce. What the complainant really seeks to obtain, it is alleged, is an absolute monopoly of the manufacture and sale of silverware in the United States and the exclusion from the United States of all foreign silverware bearing these marks.

It is alleged that silverware with an anchor, a date letter and other similar marks, has, since the commerce of the United States has existed, been constantly in use within the United States in interstate commerce and in commerce with foreign nations and that neither the complainant nor anyone else can claim any exclusive right to the marks used by the complainant, whether identified by the lion, the anchor or the letter "G" or identified merely as panels. Such marks are, it is set forth, the public property of the world and may lawfully be used in the United States and elsewhere.

It is contended that the complainant concern by its claim of a trade-mark consisting of the "hall marks" in common use and by selling goods so marked in competition with goods made in England has thereby brought confusion into the trade. The trade-mark claimed by complainant concern, it is alleged, is not defined or limited.

The answer next refers to numerous books published on the subject of "hall marks" in support of the arguments presented in meeting the bill of complaint, among these books are those by Joseph Cripps, E. L. Lowes, Charles James Jackson, J. H. Buck and others. Extracts from these works and illustrations taken from the same sources are submitted.

Speaking of the registration of the complainants' trade-mark as No. 33,902, and the statement that the trade-mark has been continuously used by the said corporation since about Jan. 1, 1853, the defendants allege that this statement is not true, as the corporation had no legal existence at that time.

The defendants deny that the figure upon their goods mentioned in the bill of complaint, said to be that of a lion, is the representation of a lion; and that while the complainant concern placed the alleged trade-mark solely upon solid silverware, the defendants have never placed it or anything similar to it, upon any solid silverware. They claim they have been manufacturers of plated ware and point out that their stationery so states. They deny that they have ever sold merchandise made by the complainant, as their product, and deny having sold goods containing the alleged trade-mark, as silverware, or anything except silver plated ware of their own manufacture.

Messrs. Weintraub further deny that the complainants' trade has been interfered with or that any profits which rightfully belonged to the complainant have been diverted or that the public is misled by any action of the defendants. They also deny that the use of the marks complained of has the effect of promoting and aiding the reputation of any demand for the plated ware on which they are used, and it is stated that this ware is sold solely on its own merits.

It is absolutely denied that the complainant has ever made any protest to the defendants against the use of the symbols or marks of which it now complains and the Weintraubs say that their first knowledge of the subject rose out of the present litigation, and that since the starting of the suit nothing manufactured by the defendants has been sold, delivered, stamped or marked with the marks complained of.

It is alleged that no purchaser of the defendants' merchandise could be deceived or led to purchase the goods as being solid silverware or the sterling silverware manufactured by the Gorham Mfg. Co., by reason of the enormous difference in price between the two kinds of goods.

It is denied that the defendants used any marks with the knowledge that they were used by the complainant. They also deny placing any mark upon their product for the purpose of deceiving the public.

It is pointed out that the complainant concern also makes silver plated ware and that its trade-mark on this ware is different from the one used on sterling silverware.

For the above reasons the defendants ask that the complaint be dismissed with the usual costs.

Prior to the filing of the answer by the defendants a motion to amend the original bill of complaint was filed by the complainants' attorney. Judge Lacombe decided that the amendments could be made as to the allegations as to citizenship, but denied it as to other allegations, saying:

> The complaint as it now stands avers among other things that the defendants have affixed to the silver plated ware sold by them a mark substantially the same as that employed by complainant. This seems broad enough to admit proofs of infringing marks which are not Chinese copies. Motion to amend is denied except as to citizenship.

Blancard & Co., 98 Maiden Lane, New York city, report great success with "The Catch That Catches and Stays Caught," for which a patent was granted March 1. The most important features of this catch are: Its great strength and the absence of complicated devices which get out of order; the closed bottom which prevents the solder from running into the slot, the locking lever at the back, which locks tight with a snap, and the extra large space in the bight, allowing ample clearance for the pin stem. The catch is novel and is proving highly satisfactory.

in the French group are examples of the handiwork of Charpentier, Roty, Chaplain (to whom has been entrusted the engraving of the new gold coinage of France), Le Noir, whose subjects include enamels and many others. The group of Belgium artists and those of the German makers which are included in the exhibits are also worthy of special mention.

Jewelers Board of Trade Now Has 591 Members—New Attorneys Selected.

The regular monthly meeting of the Board of Directors of the Jewelers Board of Trade was held Thursday, at the offices of the organization in the Silversmiths' building, 15 Maiden Lane, New York, at which time considerable business of great importance to the organization was transacted. A number of firms were admitted to membership and new attorneys were appointed for the Board.

The meeting was called to order by President Rothschild, with 13 directors present.

The following firms were unanimously elected to membership: J. Bochner & Co., Davis & Welkison, Finkelstein Bros., Veit, Hirch & Co., Jac. Kryn & Wauters, Laubheim Bros., John Lamont & Son, Oppenheim & Strauss, Jacob Strauss & Sons, all of New York; Garland, Fisher & Co. and La Seela, Fried & Co., Newark, N. J., and the National Exchange Bank, Providence, R. I. (associate).

The total membership is now 591, the largest in the history of the Board. This consists of 551 regular members, 21 branch office members and 19 associate members.

One of the changes adopted by the directors is to employ a collector to make personal demand on debtors in New York. It was formerly the custom of the Board to forward this class of business to its New York attorneys. The addition of a collector will give the organization added facilities for handling this kind of work, and the Board trusts that its members will avail themselves of the added facility.

The new attorneys selected for the Board are Philbin, Beekman, Menken & Griscom, 52 Wall St., New York, one of the most prominent law firms in New York. Eugene Philbin, of this firm, was formerly District-Attorney, while Lloyd C. Griscom was formerly minister to Italy.

The Board recently sent out a letter to members asking their co-operation in obtaining new members for the organization. It is the desire of the Board to raise the service to the highest possible state of efficiency, and to do this it is desired that the membership be increased to 1,000. Suggestions for the improvement of the service will be thankfully received by the Board.

The Elliott, Taylor, Woolfenden Co. is preparing to remove to a large new building above Grand Circus Park, Detroit, Mich. Their old stand will be taken by Wright, Kay & Co., who will equip this building in such a manner as to make it the finest and largest store of its kind between New York and Chicago. Wright, Kay & Co. have been at the corner of Woodward Ave. and the Campus so long that their store has become a landmark.

Conviction of Man Who Robbed Norristown, Pa., Jeweler Results from Publicity Given to the Crime.

Norristown, Pa., March 9.—The conviction in the criminal court Monday of F. R. Morton, on a charge of robbing Gustave Lanz, a jeweler of 211 De Kalb St., Dec. 23, is the result of Mr. Lanz's thorough prosecution helped by the publicity given to the arrest of Morton through The Jewelers' Circular-Weekly. Morton was sentenced by Judge Weand to not less than nine months or more than three years in the Eastern Penitentiary.

The convicted man entered the store of Mr. Lanz two days before Christmas and looked at some diamond brooches and chains. He selected an expensive brooch and chain, asking that they be laid away as he would call later. He then examined some diamond earrings, and saying that he would return that night, hurriedly left the store.

The man's actions had aroused suspicion and the clerk who examined the stock found that a diamond earring valued at $175 was missing. The stranger was immediately followed and the police notified with the result that he was arrested.

Though the jeweler was sure that the man had taken the missing earring, this could not be found and the prisoner strenuously denied his guilt. The police held him while they looked up his record, but succeeded in finding nothing against him.

Mr. Lanz was not satisfied with this work and obtained a photograph of the accused man, sent this to The Jewelers' Circular-Weekly with a description, and on its publication the photograph was identified by J. Davis, a West Philadelphia jeweler, as that of a man who had attempted to steal a locket from his store. In this instance the theft had not been successful as Mr. Davis had discovered it in time and with the aid of his revolver had forced the man to return the property.

At Mr. Lanz's suggestion Mr. Davis came to Norristown, went to the jail, identified Morton as the man who had attempted the theft and Morton admitted the charge. Mr. Lanz also heard from other jewelers whom the prisoner had visited and this, with Mr. Davis' identification, established the fact that no mistake had been made in the arrest. Had it not been for the jeweler's work and the information obtained by the publication of the thief's photograph, the conviction might never have been had.

Assets of T. J. Collins, Proctor, Minn., in Excess of Liabilities.

Proctor, Minn., March 9.—According to the schedule of Tony J. Collins, a local jeweler and watchmaker, who filed a voluntary petition in bankruptcy about a week ago, his assets aggregate about $6,188.50, of which the jeweler claims $2,250 as exempt under the law. The liabilities are placed at only $3,972.60.

Mr. Collins, who has carried but a small stock, has been located here since 1905 and was considered to have had a capital of about $1,000. He is a practical watchmaker of considerable ability and has been well regarded in the trade. His principal merchandise liabilities are said to be in St. Paul.

P ttsbu Police Hold Man Accused of Obtning Merchandise by False Representations.

irs RG, Pa., March 12.—Philip Volk, s aid to have swindled jewelers in nd elsewhere and who swindled ros. & Co., of this city, a few days arrested to-day and lodged in the e county jail on an information him with obtaining goods under nses.

r days ago Volk called on Wm. the firm's credit man, and pre- tatement setting forth that he was business in McKeesport, pre- card as evidence of the allegation, a statement that he had property K sport worth $2,600 that was un- l. Mr. Hoffman requested Volk statement which he readily did e urned the man over to his son, ffman, who sold him a bill of luding 17 watches and other It developed later that Volk was d that he had made false repre- to the jeweler.

er endeavored to secure a bill of m the Pittsburg Dry Goods Co ry goods concern communicated en Bros. & Co. with the result rrant was sworn out by A. A. t the Heeren house. It appears also successfully played his game not only here but in Buffalo. that Volk, according to informa- ned here, had been arrested in short time ago, but was dis- cause of the police being unable sufficient evidence to hold him. me is said to be in McKeesport. Volk was searched at Central tion, where he was taken follow- rest, a number of pawn tickets d on his person showing that he ed the goods which he secured en Bros. & Co. immediately after t store. It is, however, expected articles he disposed of in this recovered, so that Heeren Bros. ll not lose much by their ex- ith the man. Volk is said to be good appearance and is described ffman as being a good talker. He a straightforward story that none mbers of the Heeren firm had any ut the man's sincerity.

fuses to Upset Judgment Ob- ne by Bankruptcy Trustee ainst Mark Streicher.

NCE, R. I., March 12.—In a de- ded down yesterday, Judge L. the United States District Court, petition of Mark Streicher, of er Comb Co., for a new trial in ought against him by William J. stee in bankruptcy of the Lazarus Co., the court at the same time motion for arrest of judgment, in the case being $8,000.

was an indorser upon notes of pt firm, and it was claimed by that the notes were paid within hs prior to the adjudication, the brought under the provisions of al Bankruptcy act. In the de- ourt says:

by the bankrupt of notes indorsed by the defendant to the amount of $8,182.02, whereby the defendant was relieved as an indorser was proved to have been made within the four months period, this proof being principally omissions made by the defendant.

The principal questions upon the defendant's petition for a new trial relate to the sufficiency of the proof to show, first, the insolvency of the Lazarus & Griess Co. at the time of payment of the notes; second, Streicher's knowledge of the bankrupt's condition, third, that the payments were made by the procurement and advice of Streicher in order that he might be relieved as indorser.

Although the testimony is in a confused and unsatisfactory condition owing in part to the very imperfect and improper bookkeeping of the bankrupt corporation, and in part to the manner in which the plaintiff's proofs were presented, yet upon a review of the entire testimony I am of the opinion that each of these points were sufficiently proved. Enough was shown as to particular transactions to justify the general findings which the jury must have made in order to reach their verdict."

Career of the Late R. E. Sturdy.

PROVIDENCE, R. I., March 10.—The funeral of Rolf E. Sturdy, one of the best known electroplaters in this city, occurred from his home, 53 Haskins St., yesterday afternoon in the presence of a large number of relatives and friends. Several of his associates in the trade were in attendance. Mr. Sturdy died last Sunday morning, after an illness of about two weeks.

Mr. Sturdy was born in Augusta, Me., in 1860 and accompanied his parents to this city when quite young. He attended the public schools of this city until he had completed a course through High School and had studied chemistry under one of the best analytical chemists in New England. In 1880, at the age of 20, he entered the employ of his father, J. E. Sturdy, who was the proprietor of an electroplating establishment at 190 Eddy St., which he started in 1869. Here the son was associated with the father until the latter's retirement, succeeding him in April, 1885.

Deceased had been suffering from a severe cold for several weeks, but had not taken the proper precautions and against the advice of his friends and family he continued at his business until about two weeks ago, when double pneumonia and pleurisy developed and his decline was rapid. He leaves a widow and one daughter. He was prominently identified with the Masonic Fraternity, being a member of Orpheus Lodge, of Providence Royal Arch Chapter and of Cavalry Commandery, Knights Templar. He was also a member of the Jewelers' League of New York.

Boston Watchmaker and Associate Held in Heavy Bail to Answer Charge of Counterfeiting.

BOSTON, Mass., March 9.—Three men whom United States secret service agents charge with counterfeiting were arrested Tuesday evening in this city and two of them were arraigned this morning before United States Commissioner Hayes in the Federal building and held for examination.

The two who appeared before the commissioner were William Sample and Frederick Hartung. They were put under $10,000 bail each for a hearing next Wednesday. The third man is Robert E. Sample, brother of William, who is ill at his home in Dorchester, where he is kept under constant surveillance, and will be produced in court as soon as he is able to appear.

William Sample is a watchmaker and well known in the Boston trade, having worked in the repair department some years ago of a wholesale house. His brother is also a watchmaker and machinist. Hartung was associated with them at 185 Franklin St. up to the first of the year, and the sign on the door of their quarters reads: "Sample & Hartung, Manufacturers of Jewelry Novelties."

The trio had been under suspicion by secret service officials for some time. Bogus dimes, containing more silver than genuine ones, but not exactly up to standard in appearance, have been in circulation in Boston for several months.

When William Sample was arrested at the place occupied by the firm on Franklin St., it is stated by the officers, a search of the premises revealed a well equipped plant for counterfeiting, a small quantity of silver and some spurious coins as well as dies.

Hartung was arrested at the Automobile Show. He has been watched by the officers since he separated from the Samples. He is a die-maker by trade.

Creditors File Bankruptcy Petition Against Harry Mermelstein, Who Claimed to Have Been Robbed at Boston.

A petition in involuntary bankruptcy was filed Friday in the United States District Court, New York, against Harry Mermelstein, a retail jeweler at 851 Fox St., New York, by Max Hoffman, a creditor, for $1,284. The petition alleges insolvency, a transfer of merchandise and accounts of $1,000 and preferential payments of $750.

Otto Goldsmith has been appointed receiver under a bond of $1,000.

In the petition of Max Hoffman asking for the appointment of a receiver it is said that the alleged bankrupt on March 9 called a meeting of his creditors at the offices of Rosenbluth & Silverman, 299 Broadway, at which time he made an offer of 25 cents on the dollar in settlement of claims against him. It is set forth that when Mermelstein was questioned as to his assets he said he had $2,500 worth of jewelry and that almost $6,000 worth of jewelry and diamonds were stolen from him in Boston about two weeks ago.

Upon being questioned, Mr. Hoffman says that the jeweler could not satisfactorily show how the diamonds and jewelry were taken from him, nor was he sure that he lost them in Boston. Mr. Hoffman said he believed the story about the loss was a mere fiction, and that the property had been secreted.

It is also stated that Marmelstein began business in October, 1909, but that during that time he has obtained a large amount of merchandise on credit and now seeks to compel his creditors to accept a small settlement.

Mr. Mermelstein was originally a traveling salesman for another line of business. In March, 1904, he opened a store as an optician at 76 Avenue B, and in October of the same year he moved to 163 E. Broadway; on May 1, 1906, he moved to 392 Grand St. He gave up his optical business there about a year ago and for the past few months has been selling diamonds and jewelry.

The liabilities are said to be about $4,500.

ence was a member of the old
Association and of the Cuddyhunk
married a sister of Mr. Dominge,
r in business, but his wife died
years ago. The two children born of the marriage died in infancy.

The only remaining member of the old firm is Joseph F. Chatellier, who is now ever 84 years old.

The funeral services were held, Saturday morning, at Mount Vernon. Interment was at Greenwood Cemetery.

New Members Elected and Rewards Paid by the Jewelers Security Alliance.

The regular monthly meeting of the executive committee of the Jewelers Security Alliance was held on Friday, the following members being present: Chairman Butts, Vice-Presidents Wood and Champenois, Secretary Noyes, Treasurer Karsch and Messrs. Abbott, Alford, Brown and Stern. The following new members were admitted:

Carstens Bros., Grand Rapids, Mich.; C. J. Dunbar & Co., Princeton, Ill.; George H. Elvis, Medford, Wis.; W. G. Johnson, Williamsfield, Ill.; H N Leibiger, Princeton, Ill.; T. W. Martin, Saginaw, Mich; J. N. Martinek, Traverse City, Mich.; Merkle & Steinmann, Grand Rapids, Mich.; Adolf Michaal, Green Bay, Wis; D Watterson, Garner, Ia.; W. A Mosgrove & Co., Fresno, Cal.; J. G. Booker, Roanoke, Va; Heinz Bros., San Francisco; Alfred Johnson, Mandan, N. D.; National Jewelry Co., Cincinnati, O.; J. W. Rhodes, Detroit, Minn.; Fred C. Price, Ashley, Pa.; L. G. Schroeder, St. Paul, Minn.; L. R. Barnett, Glendive, Mont.; Blomstrom & Petersen, Escanaba, Mich.; Jerry Davis & Bro., Waynesville, N. C.; Frank Durkee, San Francisco, Cal.; Charles C. Lamb, New Salem, N. Dak.; B. Lichtenstein, Glen Ullin, N. Dak.; J. H. Mosher, Glendive, Mont.; A. H. Souders, Broken Bow, Nebr.; Tall Bros., South Haven, Mich.; C. G. Aldrich Co., Lynn, Mass.; C H. Case, Durham, N. C.; Holmes-Irving Co., Des Moines, Ia; O. O. Nelson and C. M. Ray, Billings, Mont.; Ellis Sarphie, McComb City Miss.; L. W. Scherffius and H. C. Smith, Miles City, Mont.; P W. Suttin, New Haven, Conn.; F. J. Butler Co., Pontiac, Ill.; C. S. Crossman & Co., New York; Haman & Co. and Albert L. Haman, St. Paul Minn.; W. H. Leonard, Salishury, N. C.; Isador Mayer, Philadelphia, Pa.; J. H. Mednikow & Co., Oklahoma City, Okla.; Ole P. Noisom, South Bend, Ind.; Roberts & Roberts, San Angelo, Texas.; G. Rohrer, Laurium, Mich.; A. M. Schmidt, Earlville, Ill.; Frank Smith & Son, Pontiac, Ill.; Woodward & Co., Bradford, Pa.; L. C. Smith, Gainesville, Fla.; Walcott & Kapp Co., Toledo, O.; Frederick B. Weiss, Inc., Newark, N. J.; W. T. Cohenhour, Muskogee, Okla.; Samuel J. Lyons, Philadelphia, Pa.; Taylor Jewelry Co., Uhrichsville, O.; Beilenson Jewelry Co., Helena, Ark.; Graves & McPhail, Harwarden, Ia.; C. H. Kelley & Co., Pasadena, Cal.; W. F. Maxwell, St. Joseph, Mo.; Frank E. Burr, Carbondale, Pa.; Werre & Brundidge, Newburg, N. Y.; B. Ed. Garrison, Overbrook, Kans.; West Jewelry Co., Galena, Kans.

The following rewards were ordered paid:

Reward No. 100.—To Officer Cloonin, of Rochester, N. Y., for the arrest and conviction of John McDonald, who kicked in the window of the store of Ellery A. Handy, Dec. 22, and stole two gold watches. The officer was patrolling his beat when he noticed the man acting suspiciously and concealed himself in a doorway and saw the thief kick in the window and grab two watches from the tray. The officer pressed a hack into service and chased the thief through the streets and finally caught him with two watches in his pocket. The thief, who had been convicted of petit larceny three times before, pleaded guilty and was sentenced to 30 days on a charge of petty larceny and to from two years to three years and two months on a charge of burglary. Mr. Handy says, "In my opionion, had it not been for the reward offer, this tbief would not have been caught. The store below me has had the window broken several times and no one has been caught because the jeweler was not a member of the alliance."

Reward No. 101.—To Detectives William S. Biggs and Arthur D. Ryan for the arrest and convviction of John Collins and James Burns, who broke into the basement under the store of Emil Steinman, Sacramento, Cal., and by working at odd times at night, made an opening through the floor under the show window. One of the burglars remained on watch outside while the other one cut a hole through a plush lining and stole diamond rings and other jewelry to the amount of about $400. Collins had been seen by an officer leaving the hotel with a brace and hit and, knowing his record, he was immediately arrested upon the discovery of the robbery and a part of the jewelry was found among his belongings at the hotel. His accomplice was arrested in Stockton through circulars sent out by the police and the balance of the goods was recovered where he had hidden them. The burglars pleaded guilty and were sentenced to five years each in State's prison.

Reward No. 102.—To Detective Andy Ernst, Lima, O., for the arrest and conviction of Harold Kilgore, who smashed the window of the McDonald jewelry store and stole about $800 worth of watches and jewelry which was on display at the time. The detective suspected Kilgore, who had been reported as having attempted to peddle diamond earrings and watches, and meeting him in a poolroom, asked the time, when the young man pulled out a new watch, and upon being arrested others were found upon his person. He thereupon admitted his guilt and the balance of the property was recovered from various parties to whom he had given it. Being under 18 years of age and this being his first offense, he was sentenced for an indeterminate term in the Ohio State reformatory.

Daring Thief Captured at Boston After He Had Escaped from Jewelry Store by a Ruse.

BOSTON, Mass., March 12.—Frank Evans, alias Frank Lewis, who entered the jewelry store of Joseph A. Williams, 333 Washington St., on Wednesday last, to dispose of a gold rosary for old gold, abstracted a watch, it is charged, from the show case by an extraordinary long reach while Mr. Williams was weighing the rosary. He supposed that he was unobserved, but the movement was seen by Edmund L. Williams, son of the proprietor, who called to his father and barred the door.

"He's taken a watch," said the son.

"Here it is," said Evans. "You've got all that was taken; now let me go."

He was not then released, however, and police headquarters were notified by telephone, but a ruse on the part of his confederate outside effected his temporary escape to the street. His accomplice came to the store door and pointed at alarm clocks in the window, and as the proprietor unlocked the door and held it ajar to speak to him the son received a blow on the head while Mr. Williams was jostled aside and Evans was in the street in a jiffy.

The thief ran toward the Old South building, near by, and Edmund Williams gave chase, overhauling him in the building. A crowd of several hundred persons closed in upon the fleeing man, who was captured after a short struggle and taken back to the store, where he was handed over to the police.

In court Thursday morning the man was arraigned and the case was continued till next Thursday. The police say that he is wanted on other charges and has a record, also that his picture is at headquarters. The rosary has been identified as one that was stolen from a woman in a Boston church, it is stated.

The Keenze Jewelry Co. has been incorporated in Franklin, La., with a capital stock of $10,000. The officers are: President, R. E. Keenze; vice-president, J. A. Peterman; secretary-treasurer, John R. Colgin. These officers, together with H. S. Palfrey, constitute the full board of directors.

United States District Court er handed down an order fixing nsation of the appraisers at $100 that of Miss Barnet, stenographer, the testimony before bankruptcy 15. This amount is to be paid Keck Co.'s funds, while the $80 ount to be paid each of the ap- mes out of the Duhme Jewelry , and the balance out of the Co. funds.

stion of attorney's fees will also and settled in a short time. At- offman, Bode and Le Blond have application for compensation for ndered in this case. They ask claim that through their efforts in resisting the bankruptcy proceedings and thereby securing higher appraisements and better sales from the stock they have rendered valuable services to the estate Receiver R. De V. Carroll asks $9,000 for services, and his attorneys, Jonas B. Frenkel and Joseph W O'Hara, ask $5,000 between them.

Everything Ready for Entertainment of President Taft at the New England Manufacturing Jewelers' Banquet, March 21.

PROVIDENCE, R. I., March 14.—Everything is practically in readiness for the big banquet of the New England Manufacturing Jewelers' and Silversmiths' Association, which will be held in Infantry Hall, this city, next Monday evening. The executive committee has arranged for everything for the comfort and convenience of the members and guests and for the first time in the history of such occasions in this city the balconies will be thrown open to ladies during the speaking. Decorations of a most unique and elaborate character have been arranged for, while special musical and electrical features will add to the affair.

Saturday President George H. Holmes, of the association, was notified that owing to engagements in connection with the corporation meeting at Yale earlier in the day, that President Taft would be unable to reach this city until 7.25 o'clock in the evening, instead of 5.30, as was originally expected. In consequence of this delay the time of the dinner has been changed to 8 o'clock instead of 6.30.

The executive committee has sent out the formal invitations to the members and guests. These are handsome steel engravings with a heavily embossed seal of the association in gold at the top.

On Monday afternoon former Presidents Henry G. Thresher and Harry Cutler will go to New Haven and meet President Taft and escort him to this city. At the Union Station they will be met by President George H. Holmes, of the association, who will escort the President to Infantry Hall. There a reception will be held at which the members and guests will be afforded an opportunity of personally meeting the Chief Executive of the Nation. The details for the remainder of the programme are best given by a circular sent out by the executive committee which reads as follows:

Tables will be set for 12 and 16. If you desire to make up parties to sit at the same table, please notify by mail, H. M. Mays, Thurber's Ave. and Eddy St., Providence, R. I., on or before the 14th, stating names of those making up your party.

Members, both active and associate, may have their tickets sent by mail at their own risk, or procure them from the treasurer, Wade W. Williams, care of Warren & Williams, 36 Garnet St., Providence, R. I., on March 18 and 19, between 8 A. M. and 4 P. M.

Guests' tickets will be mailed by Secretary Frederick A. Ballou direct to guests in accordance with addresses already furnished. These tickets will contain the name of the guest and are not transferable.

A limited number of balcony tickets, each admitting one lady, will be furnished to members only, upon application to Secretary F. A. Ballou on March 14, 15 and 16. One ticket can only be furnished to each member owing to the limited capacity of the balcony. There will be no tickets given out at the hall.

Balcony doors will be opened at 8 P. M. sharp. No one will be admitted while anyone is speaking. Entrance to the Infantry Hall will be through the north door only, where you will surrender your entrance coupon, check your coat and hat, and go direct to the drill room on the fourth floor and procure your souvenir by presenting your coupon for the same. After leaving the drill hall the balcony will be open for members and guests, entrance being through the south door only, where dinner coupons will be taken. You will remain in the balcony until the signal for proceeding to the main floor dining hall.

A diagram will be furnished you upon entrance to the drill hall which will show your name and number of table, and a card bearing your name will be found at the place provided for you. Keep your wine coupon and present at the proper course.

A full corps of ushers will be in attendance and designated by a badge. They will furnish information and look after your comfort. Superintendent of Hacks Charles Bennett will be on duty to look after automobiles, carriages, etc.

Owing to the large number to be entertained you will help the committee in caring for your comfort by keeping to the right and keep moving until you reach the drill room, and do not loiter in the corridors. By taking this notice with you and consulting it on the evening of the banquet, your comfort will be enhanced.

This is signed by the executive committee, H. M. Mays, chairman, Edward B. Hough and R. C. Thompson.

President Holmes will preside at the meeting which will follow the dinner and after welcoming the assemblage will introduce Past President Harry Cutler as toastmaster. The speakers will be Mayor Henry Fletcher, Governor Aram J. Pothier, Senator George Peabody Wetmore, Senator Nelson W. Aldrich and President Taft. Music will be furnished by the American Band, Bowen R. Church, leader.

Every possible safeguard will be provided for the President during his stay in Providence. Chairman William H. Luther, of the Police Commission, stated this morning that the same precaution which was taken to guard President Roosevelt on the occasion of his visit to this city several years ago will be taken on March 21. The whole staff of inspectors and a full detail of police will be on hand at the Union Station when he arrives and there will be a number detailed to guard him all the time he is in the city.

SAVED FROM BANKRUPTCY

But I always do that. Read this letter carefully, Brother Jewelers. I have many letters of this kind from jewelers, attorneys, trust companies and banks. No jeweler ever failed after my sales. 20 years of success is my record. This, my last sale, ran four months and my daily average profit was 31 per cent. over cost of goods. I sold the fixtures also without a loss. This is not only salesmanship, but cool-headed business judgment. If you need money, if you want to reduce stock, if you need advice that will make you money, consult me. I often advise against auction sales, as I just did for a large house in New York, where I knew a sale would hurt them. That is the kind of a man you deal with when you deal with me, and if you need a sale you can have two men at the price of one. Gentlemen, not fakers. I also furnish you any amount of goods desired at 25 to 50 per cent. under market prices. You pay for what you sell, return balance. Sales made on commission or share of profits.

DAN I. MURRAY

3 Maiden Lane - - - - NEW YORK
151 Wabash Avenue - - CHICAGO, ILL.
512 Race Street - - - CINCINNATI, O.
183 Eddy Street - PROVIDENCE, R. I.

This is H. T. Stapleford, who has been in employ for the past 10 years. Just closed out the sale in Georgia, for the Madison Jewelry Co. son, Ga. At present closing out the Quintard Bros., Poughkeepsie, N. Y., and the largest sale ever made in that city.

To Whom It May Concern: Syracuse, N. Y., February 14, 191

This is to certify than Mr. Dan I. Murray, who has just concluded a four months' sale with us, has pu us out of a bad hole and, through his advice, good judgment and splendid salesmanship, has enabled t pay our creditors in full and saved us from going into bankruptcy. We dreaded the idea of an auction after consultation with our creditors and others, found Mr. Murray has greatly exceeded our expectations cannot too strongly recommend any firm to employ him who wants to realize 100 cents on the dolla their stocks. (Signed) VANDERBURG & DURNEY, H. C. Vanderburg, Success

Los ngeles, Cal., Jeweler and Wife Ch ged with Being Responsible r Disappearance of Salesmen's Trunk.

o ANGELES, March 9.—Charges implyt Albert Fink and Julia Fink, his welry merchants at 818 Broadway n building, are themselves responsible disappearance of a trunk containing 12,000 worth of jewelry that was to San Francisco, Dec. 29, by Harry one of their traveling salesmen, and st, were filed in Justice Summerourt yesterday. The specific allegae that the Finks presented for al- a false claim for $5,000 against the Fire Insurance Co. Behind the are alleged strange circumstances, s , scheme for "switching" baggage The defendants deny the charge y and have been released on bail.

was employed by the Finks to t them in a northern territory. On he started on his first trip. He s sample trunk with diamonds, d jewelry of a total value of $12,- checked it. He did not leave the il the next day. When he arrived S Francisco he presented his check s given an old suit case containing orthless clothing.

rs were sent after the trunk and in several cities were put to work ase In due time the Finks filed a or $5,000 with the Hartford com- which they were insured, and a demand on the Southern Pacific l. Each refused to settle and emdetectives.

allegation of the detectives is that dams checked his trunk, Fink prohe check under some pretext and that he could not get accommodauntil the next day. The officers deat Mrs. Fink left that night for San co with the check and that she prohe trunk immediately upon her arere.

s was given a check the next mornlearned upon arriving in the norththat it called for nothing which in y represented his samples. The alis that the suit case was "planted" Finks, and that they arranged for ing" the checks.

officers say they are in possession of hat Mrs. Fink registered in a hotel Francisco as "Frau Eda Schultz." unk is alleged to have been kept in el for one day by her, and then d out of sight until it appeared in road station in San Jose, stripped of ables.

is is in no way implicated in the He reported the disappearance of k to the police immediately upon his ry of his loss.

Finks were arrested yesterday on rge and were released under $5,000 each for appearance before Justice rfield for examination on March 15. eclare that the criminal proceedings en instituted for the purpose of de- the civil suits which they expect o recover what they lost.

Fink was formerly in business in , but for several years was in the of the J. P. Trafton Co., of this City, as a traveling salesman. He is widely known among the trade and has many friends.

Chas. Rosen, Accused Jeweler, Refuses to Return to Cincinnati Without a Hearing.

H. C. Bolsinger, trustee, and S. A. Headley, attorney representing creditors of Charles Rosen, the bankrupt jeweler, have just returned after locating Rosen at Los Angeles, Cal., and finding M. Levine, Rosen's brother-in-law and manager, at Aberdeen, S. Dak. Rosen refuses to return to Cincinnati without a preliminary hearing first, which will take place about March 21, when between 50 and 75 creditors will be represented. Rosen is held under $5,000 bonds.

Levine, it is stated, also intends to fight against being brought here for trial. When Rosen disappeared so mysteriously his wife pleaded that she was left destitute and had no knowledge of her husband's whereabouts. She, too, is in Los Angeles with her husband

As the case develops, it is alleged that Levine has drawn or cashed a draft for $1,600 There is also a note for $200 given by Levine, indorsed by Mrs. Rosen, secured by a pledge of two diamond rings, but this has not been paid. Mention is also made of a money order for $275 drawn at Colon, Nebr., by Levine, Feb. 2, 1910, and payable to Mrs. Rosen.

Much of the merchandise found in Rosen's possession has been identified. It is supposed that arrangements were being made by Mr. and Mrs. Rosen to ship the goods to Levine in Aberdeen, S. Dak., but the creditors' proceedings stopped this, if such action was contemplated.

OCEAN PARK, Cal., March 10.—Chas. Rosen, arrested here on the charge of having attempted to defraud creditors, came to southern California from Cincinnati, about a year ago, and commenced business with a company capitalized at $6,000. Ample credit was soon secured and heavy purchases made Goods were secretly shipped to Morris Levine, Rosen's brother-in-law, and in time the firm was compelled to go into bankruptcy.

In searching for the missing goods $3,000 worth of jewelry was found hidden in barrels that had been stored in a warehouse in the name of another party. Levine is known to the police and wholesale jewelers because of an experience at St. Paul, Minn.

Unique Explanation of Origin of a Fire Which Damaged Stocks in Minneapolis, Minn.

MINNEAPOLIS, Minn., March 9.—In a fire which occurred early Monday morning the jewelry stock of Johantgen & Kohl, 305 Nicollet Ave., was damaged to the extent of $2,000, while Julius Schneider, lapidary, who occupied a portion of the same suite, suffered a loss of $300.

A watchman discovered flames issuing from the building about 1.30 A. M. and turned in an alarm. By that time the fire had made good headway and the firemen experienced some difficulty in extinguishing it and saving the remainder of Johantgen & Kohl's stock, which was stored in adjoining rooms. As it was, the flames destroyed the machinery and silverware in the polishing room, the surplus umbrella and stationery stock belonging to Johantgen & Kohl and a considerable portion of Mr. Schneider's stock. The latter, unfortunately, was uninsured, but Johantgen & Kohl carried insurance amounting to $6,000. The doors of both establishments were closed for several days, while losses were being adjusted and stock rearranged, but Johantgen & Kohl are now again open for business. Mr. Schneider is looking about a little and has not yet determined whether to go into business at the old stand or seek a new location.

Nothing certain is known regarding the cause of the fire, but the theory of its origin which has been accepted by the owners is unique. A very high wind prevailed locally, last Sunday evening, and it is believed that among other damage it blew something through the skylight in the polishing room, striking the electric wires, crossing them, and thus starting the blaze.

Large Pearl of Over 200 Grains Imported by New York House.

There was received last week at the New York Customs House one of the largest and finest pearls that has come into this country in years. It was imported by Dreicer & Co., 560 Fifth Ave., and is a pear-shaped gem, set to be worn as a pendant. It is estimated to be worth $200,000. The Government agents did not give out a statement as to the appraised value of the gem, but it is believed that the duty on it amounted to over $15,000.

According to the statement given out by a member of the firm of Dreicer & Co. the pearl weighs about 200 grains and is about one and one-half inches long. The pearl is known as the Dudley pearl, and was once the property of Lady Dudley, who possessed a fortune in jewels. It is said that it was once one of the jewels in the coronet of a member of the Spanish royal family. It was acquired by purchase, and a member of the firm brought it from England. The gem was carefully guarded on its trip across the ocean and on its journey from the Appraisers' Stores to the vaults of the Fifth Ave. jewelry concern.

Mr. Perrine, of the firm, in speaking about the pearl to a reporter of THE JEWELERS' CIRCULAR-WEEKLY, said that it was not bought on order, but was, however, sold soon after it was received. He said the pearl is of a pinkish-white color of splendid luster.

Dr. Geo F. Kunz, in his book on pearls, says of the famous Dudley pearls: "The pearls of Lady Dudley were sold at Chrystie's on July 4, 1902. A single pear-shaped pearl of the finest Orient mounted with a diamond cap, as a pendant, and weighing 209 grains was sold for $67,500 The entire casket of 31 lots realized $147,630."

Thomas E. Duncan, at one time engaged in the jewelry business at Kanopolis, Kans., was recently sentenced to two years' imprisonment in the penitentiary after having pleaded guilty to a charge of larceny.

Great Floods in Central New York Damage Business District of Herkimer.

HERKIMER, N. Y., March 12.—The greatest flood in the history of Herkimer, which was recently brought on by the continued heavy rains, great volumes of snow and the mammoth ice jam in West Canada Creek, completely submerged about three-fourths of the village and for a while many of the streets were raging torrents of ice and water. The flood caused a cessation of business for several days with serious losses to mercantile interests.

An idea of the conditions under which business had to be done on the main street may be had from the accompanying photograph. Among the jewelers who suffered most with J. C. DuBois, whose store is situated on Main St., and the waters here mounted up to the threshold and completely filled the cellar, in which luckily no stock had been stored. Mr. DuBois was constantly on guard during the height of the flood, fully prepared to remove everything of value out of reach of the waters, should they get any higher.

SCENE ON THE MAIN STREET OF HERKIMER, N. Y., DURING THE FLOOD.

The other jewelry stores were somewhat protected by a rise in the grade of the street.

Aside from the losses due to the cessation of business the jewelers have come out better than they expected, and have been more fortunate than some of the other merchants.

Diamond Market at Amsterdam Quiet, but Prices Remain Very Firm.

AMSTERDAM, March 6.—Business here has remained comparatively quiet. Some important buyers are in this market, but they are taking their time in making selections. The demand all over the world is not booming, but there is a current demand for certain kinds of goods.

The manufacturers here expect good business within a short period, so they continue to work their plants full speed. If they cannot sell the goods at their own figures they simply wait till they can get what they ask.

Prices are very firm; in fact, some special lines, as fine small and very small brilliants and eight-facets, are constantly and gradually increasing in value. Piqué and badly spotted goods are in great demand; mêlée sell slowly, but are disposed of more easily than some weeks ago. Light brown, which is very scarce, and silver caps are much in demand. Clean goods are not in great demand; whatever is sold in that grade is bought by European dealers. It seems that the American merchants are not yet quite educated to the high prices of this article, but they will have to get used to these prices sooner or later. The sooner they do the better for them, because if business gets a little brighter we may expect another raise of the prices here.

Among the buyers in this market were representatives of the following firms: Wm. S. Hedges & Co., New York; Marchand Frères, Paris-New York; A. Haefner, Nuremberg; Abrahams & Cooper, Birmingham; Monikkendam, Paris; T. B. Kaufman, London; L. S. Wins, Paris; N. M. Oppenheim, Frankfort; Saul & Kohn, Antwerp; Ryrie Bros., Toronto; L. Schiff, Paris.

Trans-Atlantic Voyagers.

TO EUROPE.

J. S. Klipper, New York, sails March 26 on the *Lapland*.

Frank Kind and Morris Kind, of S. Kind & Sons, Philadelphia, Pa., sailed Tuesday on the *Lusitania*.

Charles Briggs, Providence, R. I., accompanied by his daughters, the Misses Marion G. and C. R. C. Briggs, sailed Saturday on the *Berlin*.

FROM EUROPE.

Frank Jeanne, of Wm. S. Hedges & Co., New York, returns to-morrow on the *Mauretania*.

J. J. Freeman, Toledo, O., accompanied by his wife, sailed Saturday for the Mediterranean.

Considerable inconvenience was caused L. W. Abrahams, Jr., a jeweler of Port Deposit, Md., recently, when that town was flooded. The stock was safely moved to the upper floor.

Philadelphia Merchants Correct Erroneous Reports as to Strike Conditions That Have Hurt Business Interests.

PHILADELPHIA, Pa., March 14.—Because great depression in business, which ted during the car strike, the mer- re determined to counteract the ex- d reports which have been spread t to the detriment of their interests. le and retail merchants declare that eral strike has been used by their rivals in other cities that they are y to receive goods purchased here on time, and that it is unsafe to visit this city because of possible bodily harm.

The following resolutions were adopted at a special meeting of the board of directors of the Merchants & Manufacturers' Association of this city, March 9:

Whereas, Many newspapers throughout the country have greatly exaggerated the conditions existing in this city, and what really small outbreaks have occurred have been sporadic in character, mostly in outlying districts of the city easily handled by the local police; and,

Whereas, The business district of the city has been quiet and peaceful, and except for what is read in the newspapers, the general run of our citizens would be ignorant that anything but normal conditions prevailed; therefore, be it

Resolved, That the Board of Directors of the Merchants and Manufacturers' Association condemn as unjust to Philadelphia the many exaggerated reports of violence tending to keep people from coming to this city; and,

Resolved, That the press of the city be urged to cooperate with us in allaying this fear and impressing the fact upon the people outside of the city that they can come to Philadelphia in perfect safety, find comfortable quarters and transact business without molestation.

News Gleanings.

The Non-Retailing Co., Lancaster, Pa., announces that the item in a recent issue as to the financial difficulties of Schneider & Baxmeier, Pittsburg, was incorrect in so far as it announced that the Lancaster firm brought an action to recover its claim. The company says it is not in the habit of pushing customers to the wall in this manner.

Harry and Nathan Orkin, formerly of Orkin Bros., Boston, Mass., have formed a co-partnership and will open offices at 21 Bromfield St., that city, at which address the factory will also be located. The concern will be known as Harry Orkin & Bro., and will manufacture a general line of gold jewelry. The new house will also deal in precious, semi-precious and imitation stones and mountings and has installed an extensive repairing department.

G. A. Bahn, Austin, Tex., recently disposed of his interest in the G. A. Bahn Optical & Diamond Co. to C. H. Page, L. J. Schneider, A. E. Stelfox, A. W. Blower, O. D. Hudnall and E. J. Palm. All liabilities have been assumed by the present stockholders and all accounts are payable to them. The company will be managed by A. E. Stelfox, who was for many years in the concern's employ, and all the old employes have been retained.

Friends of Benj. V. Arnstine, of the Arnstine Bros. Co., Cleveland, O., have been expressing to him their sympathy on the death of his wife, Mrs. Laura S. Arnstine, who died March 7 at St. Luke's Hospital, Cleveland, after an illness of a few days. Mrs. Arnstein was born in Cincinnati, Nov. 7, 1861, and later went to Tiffin, O., where she graduated from the high school. She married Mr. Arnstein June 15, 1887, and besides her husband is survived by two children, a daughter, Selma, and a son, Edgar; also by a mother, one brother and five sisters. Deceased was prominent in the Cleveland Council of Jewish Women and the Ladies' Auxiliary of the Willson Ave. Temple and in religious work generally. The funeral services were held, Wednesday afternoon, from the family home, 2033 Abbington Road, and at Mayfield Chapel.

Jewelers Win Suit Against Pawnbrokers to Recover Jewelry Embezzled by Salesman.

The Appellate Division of the Supreme Court handed down last week a decision in the suit of Freudenheim Bros. & Levy against Gutter & Son, which arose out of a question as to the right of a pawnbroker to enforce his lien on goods pledged with him. The decision in favor of the jewelry concern rendered in the lower court was affirmed. It is understood that the case will be appealed at once to the New York Court of Appeals. No opinion was submitted.

The question which arises between the litigants dates back to the time when Freudenheim Bros & Levy, a large jewelry house in New York, employed a man named Levinsohn as a salesman. Levinsohn sent some of the jewelry which he had obtained from Freudenheim Bros. & Levy to be pawned by a man named Feinberg. Feinberg pawned a certain number of pieces with Gutter & Son, who are pawnbrokers in New York.

Levinsohn used the money thus obtained to pay some of his own bills. When the firm of Freudenheim Bros. & Levy discovered this they had the salesman arrested in Chicago and brought to New York, where he was indicted for grand larceny. He pleaded guilty and was sent to Sing Sing.

The jewelry firm then made a motion before Judge Mulqueen who sentenced Levinsohn, for an order directing Gutter & Son and a number of other pawnbrokers with whom goods had been pawned to turn over the property. The attorneys representing the pawnbrokers opposed this, claiming that their clients had a right to a day in court and a jury trial to establish their lien for money advanced on the goods. After consideration, Judge Mulqueen so decided.

The case went to the Supreme Court, where Judge Bischoff decided in substance that had the merchandise been pawned by Levinsohn directly the pawn brokers might have had a lien for their advances, but as it was given by Levinsohn to his clerk to pawn, this act was conversion. The clerk had no title to the goods and therefore the pawnbrokers could not in any way get title from him.

The pawnbrokers based their appeal on the claim that the act of the clerk was the act of Levinsohn in that he was simply the instrument of Levinsohn.

In the case on trial the goods are valued at $2,100. About $20,000 is involved in all the transactions. The other pawnbrokers are waiting, however, for a final decision in the present case.

Market Prices for Silver Bars.

The following were the quotations of silver bars in London and New York, reported as follows:

	London.	*New York selling price, 999 Basis.*
March 8	23 7 16d	$0.53
" 9	23 3-8d	.52⅞
" 10	23 7 16d	.53
" 11	23 5-8d	.53⅜
" 12	23 11 16d	.53⅛
" 14	23 5-8d.	.53⅜

Eugene Hoerz, Dolgeville, N. Y., and Miss R Colenstein were recently married.

Providence.

One of the latest devotees of automobiling is Theodore C. Rueckert.

Leon Elias is on a western trip in the interests of Mackey & Elias.

Henry Lederer, of H. Lederer & Bro., was in New York, last week.

E. E. Craddock, of the Providence Art Co., was in New York last week.

Gustave Saacke, of Wildprett & Saacke, was in New York on business, last week.

J. Forsythe, of the Meriden Cutlery Co., Meriden, Conn., was a caller in this city, last week.

Fred Barry, traveling for L. Stern & Co., has been visiting the factory in this city in the past week.

"Billy" Lamb is on a trip to the Pacific Coast in the interests of George H. Fuller & Son Co., Pawtucket.

A. S. Vennerbeck, of the Vennerbeck & Clase Co., of this city, was in New York, last week, on business.

Henry D. Sharpe, of the Brown & Sharpe Mfg. Co., has been re-elected a director of the Providence Gas Co.

Conley & Straight, refiners, of this city, have registered a 32-horsepower touring car during the past week.

Charles W. Clough, Pawtucket, has been admitted as a member of the Pawtucket

John S. Holbrook, vice-president of the Gorham Mfg. Co., has just purchased a 26-horsepower touring car.

Business Men's Association.

William J. McDermott, enameler, 299 Weybosset St., is working evenings to catch up with his orders for emblems.

D. Harold Rogers has resigned his position with the Gorham Co. and gone into the insurance and real estate business.

H. C. Barnum was a caller upon the trade in this city, last week, in the interests of Shafer & Douglas, Newark, N. J.

Edward Rothschild was in this city the past week, purchasing for the American Comb & Novelty Co., Chicago.

E. Suarez, formerly with Green & Conlon, Boston, has accepted a position with the Tilden-Thurber Co., of this city.

Manufacturers in the vicinity were visited the past week by J. Alfred Guay, importer and jobber of jewelry at Quebec, Can.

Archibald Silverman, James Smith and Charles Silverman have been elected members of the Rhode Island Motor League.

The Gorham Co. recently furnished a series of prize cups and other trophies for the Knickerbocker Yacht Club of New York.

S. Smigrod, who has established himself in the jobbing business at 49 W. 116th St., New York, was one of the buyers in town last week.

The recent arrival of a son and heir in the family of Archibald Silverman, of Silverman Bros., is the cause of many congratulations.

Herbert E. Brown, the well-known electroplater of this city, has the sympathy of the trade in the recent death of his father, 93 years of age, at Seekonk, Mass.

David M. Watkins, of the D. M. Watkins Co., has entered the ranks of automobilists, registering a 43-horsepower touring car with the State board the past week.

Harvey J. Flint has been elected a member of the entertainment committee that is planning for the annual banquet of the Edgewood Yacht Club, of which Mr. Flint is commodore.

The regular monthly meeting of the directors of the Manufacturing Jewelers' Board of Trade will be held, next Friday afternoon, at the rooms of the association in the Wilcox building.

The Shepard Finding Co., of this city, is among the first to anticipate the popularity of the "Chanticler" craze by getting out a full line of findings for hat, scarf, sash and brooch pins, buckles, etc.

Charles Briggs, accompanied by his daughters, Miss Marion G. Briggs and Miss C. R. C. Briggs, sailed, Saturday, from New York on the *Berlin,* of the North German Lloyd line, for Naples and Genoa.

Frederick S. Neff, who has been head of the optical department of the Boston Store, has resigned, and G. Fred Beane, who has been associated with Mr. Neff for three years, has been appointed to fill the vacancy.

Among the creditors of James B. Fogarty, Centredale, who was adjudged a bankrupt, last week, in the United States Court here, was the American Standard Jewelry Co., Detroit, Mich., who is interested for a small amount.

Arthur E. Austin, of John Austin & Son, announced, Friday, that he would not accept the Republican nomination for Mayor of the new city of Cranston, which was created by an act of the General Assembly, last week.

William Smith & Co., who have for many years conducted a manufacturing jewelry business at 61 Peck St., have secured new quarters at 41 Mulberry St., Newark, N. J., will remove their business thereto in a short time

The case of Charles E. Varney against the Unique Novelty Co. on book account was called before Judge Gorham in the civil session of the Sixth District Court on Thursday and decision given for the defendant for costs.

The case of Umberto Rossi against the T. W. Lind Co. was called before Presiding Justice Tanner in the Superior Court, last week, and upon agreement of counsel the demurrer to the declaration is sustained and the plaintiff is allowed to amend.

The big display window of the retail jewelry store of J. A. Angell, on Olneyville Sq., was badly cut by some instrument one night last week. It is thought that an effort was made to effect an entrance, but that the perpetrators were frightened away.

A fire was discovered in the charcoal forge of the J. J. White Mfg. Co., 158 Pine St., at 7.30 o'clock Friday evening. A still alarm was sent in by the watchman, Judson Allen, and the firemen responded. The damage was slight, owing to the timely discovery.

The Sunday *Tribune,* of this city, had a half-page article last Sunday on the New England Manufacturing Jewelers' and Silversmiths' Association, illustrated by cuts of George H. Holmes and Harry Cutler. The objects and history of the association were interestingly set forth.

Among the foreign importations received through the Providence Customs House, last week, were the following: From Bremen, 28 packages of imitation precious stones, manufactures of metal and glass; from Havana, one package of [illegible] precious stones; from Liverpool, [illegible] age of cutlery and seven of mar[illegible] of silver.

Rueckert Mfg. Co., of 141 Pine St., , which manufactures jewelers' ersmiths' cases, trays, etc., and novelties, has leased the first floor ames E. Blake factory, corner of S Main St., in Attleboro, where s to start a branch of its factory The factory that the concern d was formerly occupied by the Mossberg Co., which recently moved 5,000 factory erected by the Attlerd of Trade for its especial pur. The Rueckert Mfg. Co. has arto occupy extra space in the Blake s its business enlarges. The con been in business here for a num ars.

P. Lindroth, who resides at River of the suburban districts of this is a prominent member of the department of the Rhode Island Guard, was fined $100 by Judge the United States Circuit Court n, March 11, on his plea of guilty arge of using the mails in a scheme d. He is at present conducting rder and jewelry commission busi his city. He was arrested at his Riverside by Secret Service officers eeks ago, it being alleged that he fraudulent claims against the f men who were dead. One spehge was that he sent bills represent me from a jeweler, offering to re onds which were asserted to have with him for setting upon the pay certain moneys as balance due. took the witness stand in his own d stated that at the time he en on the swindling scheme he was n debt to the amount of about t he was employed at $2.50 a day te range of the Rhode Island Nard, and that he had a child who in delicate health for about three e said that if he could have his he would again take the position cer at the State range, beginning Lindroth declared that he had sent 20 letters to relatives of dead perughout the country from an office eld St., Boston, stating that the had made payments on a diamond t would be forwarded on receipt he defendant said that the scheme was stopped before he secured any money. An attorney of this city who is an officer of the National Guard, and who had been retained by fellow members of the Guard to defend Lindroth, pleaded for leniency. The defendant made a good impression on the court. He was warned by the judge against giving any future thought to swindling schemes. The fine was paid by the attorney.

Attleboro.

John M. Fisher has been confined to his home the past week by illness.

L. E. Powell, western salesman for S. O. Bigney & Co., was at the factory last week.

E. A. Warner, a local manufacturer, was in New York last week on a business trip.

G. Percy Clap has again taken up his duties at New York after spending a vacation at the Cape.

Bates & Bacon are making arrangements for the construction of a third floor to their building on County St.

The Freeman, Daughaday Co., Chartley, closed its factory last Thursday for the remainder of the week.

Earl Viall, representing the F. H. Sadler Co., has been making a business trip through New York State.

William H. Lyons, of C. D. Lyons & Co., Mansfield, was elected water commissioner of that town on last Monday.

Mr. Mason, of Mason, Howard & Co., is in charge of that company's New York office during the absence of Ralph Hoxsie.

Word was received here last week of the death of the father of Ralph Hoxsie, who is traveling salesman for Mason, Howland & Co.

In an exciting match last week the bowling team representing the Attleboro Mfg. Co. succeeded in landing two strings from the Bristol Mfg. Co. team.

The labor committee of the Massachusetts legislature is making arrangements to visit Attleboro in order to learn the conditions of the business in relation to the 56-hour law.

In the Fourth District Court last Friday morning Edward O'Neil was arraigned on a charge of larceny of a gold ring from F. I. Gorton, a manufacturing jeweler of North Attleboro. The boy was arrested in Pawtucket while attempting to exchange the ring for a revolver. O'Neil worked for Gorton two years ago, and while in his employ the ring was missed. Since that time the boy has served a sentence in the House of Correction. The case was continued several days.

The funeral of the late Joseph W. Clarke, who was salesman for R. B. Macdonald & Co., took place Tuesday afternoon. The services were held in the Murray Congregational Church, with Rev. Frederick Moore officiating. After the church services the Odd Fellows and the Knights of Pythias performed their ritualistic services. The bearers were George H. Palmer, G. Gardener Bullock, Frederick A. Clarke, Walter M. Thayer, Louis D. Humken and Horace A. Cheever. Interment was at the Woodlawn Cemetery.

An announcement was made in a local paper last week that James E. Blake, owner of the factory at the corner of Mill and South Main Sts., had leased the first floor in the building to the Rueckert Mfg. Co., of Providence, and that this concern would locate in Attleboro. Upon investigation the correspondent of THE JEWELERS' CIRCULAR-WEEKLY found that the statement was misleading. George C. Rueckert, head of the company, said: "We have no intention of making any change in our business in Providence, nor are we going to move our factory to Attleboro. We are, however, going to establish a branch in Attleboro in the old Mossberg factory. At this branch the firm will carry a full stock of goods for the use of the traveling salesmen.

North Attleboro.

Fred. Gilbert is back from the west.

Daniel Chisholm was in Boston, last week.

James Lyons has accepted a responsible position in Canada.

Albert Totten has returned from an extended trip to Panama.

H. H. Pierce has returned from a business trip for the T. I. Smith Co.

Louis D. Barrows has returned from an extended vacation enjoyed in Florida.

Albert Beck, New York representative for the Cheever & Tweedy Co., has resigned his position.

Joseph Swift, of Furbish, Swift & Fisher, was in New York, last week, making arrangements to open a New York office.

C. W. Prince, who travels for the Nickerson Comb Co., of South Attleboro, is in New York in the interests of the concern.

Edward Sommer, who was formerly salesman for J. J. Sommer & Co., was in town, last week, on a visit to his parents.

The firms in the Sturdy building have resumed work, after being closed for several days on account of the breaking of a part of the engine.

Henry G. Thresher, the Providence manufacturer, will deliver an address before the Baptist Men's Club next Tuesday upon the jewelers' tariff fight.

John Killion, of this town, who is foreman of the Attleboro Chain Co., recently underwent an operation at the Carney Hospital for appendicitis.

An article has been placed in the annual town warrant asking the town to purchase the large estate of H. F. Barrows for the location of several town buildings.

Charles Jacques, manager of the clock department of Bawo & Dotter, New York, is now preparing a descriptive catalogue of the firm's hall clocks, which will greatly assist the clock dealer who carries these goods in stock. It will contain, besides the usual illustrations, cuts showing the various phases of the movements and a most thorough explanation of all the parts, besides elaborate information which will enable the dealer to explain any part of a hall clock and answer any question which may possibly be asked by a customer and overcome any particular prejudice on the part of the would-be purchaser. In this catalogue Mr. Jacques imparts his expert knowledge, the result of 30 years' experience in the clock business. This catalogue will be ready in time for the Spring trade.

GORHAM SILVER

WHAT EVERY WOMAN KNOWS

That the Gorham trade-mark is a certificate for Sterling Silver $^{925}/_{1000}$ fine, and needs no explanation to the recipient when sent as a gift; therefore, when a dealer offers solid silver bearing this mark the sale is readily made. How much better this is than trying to explain that some other make is "just as good."

Pawnbrokers Lose Important Suit.

THE Appellate Division of the New York Supreme Court hit the pawnbrokers a hard blow in its decision last week, which affirmed without opinion, the judgment of the trial term in favor of a New York jewelry concern and against a pawnbroker in a suit that involves some novel features. This case, which was described in full in the issue of Feb. 23, hinged on the question whether the pawnbroker had a lien upon the jewelry embezzled by a salesman of the jewelry house which had been pledged with the defendants, not by the salesman, but by an agent of the latter.

The circumstances of the case were such that had the salesman himself pledged the jewelry, the lien of the pawnbrokers might have been enforcible; but in turning it over to the man who had pledged it the salesman committed larceny, and the court decided that the pledgor could give no title to the pawnbrokers, irrespective of what their rights might have been had the salesman himself committed the act.

The pawnbrokers based their appeal on the claim that the act of the pledgor was the act of the salesman of which he was simply the instrument, and that any rights which they might have had in dealing with the latter existed in dealing with the former. This claim the Appellate Division has evidently found without merit, but there is no doubt that the case will be brought to the Court of Appeals as the points involved are most important to the business community and particularly to jewelers and pawnbrokers.

Trade-Marks Useful as Well as Valuable.

THE trade-mark as a factor in all business is growing in importance every day, and there are few lines in which its utility and value are made manifest to a greater extent than in the jewelry industry, in which it often has a double function—a means of identifying the makers of a product and guarantee as to quality.

How the good will of a business may be bound up entirely in the trade-marks and trade names of the firm is a subject on which volumes may be written, and it is hardly necessary to point out the value of an established trade-mark to jewelers at large. However, the value of a trade-mark as a means of identification is not as fully realized by some manufacturers and retailers, though in this function alone the trade-mark performs a service of incalculable good. This the retailer can readily see, even if a few manufacturers are too blind to realize it fully. In handling goods that have to be repaired or duplicated the greatest help to the dealer is the mark of the manufacturers which they bear. If there is no such a mark it may be weeks or even months before the jeweler can finally learn the name and address of the maker of the article, if he ever does. If the trade-mark is there, he simply has to consult the volume of the "Trade-Marks of the Jewelry and Kindred Trades," get the name and address of the maker and his work is at an end.

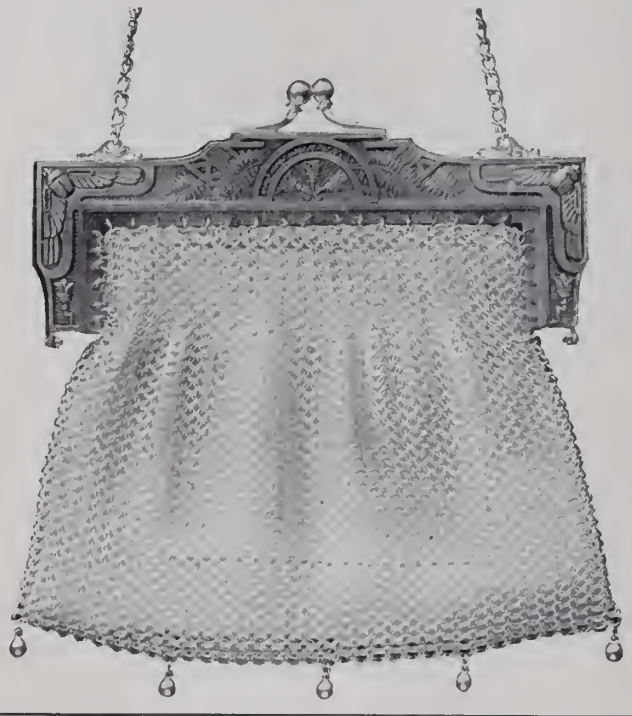
As to the manufacturer, the trade-mark brings him inquiries about his own goods and to a certain extent limits this to his own goods; where no mark is used the manufacturer is constantly in receipt of goods made by other concerns, accompanied by claims that they are his and demands that they be duplicated or repaired, as the case may be.

There is little doubt that the use of a trade-mark by all manufacturers in the jewelry trade, on every article turned out, would result in great good both to the makers and to the retail jewelers, and any inconvenience that might incidentally result therefrom would be so small in proportion to the good accomplished as to be worthy of little consideration.

The best publication of its class is the one to advertise in, if you wish profitable returns.

Publicity as an Aid to Justice.

ANOTHER victory was scored by "publicity" last week in the conviction at Norristown, Pa., of a man who had robbed a jeweler of that town of a diamond earring. Though the jeweler was sure the prisoner was guilty the suspect denied the charge and the stolen property was not found in his possession. The police were unable to obtain any evidence of previous charges against the thief, and there is little doubt that his story would have been believed and that either he would not have been prosecuted or would have been finally acquitted, had not the complainant through the police got a photograph of the prisoner and sent it to THE JEWELERS' CIRCULAR-WEEKLY with a description of the suspect. This immediately brought to light the fact that the man had operated elsewhere, though he had not been arrested or convicted. His record practically knocked the ground from under his defense.



One of the jewelers on whom the prisoner had previously tried his tricks recognized the picture in this journal and was induced to go to Norristown, visit the jail and there identified the prisoner as a man who had attempted a theft, but had been forced to surrender the stolen property at the point of a revolver. The prisoner then admitted the incident. With this evidence the Norristown jeweler was able to obtain the help and co-operation of the authorities in the prosecution of the case, with the result that the thief has been sent to jail for indeterminate term of from nine months to three years.

Had the jeweler in this instance relied wholly upon the prosecuting authorities the chances are that this thief would now be at large and a menace to the trade wherever he went. By the complainant's enterprise and public spirit in putting the man's picture and description before the entire trade not only has the thief been put away and taught a lesson, but in addition the trade

lding operations at the old assay Wall St. progressed far enough, so that it was found necessary gold bars kept in storage there g rooms of the Sub-Treasury building next door. The assay office had on hand $10,800,000 worth of gold bars, which were transferred in hand trucks. While the gold was in transit two policemen from the John St. station and half a dozen detectives were on hand to guard the gold.

E. B. Hough, of the Wightman & Hough Co., Providence, R. I., arrived in this city Wednesday, and will remain in town for a few days supervising the removal of the firm's office at 3 Maiden Lane to its new quarters in the Silversmiths' building, 15 Maiden Lane. Hutchison & Huestis, who shared the old office of the former concern, move at the same time and will share the new quarters. The firms have gained better light, larger room and much greater facilities by the removal.

At a meeting of the members of the Central Manhattan Improvement Association held, last Wednesday, at the Waldorf-Astoria Hotel, several matters of interest to the future development of 34th St. were discussed. A number of jewelers are members of the organization, which is urging that an express station be placed at 34th St. on the new Lexington Ave. subway. The report of the committee which had the matter of obtaining this express station at 34th St. was not entirely satisfactory. Several other matters of interest to the organization were discussed.

Recent decisions by the Board of General Appraisers on the protests of the R. H. White Co., Boston, and others, sustained the importers' contention that millinery ornaments had been properly classified as jewelry. The protest of Wm. Krafft, claiming that engravers' diamonds set in wooden handles were held dutiable under Par. 193 as articles in part metal, was allowed. Another protest, that of the International Dispatch, New York, for the classification of coral shells, was sustained, the Board holding that coral shell, cut and intended for jewelry purposes, is dutiable as precious stones, cut but not set.

Saffir Bros., 51 Maiden Lane, dissolved partnership yesterday. The concern was composed of David Saffir and Jack Saffir. The former, the senior member of the old concern, has formed a partnership with J. Blatt under the firm name of Saffir & Blatt, importers in diamonds. The new concern will be located on the second floor of the building at 37 Maiden Lane. Jack Saffir and David Saffir, Jr., who were formerly members of the firm of Saffir Bros., the dissolved firm, have formed a new co-partnership under the firm style of Saffir Bros. They will import diamonds and diamond jewelry, and will be located at 51 Maiden Lane, in the offices formerly occupied by the concern which has just dissolved.

The Jewelers Board of Trade reports that John D. Bodfors, Minneapolis, Minn., has made an offer to pay creditors 35 per cent., net cash, on the balance of his indebtedness as it now stands. Mr. Bodfors secured an extension from his creditors in February, 1909, agreeing to make payments, commencing Jan. 1, 1909, and ending Jan. 15, 1911. Under this extension agreement he made four regular payments of five per cent. each, but was only able to pay five per cent. of the Dec. 15, 1909, payment, which called for 10 per cent. He was also unable to make the 25 per cent. payment due Jan. 15, 1910. A total of 25 per cent. was thus paid on the original extension indebtedness. An inventory of his stock and fixtures shows a value of $11,147, together with cash on hand of $1,127, but this amount will be more than consumed in paying bills. After deducting the 25 per cent. paid the creditors, his estimated liabilities are at this time about $15,000. He has secured financial assistance sufficient to enable him to pay creditors 35 per cent. on the balance of the indebtedness.

There is at present an exhibition and sale under way at the Scuola gallery, 59 W. 39th St., which shows what can be done in fashioning by hand wrought jewelry in ecclesiastical silver and enamel work. The exhibitors are Miss Helen Kelling Mills, Miss Jeanne de MaCarty and Miss Eleanor Denning. They have designed and executed the unusually fine collection which was placed on exhibition last week. The display is noticeable for its many exquisite examples of enamel work, including combs, brooches, pendants and other articles. The color combinations are most artistically wrought, and the effectiveness of the metal work is enhanced by the introduction of jewels and semi-precious stones. The ecclesiastical designs shown include a chalice fashioned from beaten silver and set with large Mexican opals and chrysoprase. In the jewelry display a couple of pendants are unusually attractive. One is of silver-gilt and in repoussé work. The work of Miss Denning is mainly in the line of jewelry, including brooches, rings, pendants, belt buckles, etc., and introducing many original color combinations. The exhibition will continue until Saturday.

Judge Lacombe, in the United States Circuit Court, last week, handed down a decree "pro confesso" in the case of the Gorham Mfg Co. *et al.* against Frederick Froelich and Wm. Riedel, doing business under the name of the Art Engraving Co. The action as brought by the complainants alleged an infringement of an invention of a mould for casting metals, of which the complainants claimed they held and owned the patent rights. The bill of complaint as filed recites that Eugene C. Smith was the original inventor for a mould for casting metals under patent No. 512,845, which was granted in 1894, and that Mr. Smith granted to the Gorham Mfg. Co. the exclusive license to employ the invention in casting silver and silver alloys, together with certain shop rights, reserving for himself all other uses and employments of his invention. He also granted certain rights to R. C. Ellis, Philadelphia, and he in turn to the Franco-American Casting Co., and it is through this concern that J. F. Robert Wurch, one of the complainants in the case, obtained his claim to the patent. In the papers asking that the decree be granted the Gorham Mfg. Co.'s attorney set forth that the complaint was filed on Nov. 27, 1909, and that on the rule day, Monday, Jan. 3, the defendants failed to appear or take other action, and that on Jan. 21 the rule for taking the decree "pro confesso" was entered. The defendants in the case are enjoined by the decree from using or making the article covered by the patent,

nts' Association of New York pamphlet form the argument ion by its committee on for- nial commerce at the hearing Committee on Merchant Ma- eries. The proposed amend- ments to Senate bill 529 are printed in full.

The Chantecler craze has cropped out in the jewelry trade and now Chantecler fobs, buckles, stickpins, etc., are being offered for sale in this city. The golden pheasant and the white hen, so much in evidence in the play, are shown in metal wrought in colored enamels.

Two unset diamonds valued at $500 each were seized by Special Customs Inspector Timothy Donohue from the person of Charles E. Ruhlmann, a hotel-keeper of St. Louis, who arrived, Saturday, on the French liner *Provence*. Ruhlmann was later taken before United States Commissioner Shields and held in $1,500 bail on a charge of attempted smuggling

A large quantity of jewelry belonging to Geo. D. Davidson, Jersey City, N. J., which was entrusted to Charles Strauss last December to sell, and for which he did not account, was recovered in New York last week. When the salesman did not report on the goods detectives were employed, who found him, and he is now lodged in jail awaiting trial. Friends of the salesman interested themselves in his case and induced a Brooklyn man to redeem the goods from pawn. The goods were recovered from him.

The Merchants' Association gave a luncheon, last Thursday, to the wholesale grocery, tobacco, wine and liquor trades. Among those present from the jewelry trade were: Col. John L. Shepherd, of the Keystone Watch Case Co.; A. S. Pitt, Marsellus, Pitt & Co., and H. H. Butts, of Hayden W. Wheeler & Co. Colonel Shepherd made a short but effective address on the necessity of co-operation in business and the importance of New York merchants supporting the association for the benefit of New York.

To commemorate their services to the Hudson-Fulton celebration, Herman Ridder, acting president, and Col. H. W. Sackett, secretary, last week received medals of Alaskan gold from the trustees and members of the commission. The medals, three inches in diameter and very heavy, were designed by Chester Beach. On one side are portraits of Henry Hudson and Robert Fulton. On the other side is the figure of Victory holding up the *Clermont*, the first steamship. Only these two medals and one in bronze for the artist are to be taken from the dies, which will go to the Metropolitan Museum of Art.

The first annual beefsteak dinner of the Jewelers' 14-Karat Club of New York will be held Saturday evening, April 9, at Reisenweber's, Columbus Circle. The dinner will begin at 6.30 P. M., and it is the desire of the committee in charge that a large representation of the club's membership be on hand to help make the affair a success. The Austin Quartet will furnish music for the evening. The committee in charge consists of Frank Schaller, H. S. Osterweil and Wm. Honigbaum. The organization has grown in memebership in the past year and has come to be one of the recognized social clubs of the trade.

Theo. Schisgall, importer of clocks, 116 Chambers St., returned from Europe last week on the *Prinz Frederich Wilhelm* after visiting the clock manufacturing districts of Germany and France. He spent a week of recreation in Nice, on the Riviera. During his trip abroad he paid special attention to the season's novelties and expects soon to show a large line in this city. He has taken two more floors in an adjoining building because of an increase in his business. He will add a line of opera glasses. J. S. Newberger and Christian Kienzli have started over their respective territories in the interest of Mr. Schisgall.

Louis C. Tiffany, director of Tiffany & Co. and the Tiffany Studios, appeared in the night court, Sunday night, and offered his residence at 27 E. 72d St., which he said was worth not less than $700,000, as bail for his chauffeur, William L. Cooper, who had run down a boy. The offer was accepted by Magistrate Harris. Cooper was driving the Tiffany limousine car north on Third Ave., Sunday afternoon, when it hit James O'Connell, seven years old, who was playing in front of his home at No. 1359. Cooper stopped the machine, picked up the boy and rushed him to the Presbyterian Hospital. The doctors say he has only a severe scalp wound.

Included in the list of recent accessions at the Metropolitan Museum of Art are an enamel pendant by R. Lalique, Paris, modern (gift of Albert M. Kohn); marriage service, 33 pieces of gold lacquer, Japanese, 19th century (purchase); gold medal, The Virgin, by O. Roty (gift of Theodore A. Kohn & Son); bronze medallion, Circle of Friends of the Medallion, by J. E. Roiné (gift of the society); bronze inkstand, Italian, 16th century (gift of Duveen Bros.); six copies of frescoes, by Giotto, in the Church of St. Francis of Assisi (gift of J. Pierpont Morgan); gold watch, single case, "Roskell, Liverpool," early 19th century (gift of Miss Elizabeth M. Greenfield). A number of these accessions have not as yet been placed on exhibition. A list of loans include a Greek marble head, fragment (lent by Frank J. Mather); 14 Chinese porcelain figures, vases and dishes added to the collection (lent by J. Pierpont Morgan): blue faenza dish, Tribute Money, 1526, Gubbio plate, The Death of Lucretia, 1522, and Urbino plate with Gubbio luster, The Entombment, by Francesco Xanto Rovigo, 1536, Italian (lent by Mr. and Mrs. V. Everit Macy); inlaid Cairo chair, Egyptian (lent by Lockwood de Forest); one silver and two gold medals awarded to the Sybil Carter Indian Mission (lent by the society).

The case of Tiffany & Co. against the United States over the duty applicable to 59 pearls purchased by Morris Guggenheim in Paris and intended for a necklace for Mrs. Guggenheim, which was reached on the calendar of the United States Court of Appeals last week, was not argued at that time, but will come before the court to-day. The pearls were purchased at the Paris store of Tiffany & Co., but were delivered to Mr. Guggenheim from the firm's store in this city. The case has been in the courts for a long time, the question involved being whether the pearls in question as imported were dutiable as pearls in their natural state, not strung or set, and subject to a duty of 10 per cent., or whether they constituted a necklace, and as such fall within the provision of the tariff providing for a duty of 60 per cent. on pearls strung or as

(New York Notes continued on page 86.)

New York Notes.

(*Continued from page 85.*)

jewelry. The pearls were imported in 1902 and were classified at the customs house as pearls in their natural state. Several months after their entry the information was received by customs authorities which started an investigation into the circumstances attending the importation of the gems. The Collector of Customs later made a reliquidation of the entry demanding a duty of 60 per cent. on the pearls. The matter has been argued in the lower courts and decision rendered in favor of the importers, following the decision of the Board of General Appraisers to this effect.

Michael M. Goldberg, 14 Maiden Lane, returned, Saturday, on the *Campania* from a trip to Europe.

Judge Sol. Oppenheimer, who represented several jewelry houses before his election to the Municipal Court bench, will be tendered a banquet by the Patriotic Republican Club at Terrace Garden, April 7. Mr. Oppenheimer was elected to a judgeship at the last election.

There is on exhibition in a window of the store of Geo. W. Shiebler, 7 Maiden Lane, an interesting solid silver Japanese tea set consisting of six pieces and a tray. The set is a duplicate of the one presented to King Edward VII. of England, at the time of his coronation, by the Emperor of Japan. The set is hand-made and has as its chief *motif* dragons wrought in silver. It has attracted considerable attention from passers-by during the week. A card displayed with the set tells its history.

Notice is given to creditors of the Union Watch Co., formerly in business at 47 Maiden Lane, who filed schedules in bankruptcy late in February, that the concern has filed its petition, verified March 1, praying that a composition heretofore offered to its creditors and accepted by a majority in number and amount, be confirmed. Creditors can attend a hearing upon the matter in the United States District Court, March 21, at 10.30 A. M. The schedules filed some time ago show liabilities of $23,746, of which $9,970 is secured and nominal assets are placed at $5,033. The bankrupt concern recently made a settlement offer of 20 cents on the dollar in cash.

A voluntary petition in bankruptcy was filed in the United States District Court for the Eastern District, Brooklyn, N. Y., last week, by Caspar N. Gunter, a jeweler at 719 Fulton St., Brooklyn. His schedules show liabilities of $2,373 in unsecured claims and nominal assets of $1,500, consisting of stock in trade. Among the creditors named in the petition whose claims are unsecured are: Robt. H. Weems, $1,733; C. R. Ehren, $400; Adolph Schwob, $90; Waterbury Clock Co., $29; Swerjen & Culander, $70; Kingston Lamp Specialty Co., $24. The stock and fixtures are in the possession of the sheriff. John P. Hurley has been appointed receiver under a bond of $1,000. Mr. Gunter commenced business in the '60's and has been at his present location since 1870. He was robbed in 1877, which caused him to fail, but subsequently he settled and resumed business.

The gold medal which will be presented to President Taft by a committee of the 12 leading actresses of America when he opens the Actors' Fund Fair on May 9 in this city was struck last week. It will be notable as the first medal ever presented by the theater to a Chief Magistrate. The medal was designed by Chester Beach, probably the youngest sculptor in America, who was commissioned by Archer M. Huntington, president of the American Numismatic Society. The face portrays Charity coming forward with Comedy and Tragedy on either side, and stretching forth her arms gracefully in an appeal for aid. On the reverse side in low relief are the comic and tragic masks. The medal bears the words, "Actors' Fund, New York, 1910." From the same design of the President's medal 1,000 replicas in silver will be struck for the distinguished guests and 5,000 in bronze for the public. Edward J. Deitsch, of the Medalie Art Co., has donated the dies.

Referee in Bankruptcy Macgrane Coxe, who was appointed as special master to take testimony in the bankruptcy proceedings of Horowitz Bros., 196 Canal St., who filed schedules in 1908, has filed his report in the United States District Court on a hearing which he conducted as to the specifications of objections to the discharge of the bankrupts which were entered by some of the creditors. The special master reported that the specifications were very voluminous and allege a number of grounds of objection to the bankrupts' discharge. The hearing closed Feb. 29, 1909. On Dec. 16, 1909, a stipulation signed by the bankrupts' attorney and by the attorney for the objecting creditors agreeing to a withdrawal of the petition for the discharge in bankruptcy, was filed with the special master. The special master therefore reported to the court that the petition of the bankrupts for the discharge had been withdrawn and that an order should be made dismissing the petition. The matter came up for hearing Monday morning in the United States District Court.

Newark.

Oscar Kohn, of Kohn & Co., is spending a few days at Old Point Comfort, Va.

F. C. Bonnor, representing F. & F. Felger, 14 Marshall St., is now on a trip through New England.

A. T. Teague, representing Link & Angell, Inc., 13 Franklin St., has just started for an eight weeks' trip through the middle west.

John Eimerbrink, jeweler, 133 W. Market St., Asbury Park, N. J., will retire from business about April 1 to start in the hosiery business.

Henry Osborn, of the firm of Osborn & Osborn, 336 Mulberry St., is at present traveling through the middle west. He finds the trade a little quiet.

Arthur H. Moore, of the firm of Moore & Son, 22 Green St., who has been seriously ill since last December with the Grippe, is now able to work part of the time.

Philip Krimke, 29 Academy St., has been appointed captain of the guard of the Ancient Arabic Order of the Noble Mystic Shrine, Salaam Temple. He will go to New Orleans, April 12, on the annual pilgrimage of the shriners.

Kent & Woodland, whose New York office is at 14 John St., have ju[st] factory in this city from the [lic] building to Crawford St., whe[re th] secured better quarters. Griffin, watchmaker at 230 St., died March 5 of pneumonia in Everett, where funeral ser- eld March 9. Mr. Griffin, who of age, was one of the old- New England trade who trav- s go through the rural sections ce, repair wagon and general stock for country custom. He leaves a family.

H. W. Brewster, of Middlebury, Vt., who was a buyer at the Daniel Pratt's Son clock store a few days ago, is one of the few jewelers still active in the trade in New England who used to come to Boston to purchase their clock stock of Daniel Pratt, the founder of the concern—which dates back to 1832—and grandfather of Frank W B. Pratt, present proprietor of the establishment.

J. D. Chipman, vice-president and director of the St. Stephen's Bank, who has an office at 45 Milk St., this city, issued a statement last Thursday in which he denied the assertion made in a dispatch from Calais, Me., to the effect that the St. Croix Jewelry Co., St. Stephen, N. B., had assigned for the benefit of creditors. Mr. Chipman and Julius T. Whitlock, cashier of the bank, comprise the jewelry company.

John M. Bird, for the past 15 years watchmaker for the Bentley Jewelry Co., and previously for about 10 years located in the South End district on Washington St., died Feb. 27, after a surgical operation at the Boothby Hospital, in this city. Mr. Bird had resided for the past 12 years in West Somerville, where he was prominently identified with the Baptist Church. He was born in England 56 years ago. Mr. Bird leaves a widow and two children.

At the regular monthly meeting of the New England Watchmakers' Club, held March 8 at the Franklin Union building the following officers were elected: President, W. B. Garfield; vice-president, C. M. Smith; secretary, W. A. Darling; treasurer, Laroy E. Nichols; directors, H. S. Reynolds, E. H. Safford, F. W. Dodge, D. A. Gindrat, J. Sundin, F. S. Lovejoy, T. F. Proctor, C. S. Ramsdell, R. S. Lohnes, O. S. de Zara, T. P. Pratt, R. H. Houghton, J. Emanuels, A. Krause and C. E. Stanley.

Traveling salesmen visiting Boston during the week included: Percy Savory, Wadsworth Watchcase Co.; H. C. Barnum, Shafer & Douglas; George W. Read, Larter & Sons; Charles T. Dougherty, Osmers-Dougherty Co.; A. E. Allsop; E. Cooper Stone, Brassler Co.; J. W. Wortz, C Sydney Smith & Co.; Harry G. Young, Gibson-Krougler Co.; H. N. Van Bergen, Snow & Westcott Co.; Jacob Schorsch, Emrich, King & Schorsch; A. J. Sansbury; Sansbury & Nellis; F. C. Staudinger, Charles Weller & Co.; David Young, White & Young; Arthur Connett, Link & Angell; Percy Hine, Luthy & Hine; D. D. Brokaw; Mr. May, F. T. May Co.; Mr. Hutton, Geoffry & Co.

An unusually large number of buyers came to Boston during the week, the big automobile show attracting them from all parts of New England. Among the visitors were: O. E. Davies, Rockland; J. E. Stephens, Rumford Falls; H. O. Spencer, Caribou; George E. Wills, Auburn; J. D. Perry, Houlton; George McL. Presson, Farmington; N. H. Hammond, Lewiston; George L. McKenney, Gardiner, Me.; C. H. Sinclair, Concord; Joseph Geoffrion, Manchester; M. P. Foss, Pittsfield; F. A. Towle, Petersboro; O. H. Sleeper, Exeter; Fred Hendricks, Nashua; J. H. Booth, Laconia; W. P. Robinson, Portsmouth; C. W. Anderson, Manchester; H. B. Holmes, Winchester; F. P. Plummer, Dover, N. H.; Frank B. Howard, Rutland, Vt.; A. C. Tucker, Whitman; M. L. Cook, Marblehead; George E. Proulx, Southbridge; F. S. Thompson, Gloucester; J. L. Hicks, Fall River; C. E. Woodworth, New Bedford; George H. Kennison, Brockton; E. F. Lilley, Milford; David B. Knowles, Lawrence; G. H. Gutteridge, Maynard; A. W. Gunnison, Baldwinsville; E. L. Middleton, North Attleboro; George W. De Mars, Lawrence; J. A. Harrington, Spencer, Mass.; J. F. Marden, Newport; George E. Towne, Westerly, R. I.

Harrisburg, Pa.

An unsuccessful attempt was made to burglarize the store of I. I. Cohen & Co. in York one night recently.

Cohen Bros., Reading, are negotiating for the location of a branch office in the central business district in Harrisburg.

Arrangements are being made for the celebration of the 25th anniversary of the Harrisburg Board of Trade next month.

The United States Circuit Court has granted an order to sell the stock of jewelry, etc., in the store of Abram Baturin, 418 Walnut St., under bankruptcy proceedings.

The wedding of Jacob Kades, of Miller, Kades & Co., and Miss Goldsmith, of this city, was announced to take place yesterday. Miller, Kades & Co., who recently removed from 3d and Boas Sts. to Walnut and 4th Sts., have added a full line of jewelry to their large establishment.

The local police have been warned by the Baltimore authorities to be on the lookout for two clever diamond "flim-flammers," one of whom poses as a jeweler, telling the intended victim that the fake stones he wishes to exchange for the victim's good diamond are genuine and offering to advance a certain sum in consideration of making the exchange. It is understood that the pair are headed this way.

A jewelry swindler, who has been under arrest in Newark, N. J., and other cities at various times, under different aliases, has been apprehended here while endeavoring to get away with a $300 diamond pin. At the police station the detectives found among other things on the prisoner's person two pairs of steel pliers, such as expert pickpockets usually carry, several gold rings with the diamonds removed and two imitation diamond studs. He was photographed and his finger prints taken.

At the meting of creditors before Referee in Bankruptcy W. H. Middleton, March 8, Job J. Conklin, of this city, was unanimously chosen trustee of the bankrupt estate of Myer Baturin, 422 Market St. A number of the creditors were represented by counsel. Mr. Conklin has filed his bond of $3,000 and will appraise the property and stock of Jeweler Baturin prior to having a sale. The examination of the bankrupt has been postponed until March 29 at 2 P. M. to give the trustee an opportunity to make further investigation into certain facts in his possession. Mr. Baturin has been made defendant in another action, this time on a charge of receiving stolen goods. The appointment of Mr. Conklin as trustee relieves Receiver Thomas M. Sykes from duty. The store has been closed.

About Choosing Your Own Stock

THE INTEREST the manufacturer has in the jobber is simply because it is through him that the Retailer is reached. Any attempt, therefore, to restrict the jobber, to limit him, to tie him down to certain lines, is really aimed at *you.*

¶ The reputation of your store has been mainly due to the nice discrimination you have shown in the choice of stock. In a sense, your *personality* has expressed itself in the nature of your displays; and the store has been essentially *your* store. Will this continue to be true if outsiders, strangers to you and to your interests, be allowed to control the primary markets and arbitrarily dictate what shall and what shall not be sold?

¶ The principle is the same whether it is applied to Watch Cases or to anything else. Your welfare lies in maintaining free choice in an open market. Suppose—just for argument—that a clique of ring makers undertook to *compel* you to sell only *their* products, good, bad or indifferent. You would resent the idea. Uphold the right to *choose your own stock* by dealing with an independent source of supply.

D. C. PERCIVAL & CO., Inc.

Buffalo, N. Y.

Henry Kirshner, 59 E. Genesee St., has been visiting New York.

The Standard Mirror Co. will erect a brick factory on Milton St.

The Freedman Jewelry Co. will remove from Main St. to Genesee St.

George Engel, Springville, and R. S. Bush, Coudersport, Pa., were among the jewelers who recently visited the Buffalo market.

G. J. Champlin, secretary and treasurer of the Simcox Optical Co., is among those who recently bought real estate on Woodbridge Ave.

According to a recent report from Smethport, Pa., the Smethport Cut Glass plant was recently sold at sheriff's sale. It is reported that Attorney F. D. Gallup bid in the property for $4,500.

E. A. Eisle recently attended a meeting of the wholesale merchants' board of the Chamber of Commerce and Manufacturers' Club. The members are planning a trade excursion to points near Buffalo.

L. Zimmer has opened a jewelry store at 2138 Seneca St. The proprietor learned the business under the supervision of his uncle, the late George E. Crandall, Springfield, one of the pioneer jewelers of that section. Mr. Zimmer's store and stock present a neat appearance.

The citizens of Ithaca will place in the Federal building being erected there a tablet commemorating the services of Daniel Tompkins, one-time Governor of New York, Vice-President of the United States and otherwise distinguished in the early history of the State and country.

Mrs. Pauline Kuster, whose jewelry store is at 1 E. Genesee St., has been on the sick list for several weeks. Joseph Kuster, her son, who also was ill for several weeks, has returned to the store. This establishment has been in business upward of 40 years. Until her last illness she was able to wait on the trade, and despite her advanced age was noted for her activity.

Frank Jones, charged with having stolen several hundred dollars' worth of diamonds from Frisch Bros.' jewelry store, appeared before Judge Taylor in County Court Friday. Jones pleaded guilty to criminally receiving stolen property, and was sent to Auburn prison for four years and three months. He has been convicted a number of times. When asked if there was any reason why sentence should not be imposed upon him he said: "Judge, I have never been given a chance to be anything. Give me a show and I will make a home for myself and my aged mother." The judge did not have much faith in his promise.

The Buffalo Credit Men's Association, to which some of the local jewelry jobbers and manufacturers belong, was addressed Thursday evening by Harry W. Crabbe, Cleveland. The speaker explained the workings of the adjustment bureau, which has for its objects the staving off of bankruptcy and the saving of money for creditor and debtor by handling the claims of members. He said the bureau could be made more important if its scope were widened by placing it under national control.

Among the travelers who recently visited Buffalo jewelers were: E. C. Weidlich, Weidlich Bros. Mfg. Co.; Arthur Bradshaw, International Silver Co.; S. C. Corbin, Waterbury Clock Co.; Maurice Kohn, Silbermann, Kohn & Wallenstein; S. Glenn Walmsley, Hermann Baum; John P. King, Watrous Mfg. Co.; John Von Holt, W. H. Terhune; C. L. Krugler, Jr., Larter & Sons; William B. Tilton, D. C. Percival & Co., Inc.; W. G. Moland, Sansbury & Nellis; C. Glander, J. D. Dalzell & Co.; C. E. Mott, J. B. Bowden & Co.; H. A. Bliss, Wordley, Allsopp & Bliss Co.; Mark Perl, Wagner Comb Mfg. Co.; J. E. Simonson, Ludwig Nissen & Co.; Ralph B. Brahe, F. H. Cutler & Co.; Henry C. Maybaum, Charles Adler's Sons; W. A. Berth, William B. Durgin Co.; J. Leffey, Gorham Co.; J. N. Beckwith, Frederick B. Weiss, Inc.; Alex. Fraser, Rochester Cut Glass Co.; A. E. La Vigne, Mathey Bros., Mathez & Co.; F. Juengling, Sessions Clock Co. and Theo. L. Parker.

Toledo.

A. B. Klownski, pawnbroker on State St., gave a burglar a warm reception one morning last week. Klownski had been missing numerous things from his barn and was led to believe that on a certain night the thieves would probably come to finish their job. Arming himself with a monkey wrench, he waited inside the door and after a two hours' vigil two men stepped into the barn. Klownski floored the first one, who gave his name as Charles Degan, but the second escaped. Upon preliminary hearing he was bound over to the grand jury and Klownski believes he has caught one of the men who has been raiding his pawn shop at almost regular intervals.

Andrew Fisher, aged 60 years, and a jeweler at Blissfield, a village near here, committed suicide March 12 by blowing out his brains with an old-fashioned horse pistol, death resulting almost instantly. The deed was committed shortly after dinner, in the cellar, where it appears he had already arranged every detail for the affair. For the greater portion of his life he has been an expert jewelry repairer, but some few years ago engaged in the retail jewelry business, associating himself with Delos Dupue, also of Blissfield. Dupue died last July, willing the entire business to Fisher. Litigation resulted on account of Dupue's heirs desiring to break his will and regain their portion of the business. This seemed to weigh on Fisher's mind until he became a victim of melancholia. A widow and two grown daughters survive him.

was received in this city, last week,
Harrison W. Hicks, Alexandria, Ind.,
has offered creditors a settlement on the basis of 50 cents on the dollar. He began business in Franklin in 1896, and four years later came to Alexandria and, with J. L. Hannabery, formed the firm of Hicks & Hannebery, who succeeded to the business of G. M. Boetcher. The partnership dissolved in 1901 and Mr. Hicks continued alone. At one time he had a branch store at Summitville, which he later discontinued. After meeting with financial reverses, four years ago, Mr. Hicks settled with his creditors on a basis of 30 per cent.

Cincinnati.

E. Albert, of Albert Bros., is serving as a petit juror this week.

"Joe" Henochsberg is now arranging his annual business trip among the Western States.

John A. Herschede, of the Herschede Hall Clock Co., has just left on a two weeks' business trip.

Joseph Posner, of Lindenberg, Strauss & Co., has resumed business after 10 days in the hospital.

Gilbert Wallenstein, of Wallenstein, Mayer & Co., leaves, this week, on a trip through Kentucky.

A. G. Schwab and Julian G. Schwab, of A. G. Schwab & Sons, are in the East for a week on business.

N. A. Francis, a retired watchmaker, has opened a retail jewelry store and repairing shop very recently at 3932 Eastern Ave.

W. H. Modreck, traveling representative of the Klein Bros. Co., is at his home in Ft. Wayne, Ind., seriously ill with typhoid fever.

Ferd. Phillips, of Richter & Phillips, accompanied by his wife, is making a business tour in Alabama. C. E. Kendal, of this house, is home from a two months' trip.

William W. Becker, Newport, Ky., an optician for Joseph Kenkel, Main St., succeeds the late M. J. Doyle as member of the Newport Council, having received a unanimous vote.

The Frank Herschede Co. has filed objections to the discharge from bankruptcy of Albert Harry Feltman, who formerly carried on a retail jewelry business in the Boylan building, on E. 4th St.

Arthur C. Jacobs, of the D. Jacobs Sons' Co., is convalescent from a four weeks' illness, and will be on the road again in about two weeks. Julius D. Jacobs, president of this company, leaves, this week, for business in Indiana.

Harry Gilsey, of S. & H. Gilsey, is at Hot Springs, Ark., with the "Reds," now training there. He is trying to induce Manager Griffith of the "Reds" to allow him to use his surplus players for the Harry Gilsey Shamrock Club, the strongest semi-professional ball club in this country.

Out-of-town jewelers here the past week buying stock included: Albert R. Baldwin, Winchester, Ky.; Herman A. Rohs, Cynthiana, Ky.; R. D. Washington, Russell, Ky.; Victor Bogert, Lexington, Ky.; Fred G. Wittlinger, J. Happenberger, Jr., and Casper Fenzel, Middletown, O.; J. Gluck, Charleston, W. Va.; H. C. McCormick, Erwin, Tenn.; E. Israel and son, Harrison, O.; Robert Cloxton, Poca, W. Va., and H. C. Reed, Blanchester, O.

Gebhardt Bros. are now located in their new and commodious quarters on the 12th floor of the new Merchants' building, at 6th and College Sts. They have leased these quarters for a term of 10 years at a rental of \$2,100 per annum and feel now they have all the facilities necessary to carry on their rapidly increasing business. V. A. Gebhardt, of this firm, is now in New York on business. The Merchants' building is fast becoming a jewelers' center. Albert Bros. will be the next occupants, and they expect to move about June. There are prospects of several more in the trade engaging quarters in this building.

The Dueber Watch Case Co., in order to avoid any danger of their suit against the Keystone and other watch case and watch concerns from being thrown out of court on a technicality in the return of the marshal in his service of summons in this case, obtained leave from the United States District Court here to amend these said returns, and this was done Friday, March 11. Through the alleged inter-relation of the defendant companies there was some confusion as to the service of the papers in the case, as H. C. Walton, former agent here for the Keystone Watch Case Co. was about to be served when he stated he was not then in the service of the company. Then J. Charles Becker, local agent for the Philadelphia Watch Case Co., was served. Upon affidavits of Charles F. Williams, representing the Attorney-General of the State of Ohio, and the deputy marshals serving the papers, the court allowed the amendment of the returns. Charles F. Williams also filed an affidavit stating that at the request of the Attorney-General he notified J. Charles Becker, local agent for the Keystone Watch Case Co., that the defendant watch concerns could not do business in this State without registering according to law. Blanks were furnished Becker, as local agent and manager, but he has not made a return on them as yet, as he says he has sent them to the home office to have them filled out.

Traveling representatives who called on the Cincinnati, O., trade during the past week included: Joe Rifkin, L. Heller & Son; Norbert Gunzberger, L. & M. Kahn & Co.; Max H. Loebritz, Dueber-Hampden Watch Works; E. S. Fishback, Hamilton Watch Co.; Max G. Cohn, Max G. Cohn & Co.; A. Fox, A. L. Lindroth Co.; William Helman, M. F. Williams & Co.; Mr. Sanfelder, M. W. Carr & Co.; Mr. Buffum, J. A. & S. W. Granbery; Charles P. Crane, Bliss Bros. Co.; H. C. Wilson, Crescent Watch Case Works; W. R. Shute, Day, Clark & Co.; J. C. Bigalke, Bigalke & Eckert Co.; William Hohne, B. A. Ballou & Co., Inc.; Elmer S. Smith, Walter E. Hayward Co.; Charles H. Clark, W. G. Clark & Co.; E. D. Wetton, C. Dortlinger & Sons; B. M. Henschel, Standard Jewelry Case Co.; W. T. Sherman, S. K. Merrill Co.; J. F. Fradley, J. F. Fradley & Co.; Frederick C. Kopf, Powers & Mayer; Henry C. Maybaum, Charles Adler's Sons; Mr. Thomas, H. P. Sinclair & Co.; A. Thanhauser, Wolfsheim & Sachs; John Marsh, Edmond E. Robert; Albert E. Motteram, Frank M. Whiting & Co.; Mr. Curran, A. J. Hedges & Co.; C. H. Davison, Kohn & Co.; A. N. Dorchester, Chapin & Hollister Co.; H. R. Blackman, Enos Richardson & Co., Thomas E. Rogers, Riker Bros.

We supply our product to a limited number of the best wholesale watch houses in the country. They push the sale of Illinois movements — not because of the superior quality alone — but because of the established selling prices, which insure a satisfactory profit to them as well as to their customers.

Vol. LX. CHICAGO, WEDNESDAY, MARCH 16, 1910. No. 7.

Chicago Notes.

George Weidig visited St. Louis last

Harry C. Ulmer, with the Kryptok Sales Co., was here last week.

C. Rochr is at French Lick Springs, accompanied by Mrs. Roehr.

C. Rose, formerly of Telluride, Colo., is taking a course in optics

G. V. Cureton, of the Newall Mfg. Co., visited from the coast last week.

C. Shourds and his wife are spending winter in southern California.

Chas Singleton, of Adams & Singleton, Mass., was here last week.

W. E. Hunter, a retail jeweler at 710 E. 63rd t., is holding an auction sale.

C. F. Washburn, with Wm. A. Rogers, has returned from a western trip.

Adolax Holzheimer has taken temporary rooms in room 711 Heyworth building.

Miss Anna Gordon, stenographer, has moved to room 1313, Heyworth building.

H. V. Matalene, New York, stopped here last week on his way to the Pacific coast.

Adolph Frisch, pawn broker, is offering creditors a settlement of 20 cents on the

Walter M. Jaccard, Kansas City, Mo., passed through Chicago last week on his way east.

W. S. Miller, of the Seth Thomas Clock Co., in southern California, accompanied by Mrs. Miller.

Walter Manes, with Ignaz Strauss & Co., stopped over in Chicago last week on his way to the Pacific coast.

Mr. Goldberger, of S. Buehsbaum & Co., is spending 10 days at West Baden, accompanied by his family.

The family of O. C. Wagner, who is with the Alexander Loan Co., was recently increased by the advent of a baby boy.

W. B. Barton, of the Ostby & Barton Co., was here last week. Roy King, traveler for this concern, is in the northwest.

Geo. Cummins, jewelry buyer for the Hirt Co., Omaha, Nebr., stopped over here last week on his way home from the east.

A meeting of the Chicago Jewelers' Association was held last Tuesday evening at the Congregational rooms. Routine business was transacted.

Harold Beckingham, formerly silverware, clock and novelty buyer for Pitkin & Brooks, is now with Geo. Borgfeldt & Co., New York.

P. G. Noyes, general manager for the Oneida Community, Ltd., stopped over in this city last week on his way from the Pacific coast.

The name of the manufacturing jewelry firm of W. M. Imhof has been changed to Imhof & Bambakaris, the new member being G. Bambakaris.

Among the diamond men here last week were Fred Mayer, Bruhl Bros. & Henius Co.; B. Hyman, J. Groen, Cy Pickering, Wm. J. McQuillan, Mount & Woodhull.

A farewell dinner was given to M. H. Berg by Messrs. Harry S. and E. S. Heyman at the Standard Club last week. Mr. Berg and family will sail for Europe on March 26.

Sandy MacPherson, of the MacPherson, Robaud Co., gave a farewell bachelor dinner at Rector's one night last week to a select party of his friends. Mr. MacPherson will be married in April.

H. P. Juergens, of the Juergens & Andersen Co., is on a pleasure trip, accompanied by his wife, which includes a visit to New York, Cuba and Old Mexico. Mr. and Mrs. Juergens will be absent a month.

L. H. Dodd & Co., jewelry auctioneers, are holding a closing out sale for Wood Bros., Paris, Ill., and will soon hold a sale for Willis H. Booth, Sioux Falls, S. Dak.

A. J. Rinkenberger, with the A. C. Becker Co., and C. T. Gustafson, with the C. H. Knights-Thearle Co., were the jewelers selected to appraise the stock of Lapp & Flershem.

Claud Wheeler, secretary of the A. N. R. J. A., stopped over here last week on his way home from Detroit, where he went to perfect arrangements for the fifth annual convention of the National Association.

A. E. Motteram, southern traveler for F. M. Whiting & Co., was here last week to meet Fred Howard, president of that corporation, who stopped over in this city on his way home from the Pacific coast.

A possible solution of a long series of window smashings may be found in the arrest here, last week, of Patrick Smith, who was caught trying to break the window of the Alexander Loan Co. with a padded brick.

R. H. Millhouse, formerly with C. D. McIlvain, Red Oak, Ia., was here last week, and announced his intention of soon opening a retail jewelry store in Colorado, but in what city in that State Mr. Hillhouse would not say.

The firm of Maas, Hirschberg & Diamond, Sterling, Ill., has been changed to Maas, Oppenheim & Diamond, J. H. Hirschberg retiring. The new partner, S. Oppenheim, was formerly with M. A. Eiseman & Bro. The concern will soon remove from Sterling, Ill., to 234 Fifth Ave., this city, where they will occupy the second floor.

Walter C. Ford and his wife are defendants in a suit for $10,000 damages for false arrest, filed by Mrs. Annie Sider, wife of J. M. Sider, pawnbroker at 2916 State St. Mrs. Sider and her husband were indicted on a charge of receiving stolen property because a sealskin coat stolen from the Ford home was found in their possession. They were acquitted of the charge and the suit resulted.

John S. Townsend, retail jeweler at 1554 Wabash Ave., is in the first ward aldermanic race against John Coughlin, otherwise known as the "Bathouse." Mr. Townsend thinks the psychological moment has arrived for the overthrow of Coughlin and is not seeking the office for any political reasons, but wants to be a member of the City Council as a business man who believes that many municipal conditions that now exist should be changed.

Among the buyers here, last week, were: W. R. Mullins, Grinnell, Ia.; August H. Hinrichs, Clinton, Ia.; C. D. McElvain, Red Oak, Ia.; Walter Mellor, Michigan City, Ind.; W. Volkman, Kankakee, Ill.; R. Nicoll, Kenosha, Wis.; C. A. McGregor, Pontiac, Ill.; J. J. Beale, Rockford, Ill.; D. D. Sullivan, Fargo, N. Dak.; Mr. Barrett, Freeport, Ill.; Wm. E. Kelly, Galeton, Pa.; Mr. Kinuse, Jr., Dubuque, Ia.; Mr. Tomeraasen, Jr., Caledonia, Minn.; J. W. Zangl, Spring Green, Wis.; Geo. Durner, Jr., and Joseph Goldman, Milwaukee, Wis.

Three employes of the Elgin National Watch Co. were arrested, last week, charged with the theft of gold leaf. The suspects have all been released on bail. They are Maj. Lucius A. Hooey, a Civil War veteran, 61 years of age, Edward Jones and Charles Ward. All of the accused men received good pay and are in good circumstances. Superintendent George E. Hunter suspected the men, and wrung a confession from Ward. The other two also confessed. Jones and Ward were employed in the gilding department, and are accused of stealing some of the gold leaf entrusted to them, which they subsequently melted down and gave to Hooey to dispose of, he being the

Chicago & Elgin messenger. The gold was sold to a Chicago pawnbroker, whose records show he had made seven purchases, aggregating $1,500.

Charles Rosenthal, Paul M. Korshak and Jay Harris were arrested here, last week, at the Saratoga Hotel, and in their arrest the police believe they have solved the mystery of many eastern diamond robberies. Rosenthal—who, the police say, is an ex-convict—was trying to dispose of some diamonds to Korshak and Harris. Korshak is known here as a small diamond dealer and Harris is his brother-in-law. When arrested Korshak had six diamonds in his possession said to have been bought from Rosenthal, and the latter had 25 diamonds with him, many of them weighing more than two carats. Rosenthal also had nine $100 bills in his pockets. From keys in Rosenthal's possession three safety deposit boxes were opened here Saturday, and the amount of loot taken from them will run into the hundreds of thousands of dollars. Two keys belonging to New York safe deposit boxes were also found, and the police think a lot of valuable jewelry will be found in that city.

Columbus, O.

Will H. Matthews, formerly a watchmaker here, who went to the Waltham factory to work, has returned to Columbus and opened a small establishment in the McCune building.

Ruth Schreiber, a 16-year-old girl, was arrested Friday for stealing cheap jewelry from the jewelry departments of department stores. She was sent to a corrective convent by the Juvenile Court.

Several Columbus opticians and jewelers have been invited to attend the meeting of the West Virginia State Optical Association and the West Virginia State Jewelers' Association, to be held at Wheeling, W. Va., April 5, 6 and 7.

Nearly all of Columbus' jewelers are participating this week in a Spring opening by all the merchants of the city, a project of the Chamber of Congress to stimulate trade among Columbus people and to attract it from nearby cities.

Harry J. Heimberger, 281 S. High St., recently made what is said to be the largest single jewelry sale in Columbus. It was an elaborate necklace made by Gebhardt Bros., Cincinnati, and containing 125 full cut diamonds, the weight of which is 32 carats.

The Hofman Jewelry Co. is in the hands of a creditors' committee, there to remain until July 15, 1912, as a result of a meeting held at New York recently. By the terms of agreement all creditors will be paid in full all claims of less than $100, to be paid at once, while those with claims more than that sum will receive instalments, the last 25 per cent. to be paid July 15, 1912. The Hofman Co. lost heavily by the fire which it had two or three years ago, but has been able to keep above water until now. The company has the largest jewelry store in Columbus. It has both retail and wholesale departments and also conducts an optical department.

Samuel Wilhoit, Forney, Tex., recently sustained a heavy loss by fire.

Kansas City.

J. H. Williams, Miltonvale, Kans., has moved to Courtland, Kans.

Sam Bloom, traveler for the Meyer Jewelry Co., was in the house last week.

G. T. Malloy, formerly in the jewelry business in Chilhowee, Mo., is now located in Honey Grove, Tex.

J. R. Mercer and wife left last week for a pleasure and fishing trip to Lake Charles, La., and will be away until April 1.

G. V. Dickinson, general sales manager of the Elgin National Watch Co., has been a visitor to this city during the past week.

W. C. Schumann, traveler for the C. B. Norton Jewelry Co., was in the house last week replenishing his trunks.

Lee Tully, with the Edwards & Sloane Jewelry Co., is taking a vacation and is visiting Wesley Smith, De Witt, Mo. Mr. Smith was a former employe of the same company. Miss Anna Huth, with this same company, is also taking a two weeks' vacation.

The following traveling salesmen called on the trade in Kansas City, Mo., during the past week: Joe Frank, Sussfeld, Lorsch & Co.; Emil Pick, Hammel, Riglander & Co.; R. L. Clark, International Silver Co.; K. Lucius Taylor, Riley & French; James O. Otis, Harvey & Otis.

The following jewelers from the surrounding country have been in the market during the past week: D. C. Clark, Lockwood, Mo.; H. P. Hall, Carthage, Mo.; E. B. Vanness, Mound City, Kans.; W. R. Pearce, Gardner, Kans.; Geo. Sells Davis, Newton, Ia.; F. G. Buchan, Aurora, Nebr., and B. W. Lubman, Chickasha, Okla.

L. Meyer, of the Meyer Jewelry Co., has been working on one of the committees of the Kansas City Missouri Navigation Co., which is taking stock subscriptions for a boat line on the river, the capital stock of which is $1,000,000. At the same time Chas. Hoefer, Geo. H. Edwards and C. L. Merry compose a committee which is calling on the jewelry and optical lines in the interest of the same company, which, when established, will mean much in the matter of freight saving to the people in this trade territory.

Pacific Coast Notes.

George Hood, Santa Rosa, Cal., is home again from San Francisco, where he went to have a serious operation performed.

Bandini Dear, who has been with an Alhambra (Cal.) firm for some time, has accepted a position in the manufacturing department of Brock & Feagans, Los Angeles.

Peter Engel, Marysville, has leased a store in the Peri block, at that place, and will move from his present location as soon as the new building now in course of construction is completed. He intends fitting up one of the finest establishments in northern California.

J. F. Reed, 1142 3d St., Santa Monica, Cal., has left for a short eastern visit, making his trip by way of San Francisco and Denver. He will be gone for about six weeks and upon his return will bring his wife and child with him from Kansas. During his absence the store at Santa Monica will be in charge of W. Lady.

P. H. Wilson, Venice, Cal., has just ed a fine clock in front of his establis on Pier Ave. The timepiece cost $7 was made by the E. Howard Clock C Wilson is making several other imp improvements in his store, including stallation of a regulator clock worth $

What is alleged to have been a destroy an entire business block at Valley, Cal., in order to conceal evi of robbery has been discovered sheriff. While E. Moe, a pawn that place, was out of town, his p business was entered and goods va $2,000 were taken. The place w fired. The flames were extinguished much damage had been done.

Milwaukee.

John M. Heaney, Berlin, ha the agency for the Hamilton wa

S. Martin, auctioneer, of thi a sale for T. L. Combs, Om this week.

E. J. Marcouiller, Oconto Fal has purchased a new building and moving his stock into attractive ne ters.

John Armbruster, Cedarburg, nishing some neat stick pins to m of the local fire department wh served 25 years or more.

M. J. Nelson, Washburn, Wis., h several improvements in his establ of late, including the installation of steel ceiling and the addition of ne

E. H. Warnke, president and manager of E. H. Warnke & Co facturing jewelers, is rapidly pr with the erection of his new $8,0 dence.

Among the visitors here, last were: the junior member of the A. Wiggenhorn & Son, Water mund Hoffman, Jefferson; John A ter, Cedarburg; F. P. Beswick, R

David Goldman will soon be in of installing a new basement depart his downtown store, in the Caswing. The china, cut glass, ar stationery departments will be in the new quarters.

Milwaukee wholesale jewelers ha notified of the fact that th Jewelry Co., Spooner, Wis., ha to G. F. Plummer. Mr. Plumm formerly engaged in the jewelry at Shell Lake, Wis.

Jewelers about the State are in a controversy started at M Wis., by tailors and other who are making war upon th "suit clubs," organized for the pu purchasing suits and jewelry on h instalment plan. The stand is taken that the weekly distribution goods is a lottery scheme and is being waged on this ground. It ported that nine suit clubs were organized at Manitowoc, mem chasing a suit of clothes or a of jewelry, then dropping out of ship. Advocates of the scheme are ing the club scheme on the grou is simply transacting busine instalment plan.

krupt stock of watches, clocks,
etc., of the M. Levy Jewelry Co. was sold at auction, Thursday, at the former place of business of the bankrupt, 205 N. 7th St., by Chase Morsey, receiver in bankruptcy. The fixtures, counters and shelving were also sold. Application for an involuntary bankruptcy was made by several of Levy's creditors in February, and there was a temporary adjustment, but Levy was later adjudicated a bankrupt.

Among the out-of-town jewelers in St. Louis, making purchases during the past week, were: H. B. Hall, Carthage, Mo.; C. H. Weinstock, Centralia, Ill.; I. Lowe, Monroe, La.; B. J. Yoch, Belleville, Ill.; F. H. Kassel, Cape Girardeau, Mo.; H. Vollmer, Princeton, Ind.; F. J. Krug, of the Krug-White Jewelry Co, Staunton, Ill.; W. H. Jahn, Pacific, Mo.; B. H. Barnes, Desoto, Mo.; E. E. Lawrence, Doniphan, Mo.; E. E. Laughlin, Charleston, Mo.

Fire which started in the Avenue Theater, East St. Louis, Sunday night, destroyed the building occupied by the defunct jewelry firm of Vahlman & Jacobs, on Collinsville Ave. The stock had been sold at auction to H. U. Wheeler, and was disposed for him by Dan G. Golding. A large part of the stock was in the safes and was not greatly damaged. The loss and insurance have not been computed.

The Hess & Culbertson Jewelry Co., represented by its secretary, Samuel E. Bamber, is a member of the newest St. Louis business and civic club, the Rotary Club. The rules of the club admit of only one member representing the same line of business. The Hess & Culbertson Co. will therefore be the only jewelry firm represented. Members of the club pledge themselves to prefer each other in business dealings. The St. Louis club is patterned after similar organizations in Chicago and other cities.

The East St. Louis Jewelers' Association will attend the next meeting of the Retail Jewelers' Association of St. Louis, to be held the last Thursday in March at the American Hotel. There are some questions attracting the retailers of both cities against which it is intended to take common action. One cause of complaint on the part of the East St. Louis retailers is the peddling of watches and other jewelry in the railroad yards of East St. Louis. An inquiry will be set on foot to find out where the goods are obtained. C. G. Derleth is president of the East St. Louis organization.

Among the traveling representatives in St. Louis during the past week were: D. Riddell, Adolph Strauss & Co.; Mr. Finberg, Finberg Mfg. Co.; William F. McGown, F. T. Pearce Co.; Mr. Vaslett, Fletcher-Burrows Co.; J. Walter Boyden, Ostby & Barton Co.; Donald LeStage, H. D. Merritt Co.; L. H. Smith, Bippart, Griscom & Osborn; Mr. Curran, A. J. Hedges & Co.; J. P. Fagan, Unger Bros.; Zach A. Oppenheimer; R. M. Sawyer, Shafer & Douglas; A. J. Casse, John R. Keim; L. D. Macpherson, Macpherson-Roubaud Co.; G. A. Jewett, Hamilton & Hamilton, Jr.; Joe Frank, Sussfeld, Lorsch & Co.

W. M. Reed, who formerly carried on a jewelry business in the store occupied by F. L. Gaines, has purchased a larger establishment in Montpelier, Vt.

Detroit.

Carl F. Bay, Milan, called on the wholesalers last week and replenished his stock.

Eugene Wagner, of A. Wagner & Bro., Monroe, was in town last week looking up novelties for the Spring trade.

J. H. Garlick, who for years has occupied a stand on Griswold St., opposite city hall, will remove during the coming Summer to a better location on the same street farther uptown.

In the window of Wright, Kay & Co. last week has been exhibited a handsome silver cup, which was presented to J. L. Hudson by his colleagues who served as jurors in the circuit court.

J. A. Johnston, formerly watchmaker with Ed. J. LeHeup, has purchased the business of F. L. Grant, Marion, Mich. Mr. Grant will remove his stock to Leesville, a suburb of Detroit. Mr. Johnston will put in an entirely new stock.

Among the visitors in town during the past week were E. H. Cressy, Saline; Ward Switzer, Mt. Clemens; Frank Presswell, Holly; O. F. Kleckner, Milan; M. L. Green, Mt. Clemens; H. J. Boyd, Onstead, and W. W. Bridges, Marine City.

F. C. Oakes, formerly with W. B. Murray, East Tawas, Mich., has opened a new store on Onaway, Mich. He was in Detroit last week purchasing his stock from the local wholesalers. He will fit up one of the finest places in northern Michigan.

Detroit has entertained the American Bowlers' Congress during the past two weeks, and several large orders for silver cups and medals were filled by local firms. These prizes were displayed in different downtown stores and were much admired.

Monday afternoon of last week was "Jewelers' Day" among the ice boaters at Kramers, on Grosse Pointe bay, and several handsome prizes were donated by local firms. For Class A Charles W. Warren & Co. gave a handsome cup. Prizes for Classes B an C were given by Fred Bender, of the Detroit Jewelry Mfg. Co. and F. Rolshoven & Co.

Detroit wholesalers complain of an unusual dulness in the trade recently, and the novel idea was advanced by one of the largest dealers in Detroit that the automobile is to blame for this condition. "The automobile craze is at its height just now," he said, "and when people are buying autos they have no money for diamonds or other jewelry. Detroit manufactures more autos than any city in the world, and while it has brought a great volume of business to the city, it has also started people in every walk of life buying machines. Autos are no longer bought by the very wealthy people, but by people of limited means, who have to sacrifice in order to make the payments. Naturally they cut out the luxuries and things they can get along without, and the jeweler feels the retrenchment first.

Dr. Richard Burrill, giving his address as Vancouver, B. C., was recently taken into custody at Blaine, Wash., on a charge of smuggling pearls. He was held in $4,000 bonds for trial. He had in his possession when arrested five unset pearls, valued at $3,000.

San Francisco.

G. Heitkemper and Henry Kahn, Portland, Ore., were here a short time ago.

C. Montgomery, Los Angeles, Cal., was in San Francisco, last week, on business.

John S. Jepson, a well known New York traveling man is visiting the San Francisco trade.

A. B. Frenzel, a connoisseur of precious stones, is in this city from a trip to Mexico.

David Schwab, of Davidson & Schwab, New York, was here a short time ago with his firm's line.

William F. Marshall, with the Burr W. Freer Co., is now out on the road and is covering the southern part of the State.

James Elston has gone out on the road for Elston Bros., this being his first out of town trip. Formerly he was a city salesman for George Greensweig & Co.

Howard Dobrowsky, Anderson, Cal., was here a few days ago with his wife and, in addition to laying in a large stock of jewelry, purchased an automobile.

The Fano Jewelry Palace, O'Farrell and Fillmore Sts., is offering for sale its safe, wall and show cases, benches and tools, preparatory to retiring from business.

J. C. Blythe, formerly coast representative of Joseph Fahys & Co., is now well settled in his new position as manager of the wholesale house of George Greenzweig & Co.

H. H. Wiendieck, Red Bluff, Cal., was in San Francisco last week accompanied by his wife, and announced that he was starting on a trip around the world that was to last a year.

George Holden, who represents Joseph Fahys & Co. and the Alvin Mfg. Co., was recently in Los Angeles and the southern section of the State, where he did a good business with these lines.

Lichtenstein & Morris, of this city, have purchased the jewelry stock of Elwood & Burnett, Medford, Ore., and will shortly hold an auction sale there to dispose of this stock, as well as that of the bankrupt firm of J. Eller.

The local trade is welcoming home Al Eisenberg, who has been absent for some months in Europe purchasing diamonds for his firm. He brought home one of the finest collections of gems ever brought here by a local buyer.

Glass & Pels, who have been located for some time in the Kamm building, 717 Market St., have been compelled by necessity to secure more room and have moved to the fifth floor, where elegant offices and show rooms have been fitted up for them.

The alterations in the office of the R. & L. Myers Co. have been completed, and that firm is now in possession of a first-class office and display room. Robert Myers, who recently returned from a trip to the northern coast of California, is again out on the road.

The wholesale jewelers of San Francisco have decided to close their places of business on Saturday afternoons during the quiet season of the year and this rule was put into effect March 5, to be effective during the months of March, April, May, June and July. The busy season of the year will then commence in earnest.

Among the visitors in San Francisco during the past week was J. E. Ziegler, of Ziegler & Ziegler, Stockton, Cal. In spite of the fact that this firm is located in an interior city of comparatively small size it has managed to secure a great deal of work from California retailers in the San Joaquin and Sacramento valleys.

The local police, who at one time were working on the case, are interested in the capture, at Montreal, of Horace Greely Robinson, a swindler who operated here about a year ago. The specific charge upon which Robinson was arrested is that of obtaining more than $1,000 from H. S. Bock, a jeweler of San Jose, who purchased spurious wireless telegraph stock from him.

Several local jewelers have been receiving notices during the past week that they are rendering themselves liable to prosecution by making bangles, pins and other ornaments of United States coins. The making of souvenirs of this character has assumed considerable proportions here, but it has never before been necessary to call attention to the practice of using coins for this purpose. The reason given for the ruling is that coins are partly mutilated, often being smoothed off on one side and thus lightened in weight, and at times these are again placed in circulation. If the coins are so handled that their identity is entirely destroyed there is no objection to their use, and gold coins are often used in the melting pot. There have been no arrests made here on account of the mutilation of coins, but a close watch is being kept on some concerns that have been engaged in this business.

Canada Notes.

George Radford has purchased the business of Bertram Myers, at Carlyle, Sask.

C. G. Schulze, Halifax, N. S., has assigned to G. E. Faulkner, the official assignee.

E. N. Harper & Co., Calgary, Alba., have admitted H. D. Powers to partnership, the style of the firm being changed to Harper, Powers & Co.

Walter J. Barr, president of the Goldsmiths' Stock Co., Toronto, Ont., has gone to New York and eastern jewelry markets on a buying trip.

George S. Bedient, with the Rogers Silver Plate Co., Danbury, Conn., and George Brabander, manufacturers' agent, Montreal, were in Toronto, Ont., last week.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included: T. Binkley, Hamilton; J. S. Barnard, London; T. W. Poile, Chatham; W. S. Frost, Orillia, and Joseph Park, Bradford, all Ontario.

The assignment of Henry E. Prince, Dulton, Ont., it is understood, will mean an absolute closing up of this business. The assets, it is reported, will pay about 25 cents on the dollar. Mr. Prince has been in business since 1889 and came to Dulton from Port Henry.

William Eaves, wholesale jeweler, is moving to 107 Notre Dame St. W., Montreal, and he is already putting stock into his new premises, but he states that he does not expect to open for business until the beginning of April. In the meantime he has possession of his old premises, a little further east on the same street, until May 1.

Los Angeles.

A. Silberberg, of El Paso, Tex., i ing some time here.

S. D. Seamans, of the Donavan mans Co., has returned to his home rora, Ill.

has sold his business to Walter G.

J. R. White Co., of this city, was
corporated to deal in watches,
d jewelry, etc., with a capital of
Among the incorporators are:
R. White, J. Edward Marshall and
P. White, all of Rochester.

The new retail jewelry store of Bastian Bros. Co., 211 Main St., E., in the Whitcomb House Block, is rapidly nearing completion and announcement of its opening will be made at an early date. This will be one of the finest jewelry stores of its kind in this section of the State.

Raymond Krumbein, 17 years old, was recently convicted in the County Court on charges of burglary in the third degree and grand larceny in the second degree. He was accused of stealing $250 worth of property from the jewelry store of Geo. Popp, on Ames St., Jan. 12. Another boy named McMullen, who was indicted for the same robbery, pleaded guilty and was a witness against Krumbein.

Pacific Northwest.

William Pauley, Gold Hill, Ore., has just moved into a new store at that place.

F. K. Gettins has been appointed trustee of the Carleton Jewelry Co., Marshfield, Ore., which recently went into bankruptcy.

The store of Ludwig & Collins, Bellingham, Wash., was menaced by fire, recently. Smoke penetrated the place, but only a small amount of damage was done.

John H. Carr, Portland, Ore., who has been in business in that city for about a year, has turned over his assets to H. S. Butterfield as trustee for his creditors. Mr. Carr was formerly employed by the Elgin Watch Co. before he started in business in Portland.

The auction of Curtis & Co.'s stock, at Grant's Pass, Ore., has been stopped on account of the illness of the auctioneer, E. H. De Selms, San Jose, who has been compelled to leave for his home at San Jose, Cal. The goods are being sold at private sale, as Mr. Curtis is very anxious to retire from business at the earliest possible moment.

The front window in the Tacoma Jewelry Co.'s store at Tacoma, Wash., was smashed with a brick, recently, by a man giving the name of G. Taylor, and goods of small value were stolen. Advantage was taken of a time in the early morning when the noise of street cars would drown the sound of breaking glass, but the thief was discovered in the act and arrested.

Bogus auction sales in the North End, Portland, Ore., where legitimate auctions are purported to be held, received a scathing denunciation from one of the judges of that city, recently, when five men were brought before him charged with vagrancy. It was shown that the men were "cappers" for two well-known bogus auction houses, and that they had been guilty of several questionable transactions. The five were sentenced to 30 days in the county jail.

The Executive Committee of the Oregon Retail Jewelers' Association met in Portland, recently, and arranged for the annual convention that is to be held in that city, May 10 and 11. The committee which met in Portland consists of the president of the association, F. M. French, Albany, Ore.; Thomas Howard, Marshfield; I. E. Staples, Portland; H. M. Leffert, Portland; C. H. Williams, Condon; E. J. Jaeger, L. W. Brems, J. O. Watts, O. A. Kramer, Portland.

Minneapolis.

A. G. Feinberg, Brownton, Minn., formerly in business in this city, was a visitor recently.

Harry F. Legg and Arthur E. Paegel, both well-known retail dealers of Minneapolis, are members of the present grand jury.

Ludwig Holmes, casemaker for Ludwig Schwarz, has announced his engagement to Miss Olive Ford, of this city. They are to be married in September.

Traveling representatives of wholesale jewelers who called on the local trade during the past week were: Mark Franklin, Goldsmith Jewelry Co.; and a representative of the Farrington Mfg. Co.

The Thomas F. Wilson Jewelry Co. has leased a large store room near the center of the upper Nicollet Ave. shopping district and will move from its present location at 238 to 903 Nicollet Ave., April 1.

Among the out-of-town jewelers who called on the local trade, last week, were W. T. Pierce, Beardsley, Minn.; H. P. Marx, Shakopee, Minn.; Mrs. F. F. Williams, Waterville, Minn., and Gust Werner, South Haven, Minn.

Local jobbers have received word of the bankruptcy of Veilleux Bros., Wahpeton, N. Dak. The schedule of the firm shows assets of $2,769, with exemptions of $1,000 claimed, and liabilities of $3,196. Each member of the firm also files individual statements of assets and liabilities.

David J. Willis, formerly in the employ of M. L. Cohen & Co., and who recently became proprietor of the candy store in the Metropolitan Theater, suffered a loss of $1,500 in a fire which occurred in his establishment, last week. The flames were discovered just 20 minutes after the close of the performance and filled the theater auditorium with smoke.

The local authorities are becoming very watchful and strict about enforcing the law which prohibits anyone not licensed as an optician from fitting eyeglasses. Two prominent local jewelers were arrested rerecently on this charge. In one case the optician employed by the firm had left the city but a few days previously. One member of the firm has an optician's license, but he permitted an employe who had no license to take charge of the optical department temporarily until a regular optician could be secured. In consequence he was haled into court and fined $20. The case of the other jeweler, after a preliminary hearing last Thursday, was continued for a week.

Harry A. Lunda, 119 Central Ave., had his window robbed of diamonds, watches, jewelry and fountain pens recently, aggregating a loss of about $1,000. Mr. Lunda had placed the goods in the window for display on Sunday and left the store to attend church. When he returned, about two hours later, to put the diamonds and valuables in the safe, he discovered the robbery, the window having been cleared. Entrance was gained by prying open a rear window. A light was burning within and people were passing constantly, but the job was done without arousing any suspicion. No attempt was made upon the safe, and none of the silverware in the show cases was taken.

Philadelphia.

W. C. Penfold was a recent visitor to this city.

Samuel Clothier, 1200 Arch St., has given up business.

B. B. Topping, Milford, Del., is renovating his store.

M. A. Keeport, Reading, Pa., has remodeled his store.

Frank Gould, 809 Chestnut St., is seriously ill at his home.

Tilghman Bros., Cape Charles, Va., are occupying their new store.

It is rumored that Kagen & Co., Reading, Pa., are selling out at auction.

W. S. Wicker has resigned his position as watchmaker for E. S. Radley.

G. W. Hurlburt returns this week from a nine weeks' trip through the west.

Mr. Bayes, of Bayes & Knight, 727 Sansom St., is in New York on business.

Thos. H. Bowen & Co., Bridgeton, N. J., are having a successful silver sale.

James Kalback, retail jeweler, has moved into his attractive new store, 13 N. 9th St.

William H. Doebele, 805 Sansom St., has been ill at his home for the past week with Grippe.

Joseph Weyll, watchmaker for the trade, has taken quarters in the new Tuttle building, 124 S. 8th St.

Charles L. Drown spent some time in the trade, last week, in the interests of the Ostby & Barton Co.

W. F. Meyer, Reading jeweler, was a visitor last week and went home the proud possessor of a new car.

Thomas Judge, with Joseph B. Bechtel & Co., has returned from a successful trip through the coal regions.

W. S. Steinmetz, retail jeweler of Pen Argyl, Pa., was in town last week and purchased a Ford automobile.

J. E. Caldwell & Co. announce an exhibit of exclusive sterling silverware, beginning Monday, March 14.

B. Cohen, retail jeweler of Catasauqua, will shortly open a jewelry store at 223 Hamilton St., Allentown, Pa.

Henry Bolte, Jr., Atlantic City, N. J., has gone on a pleasure trip to Florida as a member of Atlantic City Councils.

Frank Ryder, of Walter E. Haywood Co., and M. Payson, representing the Finberg Mfg. Co., called on the trade last week.

George Hilsinger, representing J. A. Dunn & Co., Providence, R. I., visited the wholesale and jobbing houses last week.

G. E. Morrill, traveling for H. O. Hurlburt & Sons, has just returned from a successful business trip through the eastern shore.

Mr. Thompson, representing C. Ray Randall & Co., North Attleboro, Mass., was here during the week and booked many orders.

Frank Kind and Morris Kind, of the firm of S. Kind & Sons, 1110 Chestnut St., sailed, last Tuesday, for Europe on the *Lusitania*.

The stock and fixtures of the Futernik Co., recently in bankruptcy, will be sold on the premises, Tuesday morning, March 22, at 10 A.M.

Suit was brought, this week, by the Photo Jewelry Co. against Lewis & Clark Official Photograph Co. A verdict for defendant resulted.

William Sutton, with Earle & Co., and secretary of the Merchants and Manufacturers' Association, is spending his first vacation in years at Atlantic City.

At the conference called, last Friday, by the United Business Men's Association to settle the Transit difficulties E. J. Berlet represented the Walnut St. business men.

Mrs. Charles Hoskins, wife of a prominent stationer of this city, died suddenly at her home in Glenside Tuesday, March 8. She is survived by her husband and one daughter.

The local jobbers' association has appointed a committee to assist in making the meeting of the Pennsylvania Retail Jewelers' convention which is to be held in this city, May 19 and 20, a rousing success.

After an extensive trip, which started Sept. 1 from this city, Robert Keil, traveling for Frank H. Noble & Co., Chicago, returned last week looking the picture of health and glad to renew old friendships. Mr. Keil reports excellent business.

Morris Smith, 1740 E. Passayunk Ave., was arrested last week on complaint of M. Scott, retail jeweler of 8th and Walnut Sts. Mr. Scott charges Smith with having received various pieces of jewelry stolen from his store by an employe. Smith and the boy have been held for a further hearing.

William Comb, of N. 10th St., was held for a further hearing, last week, charged with being an accessory in the robbery of a jewelry store at 16th and South Sts. Many complaints have been received of robberies in this district, and the accused tallies with the description sent through in the complaints.

Chestnut St. business men called on the Mayor, last week, and presented a resolution requesting the wood-block thoroughfare rather than the asphalt. The committee which visited the Mayor was composed of J. E. Caldwell, of J. E. Caldwell & Co.; Joseph Bailey, of the Bailey, Banks & Biddle Co., and many other Chestnut St. merchants.

The sudden death of Mrs. Corinne Kaas Wolfe, daughter of Andrew Kaas, a well-known local jeweler, recalls to many Philadelphians the beautiful Mrs. Wolfe, who was prominent socially and known for her kindly, charitable interests. Though Mrs. Wolfe had been ill for a period of years, her death, which occurred March 4, was a severe shock to her many friends.

George Richardson, of Front St., this city, was held last Wednesday in $800 bail for court by Magistrate Mackin. The accused was held on the charge of stealing $500 worth of jewelry from the store of Asenstein & Gordan, 517 S. 4th St. The police who made the arrest testified that he had found some of the stolen pieces in the cellar of Richardson's home.

Reider's loan office, 22d and South Sts., was entered, last week, by George Finlay, who lost no time in locking the door and was just in the act of opening a show case when the jeweler appeared and summoned the police. The prisoner resisted arrest so strenuously that the policeman lost his badge, helmet and club. The man was finally subdued and taken to headquarters, where he was held in $1,500 bail to answer Beaton on the charge of assault and battery.

The following jewelers were s this city during the week: Tho Trenton, N. J.; T. C. Kremer, P Pa.; D. H. Krause, North Wa B. McFarlan, East Downingtow E. Hunter, Beverly, N. J.; R man, Atlantic City, N. J.; R Burlington, N. J.; Willis P ton, N. J.; H. S. Kratz, Sou and Otto Jarck, Easton, Pa.

On a warrant issued in New ing him with the theft of jew at $1,600, John F. Devine, 19 y West End Ave., New York, w by Central Office Detectives Cunick in Broad St. station las charges against the young mar ferred by L. B. Walters, of Devine was locked up in the Cit the room occupied by him dur in this city will be searched

Washington, D.

S. Greenberg, who cond and watch repairing store a N. E., has given up the bus a tailoring establishment n P Ave.

Traveling men in the city dur week included: Charles A. Pa son-Roubaud Co.; C. H. McAr huber & Lehrfeld; A. Broder, M Herback-Demer Co.; Jacob Mill sentative of Charles Arms J. W. Nevins, J. B. Bowden &

The secretary of the Retail Je sociation of the District of Col receipt of a letter of thanks fro Chamber of Commerce for th given by the association to the appreciation of the latter's kind lowing the jewelers the use of in which to hold their meeting

Albany, N. Y.

It was reported here that San berg's jewelry store, 145 S Schenectady, had been robbed stock valued at about $500. The into the store by a rear window

Jos. Peyzner, dealer in notions at 289 S. Pearl St burned about the arms and fire which recently wrecked t of his establishment. While h a fire from some old paper t plosion which blew the fla store and ignited Mr. Pey Before the flames could be ex left hand was badly burned also suffered.

The creditors of the Art M Co., with offices in Meriden, petition in the United S cently asking that the judged bankrupt. The liabilit be $52,000, the assets are u the creditors are Grey C. Dwig W. H. Squire has been named receiver of the concern. The app C. O. Lambert, Bridgeport, and A and G. L. King, Meriden. It i that the concern will be reorgani

James L. Hand
America's Leading Jewelry Auctioneer
14 MAIDEN LANE, NEW YORK

I have no booklet to send you for the asking, but I guarantee you rience, ability and results unequaled. No two auctions can be cducted alike. Conditions are unlike in the various towns and cis and it is necessary to use different methods of advertising, ai ngement of stock, selling, etc., so as to assure the success of vr sale. A booklet might be the proper thing for advertising a pi nt medicine "cure all," but this method cannot be applied to th important proposition of your auction sale. A liberal expenditure fc printer's ink and a "booklet" does not make the gentlemanly, cc petent auctioneer.

$10,000 to any charitable institution that you select if I cannot pr e that I have conducted the auction sales of the largest and finest st ks of high class jewelry ever offered in this way in the United S es and Canada.

I am at present conducting the removal sale of the fine stock of E Vail & Co., of Wichita, Kansas. This is one of the largest and st stocks in the State. The Vail store is one of the representative je lry establishments of the West.

Write or wire me in their care or to my New York Office and te me of your store and stock and what you desire to accomplish b neans of your sale. I will hold your communications strictly con- fi ntial and will give your letter my personal attention. I give all s s my personal attention and my staff of auctioneers consists of six o he best trained jewelry auctioneers in this country. You can have a of them for the price of one if your sale warrants it.

Hundreds of references from men high in the jewelry trade on re iest.

JAMES L. HAND.

$1000 TO $3000

OUR Daily Average Sales AT AUCTION

Below is a photograph of one of our Auction crowds at the sale of the stock of Ambrose Kent & Sons, Toronto, Canada, a stock invoicing nearly $200,000. Another room as large as the one shown and opening into this by an archway, was also comfortably well filled. This kind of a crowd is characteristic of all our sales. ¶ We have been running this sale nearly nine weeks and the interest is as great as at the beginning. That is also characteristic of our sales. The public never tire of them. That explains why we always succeed in selling everything.

Our System Insures You a Successful and Profitable Sale

We give each Sale our Personal Attention and Never Send Substitutes

We stay with you until the purpose for which the sale was made is accomplished. Write for terms and date

Mitchell & Tillotson

35 Maiden Lane

NEW YORK

Messrs. Mitchell & Tillotson came to us with the highest recommendations from our friends in the wholesale trade. They have proved themselves worthy in every way of all the good things said about them. They have been with us for eight weeks and have succeeded in disposing of nearly all of our large stock, which originally invoiced $150,000. The daily average of sales during the eighth week was equal to the sales made during the first and second weeks, when the stock was complete.

We are confident the small remainder of the stock will be sold and the interest in the sale maintained until the close.

Ambrose Kent & Sons

The test of any man's greatness is in the doing of things that others have failed to do

We have repeatedly taken up and carried through to success sales that other well-known self-styled leading auctioneers had made miserable failures of. If we undertake your sale we stay by you (no matter how many and how tempting offers we may have) until the work is completed.

Your welfare, your success has the right of way

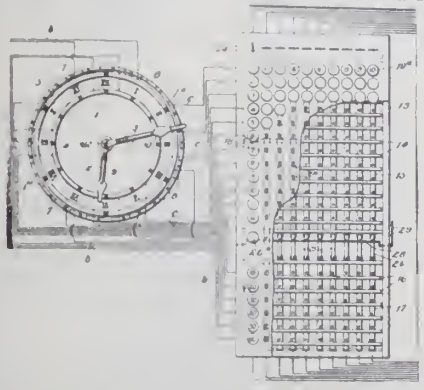
re-alarm, the combination of a casing,
ric circuit, a segment comprising con-

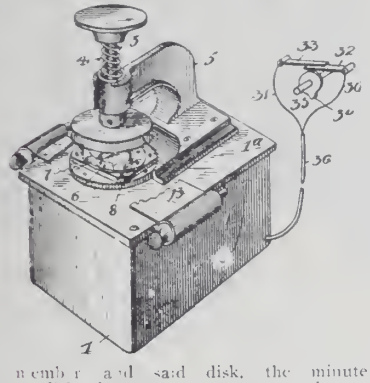
in the circuit, clockwork, a contact arm
y the clockwork, and means for stopping
ork and locking the contact arm.



CANNON-PINION SHAFT. WALTER
B. IEHL, Waltham, Mass., assignor to the
Philadelphia Watch Case Co., Riverside, N.

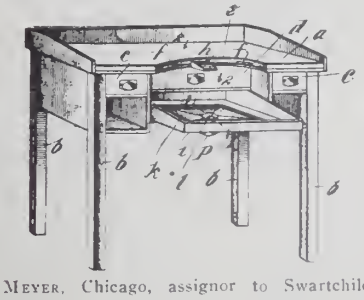
iled Aug. 6, 1909. Serial No. 511,485.
atch movement, the combination with a
la and a dial plate, of a center pinion mounted between said plate and a cannon pinion shaft passing through said center pinion, said shaft being hollowed out for a portion of its length and slotted to form a spring tongue of approximately one-third of the circumference of said shaft.

951,118. ELECTRIC CALL CLOCK. OWEN P. RAGAN, Ridgeway, Mo. Filed April 15, 1909. Serial No. 490,045.



A device of the kind described comprising a dial having two concentric sectional rings, hour and minute hands co-operating respectively with said rings, a third ring having cam surfaces thereon engaged by the minute hand, said cam surfaces lifting the said hand intermittently from engage-

ment with its sectional ring, the said minute hand being hinged, a spring holding said hinged hand in engagement with the cam ring and the sectional ring, a plurality of electric circuits including signal devices, each of said circuits being connected to a section of said rings and including the hour and minute hands, said circuits being normally broken, and means for completing said circuits.

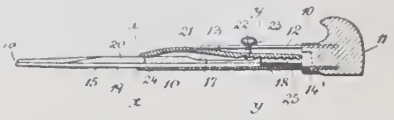


951,224. TIME-STAMP. CLARENCE C. SIBLEY, Perth Amboy, N. J. Filed Jan. 9, 1906. Serial No. 295,225.

A time-stamp comprising a dial member having a socket, a minute indicator disk journaled therein, a plate having an opening receiving said member, an arm carried by said plate and extending over said member, a pad carried by said arm over said member, anti-friction balls between the

dial member and said disk, the minute indicator disk having a recess, an hour indicator disk with a said recess, anti-friction balls between the minute indicator disk and suspended below said dial member, means to impart step-by-step movement to said wheel, a gear connected with the hour indicator disk below said wheel, a stationary gear below the first named gear, a pair of gears united and pivotally carried by said wheel and meshing with the indicator gear and with the stationary gear.

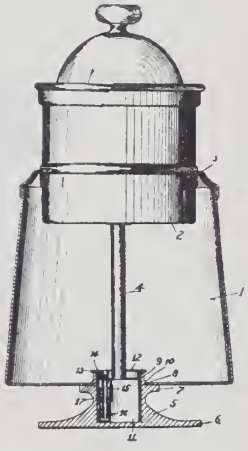
951,506. JEWELER'S BENCH. WILLIAM J. MEYER, Chicago, assignor to Swartchild &



Co., Chicago. Filed June 4, 1908. Serial No. 436,593.

A work bench comprising a bench top *a* having a recess *e*, a block *h* separately engageable with different marginal parts of said recess, and an apron drawer *i* beneath the recess in the bench top in position to receive material falling from the locations of said block.

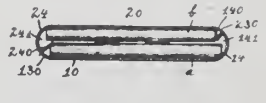
951,535. ENGRAVER'S TOOL. ALFRED S. KOCH, Lancaster, Pa. Filed April 16, 1909. Serial No. 490,370.



An instrument comprising a handle with a straight under and inside wall, a cutting tool

lying in said handle with its lower edge along said wall and having a projection on its upper surface, a longitudinally movable clamping member adapted at different places to engage the aforesaid projection and by its movement to clamp the tool in rigid contact with said wall.

951,581. PERCOLATING DEVICE. GEORGE E. SAVAGE, Meriden, Conn., assignor to Manning, Bowman & Co., Meriden, Conn. Filed July 8, 1909. Serial No. 506,472.



In a percolating pot, a main chamber, a heating chamber, a percolating tube having a cap at its lower and adapted to fit into and close said heating

chamber, an inlet tube passing through said cap and affording means for communication between said chambers, and means adjacent said inlet tube to form a tortuous passage for the liquid in its travel from the main to the heating chamber.

951,592. CIGARETTE CASE. JOHN CHATELLIER, Arlington, N. J. Filed June 3, 1909. Serial No. 499,980.

A cigarette case, comprising two compartments, each having a substantially flat rectangular plate with four upturned edges, a hinge adapted to unite two of these edges at one side and a lock adapted

to unite the two opposite edges at the other side, one of the two edges of each compartment at right angles to the hinge having an upturned lip of less height than the four lock and hinge edges, and the other of the two edges having an upturned lip higher than the lock and hinge edges, the corresponding higher and lower edges meeting together and completely closing the case when brought together, the wider upturned edge at each end having a reverted flange to prevent the accidental displacement of the cigarettes placed against the flat plate.

951,672. CROWN FOR WINDING-STEMS OF WATCHES. HENRY AXTELL, Berkeley, Cal. Filed Dec. 14, 1909. Serial No. 533,043.

A device of the class described comprising a key stem having an integral head, a crown having a solid top and bored out from the underside to receive the head, a plurality of tension springs arranged in superimposed relation within the bore

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."]

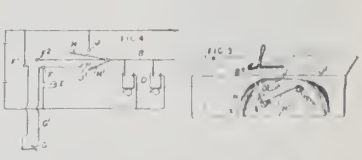
ISSUE OF FEB 2, 1910 (CONTINUED.)

21,914. CIGARETTE AND LIKE CASES. R. E. Eve, London, W. Oct. 16.

A case of cigars, cigarettes, visiting-cards, etc., consists of two parts *a*, *d* hinged together at *b*, the part *d* being secured to the hinge-strip *c* by

pins *e* which engage in slots *f* and are secured to a fillet *g*. The parts *a*, *d* are capable of a longitudinal relative motion equal to the length of each slot *f*, the case becoming fastened by a catch *h* on the part *d* entering a slot *i* in the part *a* and engaging with the underside of the flange *j*.

22,256. GLOBE CLOCKS. C. Werner (firm of), Villingen, Baden, Germany. Oct. 20.



A terrestrial globe, detachably mounted on the casing of a clock provided with an ordinary dial, is rotated by the clock-work once in 24 hours. A rigid meridian arc *e* screwed to a bracket *f* sup-

ports the axis of the globe, the south polar extension of the axis carrying a bevel-wheel *g* and resting in a step-bearing *h*. The wheel *g* meshes with a wheel *c* which is fixed to a vertical arbor *b*. A graduated equatorial ring arranged around the globe indicates universal time.

22,263. TIME-ALARM SIGNALS. D. H. Smith and L. A. Hearin, Liverpool. Oct. 20.

The usual alarm spindle X, Fig. 3, of an alarm clock carries a double contact-arm H, H^1, which is electrically connected to the frame of the clock and makes contact, at the time for which the alarm has been set, with two insulated terminals J, J^1, thereby energizing two alarm bells and a lamp. The upper end of the arm H can be locked in a

hook-slot B^1 to put the alarm out of operation. The clock is mounted in an ornamental gilt-iron case, with the bells at each side of it, and the lamp preferably mounted at the front. The circuit connections are shown in Fig. 4, in which the frame and case is represented by the reference B. By having separate terminals for the bells D and the lamp E, the lamp can be energized separately at will by means of a pear-push G, which is con-

SOUTH BEND WATCH COMPANY, Manufacturers of High Grade Wat
SOUTH BEND, INDIANA

New Spring Needle

T. A. S. Fountain Watch Oile

No. H. 1036. Price, $1.00

No Danger of Injuring Needle as with Others!

When not in use, needle springs back into case and may be placed among tools without danger of damaging point.

It has a coil spring inside, which, when pin is pushed out of notch, carries the oiling needle automatically back into case, thereby protecting it.

The outer case is made of polished hard rubber with nickel plated front cap.

Cap or collar on glass tube is removed by unscrewi , and easily cleaned by pushing out cork valve and draw fine wire entirely through needle tube.

By its use oil is kept absolutely clean and practically right, and watchmakers will admit this is the most pot factor in the repairing of a watch.

Full directions with every oiler.

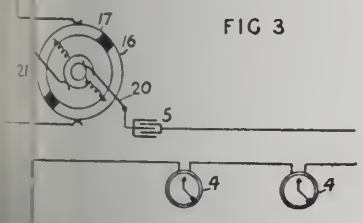
ISSUE OF FEB. 16, 1910.

S. ATCHES. H. Ginnel, Brooklyn, N. S. A. Oct. 24



Pendants.—The bow of a watch is ahle so that it may be readily replaced w e, or, if desired, by a brooch-bow, Fig. ever, this device permits the use of a link on the watch chain. The ends b^1 are tubular, and the bow is retained by s -pins b^2, which pass into the enlarged he pendant and engage, by means of d y-turned ends b^4, with hook-shaped c^1 on a cap *e* secured to the stem *a*.

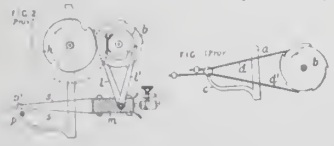
e bow, the stem is pulled outwards as g. 3, thereby raising the projections on ear of the pins b^2. The stem is held position by a split spring-sleeve *g* in engaging with an annular groove n^2 , which is provided in addition to the es for determining the winding or positions.

. LOCKS W. Fairweather, London. Abolaget L. M. Ericsson & Co., 5 Thule- Stockholm.) Oct. 26.

ocks.—Secondary clocks are driven by m a condenser which is charged and from a constant source through a peri- in the primary clock. The arrange- ses condensers in series or in parallel a simple rotating switch or a commu-

by which the condensed is not only but recharged to the opposite polarity. s the last arrangement. The wiring one side of a condenser 5 through a condary clocks 4 to one brush 21 of a nmutator 16, 17, which is connected by rush 20 to the other side of the

VATCHES. E. A. Holland, Rock Cheshire. Oct. 27. Period for grant- tent not yet expired.



echanism.—A wheel 4, which is always h the stem-pinion 15, is supported so move laterally in order to gear with winding-wheel 3 or the hand-setting hen the stem 1 is pushed in, the wheel gear with the wheel 3 by a spring 8 he arbor 7. When the stem is pulled n elbow lever 11, the bent end 13 of

ges with a groove in the stem, is its other end shifts the wheel 4 to the position. In each of the two posi- lever 11, a pin carried by it takes into ding hole 23 in the spring tongue 22 10, the tongue thus acting as a detent. , which bears near its end against the cts as a non-return pawl on the main- 3.

22,819. Electric Clocks. T. J. Murday, Hounslow, Middlesex. Oct. 27.

In a primary clock, the circuit by which a current is transmitted to indicators is closed at regular intervals by a projection on the pendulum. Fixed to a pivoted insulating-block *m* are two arms *l*, l^1, the ends of which rest on notched disks *h*, *i*, carried by arbors of the time-train, which may be driven by the pendulum acting on a ratchet-wheel *b*. The block also bears two springs *s*, s^1 having cylindrical contact-pins p^1, p^2 at their adjacent free ends which lie near the path of a third pin *p* carried by an arm on the pendulum. At the

instant when the ends of the arms *l*, l^1 pass into the respective notches on the disks *h*, *i*, the block *m* is tilted so that as the pendulum makes its next swing, the pin *p* passes between the contact-pins p^1, p^2 and closes the circuit. Immediately afterwards, the pins p^1, p^2 are again raised clear of the pin *p*. The contact-device may be applied to any clock that is required to transmit a current at each swing of the pendulum; the levers *l*, l^1 are then dispensed with, and the block *m* is fixed. In the arrangement described, for driving the clock-train through the oscillations of the pendulum, Fig. 1, an arm *c*, projecting from the pendulum-rod *a* supports two counterweighted clicks *d*, d^1, the bent ends of which engage with the ratchet-wheel *b*. As the pendulum swings, the ratchet is alternately pulled and pushed around by the clicks *d*, d^1 respectively.

Medallion or Locket Watches.

WHY is the pendant, bow and crown applied to a watch case? "Simply custom," comes the answer from many members of the trade and public. With the advent of the first portable timepiece a means of securing it to the person of the wearer was devised in the round bow, fastened to the pendant of the case, and the custom was established. It is a fact that in the evolution from the first watch to watches of the present day the general external appearance

Fig. 1.

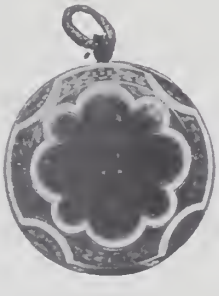


Fig. 2.

Fig. 3.

or shape remained the same, with but slight variations.

With the introduction of stem-winding movements we find that watch cases were made to resemble the older type of key-winding watches with long pendants and large bows, plus the crown required for winding, and that this type of construction is still in vogue. Hence the question, Why is the pendant, bow and crown applied to a watch case?

That these adjuncts are not necessary, and under some conditions may be considered superfluous, is shown by the construction of watches at the present time that have neither pendant, bow nor crown. Fig. 1 and Fig. 2 represent modern stem winding and setting watches, the external appearance of which resemble medallions or lockets, the eye and loop appearing at the top being the winding, setting and the suspending means. One of the many advantages of a watch constructed in this manner is the protection afforded against loss from the

Fig. 4.

bow springing out, since there is no bow to pull out.

The decree of society that watches are not to be worn with décolleté gowns is overcome with this new type of watch, since to all appearance it is a medallion, and may be diamond paved, enameled, carved or treated in any artistic manner.

Fig. 3 represents a bracelet watch without a crown, the winding and setting being accomplished by manipulating one of the chains on the sides, which is attached to the winding mechanism.

In the above watches means are provided for permitting and preventing the longitudinal movement of the stem for setting, as set forth in letters patent granted to H. W. Matalene, April 20, 1909.

Fig. 4 represents a gentleman's watch constructed without a pendant, bow or crown, with a variation in the manner of setting.

Mrs. L. M. Black, Foxboro, Mass., is about to discontinue business there and move to Mansfield, where she will open a larger establishment.

WE have recently issued a supplement to our 1904 material catalog which will be forwarded to you on application. This supplement used in connection with our 1904 catalog you will find a great help in getting correct repairs for our movements. Material for all new grades manufactured since the issue of our 1904 catalog are listed. Special numbers showing grades of movements to 15394000 are given; table showing numbers and strengths of Hair Springs for different grades will be found a great convenience. We especially call your attention to the introduction in the supplement which explains how to get the part you want for any particular movement. A postal card request will bring one of the supplements.

mind if I use one of your
" he asked. "I just notice that
tools need touching up, and
islike is to be obliged to start
tools in a new place before I can do some good work for the boss."

Watkins immediately exchanged his black sack coat for a gray working coat and proceeded to put his tools in first-class condition. As he stood on the side of his new companion's work-bench overhauling his tools he remarked that he felt perfectly at home. "All I need to make me feel at home," he said, "are my tools and something to do. The only new surroundings that are of any interest to me are work shops with difficult repair jobs and an ex-

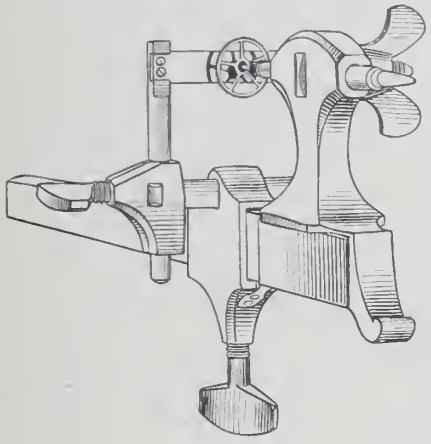

FIG. 1
Centering and drilling device

pert to inspect my work." He spoke with the air of a great musician who desired to play classical music before an appreciative audience.

"Here is something that appears very peculiar to me," said Watkins. "This watch is an old and well known make. It has the original wheels and pinions, the jewel holes and pivots are in good condition, and yet the depthing seems radically wrong. Look at the third and fourth wheels," he exclaimed, handing over the movement. "Just notice how the third wheel meshes in the fourth wheel-pinion; the depthing is shallow on some teeth and decidedly too deep on others." I examined the third wheel in my calipers and to my surprise found it perfectly round.

Milthau being pleased with the occasion to look at something in his line which at least seemed very enigmatic, sat down to examine the depthing with much curiosity. Placing the sharp point of a piece of pegwood on the pivot of the fourth wheel-pinion in order that he could hold it fast, at will, he rotated the third wheel with a pair of tweezers and examined the shake between the teeth and pinion leaves by holding the third wheel-pinion fast and letting the sides of both teeth strike one pinion leaf.

After a brief observation he took the watch apart, placed the fourth wheel-pinion in a chuck, then put it in the lathe and, while revolving it very slowly, watched the upper pivot closely.

"Just what I expected," he finally exclaimed, turning to his friend, who was watching the proceedings with interest. "You have examined the wrong wheel. The error is not in the third wheel, but in the fourth wheel-pinion; just watch the pinion closely in the lathe and you will observe that the upper pivot is slightly eccentric. That causes the pinion to mesh deep with the wheel on one side and shallow on the other. Evidently this pivot was drilled in by some novice and the only way to correct the error is to replace this pivot by one that will be perfectly in center, or, if you want to go to the expense, a new pinion would be advisable. Watkins, curious of the results that the insertion of a new pivot into the same pinion would bring, decided that he preferred to experiment with another drilling, and should that prove unpractical, it would not be too late to replace the whole pinion.

"Very well," agreed his friend. "If you like to experiment I will tell you how to go about it and I am sure the result will be satisfactory. Before you cut off the old pivot you must ascertain whether the pivot is in tight enough to prevent the drill from removing it. Generally, if the old pivot is driven in as far as it goes before the cutting is performed, it acts as sufficient plugging for the hole to stand a new drilling

"Next comes the annealing of the pinion. Take a piece of copper wire, about one inch long and twice the thickness of the pinion to be annealed. Bore a hole through the center and place it on the pinion; then heat the outer end of the tube until a blue color is visible on the pinion. By this procedure the pinion may be annealed without the slightest damage to the wheel. Copper wire is desirable for this operation because it retains the heat. Now cut off the old pivot and even it down to the pinion.

CENTERING AND DRILLING PROPERLY.

"You can now put the pinion in the lathe

WALTHAM WATCHES

COLONIAL SERIES
Riverside Maximus
Enamel Dial

COLONIAL SERIES

Gold and Gold Filled Watches

These watches are a noteworthy addition to the Waltham line. They are exceptionally thin and may be had with Enamel, Silver finish or Gilded Metal dials of artistic design. Colonial Series watches appeal to the most critical buyers. Equip your stock with these good for Spring trade.

Colonial Series watches are to be had in five grades of movements as follows:

Riverside Maximus—23 jewels, adjusted to temperature, isochronism and five positions.

Riverside—19 jewels, adjusted to temperature and five positions.

Royal—17 jewels, adjusted to temperature and three positions.

No. 1425—17 jewels.

No. 1420—15 jewels.

All Colonial Series watches are cased and timed at the factory. They are delivered to the trade in display boxes. The retail selling price on these watches is fixed and plainly printed on the contract notice which is placed in the box with each watch before leaving the factory.

e est material for a pivot that I
(' said he, "is a sewing-needle.
ou ver try a piece of mainspring for
use?"

"No, I have not, but I might as well try it now while I am working according to your instructions, so that I may be relieved of all possible blame in case the whole operation proves a failure," replied Watkins, with an amiable smile at his colleague. Immediately he put a piece of mainspring in the bench-vise and chisled off the widest part of it, leaving a narrow strip in the vise. He then put the narrow strip in a small pin-vise, stripped it down to a square, then to an octagon, and very soon had it perfectly round and driven into the pinion. After he shortened it to its proper length, he touched it up with the graver, then with the oil stone and after obtaining the exact size for the jewel-hole, he put the final polish on the pivot with a steel burnisher and finished it up with a zinc lap covered with rouge and oil.

When the job was completed, he put the third and fourth wheel in the movement and examined the depthing. "This is indeed a clean and skilful job," he exclaimed.

"The depthing is in excellent condition and now, if you want to retrieve the white polish on the pinion, you may do so by diluting muriatic acid in water and dip the pinion in this. A mild solution is preferable, as caustic acid would destroy the gloss.

"The strength of the solution may be tested by dipping a piece of mainspring in the solution. The mainspring should come out white, without losing its gloss."

After the pinion was dipped into the acid and the original bright polish appeared, Watkins remarked that he had gained valuable information in regard to his trade, and congratulated his colleague on the result of the job.

"Here is a little attachment I have made to my hand-lathe for centering and drilling pivots," observed Milthau, handing the lathe to Watkins for approval (see Fig. 1). This method enables the less skilful practitioner to obtain the exact center of a pinion or staff, without difficulty. The centering strip is about 35/1000 in thickness, provided with holes of various sizes and countersunk on the face-side to receive the pinion or shank to be drilled.

"After the size of the hole to be drilled has been selected in the centering strip, a drill must be chosen to fit the respective hole without side-shake.

"Now, when the wheel is set up in the lathe with the shank to be drilled running in the countersink, the drill is applied through the respective hole from the opposite side and the exact center is obtained."

"I like the idea very much," agreed Watkins. "While it is very simple and easily made, it is a very expedient little tool for accurate work."

"I see that you are in favor of using the kind of tools that are commonly termed 'time saving devices.' I have made a little lathe recently for polishing balance-pivots (See Fig. 2), which I am sure will appeal to you. Don't mistake me, however, for a genius," he added, with reserved modesty, "for the credit of originality of this device belongs to someone else.

"I use this lathe in the factory," said he, passing it over to his German friend. "You see it dispenses with the need of removing the hair-spring and roller from the balance whenever a pivot needs polishing. It is true that to remove the hair-spring and roller is a very simple operation, but it surely is a more complicated job to restake the balance after the pivots have been polished.

"The hair-spring may not be as perfectly true after restaking, the roller may not fit as tight or may not be replaced at the exact point, thus knocking the balance out of beat, and unless the repairer is an exceptionally skilled one, the watch will leave the repair shop a less competent timekeeper than it was before the pivot polishing operation was performed.

"The body of the lathe is made of brass. The face-plate (a), which is provided with holes of various sizes to receive the cone of the balance pivots, is made of steel and hardened in oil.

"The arbor, to which the face-plate is attached, runs in a bore and may be kept in a stationary position by tightening the side screw (d). This enables the operator to use the various sizes of holes of the face-plate, which are drilled in a perpendicular position, simply by either lowering or raising the face-plate.

"A supporting arbor (e), is provided with a hole in the center deep enough to protect a pivot and larger in diameter than the average balance-pivot, in order to permit the cone of a pivot to run in the hole without any friction to its pivot.

"Thus when a balance-pivot to be polished is placed in the proper size of hole of the face-plate (a), and the other pivot is supported by the arbor (e), the pivot to be polished perforates the hole of the face-plate and makes the seat of the operation accessible. The arbor (e) runs in a bore and may be adjusted to the requisite distance by sliding it forward or backward, and is held stationary by a knurled thumb-screw (e). The balance is set in motion by two pins projecting from the roller (b), which runs on the arbor (e). Thus when (b) is rotated by the use of a bow, it impedes the balance through its pins that inclose the balance arms."

Milthau inspected the lathe closely and expressed his approval by asking Watkins for permission to copy it.

The following evening when they met again in their little room they decided to continue their horological discussion, and Watkins commenced immediately after lighting his pipe on what he termed "A Lecture on the Knack of Balance Truing."

(To be continued.)

At a recent sale of the chattels of a private estate in Lancaster, Pa., a grandfather clock was sold for $336, which is said to be the highest price ever received in that county for a timepiece of that kind.

The famous clock at Hampton Court Palace, England, which was illustrated in a previous issue of The Jewelers' Circular-Weekly, was recently taken down for repairs. Numerous legends are associated with this old clock. It is said that when Anne of Denmark died in Hampton Court the clock, which was striking four at the time, immediately stopped. Legend also says that the clock acted in the same way ever since, whenever any old resident of the palace passed away.

outside and in, masterly mytho- pictures in translucent enamel. The magnificent example of the en- art. This piece was formerly in the collection of Baron Mayer Carl von Rothschild, in Frankfort-on-the Main.

Some years ago we published a short article on this wonderful collection, in which a number of fine specimens of the early

GOLD OPEN-WORK REPEATER.

With gold extra case in Vernis Martin, with pictures of Emperor Joseph II. and family. Period, 18th century.

watchmaker's art and of the jeweler's art—Mr. Marfels made it a point to acquire only the most artistic pieces—were illustrated, but as every one of the members of the collection is of marked interest, we feel justified in showing herewith some more of these marvelous creations. Then, again, the fact must not be lost sight of that an active collector is constantly exchanging and acquiring new specimens, and naturally the Marfels collection has changed appreciably.

The discovery of the means of operating

Has handsomely enameled dial. Time, about 1600. Acquired from the famous Spitzer sale.

clocks with the aid of springs, in place of weights, made the production of portable clocks possible at the commencement of the 16th century. The first traveling clocks and the first pocket clocks or watches followed in due course. The latter were first carried in the bosom or in the purse, but most frequently, especially during the first half of the 17th century, were worn as neck watches, hanging from a cord or chain about the neck. The watch was essentially a piece of jewelry, and as such was quite expensively ornamented. Cases of rock crystal or metal, ornamented with enamel, were at first the most popular. The custom of carrying the watch hanging free from the girdle, the face turned toward the body, prevailed until the end of the 18th century and was the origin of the richly-elaborated and often finely-chased patterns of attractive design.

Not until the period of the great Revolution did the watch disappear entirely into the pocket, and then the cases were made

BUTTERFLY-SHAPED WATCH.

Gold and enamel. Beautifully colored. Has music attachment and bonboniere. About 1790.

smooth at first, though preferably decorated with enamel. The pretty chatelaine, to which, in the Rococo period, the watch, with keys and seal was suspended, remained for a time in evidence, until it was finally replaced by the long neck chain of our grandfathers. Since the watch was relegated to the obscurity of the pocket its case has become the step-child of art and it remains to-day the bare box that it is. Even the attractive but, unfortunately, only transitory, custom of the ladies in wearing the watch displayed at the corsage brought no improvement. Modern art, which aims at making the objects in daily use attractively beautiful, has neglected the watch. Of noteworthy efforts in the other direction there have been but few. At an exhibition recently held in Darmstadt was shown a gold watch with delicately wrought reliefs of the Fates; but this was a step in the wrong direction, for the fine relief ornamentation would in a few years have been destroyed

GOLD ENAMELED WATCH.

Shell-shaped, set with pearls. About 1800.

by wear. Despite our modern custom of carrying a watch out of sight, it would be most desirable to invoke again the aid of the engraving and enameling arts for its decoration.

(To be continued.)

We are spending our money advertising and building up an immense business which has to come to us through retail jewelers who sell our watch.

The watch is the Ingersoll-Trenton and only jewelers of *responsibility* can have it to sell.

In the important 7 jewel field isn't it to your interest as much as to ours to have this plan succeed?

Over 7,000 of the best jewelers have answered "yes" by placing these goods in stock.

A NEW ERA IN Lighting

The perfection of the G-E MAZDA Lamp marks the "greatest advance in electric lighting since Edison's invention of the incandescent lamp."

This new lamp more than cuts in two the former cost of electric lighting, making it possible for every jeweler to flood his store with a wealth of light of real sunlight quality.

MAZDA LAMPS

To produce the same amount of light as the electric bulb commonly in use, the G-E MAZDA Lamp requires only ⅓ the current. The 32 candle power carbon filament lamp and the 32 candle power G-E MAZDA require 112 watts and 40 watts of electric current respectively.

Be sure you see the famous G-E monogram on all these lamps, which are supplied by lighting companies and electrical supply dealers everywhere.

AT BOTH ADDRESSES

Relation of Salesmanship to Advertising.

Address delivered by HUGH CHALMERS before the Associated Advertising Clubs of America, at the Louisville Convention and reported in the *Business Philosopher*.

(Continued from issue of March 2.)

I ONCE went in to see an old business man and wanted to borrow $500. I went in and said: "I want to borrow $500, and will give you my note for 60 days, and I will pay at the end of 60 days."

He turned to the cashier and said: "Write Mr. Chalmers a check for $500."

He then said to me: "Young man, let me tell you something. You could not have gotten that money had it not been for the straightforward way you asked for it. Most men come in here and waste a whole lot of my time ing: 'Good morning! How are his morning? Nice weather we been having the last few days. ws the family? And, by the way, I ittle short of money and would like brow $500 for a couple of months.' t, e said, 'I was impressed by the way ked for it. You came in and asked the money right off, so I am going le you have it."

So gentlemen, in this time and genera-, et's eliminate all the "by-the-ways" d down to straight business. It pays. ieve salesmen are made as well as nd teaching will do a great deal to ke salesman. However, there are 10 qualities which a man must possess to be a successful salesman, and as far as my experience goes I should say that these principal qualities are health, honesty, ability, initiative, knowledge of the business, tact, sincerity, industry, open-mindedness and enthusiasm.

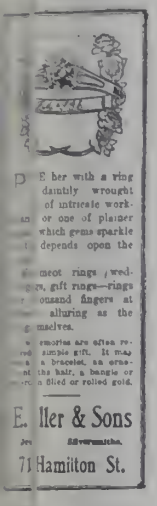
I think these same qualities may be applied to advertising men, or, as a matter of fact, to any man, because when you get right down to the facts we are all salesmen. Every man is trying to seal his personality to some other man. He is trying to impress the people he meets. He wants people to think well of him; consequently he is a salesman, because he is trying to sell what he considers his good qualities to other people.

A man may not have all 10 of these qualities, but in proportion as he has them will he succeed

The man who has health of body is surer to have a healthy mind than the one who hasn't bodily health. Into the question of the health of a salesman enter those things he shouldn't do.

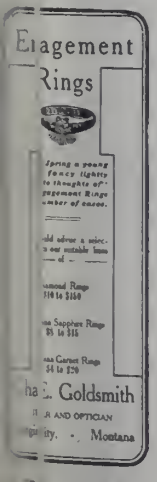
There is hardly a salesman in the country to-day but is doing one or two things that are injuring him. The greatest thing that bothers us all is our habits. I refer particularly to the subject of eating, drinking and smoking too much.

I know of nothing that will so unfit a man for business as a drink or two in the middle of the day. At two or three o'clock in the afternoon he is lazy and heavy and unfit for work. And a salesman, above all others, if he feels he must drink, should not take a drink until after six o'clock at night. The man who will stick to this rule will have more dollars in the bank at the end of the year than the man who does not.



I speak from experience, like the man who said: "It pays to be honest, because I have tried both ways." In speaking of honesty, I don't refer to it in its basest sense, because a man is nothing short of a fool nowadays who is not absolutely honest. But honesty goes farther than just what a man does.

Honesty means what a man thinks as well as what he does. After all, gentlemen, there is only one man in the world who knows whether a man is honest, and that is himself. Our wives think that we are honest, and whether we are or not it is a good thing to keep them thinking so, but they could not prove it to save their souls.



I give it to you as good sense and business logic that honesty in all things must be the rule of any man who wishes to succeed.

I tell you it is a good thing some men are dishonest, because if they were honest, coupled with their natural ability, you and I wouldn't have much of a chance.

I have always noticed that the lawyer who reads the most law books and keeps up to date on law is, as a rule, the best lawyer. I know that the statement that "salesmanship is a profession" is worn threadbare, but it is true, nevertheless. A man ought to have all the knowledge of his business that he can possess, keeping in

nd t old saying that "kn wledge is wer.

I re mber once being in Germany at le sen's convention. There was one th e who had been banner agent for yrs in succession. In awarding him pri at this convention I asked him to the ther agents why he had led all the th hree years.

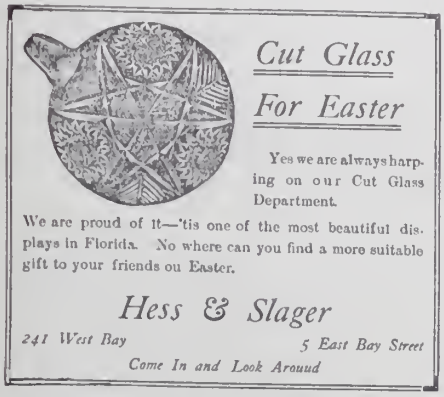
c ld not have answered better if he a d a day, and yet he answered in c y one sentence when he said: "I o body in all Germany to ask me a about my business that I cannot r That was the great secret of his s

n tell from the way men talk hey are sincere or not. Men are s everything you say and do. You t throwing thoughts at a man is more or less than throwing some- t ible at him.

w entlemen, I claim it is impossible i insincere thoughts at a man and h catch sincere thoughts. I say it t impossible to do this as it is im- l or me to throw a cup at a man him ca ch a saucer. If he catches he will catch a cup.

hat men are unconsciously affected ncerity or insincerity of the man a dealing with. I believe in being e all things. Insincerity has taken ders, but insincerity never held a I admire a sincere man, and so I hate a jollier. It is your friend c izes you and your enemy who s u.

r iend is sincere, wants you to im- d tells you where you are wrong, an who tells you that you are the w on earth when you are doing r't your friend, because he is en- g you to continue to do things that ght. Therefore accept criticism w because it is your friend.



en indedness is the willingness to estions. The man who knows it nding on a banana peel placed a fool-killer, who is just waiting ne corner.

an who is not open-minded will t rut, and, after all, gentlemen, the fi rence between a rut and a grave dth and depth. We should all be g receive suggestions. The day is r past when the salesman used to ggestions. Most salesmen accept r vadays. I have heard of cases en have made suggestions to a n dent and he has told them that wa is business—has even gone so far re" them for interference. The wl is doing a work every day is the w is best able to tell you how to v t.

hould just as soon be stopped by a r by a general manager, because h es are 10 to 1 that the janitor s re about the thing he wants to me han the general manager does. s that if we are to progress we A icit and gladly receive suggestions. n might have honesty, health, abil- i tive, knowledge of the business, tact, sincerity, indu try and open-minded ness, and without enthusiasm he would be only a statue.

Enthusiasm is the white heat that fuses all of these qualities into one effective mass. To illustrate enthusiasm: I take a sapphire and a piece of plain blue glass. I can rub the plain glass until it has a surface as smooth as the sapphire, but when I put the two together and look down into them I find that the sapphire has a thousand little lights glittering out of it that you cannot get out of the glass if you rub it a thousand years. What those little lights are to the sapphire enthusiasm is to the man.

I love to see enthusiasm. A man should be enthusiastic about that in which he is interested. I like to go to a ball game and hear a man "root" for the home team, and it never bothers me a bit, because I know that that man has enthusiasm. He has interest. I would not give two cents for a man who works for money alone. The man who doesn't get some comfort and some enthusiasm out of his daily work is in a bad way.

A GOOD AD. FROM JACKSONVILLE, FLA

BORDER TOO COMMONPLACE.

Some men are almost irresistible; you know that. It is because enthusiasm radiates from their expression, beams from their eyes and is evident in their actions. Enthusiasm is that thing which makes a man boil over for his business, for his family, or for anything he has an interest in, for anything his heart is in.

I keep before me at all times the 10 most important things to do. I have these in a folder on my desk. As the things are attended to they are marked off, and my secretary keeps making a clean sheet of the 10 most important things, because I want to keep my mind on important things only.

Transfer to someone else the details, because we men who handle other men succeed just in proportion as we can intelligently direct their efforts. The actual work we do ourselves does not amount to anything; it is what we can succeed in getting others to do that counts.

I might illustrate this by a homely story: Suppose a farmer had a 40-acre cornfield and a helper named John. Suppose he were to say: "John, go chase the pigs out of the cornfield." John might chase pigs for a week and never know when he had them all out, because he doesn't know how many are in there.

Suppose this farmer should say: "John, there are 10 pigs in that cornfield; go get them out." After John got out 10 pigs he would no longer be chasing pigs that didn't exist.

This same thing applies to us as business men. If we keep before us the 10 most important things we have to do we are sure that we are not chasing things that do not exist.

If I should ask almost any business man, "What are the 10 most important things you have to do?" he will have to scratch his head and think. Now, if he doesn't know what the 10 most important things in his business are, how can he he sure that he is working on these important things?

(THE END.)

What Is Good Advertising?

GOOD advertising is any legitimate method of making an impression on the buying public, favorable to your store, your line and yourself.

Good advertising is keeping the buying public informed of what you have to sell and how you are selling it.

Good advertising is a convincing, concise and dignified argument, set in print in such attractive style that all who see will read it.

Good advertising is creating a desire for the things you have to sell and a preference for your establishment as the best place to buy them.

Good advertising is keeping a neat store, a nicely assorted stock, selling at just the right prices, satisfying your customers, making good every promise—and using a liberal amount of printer's ink to keep the fact ever in the public mind. A. B.

The bankrupt stock of I Tendler, Elgin, Tex., was sold recently to Max Hirsh by Referee Jos. Koen, of Austin.

STORE KEEPIN DEPARTMEN

Interesting Points About the Jewelry Business.

Address Delivered by M. C. Steele, Auburn, Nebr., Before the Recent Meeting of the Nebraska Retail Jewelers' Association.

WHEN I received an invitation over the signature of your president to be present and occupy 20 minutes' time of the members of this association from the platform, my first thought was that I had gotten hold of someone else's mail, or that some of my Omaha friends were trying to perpetrate a joke on this assembly—but when a printed program followed in almost the next mail, containing my name, proper address, and the assignment of a topic, the matter began to assume a more serious aspect, and it will now be for you to determine which it was—a joke or a mistake.

The topic assigned to me allows great liberty, but I consider it presumption on the part of your president, and am inclined to resent the implied insinuation, that I tell all I *don't* know about the jewelry business in 20 minutes (for that is what was evidently in his mind), and I want to state right here, so that none of you may be disappointed, that such a thing would be an impossibility.

I was, however, impressed with the tact displayed by your president, in the assignment of this topic to me, and on his judgment of human nature, recognizing, as he apparently does, that men usually talk most fluently on subjects that they know least about. (Now, gentlemen, that applies only to my particular assignment.)

Let me first state that my first introduction into the jewelry business occurred some years ago. For some time I have been engaged in other lines of merchandizing, and when I reengaged in the business last November, it was somewhat like I imagine a man feels when he remarries his divorced wife. At any rate, I discovered that a lot of things had occurred in the meantime, that I knew very little about.

One thing which it appears to me has been well developed in the last few years by the manufacturers is the coining of new descriptive titles for their products, and with the wonderful resources of our English language, the possibilities in this line show no symptoms of being exhausted, and we are likely to have in addition to our "Solid Gold Filled," "Real Imitation Diamond," "14-Karat Gold Filled," "Genuine Re-constructed Ruby," "14-Karat Gold Top," "Gold Front," "Quality Guaranteed," many other extravagant phrases, even more suggestive, but equally meaningless.

I am not inclined to place the entire responsibility for this deluge of extravagant titles entirely upon the manufacturer, for I suspect that unless he had found a demand for them he would not have produced them, and they would not occupy such an important place, and be found in such plentiful quantities among the stocks of our retailers. But, then, I don't know. I am of the opinion that the consumer places less confidence in these extravagant titles than is generally thought to be the case.

I notice that the public look with greater confidence and favor upon the old than the new, to regard them as of greater intrinsic value. There has been great demand of recent years for the antique, which I am persuaded is not exclusively a matter of taste, but the belief that they are of greater value. Of course, I do not include in this such fads as the revival of the Swastika superstition, and if we are to return to the Elizabethan period, we may expect to have immediately following this fad, jewelry ornamented with rats' ears, bats' heads, agates suspended by lions' hair, etc., etc.

And, yet, while we have not entirely eliminated from our minds all thought of the superstition, it is a fact that we must recognize, that the early days had less of the imitation and more of the genuine, and I cannot help but think that this is the thought uppermost in the mind of the average customer.

Only a few days ago, a customer brought me some "coin silver" tea spoons worn so thin that some of them were cracked across the bowl—and insisted that I fill and repair them for her, considering them of greater real value than new sterling silver spoons, which I could have supplied her at near the same expense it cost her to repair her old ones.

People are searching out the genuine in all walks of life to-day as never before, and the merchant who heeds this fact and caters to this opinion will profit by it.

There has gone over our country during the past few years a great wave of reform along this line, and it has met with a generous amen from the whole congregation of the people everywhere. The ti considerable liberty was perm commercial world in the use methods pertaining to business and I have heard salesmen, w account for some extravaga t ply that such a statement wa mercially true," as if there co of truth. I am pleased to n that this class of salesmen found in large numbers only of "has beens."

It is a matter of regret that "so-called" successful busine in times past winked at this speak from personal contact one with whom I had an exp years ago, whose governing pa expressed in the following, w from the columns of one of pers a short time ago.

"The homely proverb says, you k
'Its money makes the old mare go
Get it, by fair means if you can;
If not, well, try another plan:
The needful thing in life's brief s
Is money, get it, fellow-man.

"Get it in silver or in gold.
In stocks or bonds, both new and
In oil, in railroads, houses, land
Grab anything that comes to hand
Get money, fairly, if you can,
But get it, somehow, greedy man.

"Cash is your politics, your friend
Make your religion serve your end
You cheat the church, you're sma
You whited wall, you living lie'
Get money, in any way you can,
Gold is your god—idolatrous man'

"Heed not the hard pressed poor
'Business is business' no sentime
The bitter cry you must not reck,
Though your heel be grinding anot
Get money, by any infamous plan
Though the blood sweat starts
man.

"Of ill-won wealth you have a sto
And still are reaching out for m
When a grewsome guest (unbidden
With chilling touch, says 'Come wi
The almighty dollar they may not
As a unit of value where you mu

"And the curious ones will eagerly
'How much did he leave, who die
An echo comes back from the fa
'How much did he leave? He left
He got money, he cared not how,
His money is here. Where

...uccess—of what does it consist? ...says it is "the favorable termina- ...issue." But that leaves us to de- ...what is that coveted goal. I would ...each this question, except for the ...which my topic permits.

...ve just passed another anni- ...of the birth of a man whose ...all the nation reveres, and ...reat hold upon our affections ... through admiration of his un- ...fidelity to the principles of truth and sincerity. We have recently had a forcible demonstration of what it is possible for a man with a conscience and a conviction to accomplish as the chief executive of our nation. And what has been possible and practical for men such as Lincoln in public life is no less possible or practical for us in private life.

I know of no other mercantile business in which confidence is such a factor as in the retail jewelry business. The customer is almost wholly dependent on the dealer, and he who would so bemean himself as to betray that confidence, is not only unworthy of further patronage, but forfeits his right to the respect of himself and his fellow men. But do I hear someone say such men are successful. That depends on what you call success. Listen, while I read for you what my friend Miller has to say along this line:

"'And he has won success,' you say?
What is it that you call success?
This thing we all long to possess,
How do you measure it, I pray?

"Does he love justice, honor truth,
Have trust in God and faith in man,
Bring peace and joy where'er he can,
And still retain the heart of youth?

"If thus his life is rounded out,
In harmony with all things true,
Tho' lowly tasks he still must do,
He has succeeded past all doubt.

"But if you count his wealth and fame,
And judge from them of his success,
Your measure fails, since power's excess
Too often veils a life of shame.

"He wins success, and only he,
Whose heart is loving, true and pure,
Whose faith is fixed serene and sure,
Whose life conforms to God's decree."

The will of the late Charles Kohler, Norristown, Pa., has been admitted to probate. It was executed June 20, 1903, and makes his widow his sole legatee and executrix.

The New Store of the A. A. Everts Co., Dallas, Tex.

ONE of the most magnificent jewelry stores to be found south of the Mason and Dixon line has been opened at the corner of Main and Murphy Sts., Dallas, Tex., directly opposite the beautiful Hotel Southland, by the A. A. Everts Co. This change was the third one made in 10 years, the firm having moved each time to a much larger home. The store is located on a corner and hence a more magnificent display can be made than in the former locations.

The new store measures 40x80 feet, with a ceiling 14 feet high, the latter being paneled in heavy Mosaic design. The center columns are what is termed as Cag-

THE SPACIOUS AND ATTRACTIVE NEW STORE OF THE A. A. EVERTS CO., DALLAS, TEX.

liolo, that is, an imitation of turquoise matrix. The floor is of white tiles with blue lines. Massive mahogany wall cases line the two sides, while numerous very heavy French plate-glass floor cases afford abundant display space for a fine grade of jewelry carried by the firm.

Very extensive purchases were recently made, increasing the stock on hand to $100,000, the new acquisitions including, particularly, diamonds and high-class jewelry. The working force has been almost doubled. The store caters to high-class trade only.

The concern has developed from a very humble beginning. The jewelry manufacturing department now has more space, the force in that department also having been increased. The means of preventing burglaries is a very unique one, the system being the one now adopted by the largest jewelers in the world.

W. M. Reed, formerly of Greenfield, Mass., has purchased a jewelry store in Montpelier, Vt.

THE CONNOISSEUR'S HANDBOOK.

Definitions of Some Technical Terms in Gold and Silver Smithing and Ceramics Alphabetically Arranged for Easy Reference.

By Clement W. Coumbe.

(Continued from issue of March 2.)

RA (Lat.). From the Greek *kithara.* ged instrument, invented (so the n) by Apollo. The *cithara* was n occasions of ceremony, such as games and processions; the *lyra,* a instrument and easier to hold, was mmonly used in ordinary life. The consisted of a sounding board which d into two arms or side pieces. The g board was of thin pieces of wood, f metal or ivory, was generally of a gular but sometimes of an oval nd was deeply vaulted at the back. s, which were broad, were hollow sounding board. As the instrument her heavy, and the player had to hile performing on it, it was gen- rovided with straps for supporting s to leave the player's hands free. *orminx,* generally regarded as an of Apollo, seems to have been a variety of the *cithara.*"—Seyffert. It m seven to 11 strings. (See *barbi-* a, etc.)

NCIEUX, or *Clarenceux.* "The title of the *Kings of Arms.*"—Robson. *erald's College.*)

CORD. (See *clarion.*)

ON, *claricord* or *clarichord* (her.). *rest* of a lance; the bearing is so from its fancied resemblance to the e musical instrument of that name. riously drawn. 2. A species of old- umpet having a shrill tone was so —Milbourne.

KE, Guillaume. A ceramist at Lille, the XVIII. century.

KE, Shaw & Cie. (pipeclay). Mon- XVIII. century.

P "(from *cleopan,* Saxon, to buckle race; or *gaspe,* Dutch, a buckle). useful adjunct, known to the Nor- s *fermail* and *agrafe*" (to both of refer), "the most elaborately orna- examples are to be found in national vate collections. Sometimes under ne of *ouche* or *nouche* it is con- d with the brooch or *fibula,* its use he same and differing only from the y hooking garments together in lieu ing them."—Planché.

PED (her.). Same as *conjoined* (to refer)

SISTIC PERIOD. The Scottish Adams brothers, in the middle of the XVIII. century created in England a style of ornament closely following the Pompeiian *motifs,* which were just being disclosed by the recent excavations. The period during which the "Adams" style was in vogue is often termed as "classistic." (See *Pompeiian.*)

CLAUSE, J. A. Berlin porcelain painter.

CLAVATE. "Club-shaped, tapering down from the top."—Mollett.

CLAVIS (Lat.). A key. "Locks were used in Egypt at an early period, and were originally of wood, probably like those now used in Egypt. * * * At a later time we find iron keys in Egypt, consisting of a long straight shank with three or more projecting teeth. * * * Schliemann found keys of copper and bronze in the remains of the cities in the Troad. * * * Many Roman *keys* have been found, much like

DOOR KEY AT POMPEII.

our own, the larger ones of iron, and the smaller ones of bronze; but there were also keys made of wood and gold in use in later times. * * * The street door was usually fastened inside by bolts (pessuli) and a bar (sera), but it also had a key which the *janitor* of the house kept. * * * In the annexed cut from Guld and Kroner a represents a ring key, b a lock with wards, for which a key of a complicated form must have been necessary, and c a ring with several small keys attached, which probably served to open jewel cases or other small cases."—Smith.

CLAW, The. A Delft pottery named De Klauw (the Claw) of the middle XVII. century.

CLECHÉE CROSS "spreads from the center towards the extremities, and then ends in an angle in the middle of the extremity, by lines drawn from the two points that make

CROSS CLECHÉE.

the breadth, till they join."—Robson.

CLEFFIUS, Lambertus (1667). A Delft potter of "De Metale Pot" (The Metal Pot) pottery. He claimed he discovered how to make porcelain, but none such of his is known. A characteristic in his work is an outline in deeper shade of the same color as the design. "L. C." is his monogram.

CLEMENTE, Vincent. A painter ceramist at Rouen, XVIII. century.

CLEOMENES. A sculptor at Athens in the Augustan age. "The celebrated Venus di Medici, now at Florence, is his work. (He is described on the pedestal as son of Apollodorus. The Germanicus of the Louvre was the work of his son, who bore the same name)."—Seyffert.

CLEPSYDRA (Gr. *klepsydra*). "A water-clock, or earthen ware vessel, filled with water, and having a hole in the bottom of a size to insure the water running away within a definite space of time. Such water-clocks were used in the Athenian law courts to mark the time allotted to the speakers. They were first introduced into Rome in 159 B. C."—Seyffert. (See also *gnomen.*)

CLERISSY, A. A potter of this name is recorded in the XVII. century archives of Marseilles, and appears on the oldest specimen of Marseilles pottery—"a dish, with a lion hunt in the center, after Tempesta, surrounded by a border of Oriental style."

CLERISSY, A. The earliest faience pottery at Marseilles was that of this A. Clerissy. So far as is known he had no family connection with his contemporary of this name at Moustiers. A piece of his is dated Marseilles, 1697.

CLERISSY, Pierre. Son of the first faience maker of Moustiers. He succeeded his father and made an equal success of the pottery and output. In collaboration with J. B. Viry (son of G. Viry, the clever ceramist) he produced very fine pieces of faience. His works extend from 1686 to 1728.

CLERMONT-EN-ARGONNE (France). "All we know of this (faience) establishment is that it was still working in 1791."—Jacquemart.

CLEWS. A potter at Warburton in the XVIII. century.

There are no other lines in the market that are more particularly adapted for the Jewelry trade than

... of the nine Muses (see ... e Greek goddess presiding over

CLIO.

... posthumous fame. She is usu... in art as with book and trum... reath is of laurel.

... or *clipeum*, or *clypeus* (Lat.)

CLIPEUS.

... oman) broad shield of circular ... ncave on the inside. It was of great weight and formed part of the special equipment of the cavalry. The original *clipens Argolicus* was circular, and often likened to the sun; in Roman sculpture it is often oval. The outer rim was termed *antyx* (to which refer), the boss in the center *omphalos* or *umbo*, a leather strap for the arm *telamon*. It was replaced subsequently by the *scutum* (to which refer)."—Mollett.

CLITIAS. An ancient Greek artist. The celebrated François vase now at Florence was decorated by him.

"CLOBBER WARE." Chinese porcelain imported to Europe and then re decorated.

CLOISONNÉ (Fr.). The process of building up "cells" (*cloisons*) on a surface, to be filled with enamel. The *cloisons* are produced by soldering on strips of metal, or wire, shaped into outlines of the design. Usually this form of decoration is employed on metallic objects, but the Japanese practice cloisonné enameling on pottery also.

CLOISONNÉ faience is produced by outlining the design with a lusterless oxide which checks the fused glaze from passing over it. Thus the different colors are kept divided clearly. Introduced by Collinot, continued by Deck and Parvillée, of Paris. Mélun and Longwy use this method very effectively.—Vors.

CLOSE (her.). "1. A term borrowed from the French word *clos*. In heraldry the word is used to express the wings of an eagle, falcon, kite, swallow, etc., being kept close to the body, but must not be applied to the peacock, dung-hill cock or any bird not addicted to flight. 2. The vizor of the helmet is termed *close* when it is down."—Robson.

CLOSE & Co. Owned a pottery at Hanley, Staffordshire, in the XVIII. century.

CLOSE-GIRT (her.). "Said of figures habited, whose clothes are tied about the middle."—Robson.

CLOSET (French *burelle*). In heraldry a diminutive of the *bar*, being half its width."—Milbourne.

CLOUÉ (Fr.). Heraldic term meaning "studded with nails."—Milbourne.

CLUDEN (Gr. and Lat.). "A sword, the blade of which was contrived to recede into the handle. It was used for theatrical representations."—Mollett.

CLUNACULUM (Lat.). 1. "A dagger so called because it was worn at the back. 2. The sacrificial knife with which the victim was ripped up. The dagger represented

CLUNACULUM.

herewith, taken from the arch of Carpentras, was probably a Gaulish *clunaculum*."—Mollett.

CLUSTERED COLUMN. An architectural column divided into numerous slender columns separate or in relief. Sometimes called a *compound pier*. The engraving represents an example taken from Wells

CLUSTERED COLUMN.

Cathedral. *Clustered columns* were very popular in the Middle Ages.

CLYMANT (her.). A term "applied to the goat, when standing on the hind legs."—Robson. (See *salient.*)

CLYPEATE (from Latin *clypeus*, or *clipeus*, a shield). A shield-shaped form. (See *scutate.*)

CMIELOW. "A porcelain marked 'Cm.' emanates from the Russian location of that name around 1790. Unfavorable political and commercial conditions made the undertaking unprofitable."—Bucher.

CNEMIDES (Gr.). "The greaves or leg armor used by the ancient Greeks. They are leggings formed of a pewter-like metal, which covered the lower limbs down to the instep, and they were fastened by clasps. * * * Homer designates them as 'flexible,' and he frequently speaks of the Greek soldiery as being well equipped with this important defense—not only, that is, well provided with greaves, but also having them so well formed and adjusted that they would protect the limbs of the warrior without in any degree affecting his freedom of movement and action."—Lacombe. The Greek greaves at a later period were made of bronze and required no clasps.

CNIDUS. A location in ancient Greece noted for its pottery clay.

COAT-OF-ARMS, or *coat-armor*. "This term was applied to every variety of military garment embroidered with the armorial ensign of the wearer, whether the surcoat of the XIII., the jupon of the XIV., or the

COAT-OF-ARMS: TABARD OF WILLIAM FYNDERNE, 1441 A.D.

tabard of the XV. centuries."—Planche. "A complete heraldic composition."—Milbourne. (See *surcoat, jupon, tabard.*)

(To be continued.)

The building occupied by J. F. Jacobs, West Unity, O., has been sold, and the jeweler will soon move into new quarters.

...SER:—Celluloid watch glasses have ...n made the subject of application ...t protection in Germany, according ...*eutsche Uhrmacher-Zeitung*. But ... other directions the priority of ...ation is disputed. As a matter of ...ral months ago a correspondent in ...y box" of the above paper adver- ...t he would supply hunting watch ...f celluloid. It is therefore doubt- ...wther the design patent can be ...ypheld. In addition to this it is a ...own fact that for many years "cellu- ...h glasses" have been employed in ...ective watch cases. This might fur- ...ather basis which in case of an at- ...uld nullify the protection of the de- ...fent. In other respects, too, our ...nt in regard to this celluloid watch ...ust be governed with special care, ...n the above paper. In the first case ... said to be suited to replace the ...n cheap gold hunting watches with ...n spring lids. It would here ap- ...rs as by no means uncertain that the ...celluloid plate would bend much easier ... thin spring lid. In consequence ...a watch provided with a "glass" of ...racter is liable, while in the pocket, ...ected with interference of the hands ...y be the cause of the watch quite ...tly running behind. In addition, it ... considered that nearly all celluloid ...ai traces of acid that will cause the ...in of steel parts in its vicinity, whereas ...s rts will become coated with verdi- ... would, therefore, appear advisable to subject a cheap watch to a prolonged test with such a glass before running the risk of spoiling a fine watch with it. Another objection would be the great inflammability of celluloid.

QUESTION No. 2435.—**Steel Gray on Copper.**—*How can I prepare copper tubing so it will have a steel gray color?* *S. G.*

ANSWER:—To steel gray copper tubing, or any copper alloy, prepare a staining solution with 1,000 parts hydrochloric acid and 125 parts nitric acid; dissolve in the mixture 42.5 parts of arsenic, and, finally, add very gradually 42.5 parts of iron filings. The articles should be treated, if copper alloys or castings, by first scrubbing them clean in warm water, and then, without touching them again with the fingers, suspending in the stain for about five minutes, or long enough to obtain the desired gray. Tubing is treated in the same manner, but will have an evener appearance if polished clean with fine emery paper on the lathe and then immersed directly into the stain. After graying wipe off with soft cloths and cover with a colorless lacquer.

QUESTION No. 2436.—**Silver Polish.**—*How can silver be polished if it is not tarnished very much?* *S. P.*

ANSWER:—One of the best ingredients for polishing silver is precipitated chalk. It is important that the chalk be very fine and free from grit. Mix the chalk with alcohol into a thin paste, and apply this with a soft brush in a thin layer over the article. Before the paste is dry, rub the polished surface with a soft cloth, brush the repoussé, then follow with a stiffer brush and finish the plain parts with a clean soft cloth. After the polishing the pieces should be washed in soap suds, to which is added a little ammonia; rinse off in cold water, then dip into clean boiling water and wipe dry with a soft towel. A weekly washing with strong soap suds and a little ammonia will usually keep silver bright and clean in the home.

QUESTION No. 2437.—**Cracked Knives from Plating.**—*We silver plate many table knives, and had good success until recently, when the blades began to crack to such an extent that we really lose about one-tenth of the knives. We have examined the blades carefully, but failed to find any bad ones. In spite of this the blades will crack. Can you explain the reason of this?* *C. & K.*

ANSWER:—The knives crack on account of excess of cyanide in the silver solution. The blades were probably hardened with the use of cyanide, and one of the peculiarities of this hardened steel is the action of the electric current. With an excess of cyanide in the solution a still harder and more brittle effect is produced on the steel blades, causing them to snap at the thin parts. To overcome this trouble, use the solution as low in cyanide as possible and a stronger electric current.

QUESTION No. 2438.—**Matting Aluminum.**—*How can I matt or frost aluminum cards?* *M. A.*

ANSWER:—Matting aluminum can be done by making a strong soda lye solution. Bring it to nearly boiling, then immerse the object until gas bubbles form copiously on its surface. Rinse in cold water, then put it in strong nitric acid and rinse again. The aluminum will, by this means, be given the appearance of matt or frosted silver. If there is any grease or oil on the aluminum wash it off with gasoline or benzine before attempting to frost it.

QUESTION No. 2439.—**Soldering Platinum.**—*Kindly inform me how I can solder platinum. I have tried several ways, but without success.* *S. P.*

ANSWER:—Platinum is very difficult to solder, and can be done with platinum solder only by those of much experience. Where two edges of platinum are to be joined it is best to solder gold solder to the edges. Then sweat them together with the blowpipe. Another method is to join the parts together, using the oxyhydrogen blow pipe or its equivalent melting flame, and melt the joining parts so they will run together, and while still hot weld the seam with the hammer. The *Central Zeitung für Optik und Mechanik* recommends that the platinum parts be placed in position and the cracks filled with platinum powder and turpentine oil; then heat the joint to a white glow, and in this condition hammer the parts together. Still another method, applicable where the crack is on the edge, consists in hanging a narrow strip of platinum sheet over the crack, placing the article in the fire, heating it white hot, and then hammering, if necessary. According to the *Metal-Arbeiter* a small hole may be closed by a rivet made of platinum wire and welded after hammering both heads together. Platinum acid vessels that become leaky are often repaired by riveting on platinum patches, using platinum wire for rivets. The operation is similar to that for making steam boiler repairs.

QUESTION No. 2440. — **Cement for Mother-of-Pearl.**—*How can I make a good cement for mending mother-of-pearl?* *C. F.*

ANSWER:—A cement for mother-of-pearl is made by dissolving broken and beaten isinglass, two parts, in 16 parts water. This requires about 24 hours to dissolve. After this the mass is reduced by evaporation to one-half, to which is added eight parts alcohol. The whole is strained through linen. While still fluid, stir in one part mastic dissolved and six parts alcohol, and one-half part of salammoniac. Then stir well together. The parts to be cemented should be warmed before applying the cement. It will require from six to eight hours for the cement to harden.

R. E. Schubart, Wheeling, W. Va., has left for a pleasure trip to Florida.

A Complaint and an Explanatio

Mr. C. O. Snyder, a well-known and experienced watchmaker and jeweler of Bloomville, Ohio, complained to the Fulcrum Oil Co. that he was not getting good results from

Fulcrum Watch and Clock Oil

The nature of the complaint indicated that he was using too much oil. An explanation of this fact was communicated to him, and here is his answer, dated Feb. 19, 1910:

"Your explanation is satislactory, lor I had diagnosed the trouble belore hearing from you. I had been using the same amount as I did with the old ---- and ---- oils (mentioning two old well-known brands), **but I reduced the quantity and the results are marvelous.**

"Escapements that have been sluggish, have with the new FULCRUM OIL taken on new lite, and it seems a pleasure to put a watch in order with this oil."

This is just one of the many letters received every day telling of the superiority of FULCRUM OIL to any that has ever before been used for watches and clocks.

Try it once and see for yourself—it means an end to all your oil troubles.

WHY

we are able to pay more for your old gold, silver, plated jewelry and platinum, sweeps, etc., than you have been accustomed to receive — we don't

GAMBLE

on valuations — we have been in the smelting and refining business for over fifty years, and stand to-day with practically no competition. We pay the highest market prices

ON

Gold, Silver and Platinum found in your waste as ascertained by the most expert corps of assayers in the United States, and in addition make a special allowance for so-called by-products for which you have never heretofore been paid. Our

RESULTS

have always been greater than expected, as our splendid record shows, and if you fail to label your next shipment

GOLDSMITH BROS. S. & R. CO.

20 JOHN STREET - - NEW YORK

we will both be losing money. Our profits are contained in the moderate charge we make for working the material, which our wonderful facilities bring down to a very small percentage. We

GUARANTEE

that you will be more than agreeably surprised by our offer if given a trial, but if by the most remote possibility it should not be quite to your

SATISFACTION

we will gladly return your shipment in same condition as received with all charges prepaid.

A 10-KARAT LINE THAT IS 10-KARAT

The Keller Jewelry Mfg. Co.

TO THE TRADE:

"A principle which we have always fought for has been to keep the market open for all watch cases, no matter of what manufacture, believing it to be for the best interests of the trade to allow them to buy the watch cases which they consider the best on the market and by so doing stimulate all manufacturers to their best efforts, with a view of establishing a high standard of excellence. The Dueber Watch Case Mfg. Co. in all its many years of existence has never sought to dictate to any jobber what watch cases he should use. It has never used, directly or indirectly, any method of coercion or force to either restrict the product of any watch case manufacturer, or to force the production of its cases upon any wholesale or retail jeweler to the detriment of any other manufacturer of watch cases. It employs the 'open door' policy in selling merchandise and believes that the trade should be open to all manufacturers and jewelers alike and to that end will bring all its energy to bear for the good of the entire trade."

F. A. Copeland's Store

ELGIN, ILLINOIS

(COPY OF ORIGINAL LETTER)

Elgin, Ill., Dec. 26th, 1909.

The Arnstine Bros. Co.,
Cleveland, Ohio.

Gentlemen:—

In regard to my December business, will say, I could not wait on all the people that came in the store to trade. I did between $2500 and $3000 more this year than last in December, or up to date.

Am very happy over my success, and congratulate the Arnstine Co. for their growing service to me.

Very truly,
F. A. COPELAND.

SEAMLESS GOLD-FILLED RINGS

RESENT SLEDGE HAMMER METHODS

BLACKSMITHS should have a monopoly of the Sledge Hammer; it is out of place in the jewelry trade.

The hammer is a good instrument for driving a spike, but a poor one for driving a Man. In fact men—real MEN—refuse to be driven at all. They *resent coercion.*

This Company approaches the trade in a totally different attitude. In selling

Wadsworth Watch Cases

the appeal is made simply to the Good Judgment, the Natural Requirements and the Best Interests of dealers. In a word, the keynote is MERIT. And it is the trade's appreciation of this that spells Success!

Such being the case, the business enjoys a HEALTHY growth, an HONORABLE growth and a STEADY growth—without the Sledge Hammer.

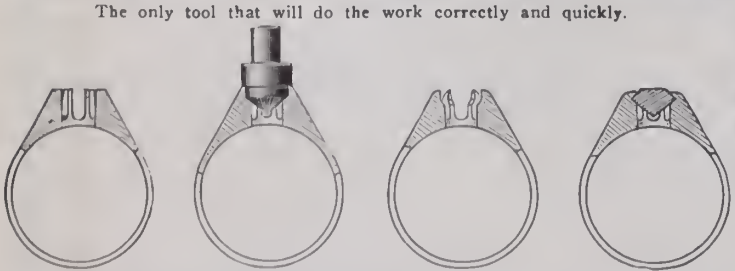
ECHARCO IMPROVED WATCH GLASS CABINET, No. 8

The NEW FEATURES of this Cabinet are the SKELE DRAWERS, making an accumulation of dust and chips impos and the very easily read LABELS of white celluloid on the d fronts. The Cabinet has nine drawers, giving 1,632 spaces. 29½" high, 24" wide and 13" deep. The construction of dra arrangement of partitions to economize space and weight, an novel method of showing contents on the drawer pulls are all and practical ideas and very well carried out. The Cabinet is of oak and finely finished, and is the lightest and strongest ca the market. Spaces are provided for the small sizes of Le and Genevas, and for Antiques, which no other Cabinet pr for, making it the most complete and convenient Cabinet ever o to the trade.

Price, $16.00

PEGWOOD SHARPENER, No.

A new attachment, designed for use on a watchmaker's which sharpens pegwood to a hair point without breaking, the same time gives the point the proper concave shape. Th is held in the lathe by an arbor fitting into a regular wire ch shown in the illustration, being steadied by the rest shown stick of pegwood is rotated by hand while the tool is revol the lathe, producing a fine, long, flexible point. With this to watchmaker can prepare enough pegwood for a day's or a work in a few moments, and have every piece uniformly and sharpened.



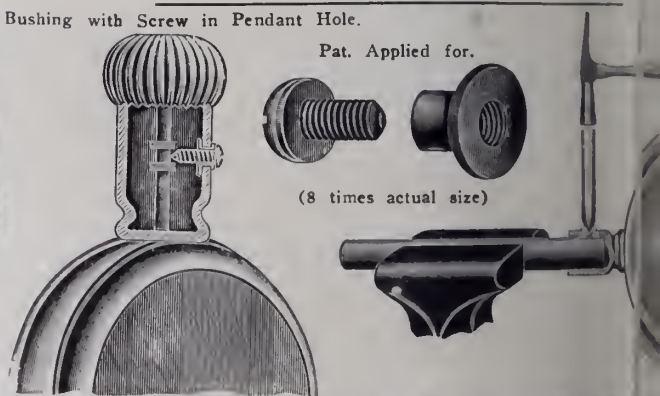
The tool is mechanically perfect, made of the best mate durable and cannot get out of order. For sharpening the cutte use of a fine Arkansas oil stone slip is necessary. Coarser ab should not be used.

Price, each, $2.00

DIAMOND AND STONE SETTING TOOL No. 85 (Pat. Applied for)

The only tool that will do the work correctly and quickly.

These tools, invented by a stone setter of many years' experience, will do the work they are intended for with absolute perfection, whether in the hands of an experienced or inexperienced workman. In eight seconds after adjustment in lathe will cut a smooth seat for any stone from 1/16 to 2 carats.



Tools are made of polished and hardened steel and are indestructible. Will fit in chucks Nos. 30 and 44.

The greatest labor saving device ever invented in the line of stone setting cutters. Put up in neat block and box.

Price, Per Set, $5.50

Bushing with Screw in Pendant Hole.

Pat. Applied for.

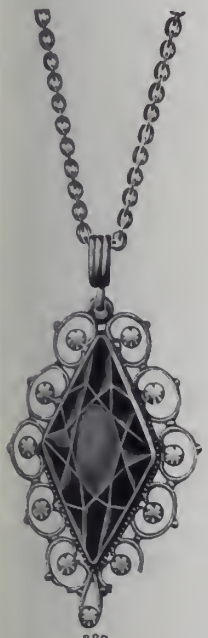
(8 times actual size)

THREADED PENDANT SCREW HOLE BUSHING, No. 3

Made in Brass for 18, 16, 6 and 0s Lever Set Cases, and in German Sil 2, 3, 4 and 5 oz. cases

Cut shows watch case pendant with pendant screw hole b inserted and also screw, and shows repair as it looks when comp

DIRECTIONS.—Ream hole to size of bushing, then place ant screw bushing in hole and place pendant with bushing on as illustrated above, and with a centering punch force ov edge of bushing and then put in screw and repair is made.



No need of soldering up or plugging up of damaged p screw holes and damaging the pendant and case as well.

Every watchmaker knows how difficult it is to repair a p screw hole after the screw is pulled out, due to bending and of the screws. This outfit makes a quick and good job.

Put up 1 dozen assorted Bushings and 1 dozen ass Screws to match in a Brass Box.....

STERLING SILVER INLAID
BACK OF BOWL AND HANDLE
"SOLID SILVER WHERE IT WEARS."

WHAT STERLING SILVER INLAID IS

At the Back of the Bowl and Handle where the goods wear on the table, a cavity is hollowed out and a block of Sterling Silver is Inlaid. The goods are then finished to the correct form, polished and then Heavily Electro-Plated throughout.

RESULT: Should the silver plate wear off at these places there would be NO WORN SPOTS, because the plate is SOLID SILVER WHERE IT WEARS.

1000 BAGS DAILY

It is estimated that there are fifty million women in the United States. Not over two millior have mesh bags. **We** must supply the other forty-eight million with machine-made mesh bags

The reason why machine-made Mesh Bags are better than hand-made Mesh Bags is

that we use **much harder wire** than used on hand-made bags, and machines harden it stil more in working, making wire **stiff and strong,** no **rough joints to catch,** and wear the dress Stronger and better than soldered mesh.

We also make the only **ABSOLUTELY SOLDERLESS FRAME EVER MADE,** othe **so-called solderless** frames have joints or some parts soldered.

We are the **sole** manufacturers of machine-made mesh with **solderless** frames.

The Krementz Collar Button

has become recognized as the leader, because it never disappoints. When a man who wants the best needs a collar button, he naturally asks for the **KREMENTZ,** and looks on the back for the name to see that he is getting the genuine. He would be suspicious of the dealer who attempted to offer him a substitute — claiming it is just as good — for there is no other collar button that equals the **KREMENTZ** in durability, in perfection of finish or in quality.

KREMENTZ COLLAR BUTTONS always assay up to the quality indicated by the stamp on the back of the button.

The Krementz Rolled Plate Collar Buttons

are made from a sheet of metal gold rolled upon — sweated, not soldered — on the composition base to form the plate of metal from which the buttons are made. Saw a **KREMENTZ ROLLED PLATE BUTTON** in half, drop it in nitric acid to dissolve away the backing. A thin shell of metal gold, strong enough to be lifted and handled, will be left. With any other plated collar button you will get but a few scraps of formless gold. We'll pay the cost of the buttons you use to make the test — for it will prove to you that **Krementz Rolled Plate Collar Buttons** will outwear any other plated button made.

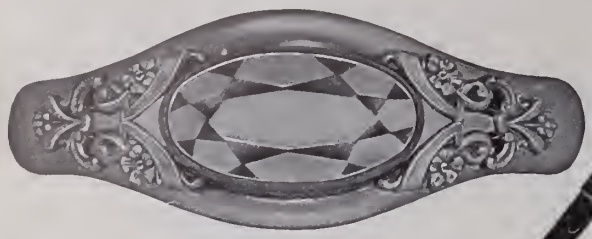
NEW MEDALLION PENDANTS



THE FUTURE NECKLACE

THE RESPONSE to the recent announcement of Medallion Neck Pendants introduced by this house, was so instant and appreciative as to justify further extensive developments of notable Cartier ideas. In these latest examples the diversity of effects is nothing short of infinite. A pleasing conceit is to have the metal colored to match the stone. At the same time Sapphire or Coral with French Grey continues strongly in favor. Conditions warrant the assertion that the Medallion Neck Pendant is pre-eminently the *necklace of the future.*

THE HOROLOGICAL REVIEW
THE JEWELERS' WEEKLY — THE JEWELERS REVIEW

X. WEDNESDAY, MARCH 23, 1910. No. 8.

The Crown Jewels of Various Nations.

By Charles A. Brassler.

of the earliest evidences of the sition of a people from barbarism ate of civilization is their recog- a settled form of government and er to whom, under various titles, rendered homage and manifested

only to be expected that they esire the distinction of this leader, is fellows, by some badge or sym- re-eminence, and as a result we appearance among the earliest peoples of insignia of rank. At mple chaplet of leaves or flowers, lain circlet of gold, until, by pro- development, we arrived at the ly wrought crowns of precious iten set with rare gems, some of ave been fortunately preserved to hidden treasures that accident or research has brought to light.

rst crown jewels on record were rely marks of distinction, often as- owing to their origin, their form ceremonies incident to their in- t, with a more or less sacred char- r, id in some instances their posses- s associated with the exercise of n rights, so that their loss was re- as a national calamity. With the nent of art and the manual dex- the goldsmith they became more e in character, while foreign inter- and the skill of the lapidary, lent hment in the shape of precious hat greatly increased their beauty r intrinsic value. With the world's ment in wealth and luxury, their haracter steadily grew, until their and value came to be recognized native, to some extent, of the mag- and importance of the owner, and vn jewels" they came to be recog- s something apart from the per- of the incumbent—a national prop- t was the hereditary emblem of the be handed down by the ruler to essor, actual ownership being vested tate.

asy to understand that under these ances each successive ruler took a amount of pride in passing on to essor as fine a collection as possible royal ornaments, the "crown jew- they were called, and in this he e encouraged by the fact that they most cases either gifts from subjects or vassals or were pur- from state funds set apart for this

here was another and a more subtle for the increase in number and value of these costly jewels: they consti tuted a conveniently portable property, a convertible resource and investment at the ruler's command, which, in the event of revolutionary vicissitudes such as history not infrequently recounts, were readily transportable and convertible, formed, so to say, an "anchor to windward" that would serve to tide them over a financial crisis, as they have found on various occasions.

Nor must the patriotic service the crown

KING EDWARD WEARING SOME CROWN JEWELS.

jewels have on more than one occasion been able to render be overlooked; how often have we not heard of their being pledged to furnish the sinews of war, for the defense of a nation? And they even have their utilitarian side, as witness the pledging of the royal jewels by Isabella of Spain to supply the equipment for the voyage of Columbus in search of the New World. We have even heard of their being hypothecated to furnish the means for scientific research or more prosaic industrial experiments, as for instance in the perfection of the manufacture of porcelain, etc.

In the present paper, however, it is rather our intention to consider the intrinsic value of these national heirlooms, as of present record, some of them, apart from the historical or artistic inter st that attaches to them, being of great material value.

As probably most immediately interesting to the public generally, because of the pending dispute as to whom their ownership is really vested in, that is, whether they belong to the late occupant of the throne in person by right of inheritance, or to the nation, and were only held by him in trust and as appanage to his exalted position, as well as by reason of their great value, are the crown jewels of Persia, the inventory of which, recently completed, confirms their enormous value and explains why the ex-Shah is so anxious to possess them. One of the favorite gems of the occupants of the Persian throne and the numerous and expensive ladies of their household has always been pearls, which are found in the waters adjacent to the country as well as in its rivers. A part of the collection the deposed Shah unwillingly abandoned when he abdicated consists of pearls of the finest quality which fill half of a glass case two feet long by one foot six inches wide and also deep. In addition, there is an endless profusion of gem-studded ornaments, jewels, articles of clothing, arms, saddlery and even furniture. On the occasion of his visits to the European capitals, the Shah was invariably ablaze with gems with which his clothes, his horse trappings, etc., were profusely embroidered, while the famous diamond aigrette that adorned his astrakhan fez was truly worth a king's ransom.

Inasmuch as these jewels are worth many millions—a fortune in themselves—it will readily be understood that the deposed monarch, who, according to all accounts, has not been prudent enough to make a very big saving, would be very glad to claim them as his personal property, but this the present rulers will not hear of, and such of it as escapes their personal rapacity is likely to be thrown on the market for the benefit of the national revenues. The ex-Shah has already acknowledged the national right of ownership in the most valuable item in the collection, the famous diamond "Darya-i-noor," the "sea of light," and it is probable that his claims on the remainder of the collection will receive scant consideration. Concerning this great diamond, Sir John Malcolm, representative of the East India Co., described it as the world's most valuable precious stone. It was then set, together with a smaller stone, as the decoration of a pair of bracelets, which at Sir John's time, fully 100 years ago, were valued at a million pounds. Since then, however, the value of diamonds has so greatly increased that to-day the "sea of light" alone would possess this value.

The "sea of light" may be referred to as a brother of the famous Koh-i-noor, the "mountain of light," now included in the crown jewels of Great Britain. But it is larger than the latter, weighing 186 carats. The Koh i noor was of the same size, but since recutting it weighs only 106 carats. At one time the "sea of light," with the

TALKS ABOUT TRADE-MARKS

NUMBER THREE

Construction is an Important Factor in Trade-Marked Jewelry

Abraham Lincoln said "You can fool all of the people some of the time, and some of the people all of the time, but you can't fool all of the people all the time."

These words are well applied to gold jewelry. At one time dishonest manufacturers made gold jewelry one quality and stamped it another, but now the National Stamping Law eliminates this practice.

Being compelled to use the exact quality of gold they stamp their products, the methods now used to deceive the public and undersell honest-made jewelry are cheap unskilled labor—light weight—frail construction and poor finish, hence they do not dare to be held responsible if their products prove unsatisfactory and therefore do not use a TRADE MARK.

Our Rings, Lockets, Sleeve Buttons, Shirt Studs, Tie Clasps and Vest Buttons are all stamped with the QUALITY MARK and our U. S. REGISTERED TRADE-MARK, which means we guarantee the QUALITY, WORKMANSHIP and CONSTRUCTION. The FINISH speaks for itself.

jewels of another recently deposed
rch, the formerly so powerful Sul-
f Turkey, which we may state casu-
mount in value to about $18,750,000
es, emeralds in enormous quantities
he most widely different shades, tur-
es and diamonds, filled numerous
s, chests and boxes of the former
ital potentate, who, like all well-to-do
ntals, found great pleasure in playing
the glittering gems during his many
e hours. Anyone who enjoyed the
ege of a glimpse into these treasure
s of this former ruler of the Osman-
tted as they were with the choicest
most costly oriental magnificence, might
ly imagine themselves transported into
abulous realms of the "Thousand and
Nights." There was a cradle of pure
wn with rubies, diamonds and
s. Costly weapons, as yateghans, dag-
battleaxes and oval and octagonal
ds, such as were borne by the high
als in the bloody Turkish wars, richly
ed with brilliants and precious stones,
hidden in the Osmanli treasure cham-
also ancient silver and gold coins to
umber of tens of thousands of pieces,
which treasures are supposed to have
fallen into the hands of the "Young Turk's" party. In the Yildis Kiosk, too, is a gold model of a ship, the windows of which are sapphires, the signal lamps on the masts large diamonds, and the anchor cables ropes of pearls.

The personal jewels of Abdul Hamid have recently been appraised by a French jeweler, who fixed their total value at 3,000,000 francs. Besides the necklaces, which are a present of the Czar, a snuff box of gold and diamonds is worthy of mention, but the stones are not perfect. The box is a gift of the German emperor. There are also four costly diadems, four valuable opera glasses and 15 narghiles or water pipes studded with precious stones. Lists of these treasures, in various languages, have been sent all over the world to insure a large attendance at the coming sale.

A batch of unredeemed crown jewels, valued at 1,000,000 francs, which the former Sultan of Morocco, Abd-el Aziz, pawned at the Mont de Piété in Paris for 1,500,000 francs, were supposed to be sold at secret auction in that city, as they are of such an erotic nature that they cannot be publicly exhibited. At the last hour, however, an agent of the former Sultan made arrangements with the holders to prevent the sale.

Another famous royal jewel is the string of pearls of the Dowager Queen of Portugal. The unfortunate ex-queen is the owner of a beautiful string of pearls, valued at $1,300,000, which has excited the cupidity of the republican element in the kingdom. During his reign King Carlos on each birthday of Queen Amelia, who had a love for pearls, added to this costly string. Since the assassination of King Carlos the queen dowager has never worn the jewels, but according to all accounts has sent them to England to forestall any attempt at their seizure. The republicans claim that these pearls are part of the crown jewels and demand their possession for the benefit of the depleted treasury. The string consists of several hundred of the finest pearls, formed during the past 30 years, off the coast of Ceylon.

Incalculably valuable crown jewels in precious stones, jewels, pearls, brilliants, silver and gold ornaments are owned by the British crown, English history, so often sanguinary, having many conquests to its credit, while the colonial policy for centuries has continually helped to increase the crown treasure. They are kept in the grim old Tower of London, in an inner jewel chamber, where they occupy a large case, with a double walled iron cage and heavy plate glass panels. Several companies of the guards are constantly on duty at the Tower, while in addition to the quaintly costumed "beef eaters," into which the "buffetiers" of King Henry VIII. time are transformed, there are watchful Scotland Yard police on duty in the jewel chamber night and day.

The magnificent crown worn by Queen Alexandra at her coronation, and made in 1840 for Queen Victoria by a famous London jeweler, glitters in celestial brilliance with its 2,800 diamonds of the finest and rarest quality. The intrinsic value of this crown is priced to-day by experts at $750,000. Noticeable among the English crown jewels is the historically famous diamond, the Koh-i-noor, the value of which is figured at $1,250,000 and the place of origin of which is India. The real diamond is safely kept in a well guarded treasure vault at the Royal castle at Windsor, whereas an excellent imitation is kept with the other crown jewels in the Tower of London and exhibited as the genuine to wondering strangers. *Mundus vult decipi.*

Although times are different nowadays, there have been in the past good reason for such a precaution. During the stormy period of the great rebellion in England, that terminated with the execution of Charles I. and the elevation to the supreme position in England of Oliver Cromwell, it was only by subterfuge that the sacrifice of the crown jewels to the greedy, fanatical zealots was avoided by Cromwell, and the restoration of the Stuarts witnessed a daring attempt to steal them. One Col. Thomas Blood, an Irish adventurer of desperate character, in the disguise of a doctor got into the Tower and beat almost to death the custodian of the crown jewels, which it was believed he intended to steal with the connivance of the dissolute king, Charles II., of whom he had been an associate, and who was to share in the proceeds of the robbery as a means of continuing his debaucheries. Blood was captured a short distance from the Tower, with the royal crown concealed under his cloak, and having been duly tortured to extort a confession, was executed. His was the last attempt to steal the jewels, although during the London riots in 1780 only the knowledge of the presence of a strong garrison in the Tower served to protect them from attack.

To the collection, which includes crowns, etc., dating from Alfred the Great, in the ninth century, there has lately been added a gift from the people of the Transvaal colony to King Edward in recognition of the justice with which they had been treated subsequent to the Boer War, the famous Cullinan diamond, the largest, as it is the most valuable diamond in the world. The 10 brilliants into which the original stone was separated in the cutting are of such clearness and brilliancy that their value may be placed at $5,000,000. The Transvaal government bought the stone in Cape Colony for $750,000. The finest of the diamonds weighs 515½ carats, and this will in future adorn the royal crown. The second largest stone, of 308¾ carats, will be set in the sceptre. At those court festivities where the crown is not used, the Queen of England will wear the Cullinan diamond. It has been put in the crown in such a manner that it can be easily removed and worn by a lady. The crown and the diamond were taken to Buckingham Palace some time ago, and there the king discussed this question with the Lord Chamberlain and the representative of the court jewelers' firm who set the stone in the crown. It is reported that the king decided for this plan to show the Transvaal how much he valued this gift, by making it possible that the gigantic diamond could be used more frequently than would have been the case if it had remained merely in the crown. In its rough state, the Cullinan weighed 3,015 carats. The "chips" split from the rough

World Gold Production.

ACCORDING to the *Engineering and Mining Journal*, the gold producing countries in 1909 not only kept up the great output of recent years, but again increased it in a marked degree, the amount being about $15,000,000 over 1908.

Beginning with the Australian and Californian mining activities the world gold output in 1849 was $27,100,000; in 1850, $44,450,000; in 1851, $67,600,000, and in 1852, $135,150,000. A zenith of production —$161,250,00—was reached in 1856, not again attained for 38 years. In 1896, the year of the free coinage of silver agitation in the United States, the world output of gold was $202,251,000, the production rapidly advancing to the large sum of $306,724,000 in 1899.

The *Engineering and Mining Journal* says that most of the gold mining companies last year increased their returns by opening new mines, by intensive working of old ones, or by closer recovery of metal from the ores—in some cases by a conjunction of all three methods.

For a series of years the gold production of the three great gold producing countries has been as follows, in values:

Year.	United States.	Africa	Australasia.	All countries.
1909	*a* $96,500,000	$168,830,000	$71,980,000	$457,567,000
1908	94,560,000	166,520,000	73,327,000	411,932,000
1907	90,437,700	160,072,000	76,906,000	401,804,000
1906	94,374,000	140,361,000	83,406,000	400,126,000
1905	88,180,000	116,695,000	85,926,000	377,135,000
1904	80,723,000	85,519,000	87,767,000	347,087,000
1903	73,591,000	67,998,000	89,210,000	327,702,000
1902	80,000,000	39,023,000	81,578,000	296,737,000
1901	78,666,000	9,089,000	76,880,000	262,493,000
1900	79,171,000	8,672,000	73,498,000	254,556,000
1899	71,053,000	73,023,000	79,321,000	306,724,000
1898	64,463,000	80,128,000	61,860,000	286,859,000
1897	57,363,000	58,558,000	52,665,000	236,077,000
1896	53,088,000	45,185,000	44,107,000	202,251,000
1895	46,610,000	44,798,000	44,554,000	199,301,000
1894	39,500,000	41,760,000	40,271,000	181,175,000

a An advance estimate of the United States Mint gives the gold production of this country as $99,232,200 in 1909.

SALE OF

Chester Billings & Son's

ENTIRE STOCK

Having purchased the stock of Chester Billings & Son, and as we are not retailers, and do not intend to enter the retail jewelry business, we offer the trade an opportunity to purchase the diamonds, pearls, emeralds, pearl necklaces, rubies, sapphires, mounted pieces and such other goods as go to make up the stock of an old established concern that has catered for years to the very best of trade. We have only 60 days in which to dispose of these goods, and will sell in large or small lots at sacrifice prices.

As the best pieces will be selected first, we can but remind you of the old adage "First come, first served."

We wish to repeat again that we are not in the retail business, and that we purchased this complete stock for the simple reason that it appealed to us as merchants, and from a purely business standpoint, and you can reap the benefit of a quick turn at small profit.

Bruhl Bros. & Henius Co.

Court Suspends for 30 Days Injunction Granted to Gorham Mfg. Co. against F. & M. Weintraub.

A preliminary injunction obtained by Gorham Mfg. Co. early last month against F. & M. Weintraub in the suit over the use of the former's trade-mark has been suspended for 30 days by Judge Lacombe in the United States Circuit Court. This result because of an error made by the Gorham Co and its attorneys in publishing the text of the decree of the court, including in this text the phrase "in combination with a lion, an anchor and the letter G," which had been stricken from the decree when granted by the court. The Gorham's counsel republished the decree in the advertisement in THE JEWELERS' CIRCULAR-WEEKLY March 9 in its corrected form, and called attention to the error in stating that his clients had been practically injured by the publication of the decree in its incorrect form, and that such publication was an abuse of process and a contempt of court, Benno Loewy, counsel for the Weintraub firm, instituted proceedings to punish the plaintiff's counsel and the court for contempt, and his motion was heard before Judge Noyes in the United States Circuit Court, Friday.

In his argument Mr. Loewy explained the motion and Judge Noyes intimated that he was averse to acting in the matter unless the counsel could show him that this court had jurisdiction to punish a common law contempt, particularly as this was a misstatement rather than a violation of the court's order. Mr. Loewy claimed that this point had been settled in a similar proceeding some years ago where an injunction obtained by one of the complainants against a large dry goods house of the West had been used in an incorrect form by the company. The court here decided that this was contempt of court and had dismissed the injunction proceedings and also the action, and this had been upheld on appeal.

Mr. Loewy's counsel then told how the decree had been published in THE JEWELERS' CIRCULAR-WEEKLY and other jewelry publications and claimed that the Gorham Co. had been sending out circulars to the same effect. He admitted that a correction had been published in THE JEWELERS' CIRCULAR-WEEKLY in a subsequent advertisement, but said that the statement that went with the correction practically nullified its effect, and that no correction has been made as to the circulars or in the other publications. In a long and elaborate argument he justified the application for punishment, asking that the attorneys be punished for contempt and that the corporation be punished by the vacating of the injunction it had obtained.

Henry Mock, solicitor for the Gorham Co., told the court that it was unfortunate that the error occurred, but that the error had been made in his office and that he alone was responsible and that his clients had nothing to do with the matter. A stenographer had included the words that had been stricken out by the judge in the proof that he sent to the Gorham concern, and that the latter in turn had used it in making up its advertisement and announcement. A correction had been made in THE JEWELERS' CIRCULAR-WEEKLY, he said, and corrections would be made in the other publications, while new circulars would be made out by the company explaining the error in the decree.

Mr. Mock and his associate counsel told the court that they were there to acknowledge the error and to throw themselves on the mercy of the court, but that it was an error likely to happen to anybody and that no actual damage had been done to the defendants. They said they were doing and would do everything in their power to correct the error.

Judge Ward during the argument stated that the republication of the notices in proper form did not seem sufficient to accomplish the purpose of clearing up the error to those who read the original notices. After an argument between the attorneys on both sides the judge finally disposed of the matter by saying:

> I am not satisfied from the statements that have been made that there has been a wilful and intentional abuse of the process of the court, but there has been a very serious mistake made and there has been a misuse of the process of the court, if unintentional.
>
> I am not inclined to punish for contempt of court, strictly speaking, but I will make this disposition of the matter. I will suspend the injunction for a period of 30 days, and it will be vacated at the end of that time, unless the complainant will satisfy the court that in the meantime it has published in every publication in which the erroneous notice appeared, another notice in as prominent a position as the original, stating that these words, "or any combination of a lion, anchor and letter G" were erroneously included in the original notice, and I should not think that it would be proper that this should be followed with any argument that, with these words omitted, the extent of the relief granted is substantially unchanged; and also, that so far as practical, every person to whom a circular letter has been sent notifying him of this decree shall be similarly notified of the mistake.
>
> It seems to me that that ought to be done and that it is practical to do it.

The form of the correction will be agreed on by counsel, and this will probably be settled when the order is entered to-day.

Boston, Mass., Watchmaker and Associate Indicted on Counterfeiting Charge.

BOSTON, Mass., March 18.—The United States grand jury, to-day, indicted, severally and collectively, Robert F. Sample, a watchmaker, age 27, of the Dorchester District in Boston, Frederick A. Hartung, a jeweler, age 30, of Somerville, and William Sample, a watchmaker, age 40, of Brookline, whose plant was on Franklin St., this city, on the charge of counterfeiting.

Robert E Sample, who was in bed at his home, suffering from an attack of rheumatism, when placed under arrest, was removed early this week to the hospital department of the Charles St. jail, and on Wednesday was able to appear in court before Commissioner Hayes, where he was held, as the others had been, for a further hearing. On Thursday the trio were in court, but were remanded to jail pending the grand jury report.

No date was assigned for their trial, but it is expected to take place in the near future.

C. H. Fulmer, Easton, Pa., April 1 will move his store from 13 S. 3d St. to 31 E. 3d St.

United States Court Grants Restraining Order Against Dealer Who Cut Price of "Yankee" Watches.

A restraining order was issued last Wednesday by Judge Coxe in the United States Circuit Court at New York against Jacob J. Schmukler, 131 Canal St., in an action brought against him by Robert H. Ingersoll & Bro., New York, which alleges that Schmukler has been cutting the price on Ingersoll watches in violation of an agreement between the parties. The motion for a restraining order was argued Tuesday of last week. The defendant is restrained against selling or causing to be sold Ingersoll watches, including the "Yankee" watch, except in strict accordance with the complainant's schedule of prices, until the entry and service of the order disposing of the complainant's motion for a preliminary injunction.

The bill of complaint, as filed, recites that Ernest H. Horn was the original and sole inventor of certain improvements in lantern pinions and that pending the application for his patent he sold his right to the invention to the Waterbury Clock Co. to whom patent 784041 was granted April 11, 1905. Mr. Horn, the complaint recites, was also the original inventor of certain new and useful improvements for lever escapements and also the inventor of other useful improvements in watches which were transferred to the Waterbury Clock Co. and which were transferred by them to Robert H. Ingersoll & Bro.

The "Yankee" watch made by the complainants embodies all the patents, Nos. 787041, 855950 and 926329, which were obtained through transactions with the Waterbury Clock Co.

The complaint further recites that one of the restrictions under which the "Yankee" watch is sold is that it will not be sold or dealt in except in accordance with certain uniform schedule of prices established by the complainants.

It is alleged that the defendant, Mr. Schmukler, notwithstanding the conditions under which the watches were sold and with the knowledge of the restrictions and without the consent of the complainants, sold and is continuing to sell these watches in violation of the price schedule and has others on hand.

The watches, according to the complaint, are sold with the guarantee of keeping them in repair for a year and the complainants are required to live up to this agreement, which can be done only when the watches are sold according to the price schedule.

It is alleged that damages of $5,000 have already been incurred by the complainants in the action.

A number of exhibits of the agreement under which the watches were sold, etc., are filed with the complaint.

The United Jewelry Co., 409 State St., Schenectady, N. Y., announces that it is not connected in any way, directly or indirectly, with the concern of the same name which recently started in business in another State. The Schenectady house makes the announcement simply to prevent the trade and public from becoming confused through the similarity of the names and to avoid, if possible, any mistake in mail or orders.

Guggenheim Pearl Case Argued Before the United States Circuit Court of Appeals.

Judges in the United States Circuit Court of Appeals heard argument and reserved decision last Wednesday in the case of the United States against Tiffany & Co., arising over the classification of 59 pearls purchased in Paris by Morris Guggenheim and imported by Tiffany & Co. The pearls, which were intended for Mrs. Guggenheim, cost $25,000, exclusive of duty. They were originally assessed for duty at 10 per cent., and several months later the entry was reliquidated, the Government claiming 60 per cent. duty under the contention that the pearls were not merely a necklace, though unstrung at the time of transportation.

The Government, which was represented by Charles D. Baker, of the Assistant Attorney-General's office, argued that the Court should uphold the assessment of 60 per cent. made by the Collector on the ground that the pearls were assorted and designed to form a necklace, and consequently fell within the provision of the paragraph for jewelry as the word is used in the revenue act. Arthur M. King, who appeared for Tiffany & Co., urged the Court to find in favor of the 10 per cent. duty on the theory that the pearls were "not strung in their natural state," as specified in the tariff act.

The case had been in the courts for a number of years. After a long fight on technical grounds Tiffany & Co. finally paid the 60 per cent. extra duty and filed the usual protest, claiming that the original classification and assessment of the Collector was incorrect. The Board of General Appraisers reversed the action of the Collector and sustained the claim of the importer, holding that the pearls were dutiable at 10 per cent. On review, the United States Circuit Court affirmed the Board's decision and the argument last week was on the appeal from this decision.

The Government contends that after a great deal of labor in matching and grading as to size and harmonizing as to color, the pearls composing the necklace were selected in Paris and that they were matched and their weight noted and a sketch made to identify them permanently. The string was accurately measured and cut in length to the neck of the person who was to wear the necklace, and were strung on a string in the order preconcerted for their final arrangement and as represented in the sketch, and then submitted in such form to the buyer at his request that he compared them with different necklaces procured from other manufacturing dealers for that purpose and they were duly approved and accepted by the buyer.

It was argued that a clasp or snap for fastening together the ends of the necklace is not deemed a necessary part of a necklace, but that the clasp is simply a gratuity on the part of Tiffany & Co. It was further argued that the legal effect of the purchaser's contract of sale was the purchase in Paris of the necklace of pearls and not the purchase of a collection of unmatched and unassorted pearls from which, after exportation and on reaching New York, a necklace was to be made, and that if the pearls had become a permanent necklace when purchased in Paris, as distinguished from a collection of loose unassorted pearls, this status was not changed by dismembering and exporting them together, though in separate parcels, brought in by the same vessel.

The Government's counsel argued that there was no doubt that the pearls delivered from the New York store of Tiffany & Co. were the same as those selected in the Paris shop. The counsel further argued that the title to the pearl necklace passed to Mr. Guggenheim in Paris, and that he took title at that time not to loose pearls, but to a complete necklace. It was further argued that the Guggenheim pearls were not brought to this country to be put in stock to be used for various purposes, but were intended especially for this particular necklace.

Tiffany & Co.'s attorney argued that no part of the purchase price, which was approximately $25,000, was paid abroad. Mr. Guggenheim bought nothing but the pearls in Paris, no pique brilliant and no clasp, and that his contract in Paris was for 59 pearls and not for a complete necklace.

He pointed out that the pearls were not strung in the form of a necklace, that they were simply put, after the consummation of the contract, on a cotton string to compare them with others.

Testimony of several New York dealers taken at the time of the earlier hearings in the case was introduced to show that a drilled pearl more closely resembles a pearl in its natural state than anything else, and that the pearls are materially decreased in value by being drilled. It was argued that a string and a clasp are vitally necessary parts of a necklace, and that the condition or use of the pearls either before or after importation, is immaterial. In determining the classification of a dutiable article the standard is an examination of their condition as and when imported. The case of the United States against Citroen was pointed out as bearing on the case at hand.

It was argued that the decision and judgment of the Circuit Court should be affirmed and the protest of the importers sustained.

Death of Thomas A. Willson.

READING, Pa., March 16.—Thomas A. Willson, the pioneer spectacle manufacturer of this city, passed away at his home, 4th and Washington Sts., at an early hour Sunday morning after an illness of about a week.

Mr. Willson was born in Winchester, Va., Feb. 8, 1846, but had resided for most of his lifetime in this city. For the past 12 years, while maintaining his Winter home in Reading, he had spent the Summer months at his Clare Point stock farm, located near Ephrata, Lancaster County.

Mr. Willson had been identified with the business interests of this city for many years. In 1870 he began the manufacture of spectacles and eyeglasses, at that time a new industry in the United States, and his remarkable mechanical skill and inventive ability soon brought him success and high standing in his chosen field of activity.

At the time of his demise Mr. Willson was president of the corporation of T. A. Willson & Co., Inc., although of late years he had not given active personal attention to business matters.

Mr. Willson is survived by his widow, Clara L. Willson; a son, Frederick Willson; a sister, Mary Elizabeth Willson; a brother, Charles G. Willson, and two grandchildren.

Parsee Arrested in New York on Charges of Smuggling Valuable Jewelry.

Merwani J. Irani, a Parsee from India, who has charge of five freaks of nature in a side show of the Ringling Bros. circus, was arrested last Wednesday by United States Marshal Henkel on the arrival of the *Oceanic* from England, charged with smuggling valuable jewels into this country. He was held in $5,000 bail Friday by United States Commissioner Gilchrist to await the action of the Federal Grand Jury.

On Irani were found an emerald and diamond bracelet, emerald and diamond brooch and a diamond pendant with a gold chain, all of which are valued at about $5,000. They were in a leather pocketbook in an inner pocket in his coat. The man protested his innocence when arraigned before Commissioner Gilchrist, claiming that the jewels were given by a friend in Paris, who asked him to hand them to a friend who would meet him at the New York pier. The man readily surrendered the articles, saying that he had no idea of their value or that he was doing any more than a friendly act in bringing them over.

In the brief examination before Commissioner Gilchrist, Irani's lawyer said that his client was on the way to this country from India and stopped over a few days in Paris. While in the French capital a friend, also a Parsee, named Godrej, who was formerly an employe of a large silk and cotton importing house with offices in Bombay, Paris, London, New York, Japan and China, gave him the jewelry, with the request that he deliver them to two Parsees who would meet him at the pier. These two men are the managers in this city of two silk firms.

Irani's counsel urged a reduction of bail from the original $10,000 figure to $2,000, but the commissioner declined to make the bail less than $5,000.

Assistant United States Attorney Walton has charge of the case, but he declined to say whether his office held that the jewels were consigned to the two Parsees personally or in their business capacity as managers of the silk firm.

The Maryland Retail Jewelers' Bowling Club, formed some months ago, has proved a great success; and with the object of furthering the subject of bowling the association is issuing a challenge to bowling clubs in the association. J. J. Bartholomee, 302 Madison St., Baltimore, is captain

Geo. K. Dietz, Millersburg, O., has leased a two-story brick building here and is having the rooms remodeled for a jewelry store and optical parlors. When complete he will have the largest jewelry and optical store in Holmes County. He expects to occupy his new building about May 1.

DIAMONDS

Death of Thomas E. Carpenter.

VENCE, R. I., March 18.—Thomas E. r, who previous to 1900 was one of rument manufacturing jewelers of died, Tuesday, at a sanitarium in dgewater, Mass., after an illness l months. Last Summer he suf- nervous breakdown, which became s in October that he was sent to rium, where he was the subject treatment. Recently pulmonary s developed, to which he finally

ter was born in Rehoboth, 3, and received his early edu- t village, and later came to this 18 years of age he apprenticed the manufacturing jewelry con- olds, Simmons & Co., to learn He subsequently was employed man for several concerns, in- Richardson, Hicks & Co., Henry and finally G. & S. Owen. In the of 1868 he made preparations to he manufacturing jewelry business lf, and, Jan. 1, 1869, he formed a rship, the firm name being Rich- ott & Co., which was subsequently Richmond & Carpenter.

Mr Richmond retired from the Carpenter purchasing his interest suing the business, making a spe- gold rings. He removed from p St., where they had been for ears, to the Fitzgerald building, on and in 1889 became a tenant of er building on Stewart St. In Carpenter disposed of his business ed from the jewelry industry en- d devoted himself to the develop- a cigar-making machine which he and disposed of to a New York which, however, he retained a interest. He then devoted his e to inventions in optical and lines, being well and widely known sing great originality and skill.

ed leaves two sons and a daughter. he former, Howard L., is secretary asurer of the Albert Walker Co., jobbers of this city.

eath of W. A. Davidson.

NNATI, O., March 21.—W. A. David- r over 30 years a jeweler in the ," died, March 18, at his home in Ky. He had been in failing health past few months, and death was not ted.

e sed was 66 years old and was born land, coming to this country when g man. In the early part of his career he was connected with Steinau as watchmaker, in which was considered a master workman. fter Mr. Steinau discontinued his s, in 1873, Mr. Davidson started in for himself in the Arcade, where inued until his death.

Davidson was well and favorably here, and was always attentive to iness. He will be greatly missed by nds in the Arcade, who for years ccustomed to see him repairing at his window in his store. He is d by a widow, four daughters and ns. Of the latter Charles Davidson presentative of the American Silver Co., W. J. Davidson is a Cincinnati attorney, and Earl Davidson, lately associated with his father as watchmaker, who will probably continue the business.

The funeral was held at the residence of the deceased to-day.

Death of Frank O. Wehoskey.

PROVIDENCE, R. I., March 18. Frank O. Wehoskey, who had conducted a mail order jewelry business at his home, 120 Massachusetts Ave, this city, for several years, died yesterday after a long illness.

Deceased was born here about 65 years ago, the son of Anthony Wehoskey. He attended the public schools here, and afterwards established himself in the gun and locksmith business on Dorrance St., where he became well and favorably known among the business men of the city. He became affiliated with several of the secret societies and attained much prominence therein.

Early in his fraternal career he began taking orders from individuals for emblems, charms, pins and other fraternal jewelry that in a few years developed to such an extent that he finally disposed of his locksmithing business and devoted himself to the new line, which grew and extended into a general mail order trade in connection with which he became widely known among the manufacturing jewelers.

He leaves a widow, to whom he was married 37 years ago, also two brothers and a sister.

Several jewelers at Eau Claire, Wis., have been following the practice of making occasional trips into the northern lumber country, where they have met with an excellent business selling watches and jewelry.

S. R. Knox, for several years optician and watchmaker with O. H. Pyper, Janesville, Wis., has formed a partnership with Mr. Pyper. The firm will now be known as Pyper & Knox. Business will be carried on as in the past at 119 W. Milwaukee St.

Members of 24-Karat Club of Pittsburg Elect Officers and Committees.

PITTSBURG, Pa., March 19.—The members of the 24-Karat Club of Pittsburg held their annual meeting last Monday afternoon in the rooms of the Pittsburg Chamber of Commerce, and organized for the ensuing year. Steele F. Roberts was re-elected president; Otto Heeren and J. C. Grogan, vice-presidents; W. O. Harrison, secretary; J. A. Reed, treasurer, and the following directors: W. J. Johnston, O. C. Siedle, August Loch, H. A. Reineman, Sam F. Sipe, C. S. Wiley, D. L. Cleeland, A. C. Geis, Rodney Pierce, Charles H. Holyland and Wm. Hunt.

It was decided to give a number of enjoyable affairs during the coming season, and in order to make things merry an entertainment committee was appointed as follows: W. O. Harrison, chairman; J. A. Reed, vice-chairman; Rodney Pierce, W. F. Steinmacher, R. M. H. Jantzen, J. W. Nichols, W. E. M. Covert, F. W. Berger, Frank T. East, C. H. Brush, Albert Pafenbach and W. E. Sarver. The field and athletic sports will be looked after by the following athletic committee: Charles H. Holyland, chairman; C. J. Parlett, vice-chairman; O. A. Stahl, W. E. Jones, John C. Crawford, Frank Stewart and F. Clayton Stitt. All of the members of the athletic teams and the bowling teams were admitted to membership in the club, which now has 150 members, the membership being filled. Others who were admitted to membership Monday were: George W. Biggs, W. J. Francis, J. Loughrey Roberts and C. L. McKelvey.

The members of the club insisted on Steele F. Roberts accepting the presidency and he was unanimously chosen, since he has helped make the organization a success in every way.

The banquet will be held at the Fort Pitt Hotel, March 29, and it is said that some surprises are being planned. It is proposed to give each person attending the banquet, which will be held in the English room of the Fort Pitt Hotel, a souvenir of the occasion; one which it is said will be superior to that given a year ago. The largest room in the hotel had to be obtained for the function.

Allan W. Pollard, Boston, Mass., Goes into Voluntary Bankruptcy.

Boston, Mass., March 17.—Allan W. Pollard, conducting a business in the Paddock Building, 101 Tremont St., as A. W. Pollard & Co., diamond merchants and jewelers, filed a voluntary petition in bankruptcy today in the United States District Court. The liabilities are given as $26,252.80 and the assets $3,313.96, although the latter consist, to the extent of upward of $3,000, of debts due on open account.

The unsecured creditors' accounts amount to $21.90, and there are also notes and bills and accommodation paper to the extent of $1,407. The secured accounts, all of which creditors, total $3,223.90.

The secured creditors are: H. Bagley, $50; Joseph Libbey, $38; Norling & Bloom, $50; G. Foster, $63; Miss Hawkes, $95; Miss Hawkes, $45; L. S. Levi, $276; A. C. Smith, $155, H. G. Morris, $1,009; Boston Co., $220; B. Ginsberg, $440; L. G. Foster, $235; E. J. Courtney, $21.

The unsecured creditors include: C. E. Hall, $50; L. G. Foster, $61; Van Dusen Watch Co, $113; A. Lorsch & Co., $1,-; Stern, Dreiblatt & Co., $473; Laubenheimer Bros., $596; D. C. Percival Co., $1,-; H. B. Humphrey, $199; M. S. Page, $50; E. E. Bentley, $915; J. Naigles, $40; Boston Jewelry Co., $160; N. E. Tel. & Tel. Co., $64; J. C. Morse, $1,250; C. Smith, $897; A. C. Smith, $400; E. F. Hall, $113; J. C. Everett, $220; W. H. Hall, $199; George E. Knapp, $203; H. Smith, $3,000; J. A. Pollard, $1,410; E. Howard, $400; W. F. Spinney, $8,000; S. Kelley, $85.

The notes and bills which ought to be paid by other parties thereto are: L. G. Foster, $125; C. S. Beatty, $165; J. C. Morse, $66; L. S. Levi, $145; George E. Knapp, $72. There is also accommodation paper for $748.

The assets include: Note on H. H. Taylor, $6; wearing apparel (exempt), $150; fixtures subject to a mortgage for $9, and debts due on open account, $3,077.

Allan W. Pollard is the sole member of the firm, was formerly employed by the Keith Paterson Co. for eight years and was employed by George W. Smith for a year. In June, 1903, with E. E. Howard he formed the firm of Howard & Pollard, continuing until March 1, 1908. Pollard then succeeded to the business and he continued alone, but was not very successful. In September, last year, he settled with his creditors on a basis of 33⅓ cts. in notes of two, three and four months.

Death of F. A. Loew, Sr.

TAMAQUA, Pa., March 16.—F. A. Loew, one of the most prominent merchants of this vicinity, and a retired jeweler, died at his home here yesterday. The funeral services will be held Friday.

Mr. Loew, who is 74 years old, had been connected with the jewelry business for over half a century, and during that time had built up an honorable reputation and many posts of friends in the trade. He started a store at Tamaqua in 1863 and conducted it first alone and then assisted by his sons, Wm. G. and F. A., Jr., until his retirement, Feb. 1, 1905, when the latter succeeded him in the business, and has continued it since that time.

Besides the sons, William and F. A., Jr., he is also survived by two other sons, Edward and Oscar, who live in this town, and two daughters, Mrs. Spangler and Mrs. George McElwain.

Bankruptcy Petition Filed Against Harry Mermelstein, New York, Dismissed by the Court.

Judge Hough, in the United States District Court, last week dismissed the petition in bankruptcy filed, March 11, against Harry Mermelstein, a New York jeweler, by one of his creditors. The discharge was granted on the consent of all parties concerned. Mr Mermelstein had no other creditor than Max Hoffman, and in a statement which was filed with the order of discharge it was stated that his claims had been satisfied and paid.

Mr. Mermelstein began business in October, 1909. He was originally a traveling salesman in another line of business. In March, 1904, he opened a store as an optician on Ave B; later he moved to 163 East Broadway, and on May 1, 1906, he moved to Grand St. He gave up his optical business about a year ago, and at the time the petition in bankruptcy was filed had his headquarters at 851 Fox St.

Otto Goldsmith, receiver in bankruptcy, has been discharged and the matter settled between the parties concerned.

Games Rolled by the Jewelers' Bowling League of New York.

" 19	45,673.26
Total	$487,116.21

J. A. Berg has rented a new store on Main St., at Pierre, S. Dak., and will move in this month.

Daring Window Thieves Steal $300 Worth of Stock from Baltimore Jeweler.

BALTIMORE, Md., March 18.—Early yesterday morning as daring a robbery as has been planned in some time took place in this city. The jeweler who suffered the loss was M. Koenigsberg, 30 E. Baltimore St. The window in his store was broken open, in the immediate heart of the busy section of the city, and right in the glare of an electric light. The job was so cleverly and neatly done that the police believe it required at least two men, while sentinels watched at either corner of the nearest streets.

A deep circle was skilfully cut into the plate glass with a diamond point and, to prevent the glass from falling to the street and making a noise, a suction affair was attached to the circular piece while it was sharply tapped with another instrument to loosen it from the surrounding glass. The circular piece was then lifted out and laid on the pavement.

The men had then only to put their hands through the hole and help themselves. They reached over the first two rows to a third row where there was displayed a line of diamond jewelry.

Among the articles stolen were eight gold lockets set with diamonds, three heart-shaped lockets set with diamonds, three round lockets set with diamonds, and six gold chased bracelets, valued in all at $300. The robbery was committed just before 5 o'clock. At that time a runner for an all-night bank while passing the store noticed the hole and notified both Mr. Koenigsberg and the Central Police Station by telephone.

Five Charges of Larceny Dismissed Against Jeweler in Baltimore, Md.

BALTIMORE, Md., March 19.—The five charges of larceny against John H. Twelbeck, who formerly kept a jewelry store at 1026 S. Charles St., were dismissed in the Criminal Court yesterday, the accused being immediately released. This action was taken by the State upon the statement of the prosecuting witnesses to the effect that Twelbeck had already been punished enough in their mind by his confinement in jail since Dec. 22.

The indictments against Twelbeck were for the larceny of a watch valued at $85 from Charles Leisure, a watch valued at $85 from Charles H. Lugenbell, a watch valued at $85 from W. E. Dooley, a watch valued at $35 from Charles Schmidt and another watch worth $65 from John Hedler. All these signed the petition for his release. As his reason for abandoning the case State's Attorney Owens wrote on the back of one of the indictments that the property had been returned to the owners and that the facts would not probably constitute a case of larceny.

After Twelbeck's arrest receivers were appointed for his business, and they closed up his affairs shortly after Christmas.

J. F. Kohler & Sons, Inc., was recently incorporated in Richmond, Va., with a capital stock of $50,000, of which $20,000 is paid in. The officers are: President, J. F. Kohler; vice-president, E. C. Kohler; secretary and treasurer, C. F. Kohler.

Herman F. Marschner, Jewelry Salesman, Pleads Guilty to Charge of Larceny.

Herman F. Marschner, a jewelry salesman who was for a long time in the employ of Oliver M Farrand in New York, but who more recently has been selling jewelry for different people in the Maiden Lane district, pleaded guilty last week before Justice Davis in Trial Term, Part I, of the Supreme Court, to a number of indictments charging him with grand larceny. He was remanded Monday morning for sentence tomorrow Marschner received from various dealers goods on memorandum valued at several thousand dollars which it was charged he afterwards pawned. A large number of pawnbrokers and creditors were in court when the case came up.

Louis Marx, 37 Maiden Lane, had Marschner arrested Jan. 8 on a warrant charging him with grand larceny. The case was set down for trial, but because of a murder case on the same calendar was not reached until last week. Marschner obtained about $1,200 worth of jewelry from Mr. Marx all told, about one-third of which he bought, the rest he had out on memorandum.

Others from whom Marschner had obtained jewelry in one way or another included Louis Halpert; Mr. Trim, of Hunter & Trim; Ben Spier Co., and Mrs. Titus. The total amount aggregates about $4,000. Mrs. Titus recovered her jewelry, but the rest of the goods are still in the hands of the court. The jewelry which Marschner obtained included a pearl necklace, rings, pins and mixed diamond jewelry of various kinds.

Assets of Lapp & Flershem, Chicago, Sold at Auction for $233,000.

CHICAGO, March 21.—The final disposition of the estate in bankruptcy of Lapp & Flershem came up before Referee Wean here this morning. Messrs. Lapp & Flershem, accompanied by their attorney, J. McKeever, of Musgrave & Lee, had been east all last week conferring with their creditors and seeking a settlement of 50 cents on time, but were not successful as they were unable to secure sufficient number of claims to make a majority in number and amount to insure the acceptance of their offer.

When the sale of the assets came up this morning the Illinois Asset Realization Co. and the Assets Realization Co. bid jointly for the estate, beginning at $201,000 against the Bauman Loan Co., 110 E. Madison St., until the latter's bid reached $231,750. Then Jas. W. Clark, proprietor of Moore & Evans and the F. E. Morse Co., bid against the Bauman Loan Co., which finally secured the estate for $233,000.

On this basis it is said that creditors will get about 50 cents.

A thief recently broke the plate glass window in the store of A. Ash & Co., 1820 Third Ave, Birmingham, Ala., and made off with $300 worth of watches and silverware. There is no clue.

Creditors Opposition Prevents Discharge in Bankruptcy Being Granted to Horowitz Bros.

Behind the note which appeared in the last issue of THE JEWELERS' CIRCULAR-WEEKLY relative to the dismissal of the petition for a discharge in bankruptcy filed by Horowitz Bros., who were formerly in business at 196 Canal St., New York, is the story of a successful fight by creditors who refused to accept an offer which they did not consider justifiable. Judge Hough in the United States District Court confirmed the report made by Referee Macgrane Coxe and dismissed the bankrupts' application for a discharge.

Horowitz Bros., who were jobbers in jewelry and fancy goods, were in business until January, 1908, when they went into bankruptcy and the members of the firm would in all probability have been discharged from bankruptcy except for the attitude of Geo. Borgfeldt & Co., the wholesale and importing house at 16 Irving Pl., New York, who were large creditors. This concern has always made it a policy to help any deserving debtor, but it has also been its policy to oppose to the utmost the proceedings of any concern whose failure would not stand investigation. Several features of the Horowitz Bros.' failure were considered unsatisfactory by Geo. Borgfeldt & Co., who instructed their attorneys, Heyn & Covington, to investigate the affair and take the testimony of the bankrupts.

The results of the investigation and examination were embodied in the objections which were filed on behalf of the Borgfeldt house against the discharge in bankruptcy. The principal objection was that the bankrupts had obtained credit upon false statements made to mercantile agencies and to some of their creditors. It was set forth that in these statements the liabilities of the bankrupts were understated and their assets overstated and that $15,000 worth of assets had disappeared. The Manufacturing Jewelers' Board of Trade of Providence, R. I., which represented about 60 creditors of the bankrupt, became interested in the matter and cooperated with the firm of Geo. Borgfeldt & Co. in opposing the discharge.

As a result of the testimony taken before Referee Macgrane Coxe, the bankrupts were finally forced to practically abandon their proceedings for discharge. The referee reported that the petition for discharge should be dismissed.

Death of Isaac Ackerman.

SCRANTON, Pa., March 19.—Isaac Ackerman, of George Phillips & Co., wholesale jewelers in the Loop Exchange, is dead. He was stricken with apoplexy on Thursday and died within a few minutes.

Mr. Ackerman was in his 18th year and he had been in ill health for some time. He is survived by his wife and one child, one brother, J. O. Ackerman, and three sisters, Miss M. Ackerman, Lincoln, Nebr., Mrs. George Phillips and Miss E. Ackerman, of Scranton.

Mr. Ackerman had been a lifelong resident of this city.

F. L. Burton, Canajoharie, N. Y., has rented new quarters into which he will soon move his stock.

Creditors Ask That Samuel Frackman, New York, be Declared an Involuntary Bankrupt.

An involuntary petition in bankruptcy was filed Monday, in the United States District Court, New York, against Samuel Frackman, manufacturing jeweler and diamond dealer at 51 Maiden Lane, by these creditors: Nebanzahl & Monk, with a claim of $1,000; Reuben Samuels, $1,655, and Harry Freeman, $936. It is alleged that the bankrupt is insolvent, made preferential payments of $5,000, and transferred merchandise accounts of $5,000.

The liabilities are reported to be between $100,000 and $130,000, and assets are estimated at between $50,000 and $100,000.

A meeting of creditors held, Monday, in the investment building, the alleged bankrupt claimed his embarrassment was caused by losing a wallet of diamonds in a taxicab on March 11, which was said to have contained $50,000 worth of gems. At the meeting Mr. Frackman offered to turn his assets over to creditors, and a committee of creditors was appointed to look into his affairs. An offer of settlement at 25 per cent., 10 per cent. cash and notes for the six months, was made by Mr. Frackman.

Mr. Frackman started in business originally in Cleveland, O., in 1882, and in 1886 moved to Omaha, Nebr. In 1890 he was sold out under a chattel mortgage, and went out of business until 1899. Subsequently he started again in Pittsburg, Pa., but business did not pay and he came to New York and started a manufacturing business at 81 Nassau St., in January, 1901. In August, 1901, he moved to 3059 Third Ave., and in January, 1902, to his present address, where he formed a partnership which was dissolved in October, 1902. Since then he has been in business alone.

Thief Who Robbed El Reno Jewelers Captured in Oklahoma City When He Tried to Pawn His Loot.

El Reno, Okla., March 19.—About four o'clock yesterday morning a man, who was later arrested at Oklahoma City, broke a large plate glass window in the store of Thomas Brady, 200 S. Rock Island Ave., and stole a dozen fine gold watch cases and a number of stick pins and various other articles of jewelry. Not being satisfied with the plunder he had obtained he went to the jewelry store of George Wood, some distance away, and in the same manner obtained a quantity of bracelets, pins and other articles of jewelry.

The next morning a man who gave the name of James Billings was arrested as he was trying to pawn jewelry in Oklahoma City. A search revealed a considerable quantity of jewelry in his possession, which he admitted he had stolen in El Reno.

Chief McCartney was notified and brought the man back to this city. Most of the stolen property was recovered.

W. Griffee's jewelry store in Boone, Ia., was robbed one morning, recently, by a lone highwayman. Watches, rings and diamonds valued at several hundred dollars were taken. The wave of robbery in that city continues, and the police seem powerless to cope with the situation.

Association Notes.

The jobbers have taken upon themselves to act as hosts to the members of the Oregon Retail Jewelers' Association when they meet May 10 and 11 at Portland. According to C. H. Williams, Condon, the secretary, it is expected that the next convention will be the best and most entertaining held by the association as well as the largest in attendance.

The New Jersey Retail Jewelers' Association will meet in annual session, on April 13, in Newark, N. J., and it is expected at that time that many matters of importance to the society will be thoroughly discussed. The association was organized a year ago at Trenton, N. J., with the following officers: F. W. Rowe, president; H. L. Rickey, first vice-president; John Harris, second vice-president; O. Roggenkamp, third vice-president; Fred Pfleger, fourth vice-president; G. E. Fort, secretary, and J. D. Lyon, treasurer. The organization has been increasing in membership, and it is expected that an interesting session will be held.

Owing to some misunderstanding as to the date of the convention of the Illinois Retail Jewelers' Association, attention is called to the fact that this will be held May 24, 25 and 26 at Springfield, the date having been changed by the directors so as to avoid conflict with other conventions in that city and to assure ample hotel accommodations to jewelers. The headquarters will be at the St. Nicholas Hotel, where rooms can now be reserved, and the officers have been guaranteed that special efforts will be made to care for all without extra charge. The convention itself will be held in Arion Hall, and all indications point to the fact that it will be the largest held in that section of the west, as the number of jobbers and manufacturers who have already reserved space and the number of retail jewelers who have signified their intention to come has proved very gratifying to those in charge. According to President F. A. Marcan, Belvidere, there will be many features of unusual educational interest which will give valuable hints and suggestions to those attending. The Springfield jewelers who intend to look after the social features will leave no stone unturned to see their visitors have a good time. A vaudeville performance will be included in this pragram.

Geo. W. Case, New Bedford, Mass., Makes a General Assignment.

Boston, Mass., March 21.—George W. T. Case, retail jeweler, New Bedford, Mass., has made an assignment for the benefit of his creditors to Henry W. Patterson, of the Smith Patterson Co., this city. Mr. Patterson states that an inventory of the assets is in progress, and notice will be given to the creditors of further proceedings at the earliest possible date.

In the notice sent to creditors it is stated that the liabilities amount to about $14,000 and the assets, so far as they have been at present valued, to about $5,000.

The number of creditors who have already signed in consent to the assignment represent claims considerably more than the present value of the assets.

A settlement is hoped for.

C. B. Blume is a new jeweler in Eleva, Wis.

C. E. Mikalson has begun business in Mott, N. Dak.

J. Forbes, Portage, Wis., has opened a new store at De Forest, Wis.

H. Jackson has engaged in the manufacturing jewelry business at Oakland, Cal.

E. R. Croufut opened a new watch and jewelry shop, recently, in Danbury, Conn.

A. E. Gordon has rented quarters in Mena, Ark., where he will open a jewelry store.

A new retail jewelry establishment has been opened in Princeton, N. C., by W. H. Wells.

M. Back has opened a small store at 807 W. 3d St., Los Angeles, Cal. Mr. Back formerly lived in New York.

Stanley R. Belknap recently opened offices in the Sunderland building, Omaha, Nebr., where he makes a specialty of clock repairing.

Albert Weisenburg and Edward Hoefler have formed the firm of Weisenburg & Hoefler, manufacturing jewelers, in the Realty building, Main and Division Sts., Buffalo, N. Y.

Albert Silberman, for several years with the Bee Hive Jewelry Co., Scranton, Pa., in partnership with George W. Burch, will open a jewelry store in the quarters formerly occupied by the Jewel Box, 401 Spruce St., Scranton, Pa.

David Stein and Joseph Goldstein have just opened a loan and jewelry store in Ely, Nev. Both were formerly residents of Butte, Mont., and until recently resided in Salt Lake City, Utah. Mr. Stein disposed of his business at Salt Lake City a short time ago to open an attractive store at the above-mentioned place.

Assets of Gaffney Jewelry Co., Gaffney, S. C., Said to Exceed Liabilities.

Gaffney, S. C., March 16.—D. C. Ross, president of the National Bank of Gaffney, was recently appointed by Judge Shipp receiver for the Gaffney Jewelry Co., which has been doing business under the management of E. L. Eison for the last four years.

The reason given for the failure is that there was not sufficient business here for two large jewelry stores, and one of them had to discontinue.

The assets of the concern exceed the liabilities, and if the stock on hand brings a reasonable price all the debts will be paid, and no one will lose anything.

The Gaffney Jewelry Co. is a corporation of this State, with an authorized capital of $5,000, of which $4,000 is said to be paid in. The officers are: W. C. Thomson, president, and E. L. Eison, secretary and treasurer.

NEW ENGLAND MANUFACTURING JEWELERS' & SILVERSMITHS' ASSOCIATION.

Annual Banquet

At Infantry Hall, Providence, R. I.

Monday Evening, March 21, 1910

PROVIDENCE, March 21.—For the first time in the history of any commercial organization the New England Manufacturing Jewelers' and Silversmiths' Association this evening had the privilege of entertaining as its guest of honor, William Howard Taft, President of the United States.

That the privilege was appreciated in all its significance was attested by the gathering of the leading members of the trade at the annual mid-Winter banquet of that association, limited only by the capacity of Infantry Hall, the largest in this city. This was further emphasized in the long and hearty applause which greeted the Nation's Chief Executive as he entered the hall, when

PRESIDENT TAFT.

he rose to speak and at frequent intervals during his address.

It is extremely doubtful if, in the 750 and more members and guests who participated, there is one who did not come away from the function firmly convinced and thoroughly satisfied that this was the greatest and most successful affair of its kind he had ever attended, either in his trade or elsewhere.

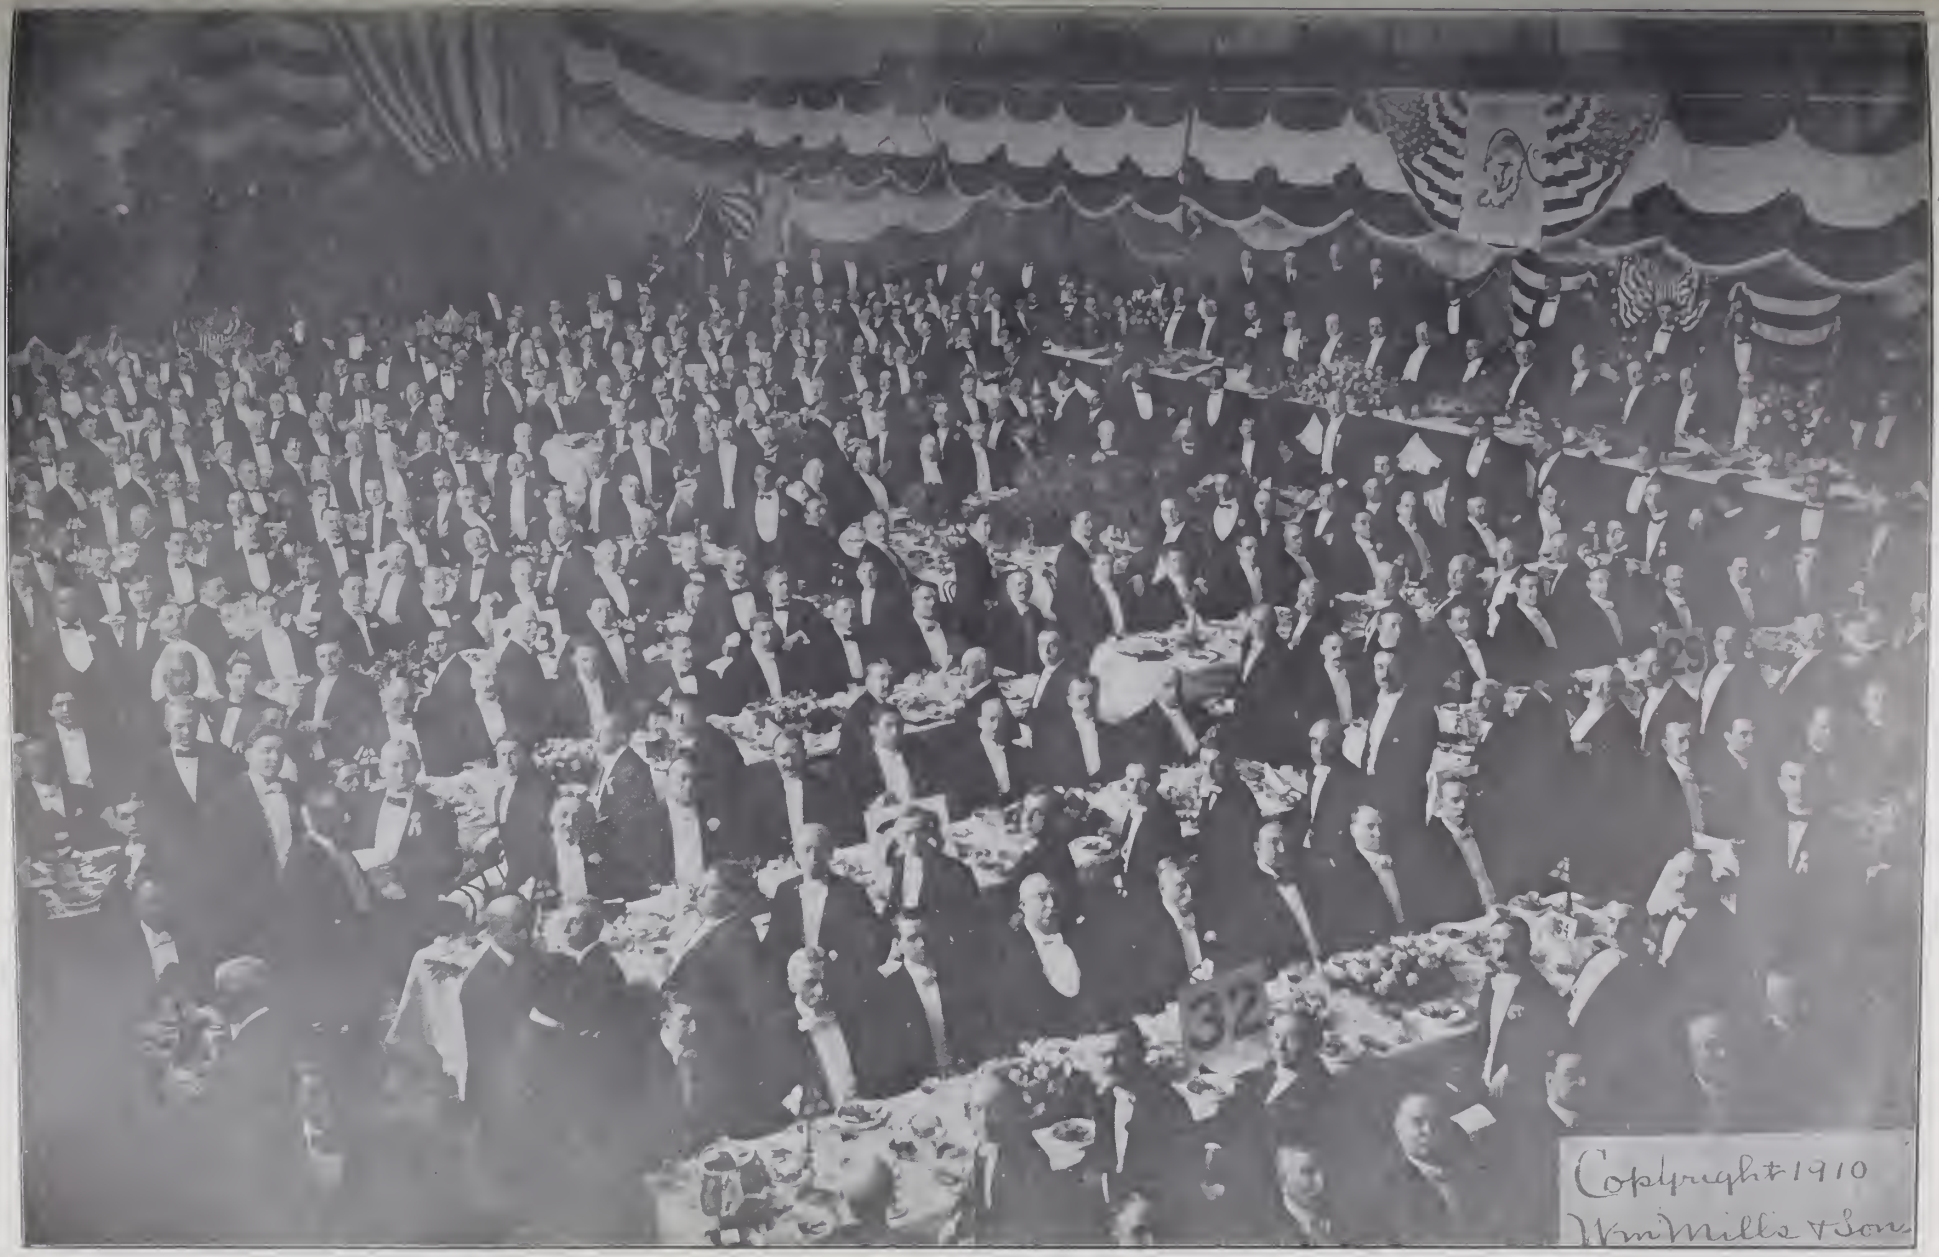
The criticism so often heard that few after-dinner speakers are listened to, much less appreciated, can in no sense be applicable to this evening's gathering, for every speaker had the undivided attention of the big assemblage and it was a picture of unusual human interest to watch the faces of the listeners as they closely followed the thoughts of those addressing them. Especially was this the case in the instance of President Taft.

With the official head of the city, State and nation, as well as the leader of the

GEORGE H. HOLMES,
President of the New England Manufacturing Jewelers' and Silversmiths' Association.

United States Senate, the committee in charge of securing speakers offered the best programme of entertainment that ever appeared before a jewelry body. Eloquent testimony of the truth of this statement lay in the fact that the attention of the entire gathering was held from the time President George H. Holmes called upon Rev. James E. McConnell to invoke the divine blessing until the last speaker had finished his remarks long after midnight.

The large gathering was composed of the representatives of one of New England's most distinctive industries, in fact the association may almost be said to be the industry itself here in Rhode Island and the Attleboros in the neighboring sections of Massachusetts, where the trade centers, for it includes within its membership the principal and progressive men of the trade and works for the upbuilding, the advancement and the genera[illegible] all branches of the industry a[illegible]



In the beginning, back in 187[illegible] merely a social body, its mem[illegible] together by a common good fe[illegible] meeting in the Summer time f[illegible] outing and a baseball game. This gr[illegible] the extension of invitations to o[illegible] wished to share in the pleasures o[illegible] fraternal meetings, and gradu[illegible] growth, came an extension of the w[illegible] its present scope. Since the incorpor[illegible] of the association in 1903 the annual Winter banquet each year ha[illegible] the most brilliant events of the s[illegible] speakers of national prominence alway[illegible]

SENATOR ALDRICH

ing heard. Such was the case this e[illegible] when the splendor of that long a[illegible] eminent statesmen was int[illegible] addition of the name of Presi[illegible]

From the time the first arrivals [illegible] to gather in the drill room at [illegible] which had been transformed by [illegible] bunting into a pretty reception [illegible] the proceedings ended with [illegible] cheers for the departing Pr[illegible] midnight, there was not one [illegible] proceedings, not one lagging [illegible] an incident of any kind that tended [illegible]

MEMBERS AND GUESTS OF THE NEW ENGLAND MANUFACTURING JEWELERS' AND SILVERSMITHS' ASSOCIATION AT THE GREAT BANQUET HELD AT INFANTRY HALL, PROVIDENCE, MONDAY EVENING, WHICH WAS ATTENDED BY PRESIDENT TAFT, SENATORS ALDRICH AND WETMORE, GOVERNOR POTHIER AND OTHER NOTABLE PUBLIC OFFICIALS.

the perfection of the arrangements, which had been so adequately and admirably attended to by the executive committee, consisting of Harry M. Mays (chairman), Edward B. Hough and R. C. Thompson.

One of the most enjoyable features of the annual banquets of the New England Manufacturing Jewelers' and Silversmiths' Association has always been the informal gathering before the dinner takes place, because the occasion serves to bring the members of the trade from all sections of New England together and affords the opportunity for the renewal of old acquaintanceships, exchange of greetings and discussion of current events of life free from the restraint of business cares and the rivalry of competition. This was especially the case this evening, for with the largely increased attendance new faces were seen, and many a reunion of older members who have been infrequent participants in the recent festivities of the association was held. Amid the good cheer and *bonhomie* fellowship, however, unfortunately a sad note would occasionally be sounded by the inquiry for some member who has passed beyond that "bourne from whence no man returns," emphasizing the losses in the interim.

But this year the earlier portion of the time allotted to the reception was one of expectancy and bustle—expectancy in anticipation of the coming of the President, and bustle in preparation for what was to follow.

President Taft came to this city in his private car, attached to the fast express, which arrived here at 7.25 o'clock from New Haven, where he had been attending a meeting of the Yale corporation. He was accompanied by Past Presidents Henry G. Thresher and Harry Cutler, of the association, who went to New Haven earlier in the day. President Holmes met the distinguished guest at the Union Station and escorted him at once to a waiting auto, in which he was quickly whirled to Infantry Hall.

When the train rolled into the Union Station there was a great crowd to greet the President, but Police Commissioner William H. Luther, who is head of the manufacturing jewelry concern of William H. Luther & Son, had a large force of policemen on hand to keep the crowd back and to afford a safe passageway for the nation's chief from the train to the automobile. As the smiling countenance and rotund figure of the President appeared he was greeted with loud, enthusiastic and prolonged cheers that continued until after he had entered the waiting cab.

The streets the entire distance from the station to the hall were packed by people desirous of obtaining a glimpse of the "first man in the country," and they voiced their welcome by continuous cheering. Notwithstanding the lateness of the President's arrival several of the banking and business houses in the central section of the city had their places appropriately decorated in honor of the occasion.

Upon arriving at the hall the President was received by Past President Frank T. Pearce, John M. Buffinton and William A. Copeland, who, with Messrs. Thresher and Cutler, compose the honorary committee, and was escorted to the drill hall where an opportunity was given every member and guest to personally meet the guest of honor.

After the reception the members and guests proceeded to the main floor where the dinner was served. The transformation of the big hall was a revelation. Flowers, palms, bunting and electricity had been

HARRY CUTLER, TOASTMASTER.

called into requisition and combined in one of the most elaborate, artistic and harmonious decorative effects ever seen in this city. But with all, nothing had been overdone and nothing had been left undone. The whole color scheme was red, white and blue, with the President's official flag

GOVERNOR POTHIER.

worked in in prominent places, while nearly a thousand incandescent lights illuminated and relieved the grand ensemble.

Towering palms, potted plants, mounds and bouquets of cut flowers, snowy napery, resplendent silver and glistening glassware, together with the plush draperies with which the President's platform was hung, the prismatic fountain playing perfumed water from a bed of ferns and blossoms [illegible] the band, hidden behind a bank of pa[illegible] combined to form a scene that bore [illegible] resemblance to some fairy tale.

The seating of the hall ha[illegible] ranged on an entirely new pl[illegible] whe[illegible] every one of the small tables was a [illegible] point in relation to the Pres[illegible]'s [illegible] The latter was on a large pla[illegible] on each side of the hall, whic[illegible] 30 feet in length and 20 fe[illegible] Here was spread the head ta[illegible] for 16, at which sat Preside[illegible] Holmes, President Willi[illegible] Cutler, Rev. James E. McC[illegible] A. Copeland, Mayor Henry [illegible] M. Buffinton, Governor Ar[illegible] Henry G. Thresher, Senator [illegible] Aldrich, Senator George Pe[illegible] Theodore W. Foster, C[illegible] iam P. Sheffield, Harold E. Sw[illegible] Archibald W. Butt, U. S. A., A[illegible]

This table was decorated w[illegible] and Farleyense ferns, the for[illegible] a mound five feet long flanked by tw[illegible] vases containing six dozen e[illegible] banquet the latter were sent [illegible]

In pleasing contrast to the [illegible] scheme of the hall itself, th[illegible] platform was festooned in w[illegible] ropings of laurel. As a backg[illegible] immense Kentia palms, against w[illegible] an immense American flag. Fr[illegible] cony facing the President's t[illegible] was hidden by wide folds of red, w[illegible] blue bunting fringed with gold, we[illegible] of-arms of Rhode Island and the [illegible] the association and of the [illegible] dence, the latter being illum[illegible] lieved by electric lights wh[illegible] hung.

Directly in front of the Pr[illegible] form was a large oval table wit[illegible] 24, at which were seated Fr[illegible] Judge Le Baron B. Colt, Unite[illegible] cuit Court; Judge Arthur L. Br[illegible] States Court for Rhode Isl[illegible] Chief Justice Edward C D[illegible] Island Supreme Court; Judge Will[illegible] Sweetland, Attorney-Gener[illegible] Greenough, Speaker Roswell B B[illegible] of Rhode Island House of Rep[illegible] ex-Governor George H. Utter, J[illegible] Lawton, Col. I. N. Ullman, of N[illegible] Lieutenant Governor Zenas W. Bl[illegible] Baker, United States Distric[illegible] Charles A. Wilson, Collector [illegible] W. Gardiner, Gen. T. S S[illegible] York; Arthur B. Shelton, Stu[illegible] rich, E. Tudor Gross, Edward [illegible] and Charles T. Paye.

This table was dec[illegible]rated w[illegible] Spur daffodils and Farleyen[illegible] from the center rose a fount[illegible] fumed water through which [illegible] lights continually flashed, p[illegible] pleasing and beautiful effect
